EDUCATIONAL RESOURCES **ERIC** INFORMATION CENTER

Resources in Education (RIE) is processed for printing by Computer Sciences Corporation, under contract with the U.S. Department of Education, Office of Educational Research and Improvement (OERI), and is published monthly by the U.S. Government Printing Office (GPO) with printing funds approved by the Office of Management and Budget. The contents of RIE do not necessarily reflect official OERI policy.

RIE is available on subscription (12 issues/year), or as individual issues, from the Superintendent of Documents, U.S. Government Printing Office (GPO), Washington, D.C. 20402. Inquiries regarding prices should be directed to the Superintendent of Documents.

Introduction

Resources in Education (RIE) — A monthly abstract journal announcing recent report literature related to the field of education, permitting the early identification and acquisition of reports of interest to the educational community.

Sponsor: Educational Resources Information Center (ERIC)
National Library of Education (NLE)
Office of Educational Research and Improvement (OERI)
U.S. Department of Education
Washington, D.C. 20208-5720

ERIC is a nationwide information network for acquiring, selecting, abstracting, indexing, storing, retrieving, and disseminating significant and timely education-related reports. It consists of a coordinating staff in Washington, D.C. and 16 Clearinghouses located at universities or with professional organizations across the country. These Clearinghouses, each responsible for a particular educational area, are an integral part of the ERIC system. The Clearinghouses are listed on the inside back cover.

Organization of Journal: *Resources in Education* is made up of resumes and indexes. The resumes provide descriptions of each document and abstracts of their content. Resumes appear in a "Document Section" and are numbered sequentially by an accession number beginning with a prefix ED (ERIC Document). The indexes appear in an "Index Section" and provide access to the Resumes by Subject, Personal Author, Institution, and Publication Type.

Availability of Documents: The documents cited in *Resources in Education*, except as noted, are available from the ERIC Document Reproduction Service (EDRS), in both microfiche (MF) and paper copy (PC), or microfiche only. Availability in microfiche only may be determined by the source, for proprietary or copyright reasons, or by ERIC for reasons related to legibility and reproducibility. The price per document is based on the number of pages and is subject to change over time. An ERIC Price Code Schedule permits the user to convert all price codes to actual dollar amounts. Current price information for documents, microfiche, and subscriptions to microfiche collections is to be found in the section entitled "How to Order ERIC Documents" in the most recent tissue of RIE.

How to Submit Documents to ERIC: If you have documents that you would like to have considered for announcement in *Resources in Education* (RIE), you should send clean, legible copies (in duplicate, if possible) to the ERIC Processing and Reference Facility, 1301 Piccard Drive, Suite 300, Rockville, MD 20850-4305. A reproduction release, giving ERIC permission to reproduce in paper copy and microfiche (or microfiche only), and signed by the author or official representative of the source institution, is requested for all documents selected for inclusion in RIE. Standard reproduction release forms may be obtained from the ERIC Facility (a sample appears at the back of this issue of RIE).

How to Order RIE: The U.S. Government Printing Office (GPO) prints *RIE* and functions as subscription agent. Detailed subscription information appears on the page in the back of RIE entitled "How to Order *Resources in Education*".

Introduction

Background

The purpose of this study is to investigate the effects of a new drug on the treatment of a specific condition. The study was conducted over a period of 12 weeks, with a total of 100 participants.

The study was designed as a randomized, double-blind, placebo-controlled trial. The participants were randomly assigned to either the treatment group or the placebo group. The treatment group received the new drug, while the placebo group received a placebo.

The primary outcome of the study was the change in the level of the specific condition. The secondary outcomes were the side effects of the treatment and the compliance of the participants.

The results of the study showed that the treatment group had a significantly greater reduction in the level of the specific condition compared to the placebo group. The side effects of the treatment were mild and did not differ significantly from the placebo group. The compliance of the participants was high.

The study was limited by the small sample size and the short duration of the treatment. Further studies with a larger sample size and a longer duration of treatment are needed to confirm the results of this study.

The study was conducted in a clinical setting, which may have influenced the results. The study was also limited by the lack of a control group for the side effects of the treatment. The study was funded by a pharmaceutical company, which may have influenced the results.

The study was conducted in a clinical setting, which may have influenced the results. The study was also limited by the lack of a control group for the side effects of the treatment. The study was funded by a pharmaceutical company, which may have influenced the results.

ERIC Clearinghouse Publications

This page highlights publications announced in this issue of *Resources in Education* which were created by the ERIC Clearinghouses and which have been selected as having special significance for educators. For each brief citation appearing here, there is a full abstract appearing under the same ED number in the pages of the issue.

In addition to collecting the literature of education for announcement in *Resources in Education* and *Current Index to Journals in Education*, the ERIC Clearinghouses analyze and synthesize the literature in a number of different formats designed to compress the vast amount of information available and to meet the varying needs of ERIC users. These formats include research reviews, state-of-the-art studies, interpretive studies on topics of high current interest, research briefs, annotated bibliographies, digests, and compilations. While some publications are comprehensive reviews designed for those who are interested in pursuing a subject in depth, others are brief analyses designed for the busy practitioner whose time for staying abreast of new developments in education is limited.

ERIC publications are published either by the ERIC Clearinghouses responsible for producing them or through cooperative arrangements with other organizations. Original copies are usually available directly from the responsible Clearinghouse or from the source listed in the citation. In addition, the publications announced in *Resources in Education* are contained in all ERIC microfiche collections, and are available in reproduced paper copy and/or microfiche from the ERIC Document Reproduction Service (EDRS), 7420 Fullerton Road, Suite 110, Springfield, Virginia 22153-2852 Telephone: 1-800-443-ERIC (3742).

Identifiers — Consortium of States, *National Occupational Competency Testing Institute

Women's opportunities for employment will be directly related to their level of skill and experience and also to the labor market demands through the remainder of the decade. The number of workers needed for all major occupational categories is expected to increase by about one-fifth between 1990 and 1999, but the growth rate will vary by occupational group. Professional and technical workers are expected to have the highest predicted rate (39 percent), followed by service workers (35 percent), clerical workers (26 percent), sales workers (24 percent), craft workers and supervisors (20 percent), managers and administrators (15 percent), and operatives (11 percent). This publication contains a brief discussion and employment information (in English and in Spanish) concerning occupations for professional and technical workers, managers and administrators, skilled trades, sales workers, clerical workers, and service workers. In order for women to take advantage of increased labor market demands, employer attitudes toward working women need to change and women must: (1) receive better career planning and counseling, (2) change their career aspirations, and (3) fully utilize the sources of legal protection and assistance that are available to them. (Contains 45 references.)

Document Resumes

The document resumes in this section are arranged in numerical order by ED number, and also alphanumerically by Clearinghouse prefix and Clearinghouse accession number.

As explained in the Introduction, each Clearinghouse focuses on a specific aspect of education. The reader who is interested in one of these major aspects (e.g., Reading) may, however, find pertinent resumes among the entries of virtually any Clearinghouse, dependent on the orientation of the document. For this reason, it is important to consult the Subject Index if a comprehensive search is desired.

The following is a list of Clearinghouse prefixes and names used in this Section, together with the page on which each Clearinghouse's entries begin:

	Page		Page

Resources in Education (RIE) is a monthly abstract journal that announces (catalogs, indexes, abstracts) documents of interest to the educational community (including researchers, teachers, students, school board members, school administrators, counselors, etc.). Each issue announces approximately 1,100 documents and provides indexes by Subject, Personal Author, Institution, Publication Type, and ERIC Clearinghouse Number. This special Computer Output Microfiche (COM) edition is prepared directly from the ERIC magnetic tape database prior to publication of the printed journal and therefore is lacking the cover and other regular introductory and advertising matter contained in the printed journal. The COM edition contains only the first three of the five indexes in the printed edition. The first accession in each issue of RIE is the issue itself. In this way, the monthly microfiche collection for each issue is immediately preceded by a microfiche index to that collection. This practice began with the RIE issue for May 1979. (CRW/WTB)

Identifiers—Working Poor

Numerous sources of data about family incomes, taxes, wages, unemployment, wealth, and poverty were used to analyze the impact of the economy on living standards in the United States in 1994-1995. It was discovered that most individuals in the United States are worse off in the 1990s than they were at the end of the 1970s. Between 1979 and 1989, family income grew more slowly than in any other business cycle since World War II. Despite recent progressive changes in tax laws, the federal tax system has continued to favor wealthy families. Most people are working longer for less. Underemployment is worsening, and the continued rise of part-time and temporary employment has triggered long-term erosion in economic security, benefits, wages, and opportunities for training and advancement. Rapid increases in the value of financial assets coupled with stagnation of the value of tangible assets has further increased the gap between the upper and middle classes. Poverty rates have remained high and unresponsive to economic expansion, and health care expenditures have continued to increase without any concomitant increase in health outcomes. Among developed countries, the United States is falling behind in productivity and wage growth. (Contains 303 tables/figures and 160 references.) (MN)

Continuity and Change in Community Organizations. Trends in Greater Cape Town from 1989 to 1991. CORE Working Paper No. 1.

University of the Western Cape, Bellville (South

Africa). Centre for Adult and Continuing Education.

Report No.—ISBN-1-86808-145-1

Pub Date—93

Note—325p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC13 Plus Postage.

Descriptors—Adult Education, Blacks, *Community Organizations, *Financial Support, Foreign Countries, *Government Role, *Organizational Development, Organizational Objectives, *Planning

Identifiers—South Africa (Cape Town)

This paper gives an overview of some trends and issues for community organizations in the greater Cape Town (South Africa) area from 1989-1991. Section 1 provides first a brief overview of the socio-political developments during those years as a background to the developments within community organizations. Then, it discusses key issues for community organizations: definitions and purposes of community organizations; relationships between community organizations and the South African state; funding and funders; and organizational strategies, including capacity building, networking, and coalition building. This section contains 55 references. Section 2 begins with a synopsis of the findings of a survey to capture the history of the formation and demise of community organizations and then presents organizations in different sectors. These are: civic organizations; community organizations; cultural organizations; education, research, resources, and information organizations; political organizations; and women's organizations. Tables provide this information: name; aims; main activities; and contact address of the organization. An index is provided at the end for quick reference to specific organizations. (YLB)

Identifiers—*South Africa
This document resulted from a 2-day colloquium devoted to the possibilities and constraints of integrating adult education and training in South Africa. The colloquium brought together 77 practitioners from various sectors of adult education and training, including representatives of the state adult education centers, industrial training boards, tertiary institutions, technical colleges, trade unions, nongovernmental organizations, employers, and ministries. This document presents the following papers: "The Changing Policy Development Context" (Jeanne Gamble, Clive Miller); "Views from the Ground" (Zweli Nokhatywa et al.); "Issues of Governance and Financing" (Papio Moloto, Judy Fawish); "Life-Long Education: International Perspectives" (Berni Gustavsson); "Reflections on the Day" (Zelda Groener, Keith Jackson); "Summary of Key Issues from the First Day (Shirley Walters); "Workshop on Integrating Adult Education and Training" (Adrienne Bird); "The Education, Training, and Development Practitioner (ETDP)" (Keith Jackson, Linda Cooper, Crispin Swart); and "Summary and Reflections" (Zelda Groener, Berni Gustavsson, and Joe Samuels). Many papers are followed by a summary of the questions and discussion that occurred after their presentation. Appended are a list of acronyms, the colloquium agenda, and a list of colloquium participants. (MN)

Identifiers—*Mozambique, *Workplace Literacy
The relationship between literacy and "people's power" within the context of Mozambique's project of socialist reconstruction was explored through an ethnographic analysis of literacy education practices at the Matola Industrial Company, which is considered one of many embodiments of Mozambique's colonial past. First, the role of the colonial schooling system as an instrument to create failure rather than success in schooling and thus regulate flows of cheap labor was examined along with the relationship between literacy, the popular state, and people's power and the spontaneous movement of self-education in Mozambique. Next, qualitative methods were used to examine the following: the fundamental tensions between time for schooling and time for production in the workplace-based literacy program at the Matola Industrial Company; the role of literacy centers as "spaces" for social communication; the interlocking hierarchies organized through class, race/ethnicity, and gender that affect literacy students' and teachers' lives; and experiences of literacy as indicators of fundamental problems in the broader process of socialist construction and the movement for renewal within state-sponsored literacy programs. (Contains 18 tables/figures and 181 references. Appended are the survey instrument and two discussion documents examining problematic areas in ABE in the Matola

Industrial Company.) (MN)

Identifiers—*Australia, *Sweden
Efforts to link schools and workplaces in Australia, Sweden, and elsewhere were examined to identify preconditions and effective strategies for linking school to work in Australia. An Australian program that combines applied, contextualized learning structured according to industry standards with students' general education was shown to produce graduates with higher rates of participation in postsecondary education and lower unemployment rates than nonuniversity-bound completers of other secondary education programs. The relative ease with which Japanese and German students make the transition from school to work was attributed to three factors: employers value academic skills and invest in efforts to develop them; work-bound students exert effort because school performance is relevant to their future careers; and teachers have authority to give students access to jobs and to give employers dependable student evaluations. Special attention was paid to the operation and effectiveness of Sweden's new system of upper secondary education, which is based on an implicit partnership between employers and the state and which views enterprises and schools as co-educators and divides the curriculum between workplaces and schools. Links between schools and business were found to be strong in some industries such as construction and wood technology but weak in others, and resourcing was identified as a continuing problem. (Contains 11 references.) (MN)

Identifiers—Sierra Leone

The two parts of this book consider two main facets of nonformal curriculum development: theory and practice. Part I on nonformal curriculum theory has four chapters. Chapter 1 addresses the origins, meaning, purpose, and scope of nonformal education. Chapter 2 examines three major themes in discussions on nonformal education: nonformal education as an instrument of positive change, as a social control mechanism, and the context. Chapter 3 explores the rationale. Chapter 4 examines the rational planning model and three models that have relevance for curriculum development in nonformal education: psychosocial, liberal education, and Bhola's core-interface. The five chapters in Part II on nonformal curriculum practice consider the case of the People's Educational Association of Sierra Leone in integrating population education into adult literacy. Chapter 5 describes nonformal education in the Sierra Leone context where it is an educational response to the problems of out-of-school youth and illiterate adults and an alternative development strategy. Chapter 6 sets forth the rationale

for population education and literacy. Chapter 7 describes the process of curriculum integration. Chapter 8 is a case analysis of the population education project. Chapter 9 highlights these conclusions: contingent nature of curriculum development in nonformal education; importance of learner participation; and need for staff development. Appendixes contain a 359-item bibliography and index. (YLB)

The international area has grown as a field of graduate research in the past 20 years. Graduate students in adult education need to become more involved in international research both to stay viable as scholars and to be able to effect positive change in the lives of people in developing countries. The four main priorities in research in adult education are as follows: women's education; peace and human rights; environmental education; and literacy. These priorities often overlap and many collaborative research possibilities exist. In searching for grants for adult education research, however, graduate students should be aware that the term "adult education" is rarely used. For example, the World Bank does not use "adult education," but it promotes adult education in many ways—literacy, teacher education, training of all kinds, nonformal education, vocational education, and human resource development. Agencies that fund research are increasingly interested in collaboration among institutions in carrying out the studies. They are also interested in funding projects that result in empowerment of people in developing countries to carry on their own adult education after the projects end. Graduate students can conduct outstanding research projects without funding and without traveling to foreign countries. There is a need to document the international projects that are being carried on; such a study could be done with resources available by telephone and online in this country. Attached is a list of international research opportunities. (KC)

Identifiers—Middle School Students

This booklet, which is designed for middle school students in Florida, contains introductory information about the available occupations, possible earnings, and educational requirements of the following occupational clusters/areas: artistic, plants and animals, scientific, protective, mechanical, business detail, industrial, selling, accommodating, leading-influencing, humanitarian, and physical performing. The booklet begins with an interest inventory in which students are asked to rate their

interest in eight activities typically performed by individuals employed in occupations belonging to the given cluster. Presented next is a 12-page table containing the following for each of 3 representative occupations in each of the 12 occupational clusters: main job duties, typical employers, source(s) of further information, average annual earnings, and education level and subjects typically required for entry-level employment. The types of training provided at the following postsecondary education institutions/training options are briefly described: public vocational-technical centers, community colleges, universities, the military, and apprenticeships. The availability of each type of training in Florida is briefly discussed along with Florida's Gold Seal Vocational Endorsement and Scholarship and Academic Scholars' Certificate programs. Concluding the brochure are a form for developing job leads and interview checklist. (MN)

Identifiers—*Bank Street College of Education NY
The Division of Continuing Education of Bank Street College of Education (BSCE) in New York City is working to change the lives of inner city children, their families, and communities by emphasizing collaboration. During the 1994-95 academic year, the division served more than 3,900 adults and children, 15 agencies, and 30 schools through the following distinct, yet interrelated program areas: (1) continuing professional education; (2) direct service delivery programs; and (3) staff development, technical assistance, and training. Among the populations served by various special projects within the BSCE's division of continuing education were the following: infants, toddlers, preschoolers, and elementary school children; inner-city adolescents; homeless families; and educators and other staff of the schools and community-based organizations serving the community surrounding BSCE. In 1994-95, the division's activities centered around achieving the following goals: develop a long-range plan; identify new funding focusing on early intervention programs for children/families and staff working with them; implement professional development activities for staff; and expand programs to increase revenues. (Appendices constituting approximately 60% of this document contain the following: program descriptions, 30-item bibliography of dissemination tools, information about selected program accomplishments/outcomes, organizational chart, lists of staff and funders, budget information, and long-range program goals.) Research has confirmed that few U.S. employers see schools as effective partners in their search for skilled workers. The growing disconnection between the nation's schools and business sector is threatening to undermine the educational quality of the U.S. work force. Educators and businesses must, therefore, join forces to develop initiatives that do not require either new funds or additional government agencies but that instead rely on the market to create the incentives for firms to invest in human and physical capital. In addition, a way must be found to lower the costs to employers of screening and hiring new workers. Two strategies appear to be promising ways of strengthening the links between the education and business sectors: (1) making grades and the reputation of a job applicant's school important criteria when hiring young workers and (2) creating internship programs. Studies have shown that businesses using school grades as screening mechanisms in the hiring process have more stable work forces and are more likely to rate their employees as fully proficient in their jobs. Other studies have established that businesses offering internship/apprenticeship programs have better educated work forces and are more likely to use high-performance work systems. (MN)

Identifiers—*United Kingdom

A study examined the feasibility and implications of awarding credit for traditional extramural studies courses throughout the United Kingdom (Credit Frameworks and Learning Outcomes Programme). The project's objectives were as follows: assess demand for and acceptability of credit among existing and potential students; test new forms of certification for learners in the liberal adult education tradition; develop and introduce employment-related credits for mature, work-based individuals as part of a certificate course; and contribute evidence and ideas to the United Kingdom's developing national credit frameworks and support the employment department's strategic research thereon. Among the study's key conclusions were the following: (1) broadening student constituencies in continuing education have necessitated a more adaptive and responsive credit system; (2) a learning outcomes approach and adoption of clear student assessment criteria will permit recognition of the fullest range of achievement for adult learners; (3) continuing education providers need to offer credit for appropriate learning whether it occurs at home, work, or college; (4) the award of credit is the start of a quality assurance cycle that includes moderation while allowing tutors a high degree of autonomy; and (5) collaborative networking of continuing education provision with other agencies is vital to gain progression and transfer opportunities for students. *Machinists, *Nurses, Nursing Education, Postsecondary Education, *Skilled Occupations, Technical Education

A descriptive study was made of the roles of training and federal programs in helping youths gain employment in selected high-wage occupations that do not require a four-year college degree. Interviews conducted with federal agency officials and industry representatives found little hard data but elicited officials' views on this issue. The study noted that although about 87 percent of U.S. youth complete high school, only 24 percent complete a four-year college degree by age 34. However, post-high school training is needed for a number of well-paying technical jobs. Six of these occupations were examined in the study: machinists, drafters, electrical and electronic technicians, registered nurses, radiologic technologists, and paralegals. The study found that there are various training paths to these occupations: a four-year bachelor's degree, an associate (two-year) degree, tech-prep programs, technical institutes, apprenticeships, and on-the-job training. For most of these occupations, the two-year associate degree programs were the most common paths, although this varied among the occupations and in different parts of the country. Barriers to students being trained in these occupations included the following: parental resistance, unwillingness of youths to relocate for training, determining relevance of training to later employment, and prevalence of four-year degree job applicants who might be selected ahead of two-year applicants depending on the job market. Financial aid did not appear to be a problem. The study summarized the role of several federal programs (Pell Grants, the Federal Family Education Loan Program, Vocational Education—Basic Grants to States, and the Job Training Partnership Act and Job Opportunities and Basic Skills Training) programs in providing financial aid for students to train in skilled occupations. Identifiers—California, *High Performance Work Organizations, Illinois, Indiana, New Jersey, Oklahoma, Texas, Virginia

This document contains reports summarizing the highlights of seven state forums that were held in fall 1994, modeled after the 1993 national forum on "Hard Truths/Tough Choices: An Agenda for State and Local Reform." The following conferences are summarized: "Reinventing New Jersey: Innovative Approaches under Fiscal Pressure" (Princeton, New Jersey, October 12, 1994); "The Oklahoma Forum on High-Performance Government" (Edmond, Oklahoma, October 14, 1994); "Creating a High-Performance Workforce in Virginia" (Richmond, Virginia, October 25, 1994); "Innovation at Work: Best Practices and Strategies for California State Managers and Supervisors" (Sacramento, California, November 14-15, 1994); "The Indiana Forum on High-Performance Government" (Indianapolis, Indiana, November 17-18, 1994); "Enhancing Career Development Opportunities for Illinois State Employees" (Bloomington, Illinois, December 7-8, 1994); and "Developing Texas State and Local Partnerships for the Public's Health" (Austin, Texas, December 12-13, 1994). All the re-

ports include key points of discussion/debate and numerous examples of innovation in action. Seven needs were identified and discussed at all the conferences: give executives authority to act and hold them accountable for the results; give front-line workers more say in how they do their jobs and the training they need to perform; set aside labor-management conflicts and work together on solving problems; consolidate redundant government operations and eliminate outdated ones; allow public sector employers to exercise their judgment in accomplishing governmental goals; reform key "control" systems in government; and blunt/manage the media's broadly negative impact on government innovation efforts. Descriptors—Adult Education, Case Studies, *Developmental Stages, *Individual Development, *Leadership Training, Models, Organizational Development, *Psychological Characteristics, *Training Methods

A new model for promoting leadership development in programs emphasizes individuals' psychological development. The model, which is intended for use by individuals responsible for leadership development in organizations or by leadership development program planners/evaluators, is based on a cyclic process of three time-linked categories: readiness for development, developmental processes, and outcomes. First, individuals' readiness for development is assessed by evaluating them with respect to a series of trait, state, environmental, and sociocultural readiness factors. The assessment results are used to design a leadership development program based on the following five requisite, interwoven processes: experience, disequilibrium, equilibrium, construction, and potentiation. The model specifies the following categories of potential leadership development program outcomes: competencies and taking action, meaning structures, the particular kind of superordinate meaning structures termed developmental stages, and holding environments. Each category must be considered when programs are planned, implemented, followed up, and/or evaluated. The model is currently being used to design a new organizational simulation to help individuals develop by responding to scenarios representative of emerging organizational issues. (The bibliography lists 70 references. Appended are a case example of applying the model to an individual in a development program and an example of one concept of stages of development.) (MN)

Identifiers—*Touchstone Exercise
This book describes a training technique in which an art activity called a touchstone exercise serves as the basis of an action-oriented leadership development program. Part 1 describes the context in which the touchstone exercise was developed and details the process of setting the stage for and conducting it. Two case studies illustrating the exercise's use

and participants' response to it are included. Discussed in part 2 are the following topics: effectiveness of the touchstone exercise as demonstrated by the LeaderLab Impact Study, changes in the touchstone exercise over time, common themes in touchstone representations, touchstone lessons used on the job, the touchstone exercise as a story, and resistance to artistic activities. Part 3 focuses on the use of nontraditional classrooms and includes sections on the following: roles of the artist, emotions, and program configuration in the effectiveness of non-traditional components; transferability; and art and leadership. Appendixes constituting approximately 50% of this book contain the following: detailed description of the LeaderLab program's content and structure, steps in conducting the touchstone exercise, sample touchstone stories from one group, and sample artistic methods used in organizations. Contains 22 references. (MN)

Descriptors—*Adult Education, *Adult Students, *Educational Attainment, *Enrollment Trends, Individual Characteristics, *Participation

Identifiers—*National Household Education Survey

The adult education (AE) component of the National Household Education Survey (NHES-95) examined the education activities of adults in the United States in 1994-95. Special attention was paid to the types of educational activities in which adults participate and the relationships between adults' participation in AE activities and educational attainment. In the NHES-95, screening interviews were completed with 45,465 households (response rate, 73.3%). Of the 23,969 adults surveyed for the AE component of the NHES-95, 19,722 (80%) completed the interview, thus yielding an overall response rate for the AE interview of 58.6%. Among the main findings of the AE component were the following: approximately 76 million adults (40%) participated in at least 1 AE activity during the 12 months prior to the study; approximately 1 in 5 adults participated in work-related courses, and 1 in 5 participated in personal development courses; approximately 31% of adults participated in only 1 type of educational activity versus 9% who participated in 2 or more different types of activities; and the overall participation rate of college graduates was more than triple the rate of individuals with no high school diploma and nearly twice the rate of individuals with no postsecondary education. Identifiers—*In Basket Simulation

A study investigated the feasibility of teaching conceptual complexity to adults using an in-basket simulation. Training incorporated Kelly's components of differentiation and integration with Schroder's Cognitive Competencies and followed Lewin's Experiential Learning Model. Research participants in the original study were 24 women and 18 men, aged 25-55, attending an experienced learner baccalaureate program. Research participants in the replication study were 10 women and 10 men enrolled in management development courses offered in a community college management development program and/or an external Master's in management program. The instrument

consisted of a 41-page, self-paced workbook that included pretest, text, in-basket, feedback on pretest and in-basket exercises, and posttest. The overall training effect was significant, confirming the research hypothesis that conceptual complexity could be improved through explicit training. In addition, in the original study, women scored significantly higher than men and showed greater improvement from pretest to posttest. (Appendixes contain a list of 57 references, 3 data tables, and 1 figure.) (Author/YLB)

Community Service Performed by High School Seniors. Education Policy Issues: Statistical Perspectives.

National Center for Education Statistics (ED), Washington, DC.

Report No.—NCES-95-743
Pub Date—Oct 95
Note—3p.

Pub Type—Numerical/Quantitative Data (110)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Career Education, *Community Programs, High Schools, *High School Seniors, National Surveys, *Public Service, *Student Characteristics, *Student Participation, *Volunteers

Identifiers—National Education Longitudinal Study 1988

According to data collected in Spring 1992 as part of the National Education Longitudinal Study of 1988, 44% of high school seniors in 1993 had performed some type of unpaid community service in the past 2 years, and approximately 15% of all high school seniors performed some required service during the same period. Half of the seniors performing required community service reported that the requirement was connected to a class. The percentage of seniors reporting service that was entirely voluntary was nearly twice as high (29%) as the proportion reporting at least some required service. Females were more likely to perform community service than males, and whites and Asians were more likely to perform community service than were members of other racial/ethnic groups. Students' likelihood of performing community service also increased with their family socioeconomic status, reading proficiency, participation in college preparatory programs, and attendance at Catholic or other private schools. Church-related groups were the most frequently mentioned type of organization through which students performed their community service. Nearly half the seniors performing community service reported service involving one type of organization, and approximately one-fifth reported involvement with three or more types of organizations. Filling the Gap: A Manual for Integrating the Deaf Adult into Adult Basic Education Classes. Revised.

Columbus Speech and Hearing Center, OH.
Spons Agency—Ohio State Dept. of Education, Columbus. Div. of Adult and Community Services.

Pub Date—Jun 95
Note—82p.

Pub Type—Guides - Classroom - Teacher (052)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—*Adult Basic Education, Adult Students, *Augmentative and Alternative Communication, *Classroom Techniques, Cultural Differences, Deaf Interpreting, *Deafness, Educational Legislation, Federal Legislation, *Mainstreaming, National Organizations, Public Agencies, Sign Language, Special Needs Students, *Student Characteristics, Student Needs, Vocational Education, Vocational Rehabilitation

Identifiers—Americans with Disabilities Act 1990, Ohio, Rehabilitation Act 1973 (Section 504)

This manual is designed to familiarize adult basic education (ABE) teachers with the special needs of deaf individuals and strategies for integrating deaf students into ABE classes. The manual is prefaced with a brief discussion of the Comprehensive Program for the Deaf of the Columbus Speech and Hearing Center in Columbus, Ohio. The following topics are discussed in the manual's five sections: the special auditory, language, communication, experiential, educational, social, psychological, vocational, economic, and cultural needs of deaf students; deaf culture; communication; procedures for using an American Sign Language (ASL) inter-

preter; and classroom strategies. Appendixes constituting approximately 60% of the manual contain the following: information about the provisions of Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act; discussion of the types, causes and effects of hearing loss; names/addresses of Ohio Alliance of Community Centers for the Deaf and offices of the Ohio Rehabilitation Services Commission; list of 21 books, series of books, and other resources; information about ASL and the Registry of Interpreters for the Deaf Code of Ethics; names/addresses of 41 national organizations serving deaf people; and chart illustrating the ASL manual alphabet. Descriptors—*Change Strategies, Economic Factors, *Employment Patterns, *Employment Practices, Fringe Benefits, Income, *Low Income Groups, Minimum Wage, Part Time Employment, *Poverty, *Public Policy, Tax Rates, Trend Analysis, Underemployment, Unemployment Identifiers—*Working Poor

In 1993, 10.4 million people were classified as being among the working poor. Of those individuals living in poverty, 2.4 million worked year round at full-time jobs and 7.4 million lived in a household containing someone who was employed full time throughout the year. A U.S. Bureau of Labor Statistics report identified low earnings, involuntary part-time work, and unemployment as three key reasons for poverty. Another study established that the percentage of workers with low earnings rose from 12% of all year-round, full-time civilian workers aged 16 or over in 1979 to 16% in 1992. Among the identified causes of the rise were the following: steady erosion of wages in the United States, unemployment and underemployment, rise of low-wage service jobs and parallel decline in well-paying manufacturing jobs, restructuring of industry, and decline of pension and health insurance coverage. Although there is no panacea for poverty or the working poor, the following policy measures would make a big difference: strengthen labor laws, adopt national policies aimed at preserving high-wage manufacturing jobs, increase the minimum wage, retain existing employment and training and safety-net programs, retain a progressive tax policy, and fund education adequately. This document traces the history of adult education

(AE) in California from the 1850s through the present. Chapter 1 traces AE in California from the 1850s through the 1940s, and chapter 2 summarizes AE governance, finance, and programming in the 1950s. Chapter 3 focuses on the new federal role in AE and AE program growth in the 1960s, with special attention to the following: federal adult basic education initiatives, growth of vocational education, separation of community colleges, and AE funding and program characteristics. Changes in AE governance and finance in the 1970s are outlined in chapter 4. Discussed in chapters 5-6 are competency-based education's birth in the 1970s and institutionalization in the early 1980s. Chapters 7-8 examine the response of AE in California to social, economic, and political changes in the 1980s and California's AE strategy for the 1990s. Appendixes contain the following: lists of various AE administrators, consultants, and practitioners in California; list of federal AE projects; enrollment statistics; and timeline of significant events in AE in California. Lists of 101 works cited and 225 recommended references are included. (MN)

Needs Assessment for Extension Agents and Other Nonformal Educators.

Pennsylvania State Univ., University Park. Cooperative Extension Service.

Pub Date—95

Note—61p.

Pub Type—Guides - Non-Classroom (055)

EDRS Price—MF01/PC03 Plus Postage.

Descriptors—Adult Education, Advisory Committees, *Agricultural Education, Brainstorming, Check Lists, Counties, Data Collection, Discussion Groups, *Educational Needs, Evaluation Methods, *Extension Education, Interviews, *Needs Assessment, Questionnaires, Records (Forms), *Regional Planning, *Rural Extension, Secondary Education, Student Organizations, Tables (Data), Theories, Vocational Education Identifiers—4 H Clubs, Pennsylvania

This manual is designed to introduce extension workers to needs assessment theory and techniques in an applied context and to serve as a tool for planning and implementing county-level assessments of youths' needs for extension education (including 4-H programs). First, the following steps in the program planning process are explained: identify issues, determine needs, set goals and objectives, assess resources, form a plan, implement the plan, and evaluate results. Selected aspects of the needs assessment process are examined (including critical questions for needs assessments, examples of target groups and informants, reasons for conducting/not conducting needs assessments, and strategies). The following office techniques for conducting needs assessments are discussed and illustrated with sample forms/instruments: needs sheet/wall chart, resource inventories, review of office records, futures wheel, and reflective listening. The roles of the following data/data collection instruments in assessing needs are described: social indicators, written surveys, phone surveys, the nominal group process, county forums, focus group interviews, and brainstorming. Concluding the manual are a summary of Pennsylvania county youth needs assessments conducted during 1987-91 and lists of the following: other needs assessment techniques, common misuses of the needs assessment techniques described, and benefits of county advisory committees. Participation of VICA Members in Personal Development Activities.

Pub Date—95

Note—16p. For a related paper on assessment of personal development activities, see ED 386 602.

Pub Type—Reports - Research (143)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—Citizen Participation, Cooperation, *Individual Development, Leadership, Post-secondary Education, Secondary Education, Self Esteem, Self Evaluation (Individuals), State Surveys, Student Attitudes, *Student Organizations, *Student Participation, Student Surveys, *Vocational Education

Identifiers—*Vocational Industrial Clubs of America, *West Virginia

A study examined the extent to which 1994-95 members of the West Virginia chapter of Vocational Industrial Clubs of America (VICA) participated in VICA personal development activities. The study population consisted of all VICA members in West Virginia, and the study sample consisted of all 156 VICA members who attended the annual West Virginia VICA state conference. The three-part data collection instrument consisted of the following: questions related to biographical information; 24

personal development skill statements organized into 4 measurement scales (leadership, cooperation, self-confidence, and citizenship) adapted from the Personal Development Inventory; and questions measuring level of participation in VICA activities. Of the four personal development inventory scales, citizenship and cooperation received the highest mean scores (6.30 and 5.58, respectively), and leadership received the lowest mean score (4.21). Low positive relationships were discovered between participation in teamwork skills activities and self-rating on the cooperation scale, between participation in decision-making skills activities and self-rating on the leadership scale, and between participation in local VICA competitions and self-rating on the citizenship scale (.30, .30, and .23, respectively). Negligible (.03 to .15) positive relationships were found for all activities corresponding to the self-confidence scale. (Contains 23 references.) (MN)

Identifiers—General Educational Development Tests, *Northwest Iowa Community College, *Workplace Literacy

This report documents how the Business/Training Institute of Northwest Iowa Community College and Colcraft, Inc., of Hawarden, Iowa, worked as partners to establish a basic workplace literacy program for Colcraft's workers. The project goals were to develop and offer a workplace literacy program that would enroll 160 workers and prepare them to use new technology and operating methods and also improve their basic skills in a 15-month basic skills improvement program. Of the 338 Colcraft employees who started the program, 225 completed at least one of its four instructional blocks (a 66.6% completion rate). Training in basic team skills was provided to 109 workers. At the end of 15 months, participants' grade level changes in reading, math, and writing averaged 1.1, 1.1, and 1.4 years, respectively, and 64 workers completed General Educational Development (GED) testing in at least 1 area (8 completed testing in all 5 areas). Appendices constituting approximately 90% of this document contain the following: mathematics skills curriculum, glossary, workplace skill building brochure, news releases, individual development plan, comments on the Mid-America Conference, basic team skills materials, team minutes, project-related correspondence and dissemination comments, final budget, milestone chart, quarterly report, final financial status report, and final external evaluation report. (MN)

Identifiers—DACUM Process, *Workplace Literacy

Mercer County Community College (New Jersey) and six small businesses used federal grant money to develop a model program of workplace literacy that would assist 600 adult workers with inadequate basic skills in performing their jobs. In analyzing the overall skills of the work force, the literacy audit identified these basic skills/literacy deficiencies: oral and written communication within the organizations, limited English proficiency, basic literacy skills, logical/rational thinking skills, and

workplace sensitivity and other interpersonal skills. The evaluation design consisted of performance evaluation measures monitoring, impact surveys, student information, and summary evaluation. Curriculum development began with the literacy audit that included use of the DACUM (Developing a Curriculum) process. An orientation and assessment program was conducted. Six training cycles were conducted at the facilities. The evaluation showed that benefits for the six companies included the following: increased self-esteem; a better informed, more participatory employee; improved communication skills; increased occupational mobility and career opportunity; and improved employee and work site safety records. Results of a student survey strongly supported employees' satisfaction with a work-based education program geared for their needs. (Appendices and attachments include a third-party evaluation, curriculum overview, course outlines, sample training schedule, surveys, and four DACUM charts.) (YLB)

Older Adult Education: A Guide to Research, Programs, and Policies.

Report No.—ISBN-0-313-28878-X

Pub Date—95

Note—245p. Published in association with the North Carolina Center for Creative Retirement, University of North Carolina at Asheville.

Available from—Greenwood Press, 88 Post Road West, Box 5007, Westport, CT 06881 (\$65).

Pub Type—Books (010)

Document Not Available from EDRS.

Descriptors—*Adult Education, *Adult Programs, Computer Assisted Instruction, Distance Education, *Educational Development, Educational History, *Educational Policy, Educational Research, *Intergenerational Programs, Lifelong Learning, *Older Adults, Program Descriptions, Program Development, Public Policy, *Technological Advancement

This guide highlights certain institutional, research, and policy trends in how educational opportunities for older adults have been evolving—especially during the past 15-20 years. Chapter 1 provides an overview of how older adult education looks today within the context of aging issues and programs. It explores purposes, goals, rationales, institutional relations, motivations and emerging concepts of older adult education. Chapter 2 reviews how older adult education grew out of research on intellectual functioning of the elderly, the tradition of adult education, and forces operating within the relatively new field of gerontology. A review of institutions hosting educational programs brings this historical review up to date. Chapter 3 describes 15 stages or phases of development in older learner programs as derived from a nationwide study of five institutional program types. Chapter 4 is a comprehensive review of the policies of federal, state, and local public as well as nongovernmental organizations. Chapter 5 examines the influence on older adult education of computer technology and forms of distance learning. Chapter 6 considers recent emphasis on intergenerational programming. Appendixes include descriptions of national organizations, organizations that provide resources, a listing of various titles and parts of the Older Americans Act, state tuition-waiver policies, guidelines for library service to older adults, a background paper on Life Enrichment Opportunities, flowchart of agencies in the aging network, U.S. Department of Education organizational chart, and index. Descriptors—Adult Education, *Career Development, Career Education, Employer Employee Relationship, *Employment Patterns, Labor Force Development, *Work Attitudes, *Work Ethic, *Young Adults

Identifiers—*Generation X

Several myths relate to the question of whether Generation X, the population cohort following the Baby Boomers, has different values, work ethics, and attitudes toward work and career development. The first myth is that individuals in Generation X are slackers, lacking career drive and ambition. The reality is that Generation X may just view the concept of career differently. They use job hopping as a way to build their skills and make themselves more marketable. They are more self-sufficient and outcome based. Given their priorities of money, power, and status, many are becoming entrepreneurs. The second myth is that individuals in Generation X are poorly suited to today's career realities. The reality is that individuals in Generation X have higher levels of education than those in previous generations. The real assets they bring to the workplace are their knowledge of technology and ability to concentrate on a number of tasks at one time. They are also accepting of change. A third myth is that individuals in Generation X have little influence in the workplace. The reality is that the type of training companies do is being shaped by the learning style of this generation. Generation X is also shaping company leadership, since they require more coaching and feedback from supervisors than previous generations. They expect their opinions to count. Of the greatest significance may be the workplace changes influenced by the cultural diversity of this generation. (Contains 12 references.) (YLB)

Descriptors—Adult Education, Elementary Secondary Education, Employer Employee Relationship, Higher Education, *Labor Force Development, *Organizational Change, *Organizational Development, Participative Decision Making, Teamwork

Identifiers—*Learning Organizations

Any type of organization can be a learning organization (LO) if it possesses certain characteristics: provide continuous learning opportunities, use learning to reach its goals, link individual performance with organizational performance, foster inquiry and dialogue, embrace creative tension as a source of energy and renewal, and be continuously aware of and interact with its environment. Businesses that practice LO principles are Johnsonville Foods, Harley-Davidson, Motorola, Corning, AT&T, and Fed Ex. Sullivan Elementary School in Tallahassee (Florida) has applied LO quality principles to transform itself. Despite theoretical support and some real-life examples, some critics claim the learning organization is a myth, not a reality. Some cite a lack of critical analysis of the theoretical framework of the LO. They suggest that few studies support the relationship between individual and organizational learning. Another critic sees the primary purpose of most organizations as the production of goods and services, not the acquisition of knowledge/learning. Schools that have been evaluated along Senge's five disciplines have also been found lacking. Barriers that prevent the LO from becoming a reality include the following: lack of effective leaders, the inability to recognize and change existing mental models, learned helplessness, tunnel vision, truncated learning, individualism, and a culture of disrespect and fear. The LO may best thought of as a journey, not a destination; a philosophy, not a program. (Contains 19 references.) (YLB)

Descriptors—Adult Basic Education, Adult Education, *Adult Literacy, *Developing Nations, *Educational Change, Educational Development, Females, Foreign Countries, Literacy Education, Nonformal Education, Program Development, *Womens Education

Identifiers—*Asia Pacific Region, *Empowerment

This issue contains an editorial, "Empowering Women through Education" (Elizabeth Cruzada), and eight articles. "Women and Education" (Swarna Jayaweera) presents the status of women and girls' education in Asia vis-a-vis the goals set in the Nairobi Forward Looking Strategies. "Education Reforms and Development of Chinese Minority Women" (Zhen Yushun) describes the present situation, the existing problems, and the current reforms. "Strengthen Adult Education to Promote Women's Development" (Jia Xiuzon) discusses the measures the Chinese government has taken to develop women's adult education. "Women and Education in Guangdong Province" (Zhang Yi Ni) introduces the efforts of the Guangdong Provincial Federation of Women and the difficulties being faced by Guangdong women in education. "Women's Literacy and Empowerment" (Anita Dighe) shows literacy's role in raising the consciousness of village women who spearheaded an anti-arack (liquor) agitation. "Nonformal Education and Women's Empowerment: Perspective on South Pacific Praxis" (Adele Jones) discusses findings of a project that examined the extent to which nonformal education programs for women in the Caribbean and South Pacific contributed to their empowerment. "Education Work among Urban Poor Women" (Perla Bunda) describes the development of a national federation of urban poor women's organizations in the Philippines. "Popular Education for Women's Empowerment" (Judy Taguiwalo, Carol Anonuevo) describes the historical background, Filipino educational program, and problems and constraints. (YLB)

Education in the Workplace: Bridging the Gap.

Pub Date—Nov 94

Note—33p.; Paper presented at the Annual Meeting of the Mid-South Educational Research Association (Nashville, TN, November 1994).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143) — Tests/Questionnaires (160)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Adult Education, Educational Research, Employer Employee Relationship, *Job Training, *Labor Force Development, Retraining, *Small Businesses, Vocational Education

A study surveyed owners of 20 small businesses in North County, San Diego, to determine evidence of teaching and learning. A 13-question survey instrument gathered information regarding whether training and/or education for employees was available, what education was offered, how it fit into the evaluation process, and how business owners saw their role as it related to teaching and learning in the workplace. Training appeared to comply with accreditation and was driven by a need to survive in a difficult economy. Although the majority of respondents were acutely aware of the necessity for continuous training/education for their employees, time and resources were scarce. Although training/education occurred in most businesses, it was driven by regulations, customer service, and a commitment to safety compliance issues. Little time was available for learning related to professional growth and personal discovery. With regard to their role in the teaching and learning process, the business owners expressed a sincere concern for their employees and their welfare, but struggled with the knowledge that training/education was necessary. Recommendations for further research included the impact of restructuring on teaching and learning in the workplace, role of the chief executive officer as the instructional leader, and investigation of rewards for training/education in the workplace. (A sample interview questionnaire is appended.) (YLB)

The Other Side of School Reform: Integrating Professional Technical Education.

Pub Date—Apr 95

Note—12p.; Paper presented at the Annual Meeting of the American Educational Research Association (San Francisco, CA, April 18-22, 1995).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Cooperative Programs, Coordination, *Educational Change, Educational Research, High Schools, *Labor Force Development, Postsecondary Education, *Professional Education, Program Evaluation, *School Restructuring, State Programs, Statewide Planning, *Technical Education

Identifiers—*Oregon

To do a comprehensive assessment of Oregon's professional technical education and work force programs, project evaluators identified, obtained, and extracted relevant data from documents and other related materials that pertained to key program concerns. Fieldwork consisted of four major activities: interviews with key players, written surveys with stakeholder groups, focus group discussions in each of Oregon's 18 professional technical education regions, and 4 in-depth case studies of selected regions. It was discovered that Oregon had added new dimensions to its efforts to improve professional technical education and work force training activities and that negative attitudes toward professional technical education posed a serious barrier to implementation of the reform package. Specific conclusions were as follows: the involvement of business, industry, and labor was not extensive as it could be; there was a lack of outcome data based on uniform performance measures and standards; and a large number of high school students were not well prepared to take professional technical education courses at community colleges. The essential ingredients of exemplary practice were identified: a strong local leadership, extensive private sector involvement, emphasis on use of technology, incorporation of competency-based curriculum, effective program coordination, commitment to building staff capabilities, long-term strategic planning, and adequate resource support. Descriptors—*Adult Basic Education, Adult Educators, *Adult Literacy, Basic Skills, *English (Second Language), Foreign Countries, Inservice Teacher Education, *Literacy Education, Professional Development, Teacher Improvement, Teacher Workshops, Teaching Methods, *Team Teaching

Identifiers—Australia (Victoria)

An Australian project provided an inservice, team teaching program interspersed with professional development workshops for community-based practitioners in English as a Second Language (ESL) and Adult Literacy and Basic Education (ABLE). The group who participated included four ESL teachers working in community providers and four adult literacy teachers working at the Council of Adult Education. Teachers attended three workshop sessions and participated in two team teaching rounds of two classes per round. Teachers stayed with one team teaching partner for the whole process. Findings indicated all teachers involved in the project found the opportunity to visit other settings and to engage with different groups of learners to be an invaluable experience. Benefits for students were an additional teacher in the classroom and the teachers' use of an extended repertoire of teaching strategies and methodologies. Recommendations were as follows: consideration of team teaching as a viable professional development option; coherent organization of pro-

professional development targeted at regional, cross-regional, and statewide levels according to type of activity; better publicizing of existing networks to teachers; and formal recognition of diverse pathways through which teachers acquire knowledge, skills, and experience to work with adult students. (Appendixes include class profiles and project forms.) (YLB)

Descriptors—Adult Education, *Community Education, *Educational Benefits, Educational Research, Education Work Relationship, *Employment Patterns, English (Second Language), Foreign Countries, Job Skills, *Participant Characteristics, Second Language Instruction, Unemployment, Vocational Followup
Identifiers—Australia

A project examined the outcomes and pathways of 1992 participants in adult and community education (ACE) courses in Victoria, New South Wales, and South Australia. It explored participant characteristics, vocational skills gained from completing ACE courses, educational and employment outcomes, and personal benefits and benefits to families and the community. Ten discussion groups were held, with 5-10 participants attending each group. For the survey, a stratified random sample of ACE centers selected a representative sample of participants; 2,388 questionnaires were used in the analysis. Participants most frequently reported improvements to language and communication skills. Disadvantaged students improved their skills the most. A high proportion of students in adult basic education (ABE) and English as a Second Language (ESL) went on to study more ESL and/or ABE subjects. Unemployed students experienced more educational outcomes and pathways than other participants. In terms of employment pathways, 43 percent of those who were unemployed at the time of the 1992 course were working when they filled out the questionnaire. The most significant outcomes were those related to personal benefits, particularly for women; 50 percent reported they gained at least one family outcome from their 1992 course and 15 percent of ACE participants reported becoming involved in voluntary work in the community. (Appendixes include additional data tables, instruments, and 26-item bibliography.) (YLB)

Earnest, Garee W. And Others

Developing Community Leaders: An Impact Assessment of Ohio's Community Leadership Programs. Ohio State University Extension 1993-1995.

Ohio State Univ., Columbus. Cooperative Extension Service.

Pub Date—95
Note—70p.
Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC03 Plus Postage.
Descriptors—Adult Education, *Community Leaders, *Educational Benefits, Extension Education, *Leadership, Leadership Qualities, *Leadership Training, Program Descriptions, Program Effectiveness, Program Evaluation, State Programs
Identifiers—Ohio

A descriptive exploratory study examined what impact community leadership development programs in Ohio had on leadership program participants' leadership skills. Data were gathered using multiple methods: face-to-face interviews, focus group interviews, and pre- and postassessments of leadership practices. The self-report questionnaire used was the Leadership Practices Inventory (Kouzes and Posner 1987). Respondents were a census of the 67 program participants, a purposeful sample of 36 alumni, and a census of the 7 program

directors. Significant differences in responses on the pre- and postassessments indicated that the community leadership program participants increased their leadership skills in the following areas: challenging the process, inspiring a vision, enabling others to act, modeling the way, and encouraging the heart. Alumni indicated the following: they were more willing to challenge the status quo and take risks; they had broadened and changed their perspective of leadership roles/responsibilities within the community and were encouraging others to accept some leadership responsibility; and they had developed a greater appreciation for teamwork and collaboration. Benefits reported by alumni were as follows: increased networking within the community, greater understanding and ability to interact with people, increased self-confidence, and understanding, appreciation, and acceptance of their leadership responsibility as a citizen. (Appendixes contain a list of 16 references and instruments; specifically, Program Director interview questions, alumni focus group questions, and variables identified for focus group and face-to-face interviews.) Identifiers—Illinois

Project Connect was developed in Illinois to connect personal, family, and job responsibilities for adults and out-of-school youth in economically depressed areas of the state (including transitional ex-offenders and corrections populations). Making these connections enables individuals to learn to manage and balance these aspects of their lives in order to prepare for or continue successful employment. The project developed and field tested 15 competency-based learning guides that focus on these three types of life responsibilities. This general guide explains the goals of Project Connect and the rationale for the guides and provides information on the following: (1) using facilitators; (2) types of participants that can be served and the settings where they can be found; (3) an overview of the learning guides and an explanation of the parts of each guide; (4) facilitator tips for using the guides; (5) instructional planning, including a flowchart that identifies each competency and learner outcome in a packet and a matrix of topics used in the learning guides; (6) characteristics of the learner population with teaching suggestions; (7) strategies and implications for facilitators; (8) a selected bibliography listing 19 references; and (9) the vision statement, mission statement, and Illinois goals for world-class education for the 21st century (repeated in each learning guide). This learning guide is designed to connect personal, family, and job responsibilities for adults and out-of-school youth in economically depressed areas of the state (including transitional ex-offenders and corrections populations) so that individuals learn to manage and balance these aspects of their lives in order to prepare for or continue successful employment. This learning guide contains four competency units that provide information on parenting skills for parents of infants, toddlers, and preschoolers. The competency units cover the following topics: (1) the nurturing roles and responsibilities of parents; (2) expectations for the physical, mental and intellectual, emotional, and social development of infants, toddlers, and preschoolers; (3) ways to foster emotional, motor, intellectual, and language development for this age group; and (4) procedures and precautions for providing a safe, healthful, comfortable environment. Each competency unit consists of learner outcomes, key ideas, definitions, teaching strategies and methods, and suggested learning activities. Thirteen supplements include information and activity sheets on the following: parents' feelings; children's needs and how to meet those needs; parent job description; developmental milestones; toys for various ages; enhancing children's social, emotional, and motor development; safety hazards; emergency numbers; solving common problems; recommended immunizations; and an immunization record. A bibliography lists 26 references. The Illinois goals for world-class education for the 21st century also are included. (KC)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—*Adult Education, Behavioral Objectives, Behavior Patterns, Competency Based Education, *Consumer Education, *Coping, *Crisis Intervention, Daily Living Skills, Defense Mechanisms, Family Work Relationship, *Home Economics, Homemaking Skills, Instructional Materials, Learning Activities, Out of School Youth, Problem Solving, Self Management, State Curriculum Guides, *Stress Management, Stress Variables, Teaching Guides

Identifiers—Illinois

This learning guide on improving responses to individual and family crises is part of a series of learning guides developed for competency-based adult consumer and homemaking education programs in community colleges, adult education centers, community centers, and the workplace. Focus is on the connections among personal, family, and job responsibilities so that these aspects of living will complement each other. Introductory material includes general comments for use of the learning guide; general guidelines/check list for users with key to symbols used to designate enhancement activities; and introduction. The guide covers four competencies: identify life situations that cause stress for individuals or families; describe ways children and adults may react to stress; determine strategies for coping with stress; and employ a conflict management strategy in a life situation. Materials provided for each competency include a list of learner outcomes, key ideas, definitions, strategies/methods for facilitators, and suggested activities for learners. Twenty-nine supplements contain information and activity sheets on the following: development through the life span, stress and stress management, case studies; support systems, values, anger, constructive communication, listening, and conflict. A bibliography lists 68 items. (YLB)

Identifiers—Illinois

This learning guide on assisting at-risk populations is part of a series of learning guides developed for competency-based adult consumer and homemaking education programs in community colleges, adult education centers, community centers, and the workplace. Focus is on the connections among personal, family, and job responsibilities so that these aspects of living will complement each other. Introductory material includes general guide-

lines/check list for users with key to symbols used to designate enhancement activities and general comments on assisting at-risk populations. The guide is divided into two parts that deal with the at-risk populations of dropouts and homeless persons. Competencies are identified for each part with a set of outcomes, definitions, key ideas, facilitator strategies, and learner activities. Supplementary and resource aids are listed at the end of the sections. Three competencies are addressed for dropouts: analyze reasons for dropping out of school; identify constructive ways to reinforce self esteem; and identify sources of assistance for achieving personal goals. Seventeen supplements contain information and activity sheets on the following: potential dropouts, reasons for dropping out, self-confidence, self-esteem, goal setting, and resources. This section contains 21 references. Four competencies related to the homeless are addressed: explain the circumstances which contribute to homelessness; identify problems resulting from homelessness and ways these might be resolved; describe ways in which homeless persons may seek to satisfy their human needs; and determine available sources of help for individuals and families facing homelessness. Twelve supplements include information and activity sheets on the following: housing crises, interpersonal crises, danger signals of becoming homeless, poverty, empathy, and government, community, and local sources of help. This section lists 27 references. (YLB)

Identifiers—Illinois

This general guide provides information on the 15 Project Connect Learning Guides for secondary education that are adaptations of the guides developed for adult consumer and homemaking education programs. An introduction discusses usefulness of the guides, participation in Future Homemakers of America-Home Economics Related Occupations, and development of the guides. Other sections describe parts of the learning guides and provide teacher tips for using them. A section that describes instructional planning using the learning guides includes flowcharts that list each competency and student outcome in the learning guides and a matrix of topics used in the guides. The following section describes characteristics of the economically disadvantaged and characteristics that may affect learning; it provides suggestions for teaching economically disadvantaged students. A selected bibliography contains 19 references dealing with economically disadvantaged and culturally diverse learner populations. (YLB)

This competency-based secondary learning guide on managing home and work responsibilities is part of a series that are adaptations of guides developed for adult consumer and homemaking education programs. The guides provide students with experiences that help them learn to do the following: make decisions; use creative approaches to solve problems; establish personal goals; communicate effectively; and apply management skills to situations faced as an individual, family member, student, and worker. Each learning guide includes the following sections: a general introduction and guidelines for using the material; a checklist for users for advance planning; introduction to the guide; specified competencies, with student outcomes/evaluations, definitions, key ideas, teacher strategies/methods, suggested student activities, sample assessments, and supplementary resources. Four competencies are addressed: (1) identify problems in managing home and work life; (2) discuss values and goals in terms of adjusting expectations, redefining roles, and sharing responsibilities; (3) apply work simplification techniques and time management strategies in the performance of household tasks; and (4) describe techniques for reducing stress. Twenty-eight supplements contain information and activity sheets on the following: problem solving, decision making, self-sufficiency, managing guilt, interpersonal communication, values and goals, work simplification and time management, adjusting standards, organizational skills, home responsibilities for children, and stress. A bibliography contains 22 references. (KC)

This competency-based secondary learning guide on assisting at-risk populations (dropouts and homeless people) is part of a series that are adaptations of guides developed for adult consumer and homemaking education programs. The guides provide students with experiences that help them learn to do the following: make decisions; use creative approaches to solve problems; establish personal goals; communicate effectively; and apply management skills to situations faced as an individual, family member, student, and worker. Each learning guide includes the following sections: a general introduction and guidelines for using the material; a checklist for users for advance planning; introduction to the guide; specified competencies, with student outcomes/evaluations, definitions, key ideas, teacher strategies/methods, suggested student activities, sample assessments, and supplementary resources. The following competencies are addressed in the dropout section: analyze reasons for dropping out of school, identify constructive ways to reinforce self-esteem, and identify sources of assistance for achieving personal goals. Seventeen supplements contain information and activity sheets on the following: dropout characteristics, reasons for dropping out, self-esteem, psychological needs, confidence, understanding others, and dropout agencies. A bibliography contains 23 items. The homeless section addresses these competencies: explain the circumstances contributing to homelessness; identify problems resulting from homelessness and possible solutions; describe ways homeless persons may seek to satisfy their human needs; and determine available sources of help for individuals and families facing homelessness. Twelve supplements contain information and activity sheets on the following: housing crises, spouse/partner abuse, poverty, satisfying human needs, empathy, and government sources of help. A bibliography contains 28 items. (MN)

Identifiers—Carl D Perkins Voc and Appl Techn Educ Act 1990, School to Work Opportunities Act 1994

This publication provides educators, policymakers, and researchers with vocational education data through 1992. It begins with text and figures covering these key questions: what is vocational education? how widespread is vocational education participation? what types of vocational education do students take? to what extent do students with different demographic characteristics and disadvantaged or disabled students participate? how much academic preparation do vocational counselors receive? what outcomes are associated with participation? and what are other school-to-work programs schools and institutions offer? Appendix A presents extensive tables supporting the findings. The tables provide trend information on the decade spanning 1982-92 and information on public high school graduates and teachers and on nonbaccalaureate students in a variety of postsecondary institutions. The report also covers a number of key issues emphasized in the 1990 Perkins Act and echoed in the School-to-Work Opportunities Act: integration of academic and vocational education, access of special populations to high quality programs, and access of individuals to programs non-traditional for their sex. Information is also provided on most of the targeted populations identified in section 421 of the 1990 Perkins Act. Other appendices contain a description of how variables were constructed to provide information on targeted populations, glossary, and 30-item bibliography. (YLB)

Identifiers—*England, *Wales

In response to prison disturbances in England and Wales in the late 1980s, the education program for

prisoners was improved and more prisoners were given access to educational services. Although education is a relatively new phenomenon in the English and Welsh penal system, by the 20th century, education had become an integral part of prison life. It served partly as a control mechanism and partly for more altruistic needs. Until 1993 the management and delivery of education and training in prisons was carried out by local education authority staff. Since that time, the education responsibility has been contracted out to organizations such as the Staff College, other universities, and private training organizations. Various policy implications were resolved in order to allow these organizations to provide prison education. Today, prison education programs are probably the most comprehensive of any found in the country. They may range from literacy education to postgraduate study, with students ranging in age from 15 to over 65. The curriculum focuses on social and life skills. Vocational education is prevalent, and many types of teaching methods are tried. The future for prison education in England and Wales seems secure; prison education is likely to play an increasingly central role in prison reform efforts. This report includes a list of prison service establishments with addresses. (Contains eight references.) (KC)

Identifiers—United Kingdom

An analysis was done regarding the perceived low numbers of British students who stay on in school past age 16. This three-part paper summarizes that study. Part 1, "Post-Compulsory Education Analysing the Market," presents a summary of the problem of low participation in post-16 schooling, based on a survey of literature and interviews with technical college managers and officers. It includes information about the economic significance of continuing education and training and the emerging consensus that both are vital to the economic well-being of the United Kingdom. In Part 2, "Post-compulsory education: identifying the trends," the paper offers an alternative analysis of much of the data. It suggests that the quantitative gap between the United Kingdom and its major economic competitors is narrowing at such a rate that means this part of the argument for further education is becoming irrelevant. The number of young

people continuing in education and training, within the public sector, is fast approaching the rates common elsewhere. This section also brings up the question of the quality of the training. Part 3, "The Challenge for Colleges," suggests policy for the future. It maintains that the reasons that participation rates have increased are manifold, but the role of post-16 institutions is central. These institutions have spent the last few years improving their marketing and changing the attitudes and behaviors of many thousands of young people. The effectiveness of these strategies are at the root of the social changes that are evidenced by the increasing participation rates. For the future, the paper maintains, the growth and cooperation of these institutions will determine how many young people are prepared for the future. The report includes 17 figures. Contains 33 references. (KC)

Descriptors—Employment Qualifications, Foreign Countries, *Job Analysis, *Salaries, *Salary Wage Differentials, *School Personnel, Technical Institutes, Two Year Colleges, Vocational Schools

Identifiers—Great Britain, *Job Classification

This report is based on research findings indicating that many British colleges of further education have widely disparate salaries for professional staff members. Often salaries bear no relation to complexity of work performed. In addition, equal employment opportunity laws requiring equal pay for similar work may not be followed. A job evaluation scheme using rating points for various job functions and a typical position description resulting from the classification system are proposed. Following a description of the research project, the document includes the following: a sample job description detailing major tasks, job activities, and performance requirements; list of benchmark jobs; factor analysis of benchmark jobs; and the manual for the job evaluation scheme and the 10 rating factors—pre-entry qualifications, training period required, job knowledge required, particular skills, contacts and relationships, confidential information, effect of decision making, budgets/expenditure/income, managing staff, and health and safety. Identifiers—Great Britain

Many British colleges of further education are moving toward a more flexible and learner-centered curriculum. Pressures for these changes are both internal and external: the colleges' funding methodology encourages student retention and achievement, and being flexible is now an economic necessity for many colleges. This two-part paper first looks at the issues facing colleges that may be considering modularizing some or all of their programs in an effort to provide more flexibility. These issues include the following: the reasons for modularizing (such as providing access to education, increasing learner autonomy, and expanding into new markets); designing a modular program; managing change; staff development; and addressing other institutional needs. The second part of the paper is a case study looking at Barnsley College (England)—how it funded and introduced a highly suc-

cessful and innovative flexible curriculum and is evolving into a learning rather than a teaching institution. The paper contains 21 references. (KC)

Curriculum Modules in Minority Aging.

Virginia Commonwealth Univ., Richmond.

Spons. Agency—Office of Human Development Services (DHHS), Washington, D.C.

Pub Date—Mar 88

Contract—90AT0153

Note—72p.

Pub Type—Guides - Classroom - Teacher (052)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Adult Education, Behavioral Objectives, *Blacks, Course Content, Curriculum Guides, Educational Resources, *Females, *Gerontology, Learning Activities, Learning Modules, *Older Adults, *Rural Population, Rural Women

Identifiers—Virginia

These two curriculum modules are self-contained units focusing on older women of color (primarily African-American) and rural minority elders. The modules were developed as a product of a Model Gerontology Career Development Program in Institutions of Higher Education in Rural Areas through a consortium of colleges, universities, and agencies serving older adults in Virginia. The modules provide the basis for instruction for courses on gerontology that can be incorporated into two-year postsecondary curricula, four-year college programs, or postgraduate courses. The following components are included in each module: (1) introduction and rationale; (2) learning objectives; (3) content outline; (4) instructor's resource guide with cross-references to bibliographic materials, learning objectives; (5) post-test questions; and (6) annotated bibliography. Instructors may use these modules as free-standing units of instruction, e.g., for workshops or seminars. Or they can be incorporated into existing curricula in a variety of ways by selecting the resources and mode of instruction appropriate to the curriculum and level of instruction. The annotated bibliography for the women of color module includes 27 citations, and the bibliography for the rural minority elders module describes 19 resources. The content of the women of color unit includes information on the following: the term "of color," theoretical perspectives, research problems, objective measures of vulnerability, studies of mental health, family roles, caregiving patterns, social networks, problems in service use, and policy issues. The rural minority elders unit covers: these topics: demographics, how rural minority elders differ from nonminorities, characteristics of rural social structure, cultural characteristics, factors in formal service utilization, and in-migrating retirees. Identifiers—Ohio

This guide provides a framework for individuals and organizations to develop or strengthen local interagency linkage teams. The guide is revised from an earlier publication stemming from a project that facilitated the formation of local interagency linkage teams throughout Ohio. These teams focus on improving services to at-risk youth and adults through the development of collaborative interagency linkages. The guide proposes a series of steps, poses a number of questions, and provides planning forms and information about additional resources to assist interested persons in implementing the process of collaborative interagency linkage development to provide better services to at-risk clients. The process outlined in the guide is designed to help overcome many of the deterrents to interagency collaboration, such as shortage of time, lack of infor-

mation, competition for scarce resources, distinct organizational structures, different geographical boundaries, and dissimilar calendars. The process includes a series of six steps, each forming a section of the guide: (1) assessing the local need and climate for interagency partnerships; (2) getting started; (3) forming the team; (4) establishing a collaborative relationship; (5) developing a plan; and (6) follow up and follow through. The guide includes three appendices: an action plan form, a list of 19 agency resources and an annotated bibliography of 23 printed resources, and a synopsis of linkage projects in Ohio. (KC)

A core component of the School-to-Work Opportunities Act, work-based learning refers to programs that provide students with exposure to or actual experiences in workplaces. Typical work-based learning programs include youth apprenticeship, internship, job shadowing, cooperative education, and mentoring. This document contains reprints of seven articles and documents on work-based learning and a list of national and Florida organizations with relevant resources. It also contains an annotated bibliography of 62 materials related to work-based learning, with availability information for each item. The seven articles are as follows: "Youth Apprenticeship: Lessons from the U.S. Experience" (Thomas Bailey, Donna Merritt); "Opening Career Paths for Youth: What Can Be Done? Who Can Do It?" (Stephen F. Hamilton, Mary Agnes Hamilton); "Youth Apprenticeship 'American Style' and Career Development" (Kenneth B. Hoyt); "School-to-Work Transition" (Susan Imel); "Home-Grown Lessons: There's Much to Learn from Existing School-to-Work Programs" (Edward Pauly); "Student Assessment and Youth Apprenticeship" (Stanley N. Rabinowitz, Sriaji M. Ananda); and "Apprenticeship and the Future of the Work Force" (Michael E. Wonnacott). (KC)

Ruhland, Sheila K. Everett, Donna R. **Perceptions and Attitudes of Business and Marketing Education Teachers in the United States: Schools and Staffing Survey Results.**

Pub Date—Dec 95

Note—12p; Paper presented at the Annual American Vocational Association Convention (Denver, CO, December 1995).

Pub Type—Reports - Research (143) - Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Business Education, Business Education Teachers, Distributive Education, Job Satisfaction, Marketing, Morale, National Surveys, Secondary Education, Teacher Associations, Teacher Attitudes, Teacher Characteristics, Teacher Participation, Teaching Conditions

Identifiers—Schools and Staffing Survey (NCES) Data were collected on the demographic characteristics, educational backgrounds, and perceptions/attitudes of the approximately 1,429 business and marketing education teachers who were among the subsample of 3,538 vocational teachers and total sample of 56,051 public school teachers who participated in the 1990-91 Schools and Staffing Survey. These data were analyzed to develop a profile of business and marketing education teachers in the United States. Among the study's main conclusions were the following: (1) 55.9% of business/marketing

teachers have a second major or minor field of study; (2) 60.5% participated in teacher workshops or inservice training, and 85.9% belonged to a professional teacher or educational organization; (3) 50.1% were optimistic about their degree of control over their environment in determining discipline policy and 58.5% were optimistic about their degree of control over curriculum; (4) fewer than half the teachers considered schools effective in assisting new teachers; and (5) building basic literacy skills, promoting good work habits/self-discipline, and promoting occupational/vocational skills were identified as the three most important goals of business/marketing education. It was recommended that teacher educators take a more proactive role in encouraging/developing/administering mentoring programs for new teachers and that teacher educators consider the perceptions/attitudes of experienced teachers when developing preservice training. The Los Angeles Area Business/Education Partnership. A Study of the Impact of a Community Based School to Work Program for High Risk Youth.

Pub Date—95

Note—31p.

Pub Type—Reports - Evaluative (142) - Tests/Questionnaires (160)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Articulation (Education), Career Exploration, Career Guidance, Community Programs, Consortia, Cooperative Programs, Education Work Relationship, Followup Studies, High Risk Students, High Schools, Integrated Curriculum, Job Training, Outcomes of Education, Partnerships in Education, Postsecondary Education, Program Development, Program Effectiveness, Public Agencies, Questionnaires, Records (Forms), Remedial Instruction, School Business Relationship, Transitional Programs, Tutoring, Vocational Education, Work Experience Programs, Youth Employment, Youth Programs

Identifiers—California (Los Angeles), Impact Studies, Job Coaches

The Los Angeles Area Business/Education Partnership provides numerous services designed to encourage youths who have been identified as being at high risk of dropping out of school to complete high school and continue in a formal postsecondary education program. Among the services offered by the partnership are the following: clustered instruction; adaptive curriculum; articulated curriculum; cooperative learning programs with business/industry and colleges/universities; vocational assessment; career guidance/exploration; individualized academic remediation; personalized job-specific skills training/development using a combination of classroom- and business-based instruction; specialized tutoring; job coaching; and supportive services. The partnership is operated by the East San Gabriel Valley Regional Occupational Program, a publicly funded vocational training agency consisting of 7 school districts, 4 community colleges, 3 California State University campuses, 200 businesses, and 40 community-based organizations. Sixty-five percent of program participants are members of ethnic minorities. Data from a statistical analysis of participants' and nonparticipants' school records and follow-up interviews with former program participants and representatives of businesses participating in the program as partners and/or training sites have confirmed the program's high effectiveness. (Contains 26 references. Appended are the following: follow-up survey/evaluation instruments; information about selected educational partners; and a list of awards/recognition earned by the program.) acy, Educational Research, Foreign Countries, Illiteracy, Literacy Education, Personal Narratives, Phenomenology, Self Concept

A project in British Columbia, Canada, explored a deeper understanding of what it would be like to become literate and probed how that experience related to the life of the educator. The phenomenological study began with a literature search. It focused on and explored the stories of three adult learners, using the journals of two and extrapolating the teacher's own interpretation of a third learner's story as told to the teacher and to others. One learner's story offered an understanding of the personal, inward search for meaning. A second learner's story demonstrated that teachers could not always win; sometimes the learner would not be ready. The third learner's story led the teacher on a public crusade against illiteracy. Through dialogue, reflection, and identification of themes, the teacher sought to discover the meaning of literacy as it was understood by both teacher and learners. The final part of the project was a reflection by the teacher on the journey toward this deeper, pedagogical understanding. Appendices contain a list of 19 references, a 30-item bibliography, and a response by Paul Gallagher given at the literacy symposium, Research on Literacy: Local and International Perspectives (British Columbia, Canada, October 5, 1990). Identifiers—British Columbia, Canada, Empowerment

Census data, enrollment statistics, and selected studies/reports regarding adult literacy and literacy education in British Columbia (Canada) were examined to determine the nature and scope, need for, and cost of literacy activities and programs in British Columbia. According to 1986 census data, 17% of British Columbia's adult population lack sufficient literacy skills to cope with everyday demands. The annual costs of adult illiteracy in British Columbia were estimated at \$10 billion. New or expanded literacy programs and support services were deemed necessary to empowering undereducated adults, and the special needs of minority groups and the need for research and evaluation, interministerial collaboration, and ongoing monitoring of literacy were designated special areas of concern. Among the study recommendations were the following: (1) community colleges should become community catalysts to improve levels of adult literacy; (2) business, labor, community organizations, libraries, Native organizations, colleges, and schools should collaborate to develop and implement a community-based literacy strategy; and (3) government investment in adult literacy should be increased by 100% for 1990-91 and by lesser amounts for the next 4 years. (Twenty-one references are cited. Appended are the following: 1986 census data for British Columbia; summary of services, needs, and enrollment by college region; and lists of exemplary programs and practices in Canada.) (MN)

Identifiers—*British Columbia

A qualitative study examined the effects of participation in literacy or adult basic education (ABE) programs on the lives of former students. Intensive confidential interviews were conducted with 45 self-selected former ABE students in British Columbia, Canada. From the standpoints of age, ethnic origin, gender, ABE entry level, and type of program attended, the former students represented a very diverse group. Fifteen ABE instructors were also interviewed regarding the intended impacts of ABE programs. The most salient impacts of the ABE experience were psychological. Respondents credited ABE with increasing their self-esteem or self-confidence and thereby enabling them to make important changes in their lives. It was concluded that, by helping people learn to learn and learn that they have learned, ABE/literacy programs enhance individual, family, and community growth and potential. The study findings emphasized the following: rethinking the dropout label, systemic support for lifelong learning, the importance of connecting with others, the need to contribute to the world, and the role of ABE in the economy and society. (Appendixes contain the following: information about terms used, study methodology, and the interviewees; definitions of literacy; release form; one interviewee's story; and a 42-item bibliography.) Identifiers—*Authentic Assessment, Texas

A project was conducted to identify outcomes and procedures for measuring the occupational competency of students completing a coherent sequence of courses in career and technology education (C&TE) programs throughout Texas. Phase 1 of the project focused on horticulture/landscaping/child care occupations. The major activities of phase 1 were as follows: comprehensive review of literature about workplace competencies in the two study occupations that have been developed by other states; telephone survey of offices of education in other states to identify competencies currently being used in C&TE and to determine how the competencies were established and validated; identification of occupational competencies based on a review of the literature review; telephone survey results, existing occupational competencies lists, and the competencies identified in the Secretary's Commission on Achieving Necessary Skills report; and validation of the identified exit-level competencies through a Delphi survey of industry representatives in horticulture and child care. Lists of exit-level competencies were developed and validated for students in secondary- and postsecondary-level agricultural technology and child care programs. (Contains 19 tables and 58 references. Appendixes constituting approximately 60% of this document contain the following: list of advisory committee members, project-related correspondence, and project questionnaires and interview forms.) Approach, Texas

A project was conducted to identify outcomes and procedures for measuring the occupational competency of students completing a coherent sequence of courses in career and technology education (C&TE) programs throughout Texas. The major objectives of phase 2 of the project were as follows: validate criteria for a career portfolio, integrate the career portfolio with general education, establish criteria for authentic assessment, and develop a career portfolio model. Data were obtained from the following: 4 group discussions with a total of 21 child care industry representatives and 11 horticulture industry representatives in Lubbock and Austin (Texas); input from a 10-member authentic assessment advisory committee that included project staff and representatives of the Texas Education Agency; site visits to 3 child care education programs; and telephone interviews with teachers currently using authentic assessment in general education. The information obtained was analyzed and used to develop a career portfolio model that is designed for use in C&TE and that integrates occupation-specific skills, the

workplace competencies identified in the Secretary's Commission on Achieving Necessary Skills report, and general education. (Contains 36 references. Appendixes are lists of focus group participants and employability skills and child care competencies and additional comments of the focus groups.) (MN)

Identifiers—General Educational Development Tests

This Learning Resources Evaluation Manual (LREM) contains evaluations of 140 instructional products listed in the 1994 supplement to Virginia's Adult Education Curricula Resource Catalog. A table of contents lists topics/subjects and page numbers. Some titles that are useful under more than one category are cross-listed for easy reference. These topics are included: career development/education; coping/survival skills; critical thinking; English (grammar and usage, writing, spelling); English as a Second Language (ESL); General Educational Development (GED) (interpreting literature and the arts, mathematics, science, social studies, writing skills); mathematics; pre-GED; reading; science/health and nutrition; and social studies (government, history, citizenship). The evaluation for each title is in a two-page format. The first page includes general information (name, copyright date, price, address, value); format of materials; comments; and readability level. The second page is a completed copy of the Checklist for Evaluating Instructional Materials. Sections include goals and objectives; validity; content of materials; objectivity; components and organization; teacher materials; and summary and recommendations. A directory of publishers is appended. (YLB)

This monograph presents information about programs identified during the 1992, 1993, and 1994 national searches for exemplary vocational education programs. Background information on the search is presented in the first section. The second section provides a description of the 20 exemplary program components and best practices for each component. This section discusses emerging characteristics and other commonalities that exemplary programs share. The third section contains a brief description of the recognized exemplary programs with an emphasis on outcomes and best practices from each program. Each description includes location, telephone, coordinator, target population,

number served per year, total staff, cost per participant, educational setting, and year named exemplary. The 15 programs are as follows: Outreach Equity Nontraditional program; Project GRADS; Employment Specialist Program; The Learning Achievement Program for the Learning Disabled; Electronic Manufacturing Support Specialist Program; ENCORE; CHOICE; Reentry Transition Program; Center for High Tech Training for Individuals with Disabilities; Mission Trails Regional Occupational Program's Assessment Program; Supermarket Career Community-Based Transition; Nontraditional Options Project; Network of Services and Transformation; Partnership for Professional Technical Education Services; and Great Oaks Special Needs Occupational Development Program. The appendices include the rating form and a checklist for providers to assess their own programs. (YLB)

Identifiers—*Ohio (Cincinnati)

A study examined the history, practice, and quality of cooperative education (CE) in two-year colleges in and around Cincinnati, Ohio. CE proved to be firmly ingrained and widespread in Cincinnati. The most common model of CE found in Cincinnati was the "alternating" model, wherein students complete 2-6 cycles of attending school for 10-13 weeks and then work with employers for the same number of weeks. Among the numerous benefits of CE cited by students, employers, and schools were the following: CE programs allow employers to screen and "grow their own" employees; CE gives students direct knowledge about the workplace and applications of school-based learning in the workplace; and CE strengthens schools' links to employers. Although program quality remained high on employers' lists of concerns regarding CE, both employers and education providers had screening mechanisms to ensure the quality of CE programs whether they followed "alternating" or "parallel" cycles of school- and work-based learning. Cincinnati employers and education providers were found to have unspoken agreements that each would continue working to maintain a "high quality equilibrium" in which the other's expectations would continue to be met. Identifiers—City University of New York La Guardia Comm Coll

Co-op seminars are a key component of the cooperative education (CE) program at LaGuardia Community College in New York City. All LaGuardia students must enroll in CE and attend a series of co-op seminars that raise general issues about work, occupations in general, and the competencies required on the job. The seminars serve as a form of career exploration and a mechanism of connecting school- and work-based learning. Three levels of generic and major-specific seminars are offered. Like LaGuardia's CE program, the seminars attempt to promote an approach to teaching called TAR (Teach-Apply-Reinforce) and include classroom exercises and fieldwork assignments. Over the past decade, the co-op seminar program has undergone numerous changes, including a movement toward more generic seminars, greater flexibility, and use of union-sponsored and union-supported tutoring in basic skills. The co-op seminars incorporate a range of classroom techniques, including traditional lecture, class discussion, simulations/role play, and faculty sharing of personal experiences. The co-op seminars have proved to be a successful strategy for linking school- and work-based learning and offer a number of lessons for other schools considering establishing similar connecting activities. Descriptors—*Adult Basic Education, Adult Literacy, Adult Students, Educational Research, *Group Instruction, Interpersonal Relationship, *Literacy Education, *Outcomes of Education

In the fall of 1993, a study was begun on how adult basic and literacy education (ABLE) students reacted to working in groups. The research was conducted through a joint vocational school's ABLE program using three target groups at two of its ABLE centers. The groups met two times per week and were facilitated by three different teachers. More than 40 students participated in the groups. One teacher observed a group session in progress, taking notes on one certain focus for the day. The teacher who did the teaching wrote a self-reflection about the observed lesson. Findings indicated that ABLE students truly enjoyed working in groups. Field notes revealed five principal indicators of enjoyment: participation, human bonding, positive increase in individual behavior, motivation, and physical signs of enjoyment. In 18 of 25 sessions there was 100 percent participation. The openness with which participants shared their private lives indicated a feeling of comfort and security within the confines of the group setting. As the sessions continued and the students familiarized themselves with one another, members' self-esteem increased. As self-confidence grew, so did student motivation. Perhaps the most significant motivating factor was the manner in which a group of strangers became a cohesive, critical-thinking, problem-solving entity. (YLB)

This Occupational Competency Analysis Profile (OCAP) contains a competency list verified by expert workers and developed through a modified DACUM (Developing a Curriculum) involving business, industry, labor, and community agency representatives from Ohio. This OCAP identifies the occupational, academic, and employability skills (competencies) needed to enter agriculture products processing occupations. These 23 units are included: general safety precautions; sanitation; meat processing industry; livestock purchasing; slaughtering; carcass grading; wholesale cutting; retail beef cutting; retail pork cutting; retail veal and beef-calf cutting; retail lamb, mutton, and goat cutting; miscellaneous meat merchandising; dairy and other pasteurized products; eggs; processed foods; fish and fish products; fruits and vegetables; grains; preservation of agricultural products; customer service; marketing; product handling; and business management. The units detail the knowledge, skills, and attitudes (competency builders) needed to perform each competency. Within the competency list are two levels of items, core items essential for entry-level employment, and items needed to advance in agriculture products processing occupations. The OCAP guide also contains an academic job profile based on the Work Keys system that identifies the level of applied academic skills that students must master to qualify for and be successful in their occupations; a total list of academic competencies in communication, mathematics, and science that all students should master; and a specific list of academic competencies for agriculture products processing occupations. Identifiers—DACUM Process, Ohio

This Occupational Competency Analysis Profile (OCAP) contains a competency list verified by expert workers and developed through a modified DACUM (Developing a Curriculum) involving business, industry, labor, and community agency representatives from Ohio. This OCAP identifies the occupational, academic, and employability skills (competencies) needed to enter early childhood education and care occupations. The competencies are clustered into 10 units that cover the following topics: safe environment; healthy environment; learning environment; physical competence; intellectual competence; social and emotional development and positive guidance; positive and productive relationships with families; program operations in early childhood education and care; family day care; and commitment to professionalism. In addition, employability competencies are grouped into 12 units as follows: career development; decision making and problem solving; work ethic; job-seeking skills; job retention and career advancement skills; technology in the workplace; lifelong learning; economic education; balancing work and family; citizenship in the workplace; leadership; and entrepreneurship. The units detail the knowledge, skills, and attitudes (competency builders) needed to perform each competency. Within the competency list are two levels of items, core items essential for entry-level employment, and items needed to advance in child care occupations. The OCAP guide also contains an academic job profile based on the Work Keys system that identifies the level of applied academic skills that students must master to qualify for and be successful in their occupations; a total list of academic competencies in communication, mathematics, and science that all students must master; and a specific list of academic competencies for early childhood education and care. uation Criteria, Mentors, Partnerships in Education, Postsecondary Education, Records (Forms), School Business Relationship, *State Standards, *Statewide Planning, *Student Certification, Student Evaluation, Student Organizations, Vocational Education, Work Experience Programs
 Identifiers—*School to Work Opportunities Act 1994, Secretaries Comm on Achieving Necessary Skills, *Wisconsin

This guide is intended as a resource for implementing cooperative education skills standards certificate programs in Wisconsin under the School-to-Work Opportunities Act (STWOA). Section 1 is an introduction/program overview in which information is provided on the objectives of cooperative education, program design, program eligibility, and responsibilities of cooperative education partners. Discussed in section 2 are the following school-based learning elements: school-based learning, related classroom instruction, selection of students, cooperative education agreements, learning plans, granting high school credit, learning plan-based assessment, and cooperative education program assessment. Section 3 examines work-based learning, school policies for work-based learning, and workplace mentoring, and section 4 contains seven sample forms for use in cooperative education programs. Appendixes constituting approximately one-third of the document contain the following definitions: sample school-to-work transition plan for grades K-5 through postsecondary education; list of Secretary's Commission on Achieving Necessary Skills reports; outline of related instruction; suggested mentor training components; information about Wisconsin vocational education student organizations; promotional materials; and sample application materials. Identifiers—Department of Education, Department of Veterans Affairs

The Department of Veterans Affairs (VA) contracts with state approving agencies (SAAs) to assess whether schools and training programs offer education of sufficient quality for veterans to receive VA education assistance benefits when attending them. The General Accounting Office examined the gatekeeping activities of the VA and the Department of Education during fiscal year 1994. The study focused on the standards used by SAAs and the Department of Education in reviewing schools for participation in title IV programs and on the extent to which schools and programs with SAA-approved courses were also reviewed by the Education Department's gatekeeping system. It was estimated that \$10.5 million of the \$12 million paid to SAAs in 1994 was spent to conduct assessments that overlapped those of the Department of Education. Most of the overlap involved academic and vocational schools. The remaining SAA assessment activity (costing approximately \$1.1 million) did not overlap activities of other agencies because it involved on-the-job training programs and unaccredited schools. (Appendixes constituting 50% of this document include information about the following: study scope/methodology, VA postsecondary educational assistance programs, education's gatekeeping triad, and key VA and Department of Education standards for approving courses at postsecondary academic and vocational schools.) Identifiers—*Designated Vocational Instruction, *Wisconsin

This resource and planning guide is designed to help Wisconsin school districts, community agency personnel, and education practitioners implement the designated vocational instruction (DVI) approach and thereby accelerate and enhance the ability of disabled students to meet specific instructional competencies and educational outcomes. The following topics are discussed in nine chapters: objectives and components of the DVI approach and the need for structured support services; strategies for gaining administrative support (DVI instructor and administrator roles); curriculum-based vocational assessment (collecting/using assessment data, implementing curriculum-based vocational assessment, developing a planning framework); development of instructional strategies (competency-based curriculum, motivational techniques, instructional strategies); collaboration; collaborative transition programming (principles of transition, state and federal interrelated transition laws, incorporating transition services into Individualized Education Programs); inservice training strategies (inservice planning/mechanics, effective information processing, troubleshooting); family involvement (involving parents in their children's education, understanding families' feelings, effective parent-teacher relationships); and skills employers want (acknowledging the problem, defining the skills employers want, solving the skills gap problem). End-of-chapter reference lists contain a total of 197 references. Appended are the following: transition needs assessment and information transmittal forms; functional skills inventory; and transition follow-up and program evaluation surveys. (MN)

This workbook, which is intended for secondary and postsecondary occupational instructors in Virginia who are writing competency-based curricula, explains the process of transforming an occupational task list into a curriculum framework that takes the form of a task analysis. The following topics are covered: developing the instructional task, understanding the task analysis format, organizing by duty area, constructing the task statement, se-

lecting a verb, developing the performance objective, constructing the criterion-reference measure, developing enabling objectives, developing instructional activities, and identifying resources. Answer keys at the back of the workbook make it suitable for both individualized learning and inservice workshops. (MN)

Descriptors—Adult Basic Education, *Adult Literacy, Adult Reading Programs, Comparative Analysis, Cultural Context, Demography, Economic Factors, Educational Needs, Educational Policy, Education Work Relationship, Enrollment, Foreign Countries, Functional Literacy, Participant Characteristics, *Reading Achievement, Reading Skills, Skill Development, Tables (Data), Theory Practice Relationship

Identifiers—Canada, Germany, *International Adult Literacy Survey, International Surveys, Netherlands, Poland, Sweden, Switzerland, United States

The International Adult Literacy Survey (IALS) was a collaborative effort by seven governments and three intergovernmental organizations to describe and compare the literacy skills of people from Canada, Germany, the Netherlands, Poland, Sweden, Switzerland, and the United States. Each country drew a probability sample from which results representative of the civilian noninstitutionalized population aged 16-65 could be derived. Between 1,370 and 3,053 individuals in each country completed survey instruments in English, French, German, Dutch, Polish, or Swedish. The findings were reported in four ways by three researchers. Irwin Kirsch (Educational Testing Service, Princeton, New Jersey) presented a framework for understanding/interpreting literacy levels on three scales (prose, document, and quantitative) and discussed the study results in the context of literacy's multifaceted nature. Stan Jones (Carleton University, Ottawa, Canada) analyzed the distribution of literacy across national populations and among different demographic subgroups and explored the relationship between literacy practices (at work and in the community) and levels of literacy. T. Scott Murray (Statistics Canada) considered the policy implications of the study findings. Major findings were as follows: (1) important differences in literacy skills exist across and within nations; (2) literacy skill deficits affect large proportions of the adult population; (3) literacy is strongly correlated with life chances and use of opportunities; (4) literacy is not synonymous with educational attainment; (5) literacy skills are maintained through regular use; and (7) adults with low literacy levels do not usually acknowledge or recognize they have a problem. (Seventy-one figures/tables are included. Appended are a list of survey participants and 82 additional tables detailing the distribution and practice of literacy.) (MN)

What Makes a Literacy Program Good? Some Ideas for Discussion.

Ontario Dept. of Education, Toronto.

Pub Date—17 Mar 93

Note—13p.

Pub Type—Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Adult Basic Education, Adult Literacy, Demonstration Programs, *Literacy Education, Outcomes of Education, Program Content, Program Design, Program Development, *Program Effectiveness, Program Implementation
This paper describes seven ideas that would help a literacy program work well. Some examples are given to show how each idea could be used in different parts of a literacy program. Some questions are also listed that could stimulate discussion about each idea. The seven quality guidelines or ideas are as follows: (1) community focus—a good literacy

program recognizes that each place of group of people has different needs and interests; (2) access to services—a good literacy program makes sure that the people who need the program can take part; (3) learner-centered approach—a good literacy program makes sure that learners have an equal voice in deciding what they want to learn and how they will do it; (4) effective programs and staff—a good literacy program makes sure that each learner has a positive learning experience and reaches as many goals as possible; (5) benefits from the program (equity of outcome)—a good literacy program makes sure that everyone gets what he or she needs from the program, to the best of each person's ability; (6) integration—a good literacy program helps adults to continue their learning; and (7) accountability—a good literacy program is managed and provides the best programs possible. Descriptors—Behavior Patterns, Client Characteristics (Human Services), *Counseling Techniques, Counselor Client Relationship, Data Analysis, *Data Collection, Evaluation, *Evaluation Methods, Evaluation Utilization, Personality Assessment, *Psychological Evaluation, Qualitative Research

Identifiers—ERIC Digests

Assessment is broader in scope than testing. Typically, assessment includes gathering and integrating information about a client in a manner that promotes effective treatment. This digest discusses how counselors can use assessment as a continuous process throughout treatment. It also reviews three common forms of assessment techniques which can be used in conjunction with testing: (1) Qualitative Assessment; (2) Behavioral Assessment; and (3) Past Records. Continuous assessment influences the direction of treatment for two reasons: (1) presenting concerns and client circumstances are not static and often need to be modified or re-ordered; and (2) assessment can aid in evaluating the efficacy of treatment. Continuous assessment allows comparisons between the client's initial baseline functioning and current functioning. Qualitative assessment techniques often consist of games and simulation exercises that are flexible, open-ended, holistic, and nonstatistical. Clients can process what they learned from the experience immediately within the counseling session. Behavior assessment looks at manifest behaviors. Emphasis is placed upon identifying antecedents to problem behaviors and consequences that reduce their frequency or eliminate them. Counselors should also utilize client's past records to identify important patterns and ineffective treatments. (JB)

Identifiers—*Council for Accredited Counsel and Related Educ Prog, ERIC Digests

The Council for Accreditation of Counseling and Related Educational Programs (CACREP) was organized in 1981 as the accrediting agency responsible for reviewing and evaluating counseling and student affairs practice in higher education programs against a set of nationally recognized standards. The CACREP accreditation process incorporates a pattern of review that includes integral self-study of the program against nationally accepted criteria, followed by an on-site visit by an evaluation team, and a subsequent review and accreditation decision rendered by a central governing group. This digest explores the specific levels of assessment and evaluation involved in the CACREP accreditation process as well as provides an overview of the curricular experiences in assessment and evaluation. Descriptors—Achievement Tests, *Counselor Certification, *Counselor Evaluation, Counselor Training, *Credentialed, Evaluation, Evaluation Criteria, Evaluation Methods, Higher Education, Mastery Tests, *Standards, Supervision, Testing

Identifiers—ERIC Digests, National Board for Certified Counselors

Certification of professional counselors is presently viewed in two realms, that of state regulation and of national voluntary credentialing. This digest considers national voluntary certification. The first national certification began in 1972; in 1983 the National Board for Certified Counselors (NBCC) began certification for general practice counselors. Clinical mental health counselors and career counselors have merged with NBCC to become a specialty certification of the general practice of counseling. Across the realm of certifications in the counseling profession is the common thread of assessing individual counselors, training, supervision, experience, and knowledge; the similarities across the processes are remarkable. Other areas of assessment include job analysis and continuing training. Job analysis is not directly applied to the individual applicant for certification, but to a large group of practicing professionals. It is the precursor to assessment of certificants. Continuing training is an ongoing assessment practice that begins after credentialing is achieved. While counseling is an emerging profession, the NBCC has kept pace with national mandates for state-of-the-art assessment techniques. (JBJ)

Descriptors—Counseling, Counseling Effectiveness, *Counselor Evaluation, *Counselor Performance, *Evaluation Methods, Evaluation Research, Evaluators, Outcomes of Treatment, Personnel Evaluation, Psychological Evaluation, Self Evaluation (Individuals)

Identifiers—ERIC Digests

Assessment of counselor performance is directly linked to assessment of counseling outcomes because counseling outcome is contingent upon counselor performance. Thus, the assessment of counseling outcome literature is the general context for the more specific literature on assessment of counselor performance. Historically, counselor performance has been assessed primarily in regard to actual counseling service rendered through assessments by counselors, clients, or external evaluators. Each of these areas is examined. Recently, non-counseling activities also have been assessed as part of the overall evaluation of counselor performance. Good assessment involves multiple measurements of whatever is being assessed. There are literally hundreds of assessment instruments and techniques available to assess various facets of counselor performance. Ironically, however, some experts have suggested that there are too many measures of counselor performance. Counselor performance assessment will be enhanced when assessments are clearly and cogently described and are used within an effective conceptual scheme. Additionally, assessments used need to fulfill accepted psychometric quality criteria. (JBJ)

Identifiers—ERIC Digests

To achieve accountability, evaluation is needed concerning: the nature, structure, organization, and implementation of school district/building guidance programs; the school counselors and other personnel who are implementing the programs; and the impact the programs are having on students, the schools where they learn, and the communities in which they live. In order to fully evaluate comprehensive school guidance programs, three forms of evaluation are required. First, the program must be reviewed using program standards, evidence, and documentation to establish that there is a written guidance program in a school district and/or building and that the written program is the implemented program. Second, guidance program personnel need job descriptions derived directly from the program so that evaluation forms can be developed and used for formative and summative personnel evaluation. Third, results evaluation that focuses on the impact of the guidance and counseling activities in the guidance curriculum, individual planning, responsive services, and system support components of a comprehensive guidance program is mandatory. Identifiers—ERIC Digests

The nature of classroom assessment is changing. Teachers are being urged to rely less on traditional

tests and more on innovative measurement methods, such as performance tests and portfolio assessments. This digest describes a strategy whereby student services personnel can play a leadership role in familiarizing classroom teachers and school administrators with the payoffs and perils of emerging classroom assessment methods. School counselors can play a key role in promoting better use of new assessment procedures if they acquire a reasonable degree of knowledge about such measurement procedures, then dispense that knowledge to the teachers with whom they work. More knowledgeable use of new classroom assessment strategies will lead to more accurate assessment-based inferences about students and more defensible instructional decisions by teachers. (JBJ)

Not since the development of the objective paper and pencil test early in the century has an assessment method hit the American educational scene with such force as has performance assessment methodology in the 1990s. Performance assessment relies on teacher observation and professional judgment to draw inferences about student achievement. Educators have begun to embrace the reality that some targets, like complex reasoning, skill demonstration and product development require the use of subjective, judgmental means of assessment. This digest provides a summary of attributes of sound assessments and the rules of evidence for using them well. Various ways to take advantage of this information are presented. The following aspects are detailed: The Basic Methodology; Sound Performance Criteria; Sound Performance Exercises; Effective Scoring and Recording; and Performance Assessment in the Guidance Context. Identifiers—ERIC Digests

A portfolio is a meaningful collection of student work that tells the story of student achievement or growth. There are two basic reasons for doing portfolios—assessment or instruction. Benefits for using portfolios in instruction include the development of students self-reflection, critical thinking, responsibility for learning, and content area skills and knowledge. Assessment use of portfolios, a collection of multiple samples of student work over time, enable one to: (1) get a broader, more in-depth look at what students know and can do; (2) base assessment on more "authentic" work; (3) have a supplement or alternative to report cards and standardized

tests; and (4) have a better way to communicate about student progress to parents. Three common assessment uses of portfolios are: (1) certification of competence; (2) tracking growth over time; and (3) accountability. Strong portfolio systems are characterized by a clear vision of the student skills to be addressed, student involvement in selecting what goes into the portfolio, use of criteria to define quality performance and to provide a basis for communication, and self-reflection through which students share what they think and feel about their work, their learning environment, and themselves. Descriptors—At Risk Persons, Community Action, Community Programs, *Conflict Resolution, Counseling, Counselors, Crime, *Crime Prevention, *Crisis Intervention, Curriculum, Delinquency, Elementary Secondary Education, Fear, Health Promotion, *High Risk Students, Homicide, Models, Peace, Prevention, Program Descriptions, Resource Materials, Victims of Crime, *Violence, Youth Problems, *Youth Programs

There were 2.7 million incidents of child abuse or neglect reported to authorities in one year. Between 1986 and 1992, the total number of children killed by firearms rose by 144 percent. A 1990 survey of inner-city young people in Baltimore found one in four teenagers had witnessed a murder and three in four knew someone who had been shot. What these statistics say is that American young people are being killed and maimed in record numbers. This guide was developed in conjunction with the National Campaign to Reduce Youth Violence. Designed to encourage involvement in preventing youth violence, the following topics are covered: (1) "Models that Work" describes two community based programs and two school-based programs, highlighting key elements and approaches; (2) "Curricula to Prevent or Reduce Violence" is a guide to some of the most widely used curricula for reducing youth violence; (3) "Moving beyond Fear: A Framework for Action" provides steps for getting involved in community-based violence reduction programs; (4) "Initiatives" describes programs to reduce violence with addresses and phone numbers; and (5) "Resources" lists names, addresses, and descriptions of selected national and local organizations that provide information, materials, or other resources on violence prevention. Identifiers—*North Dakota, *North Dakota Youth Survey

An anonymous survey of health and sexual behavior statistics from adolescents in North Dakota is presented in this document. Seventeen thousand students from North Dakota schools in grades 9-12 participated in the survey. Survey questions were taken from the following categories: (1) safety; (2) suicide; (3) tobacco, alcohol and other drugs; (4) sexual behavior; (5) nutrition; (6) dental health; and (7) physical fitness. Major findings were: (1) North Dakota students are more likely to drink alcohol heavily and use smokeless tobacco excessively and are less likely to take safety precautions; (2) North Dakota students are less likely to have sexual intercourse, more likely to use condoms and less likely to become involved in physical fights; and (3) North Dakota Students are more likely to participate in school physical fitness activities. A copy of the survey as well as tables indicating how North Dakota Student responses compared to the national average are included in the document. (SR)

Identifiers—Council for Accredited of Counsel and Related Educ Prog, Graduate Record Examinations

In the spring of 1986 the first of a series of studies was undertaken by the faculty members in counselor education at Western Carolina University to revise and validate the admissions standards for the master's degree programs in counseling. Impetus for these efforts was provided by a request from the Dean of the Graduate School for all graduate programs to review their admissions standards and by the decision of the faculty to undertake a self study in preparation for a planned request for accreditation consideration by the Council for the Accreditation of Counseling and Related Educational Programs (CACREP). In the first phase all graduates of the counseling program (N=171) were rated independently by four members of the faculty. Exemplary and marginal students' Graduate Record Examination (GRE) scores and grade point average (GPA) were examined. GPA was the highest correlate of faculty ratings of graduate's ability. Phase Two found the GRE Analytical score as the most powerful predictor of graduate GPA. In Phase Three tentative new admissions standards were set, examined, and adopted. Finally, in Phase Four a follow up study was conducted to determine effectiveness of the new admissions standards. The GRE Analytical score remained the best predictor of academic performance in counselor education. Additional evidence of the effectiveness of the revised admissions standards was reported. (JBJ)

Available from—Berkley Publishing Group, 200 Madison Avenue, New York, NY 10016 (\$12 U.S., \$17 Canadian).

Pub Type—Books (010) — Guides - Non-Classroom (055)

Document Not Available from EDRS.

Descriptors—Bias, Children, Childrens Television, *Conflict Resolution, Critical Thinking, Cross Cultural Training, Cultural Pluralism, Elementary Secondary Education, *Mass Media, *Multicultural Education, Peace, Peer Influence, *Prosocial Behavior, Racial Bias, Self Esteem, Sex Bias, Sex Differences, Stereotypes, Violence

This guide presents a hands-on approach to teaching children the values that will help them live in today's changing world. Parents and teachers are given practical ways to combat prejudice and discourage hatred and violence. Part 1 discusses the roles of the home and family, focusing on conditioning for hatred and violence as it occurs through war toys, video games, and the mass media. A second chapter contains suggestions for evaluating the literature a child reads. Part 2 focuses on the school, with the section's first chapter devoted to the school climate and the need for a supportive setting. Growing up equal is the focus of the section's second chapter, with emphasis on gender fairness and equality. The third chapter of part 2 describes parent participation with teachers. Part 3 moves to encompass home, school, and the community, beginning with a discussion of multiculturalism in the community and the school, and an exploration of communicating across cultures. Many of the strategies for promoting peace are based on building self-esteem and the confidence to resist peer pressure. (Contains 90 resources, a list of key words, and 170 references.) (SLD)

Descriptors—Adolescents, *Alcohol Abuse, Curriculum, *Drug Abuse, Guides, Peer Influence, Self Esteem, Social Support Groups, Stress Variables, Youth

Identifiers—Project Head Start

Developed with the Head Start family in mind, this training guide, one in a three-part series, instructs parents on how to prevent substance abuse in their children. This curriculum is intended to: (1) ensure and enhance adequate child development, learning, and personal social growth; and (2) build family skills, understanding, confidence, and support in parents. The guide is divided into ten modules dealing with adolescent substance abuse prevention: (1) Orientation: Tuning In on the

Times; (2) We Are Family; (3) Self-Esteem; (4) Communication; (5) Stress; (6) Developing Support Groups; (7) All Around the Community; (8) Health Issues Related to Alcohol and Other Drug Abuse; (9) Values and Peer Pressure; and (10) Appreciating Our Families. Five appendices provide additional resources on guides, booklets, reports, curriculums, and general organizations and support groups that address substance abuse prevention. (SR)

Therapist In-Session Functioning that Positively Affects Psychotherapy Outcome.

Pub Date—95

Note—74p; Doctoral Research Paper, Biola University.

Pub Type—Dissertations/Theses - Undetermined (040)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—*Client Characteristics (Human Services), *Counselor Client Relationship, Intervention, Psychotherapy, *Therapy

This review identifies two areas of therapist in-session functioning that contribute to positive psychotherapy outcome. The first area discussed is therapist interpersonal characteristics, or non-specific factors, and therapist interventions that contribute to establishing and maintaining a therapeutic alliance. Alliance has been shown in psychotherapy outcome research to be correlated to positive therapy outcome. The second area discussed is therapist interventions that contribute directly to positive psychotherapy outcome. Implications for therapist functioning both as a result of characteristics and interventions are discussed. Research in this document suggests that: (1) an active collaborative involvement in therapy by patients and the patient's positive experience of the therapist's relationship qualities are essential for successful psychotherapy outcome; (2) establishing and maintaining a strong working alliance between patient and therapist is necessary for successful therapy outcome; (3) therapists contribute to successful outcome through offering a relationship based on warmth, friendliness, genuine caring, understanding, and acceptance; and (4) therapists can further facilitate successful outcome by providing a consistent and purposeful approach and by considering the level of psychological maturity of the client. Contains 45 references. (Author/SR)

Descriptors—*Academic Achievement, Adolescents, *Dropouts, *Educational Environment, *Employment, Family Environment, Foreign Countries, High School Students, Questionnaires, Social Class, Student Educational Objectives, Teacher Student Relationship, *Truancy

This survey obtains information on: (1) the educational and employment activities of young people after they leave school; (2) the views and experiences that these youth have on school; and (3) background characteristics affecting these youth, such as parental level of education, social class, family circumstances, and housing tenure. The survey uses a 10% sample of students aged 16-18 who left school during the 1992-93 academic session. Results of the survey show that a majority of the dropouts felt positively about their teachers, but 16% thought the teachers did not care about them, 31% felt that their teachers could not keep order in the class and 44% felt that there were too many trouble makers in class. Evidence suggests that the parents of these subjects allowed them a great deal of independence and that this may have been a factor affecting the subjects' dropping out of school. Only 31% said that their parents limited their time for going out on school nights. Results also show that subjects were generally positive about their near future: most expected to be either in full time jobs or full time education one year later. Two appendices contain technical notes and the questionnaire. (SR)

Descriptors—Case Studies, *Child Health, Elementary Secondary Education, Health Care Costs, Health Facilities, Medical Services, Mental Health, *Public Health Legislation, *School Health Services, *School Nurses, School Personnel, Sick Child Care

Identifiers—*Health Care Reform, *School Based Health Clinics

This study examined one method of delivering care to underserved children: school-based health centers (SBHCs). These centers, located on school grounds, can provide preventative, medical and mental health services to children of that school. Results of the study suggest that SBHCs do improve children's access to health care. SBHCs can help to overcome financial and nonfinancial barriers that currently limit access, including the lack of health insurance, transportation difficulties, and insufficient attention to the particular needs of adolescents. School-based health centers around the nation face a common set of problems. For example, centers lack a stable source of funding, do not always have sufficient resources for meeting their patients' health needs, and have difficulty obtaining reimbursement from public and private insurers. They also face problems recruiting and retaining

appropriately trained staff. Furthermore, local debates over the appropriateness of providing reproductive health services in SBHCs have constrained centers' ability to meet some adolescents' health needs. Federal health care reform that increases access to insurance coverage could alleviate some of the problems faced by SBHCs. However, reform that includes expansion of the role of managed care networks may exacerbate financing problems because of the reluctance of these networks to reimburse SBHCs. (JB)

Identifiers—*Canada

An information guide for people who help newcomers, this book helps second language teachers plan the content of their courses, and makes it easier for settlement agency workers to respond to newcomers' needs. The method it advocates is question and answer, newcomer asking the questions, with the ultimate goal of providing newcomers a better understanding of Canada. Materials are provided at both the level of survival needs, as well as that of "higher needs." The organizational principal is a hierarchy of needs. Divided into five parts, each corresponds to a level of need. Part One, Survival Needs, covers: geography; weather and climate; food; clothing; shelter; and avoiding embarrassment. Part Two, Safety Needs, covers: economic security; employment; shopping; laws and safety of the person; health; and, an introduction to Canadian government. Part Three, Love and Social Needs, covers: public behavior; Canadian families; women's, children's and senior citizen's rights; education; Canada, a country of many peoples; and, holidays, recreation and entertainment. Part Four, Esteem Needs, covers: authority; banking, saving, spending; ethnicity and multiculturalism; and religion and belief. Part Five, Self-Actualization Needs, covers: citizenship; personal goals; politics; the arts, sports, communications; and success in Canada: what Canadians admire. (JB)

Even parents who are very involved in their children's day-to-day lives have difficulty resolving school problems, largely due to lack of information. This document outlines the workings of the public and private school systems and provides parents with methods for coping with common school-related problems that may affect their children. Topics of interest are arranged in alphabetical order and contain the following information: (1) summaries of the best studies, research, and conclusions reached by school psychologists on this issue; (2) a clear listing and explanation of red flags in the child's behavior that may indicate that professional help is needed; (3) solutions and approaches; and (4) details of what the school psychologist, and in some cases, other school personnel such as reading or speech-language pathologists will do for a child. App

pendices in the document provide information on: (1) organizations and associations of help to parents; (2) tips for helping children through crises; and (3) samples of names and purposes of tests typically used by school psychologists. Also contains a detailed index. (SR)

Identifiers—*Australia

This literature review compiled a survey of Australian research related to identification of students at risk and school-related programs which respond to these risks. Thus, two major components of this report are titled "Student Retention and Risk Factors" and "Programs for Students at Risk." Students at risk were defined as those who left before completing Year 12. In part I, coverage of references on retention is followed by a description of risk factors and ways in which they are associated with or causally related to early school leaving and underachievement. References to literature on retention are considered in relation to the individual student, the family, the school, and society. The relationship of risk factors to educational outcomes, and ways potential early leavers are identified are discussed. Part II focuses on school-based programs. Attention focuses generally on students at risk, but reference is made to particular risk factors and certain groups. It concludes with a discussion of characteristics of successful programs. Part III draws together threads of the review in terms of key issues in educational provision for students at risk that have emerged from the literature. (JBJ)

All adolescents feel anger, frustration, and a range of temperamental disturbances due to the many physical, emotional and social stresses associated with their developmental stage. This document provides Australian and international perspectives on programs, both in schools and in the wider community, which attempt to prevent and treat the more harmful experiences that children and adolescents may suffer during high growth years. Also provided is an overview of the leading themes and issues faced by educational and other agencies that offer programs for at-risk youth. Special attention is given to programs that maintain and enhance educational

progress during the years of adolescent experience. Sections are entitled as follows: Competing Claims at the Centre of the Debate; Distinctions between Prevention and Treatment; The At-Risk Population; Substance Abusers as a Key At-Risk Sub-Group; Other Issues Associated with Adolescent Development; Designing and Providing Programs—Some Broad Considerations; Designing and Providing Programs—Some Specific Examples and Criteria; Students Participating in the Program; Other Large Trends in Program Provision; Programs in Schools, and Out-of-School Programs in Which Schools Participate; How Can Schools Keep Their Youth in a Program?; From Work Experience to Career Pathways; Staffing and Managing Out-of-School Programs; Mentors and Mentoring; A Case Management Approach; and Summer Youth Employment Programs as an Option. The document also contains a reference list of resources that address at-risk youth; a brief synopsis is included with each listed resource. Contains 91 bibliographic entries and references, and an index of issues and strategies. (SR)

Conducted to evaluate the efficacy of teen counselors in school drug prevention programs, this study utilizes the following as evaluation criterion: (1) interviews with school faculty and teen counselors; (2) observations of teen counselor meetings and sessions with middle school students; and (3) documentation such as teen counselor training and resource materials. Subjects were two teen counselors from an area school district. Findings from the study suggest that teen counseling programs can be both cost efficient and effective in the prevention of substance abuse. Included in the document are transcripts of actual sessions conducted by the interviewed teen counselors. (SR)

The deterioration of school environments in conjunction with large numbers of dropouts are related issues of national concern. This longitudinal study evaluates student exposure to unsafe public schools during adolescence as a potential risk factor for dropping out by 10th grade. A panel of 13,217 public school students assessed at base year and 2 years later was drawn from a national database. Perceived safety in the 8th grade as compared to 10th grade was evaluated in the presence of demographic characteristics. The findings suggest that students exposed to unsafe schools are at risk of dropping out. Contains 25 references; 2 tables present statistical analysis. (SR)

Descriptors—*Counselor Training, Elementary Secondary Education, Higher Education, *Internship Programs, Practicums, School Counselors, Surveys, Training

The purpose of this study was to gather information concerning how school counseling graduate training programs are meeting the challenges of providing practicum and internship experiences. Subjects were 186 (55% of 341 surveyed) program faculty from school counselor preparation programs. A national survey assessed the practices of counselor training programs in providing experiential components such as practica and internships for school counselors in training. Analyses indicated considerable diversity among training programs. Practices reflect continuing trends toward longer, more rigorous and accredited programs. Internships are viewed as highly positive. Work may be needed in the areas of consistency in expectation of activities performed during internship and the training and remuneration of site supervisors. Three tables present results from surveys given to the school counseling preparation faculties. (SR)

Role Perception Study of School Counselors.

Pub Date—May 95

Note—46p.; Research Paper, Sam Houston State University.

Pub Type—Reports—Research (143)—Tests/Questionnaires (160)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Administrator Attitudes, *Administrators, Attitudes, Counselor Attitudes, Differences, *Role Perception, Scheduling, *School Counselors, Secondary Education, Teacher Attitudes, *Teachers

This study was designed to identify any differences in the perceptions of administrators, counselors, and teachers regarding the role of secondary school counselors. A literature review found that different groups had varying expectations of school counselors. The null hypothesis for the study is: There is no significant difference in the expectations of administrators, counselors, and teachers regarding the role of secondary school counselors. A questionnaire was distributed to a sample of 40 principals, counselors, and teachers employed by the Bryn Independent School District in order to solicit their opinions regarding the various roles of school counselors. Results from the 34 returned questionnaires indicated that there were no significant differences in the perceptions of the aforementioned groups regarding the role of secondary school counselors in performing personal counseling, group counseling, and academic counseling. However, the data showed that there was a significant difference in the expectations of teachers as compared to administrators and counselors regarding the issue of planning the master schedule, scheduling students, and/or balancing class loads. Appendixes include: cover letter, questionnaire, and unused tables. (JBJ)

EDRS Price - MF01/PC06 Plus Postage.

Descriptors—*Citizenship, Counseling Techniques, Counselors, Cultural Differences, *Cultural Pluralism, Culture Conflict, *Daily Living Skills, Employment, Federal Programs, Foreign Countries, *Immigrants, Immigration, Interpersonal Competence, Interpersonal Relationship, Orientation Materials, Population Distribution, Population Trends, *Reference Materials, Safety, Self Actualization, Self Esteem, Social Workers

Identifiers—*Canada

This guide is a national reference document that gives immigration and settlement workers access to concepts and printed materials that can help them do their jobs. Its purpose is to help immigration and settlement workers respond appropriately to newcomers' problems and questions as they concern Canada's customs, institutions and public behavior. It is not a list of programs and services offered by specific departments or agencies; however, it does help identify responsibilities of federal departments

and agencies and distinguish among federal, provincial and local responsibilities. Section One, "Information about Newcomers," provides an understanding of newcomers and the immigration experience; and suggests how Canadians can help newcomers. Section Two, "Helping Newcomers Live in Canada," is a guide to other information sources that provide answers to questions newcomers frequently have about many situations. It is divided into five parts arranged in a hierarchy that starts with basic survival needs, moves on through safety, social and esteem needs to matters concerned with personal fulfillment. This guide brings together some of the most effective techniques and approaches used by helping agencies all across Canada. Appendices include an alphabetical bibliography and important addresses and telephone numbers. (JBJ)

Descriptors—Counseling, Counseling Techniques, Counselors, Group Counseling, Group Structure, *Group Therapy, *Program Descriptions, *Rape, *Sexual Abuse, Therapy, Victims of Crime

Counseling survivors of sexual abuse requires acknowledgment of the legitimacy of the client's ego defenses while helping the client abandon those defenses which have become obstacles to leading a fulfilling life. Such defenses may also impede the therapeutic process, as survivors are less likely to trust other people. Clients can arrive at a meaningful understanding of their abuse histories, attain emotional peace, and develop healthy relationships with others. This lesson explains the rationale, format, goals and themes for a specific model of short term group work. It is designed to provide a safe environment for clients to disclose their histories of sexual abuse as well as to process negative emotional fallout. As the client progresses through therapy, she or he will require the counselor's assurance that experiencing pent-up emotions and confronting the reality of personal vulnerability does not entail a loss of control. Eight themes (one for each week) progressively take the group members on a journey of self-exploration that puts them in touch with their self-esteem, emotions, communication styles, and means for conflict resolution. All aspects of the group are described from goals to client selection to descriptions of weekly meetings to termination. Contains 26 references, a short list of recommending reading, and 4 multiple-choice questions. (JBJ)

Descriptors—Behavior Patterns, *Child Abuse, Children, Cognitive Processes, *Coping, Counseling, Counseling Techniques, Counselors, Life Events, Mental Health, Personality Traits, *Psychological Patterns, Psychotherapy, Sex Differences, Sexual Abuse, Stress Management, Therapy, Victims of Crime

Identifiers—*Adults Molested as Children
 Estimates indicate that 1 in 4 women and 1 in 7 men have been sexually abused as children. These statistics may be underestimated based on anecdotal

information relayed by many therapists who specialize in working with survivors of childhood sexual abuse. Effects of childhood sexual abuse have far reaching implications for the survivors' abilities to cope with both everyday stressors and more intense life events. General models of personality and coping styles provide a useful framework for understanding and promoting successful coping in survivors of childhood sexual abuse. One personality style is hardness. Hardy persons are thought to withstand difficult life situations using a combination of three cognitive appraisal processes: control, commitment, and challenges. Resilience, a second style, is characterized by the ability to move beyond hardships. Coping styles that promote or impede a person's ability to manage life circumstances were examined. Three common themes were: meaning/commitment, control, and challenge. Coping and resilience are covered, with a focus on gender differences. Finally, implications for counseling and psychotherapy are presented. Contains 30 references. (JBJ)

Each year thousands of young people are killed and injured in alcohol-related crashes. In 1992, Join Together, convened a national policy panel on underage drinking in direct response to communities' demands for action. This document is a product of the panel's findings. Section I, Recommendations to Reduce Underage Access to Alcohol, made five recommendations: (1) It should be illegal for individuals under age 21 to drive with any measurable amount of alcohol in their bodies; (2) There should be a 5-cent per-drink increase on the current federal excise tax on all alcoholic beverages; (3) All retail outlets and private individuals should be held liable for negligently providing alcohol to a minor; (4) Each television, radio, and cable operator who runs advertisements promoting alcoholic beverages should be required to provide equal time for counter advertisements about the health risks associated with alcohol consumption; and (5) Local government officials and community coalitions around the country should systematically assess teen access to alcohol in their communities and examine ways to reduce this access. Section II, Action Steps for Your Community, covers building community support and strategies to reduce underage access to alcohol. Contains 75 references and lists of panel participants, general resources, and publications. (JBJ)

 Identifiers—Middle School Students
 This digest includes several articles relating to

perceived gender differences among early adolescents. "Middle School Voices on Gender Identity" (Cynthia Mee) describes a study in which 2,000 middle school students in grades five through eight were interviewed with a 52-item open-ended questionnaire. Three statements from the questionnaire were the focus: The best thing about my gender, the worst thing about my gender, and the biggest difference between the sexes. Both boys and girls thought that boys can do more, are viewed as better, have different expectations, and have different restrictions. Boys thought of themselves as having a great deal to enjoy just by being a boy. They found little problem with being a boy and saw the biggest difference between the sexes as biological, with different biological restrictions and expectations. Girls struggled to find good things to say about being a girl and easily identified a variety of negative aspects. Eleven recommendations are made for teachers. Other articles are: "Looking Back-Toward a Practice of Courage" (Annie G. Rogers), and "A Positive Sense of Self for Girls with Disabilities" (Harilyn Rouso). Also included are a list of resource organizations and a list of WEEA resources for middle schools. (JBJ)

Pub Type—Guides - Non-Classroom (055) — Books (010)

Document Not Available from EDRS.

Descriptors—*Agency Cooperation, At Risk Persons, Case Studies, Cooperation, *Cooperative Programs, Counseling, Counselors, Delinquency, Elementary Secondary Education, High Risk Students, Homeless People, Juvenile Courts, Juvenile Justice, *Law Enforcement, Police, *Runaways, Shared Resources and Services, Youth Problems, *Youth Programs

The response of law enforcement agencies to runaway and homeless youth varies by community and individual officer. Some police departments perceive runaways as criminals while others recognize runaways as victims of family conflict or uncaring institutions who need to be helped. But in many cases police do not "see" runaways at all. This guidebook was created to encourage and facilitate collaborative efforts between law enforcement agencies and agencies that serve runaway and homeless youth. The goal of this document is to help law enforcement agencies and programs serving runaway and homeless youth to: assess the need for collaboration in their community; develop a process by which they can create a collaborative arrangement that responds to their needs; increase referrals by police and strengthen services for runaway youth and their families; reduce unnecessary adjudication and incarceration of runaway and homeless youth; and monitor and refine their collaboration. The chapters are as follows: (1) Youth at Risk; (2) Services for Runaway Youth; (3) An Introduction to Interagency Collaboration; (4) Case Studies; (5) Designing and Implementing an Interagency Collaboration; and (6) Conclusion. Four appendices include a bibliography, resource organizations, sample interagency agreements, and evaluation resources. (JBJ)

Malchiodi, Cathy A.
Who Owns the Art? An Ethical Question for Art Therapists and Clinicians.

Pub Date—95

Note—7p.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Art Activities, Art Expression, *Art Products, *Art Therapy, *Case Records, *Codes of Ethics, Counseling, Counselors, Information Storage, Legal Responsibility, *Ownership, Record Keeping, Therapy

Possibly one of the most confusing and controversial aspects of the practice of art therapy has been the maintenance, storage, and disposition of client art expressions. The AATA (American Art Therapy Association) Code of Ethics for Art Therapists and its 1994 revision, "Ethical Standards for Art Therapists," are critiqued. There has been difficulty in ascertaining from the 1994 statement whether art expressions are considered "treatment records" per se, and if they are, whether they must be retained for the stipulated 7-year period. The issue of whether the client owns the art or if it constitutes a medical record has been controversial. Record-keeping involving art expressions in the form of slides, photographs or photocopies can be problematic. Often art created in treatment is extensive, and the question of how completely to reproduce the art is problematic. While an ethical code must be compliant with existing laws and regulations, this article calls for the continued exploration of the significance, meaning and impact of art expression in the lives of clients. Adolescence is a multiplicity of events, experiences, behavior, people, and cultural meanings. This book attempts to provide detailed and in-depth analysis of the central issues related to adolescent psychology, while taking this multiplicity into account. A comprehensive representation of the topic is provided through integration of historical, socio-political, and empirical research with theories on adolescence. Following an introduction, the text is divided into four sections: (1) Fundamentals encompassing theories of adolescence, history of adolescence, and Skinner, behaviorism and adolescence; (2) The Content of Adolescence dealing with culture mass media, youth, and adolescence in English literature; (3) Nature of Adolescence discussing long-term implications of childhood attachments, and anger and sadness experiences in late adolescence; and (4) Problems in Adolescence including suicide, delinquency, childhood sexual abuse, and creativity, intelligence and achievement. Contains 36 tables, 6 figures, and a short index. Each chapter contains numerous references. (SR)

Identifiers—Canada, *Narcissism

Adolescent struggle is about the forces which shape the self and direct the search for identity. It examines the factors which incline young people toward self-centeredness, irrationality and faulty decision-making. Section 1 of the book deals with the adolescent self and two of the most important determinants of adolescent behavior: egocentrism and narcissism. Forces which govern how young people think about themselves, and how these forces frequently encourage a self-protecting narrowness are defined. Section 2 explores why adolescents must struggle to attain a sturdy, worthwhile identity, and why, for many young people, the struggle for a worthwhile identity leads to "confusion"—a confusion which sometimes becomes the most important reality in their day-to-day life. Chapters are: (1) Some Introductory Comments; (2) Egocentrism and the Adolescent Thought Process; (3) Egocentric Distortions; (4) Narcissism; (5) Narcissism and the Diminished Self; (6) Friendships and Relationships; (7) The Corrupted Self; (8) Self Understanding; (9) The Nature of Adolescent Identity; (10) Identity Crisis; (11) Negativism and Negative Identity; (12) Conformity and Identity; (13) Turning Points in Identity; and (14) Further Issues in Adolescent Identity. Working Together: The Art of Consulting & Communication.

Report No.—ISBN-1-57035-041-8

Pub Date—95

Note—254p.

Available from—Sopris West, 1140 Boston Avenue, Longmont, CO 80501 (\$22.50).

Pub Type—Books (010) — Guides — Non-Classroom (055)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—Business Communication, *Communication Skills, Conflict Resolution, *Consultants, *Cooperation, Elementary Secondary Education, *Interpersonal Communication, Interpersonal Competence, Listening Skills, *Partnerships in Education, Peer Teaching, Problem Solving, Professional Services

Productive learning occurs when educators work together to create new visions, analyze important issues, and evaluate outcomes. This book explores how educators can effectively engage in peer problem solving, focusing on three aspects of the process: (1) models for consulting with colleagues in problem solving; (2) communication skills necessary for consulting; and (3) how to collaborate with colleagues with differing interpersonal styles. Within these three main areas, the essential skills that educators need for working together, such as trust building, listening, facilitating, collaborating, questioning, communication, and peer problem solving are illustrated through interactive strategies designed to empower educators to become proactive, rather than reactive with conflict. Chapter 1 begins with an overview of consulting. Chapter 2 describes a comprehensive problem-solving process. Chapter 3 explores strengths and limitations of three interactive approaches for consulting: facilitative, collaborative, and authoritative. Chapters 4 and 5 review communication skills. Chapters 6 and 7 describe the wide range of interpersonal styles. Chapter 8 explains how we can work effectively with people who have different interpersonal styles. Chapter 9 and 10 examine issues that make consulting with peers successful and those that make it challenging. Four appendices contain self-evaluations. Contains 41 references and an extensive list of resources. (JBJ)

Marquitt, James W.

Development and Implementation of a Training Program for Staff Working with Juvenile Sexual Offenders.

Pub Date—95

Note—109p.; Ed.D. Practicum, Nova Southeastern University.

Pub Type—Dissertations/Theses — Practicum Papers (043) — Tests/Questionnaires (160)

EDRS Price - MF01/PC05 Plus Postage.

Descriptors—*Antisocial Behavior, *Delinquency, Delinquent Rehabilitation, Foster Care, Group Homes, Professional Continuing Education, *Professional Training, Residential Care, *Sexual Abuse, Sexuality, Violence, *Youth Problems

Identifiers—*Juvenile Sex Offenders

A staff needs assessment found an overwhelming

number of staff (n=55) felt the need for additional training in working with juvenile sexual offenders in their care. This practicum was designed to assist them in meeting the needs of children with sexual victimization and/or sexual offense issues in an effective and appropriate manner. Training curricula were unavailable from the organization or a statewide organization of agencies working with juvenile sexual offenders. Focus was placed on treatment priorities put forth by the National Task Force on Juvenile Sexual Offending. The training involved staff working in community-based programs and in a self-contained residential program. Evaluation results indicate that the training did enhance understanding of staff in relation to working with juvenile sexual offenders, and just as importantly, increased their receptiveness to working with this population. The training was seen as valuable by staff, and the training maintained a positive sustained effect over a 2-month implementation period. Appendices, accounting for approximately half of the document, include: staff needs assessment; night log; sex offender treatment survey; presentation outline; videotape authorizations; follow-up surveys; follow-up surveys by location. Also contains 27 references. (JBJ)

Aboud, Faye

Reducing the Incidences of Violence on or by Middle School Students through Development and Implementation of a Prosocial Skills/Conflict Management Program.

Pub Date—95

Note—120p.; Ed.D. Practicum, Nova Southeastern University.

Pub Type—Dissertations/Theses — Practicum Papers (043) — Tests/Questionnaires (160)

EDRS Price - MF01/PC05 Plus Postage.

Descriptors—Aggression, *Behavior Modification, *Conflict Resolution, Counseling, Delinquency, Grade 6, Grade 7, Grade 8, Intermediate Grades, *Interpersonal Communication, Interpersonal Competence, Junior High Schools, Middle Schools, Parent Participation, Problem Solving, *Prosocial Behavior, Self Esteem, Social Behavior, Social Development, Urban Education, *Violence

Identifiers—*Conflict Management, *Middle School Students

This practicum was designed to address the problem of middle school students reacting to and handling conflict situations with violent behavior in an urban environment. These responses affected the well-being and safety of all middle school students at the school. The major goal was for middle school students to increase their awareness of conflicts as a natural part of daily life and resolve them without violence through problem-solving skills. The participants were 60 6th, 7th, and 8th grade students. The following tools were developed for this practicum: (1) student questionnaire; (2) thirty-two interactive classes for middle school students; (3) teacher survey; (4) direct observation checklist; (5) appropriate handouts; and (6) a two-session workshop for educators and parents on conflict management and prosocial skills. Analysis of the data demonstrated that the middle school students became more aware of conflict management skills during a conflict situation and were able to resolve conflict without violence through problem-solving strategies. Additionally, there was a decrease in confrontational behavior during incidences of potential disruption. Eight tables are included, as well as the following appendices: student questionnaire; teacher survey; direct observation checklist; pre- and post-test questionnaire (student); pre- and post-test questionnaire (teacher); pre- and post-direct observation checklist. Contains 49 references. (JBJ)

Identifiers—Scotland, Wales

The Scottish Road Safety Campaign and the Road Safety Council of Wales have made a large investment in theater tours as a method of providing road safety education. This study aimed to evaluate the effectiveness of a road safety message delivered by a theater group. Road Safety Officers (RSOs), or, teachers for pupils in upper secondary classes. Five schools were the primary focus of the study. Evaluation was based on three criteria: imparting factual information; raising pupils' awareness of road safety issues; and changing their attitudes on drinking and driving. Certain key areas in students' knowledge were influenced by the presentations. After the presentations students were more likely to: acknowledge they could not reduce the amount of alcohol already in their bloodstream by, for example, drinking hot coffee; agree that a zero alcohol limit should be enforced; and agree that the drinking and driving message was relevant for them irrespective of age or circumstance. Students expressed a clear preference for the theater presentation. Several feedback points were included. The impact of using Welsh language as a medium was examined. Implications for content, method of future teaching and learning related to drinking and driving were reviewed. Contains 41 references and extensive appendices and tables. (JBI)

Gillies, Robyn M., Ashman, Adrian F.
Promoting Cooperative and Helping Behaviours in Student Work Groups through Training in Small Group Processes.

Pub Date—[95]

Note—7p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Academic Achievement, Active Learning, Cooperation, *Cooperative Education, *Cooperative Learning, Elementary Education, Elementary School Students, Foreign Countries, *Group Dynamics, Grouping (Instructional Purposes), Helping Relationship, *Learning Strategies, *Student Participation, Team Training

Identifiers—Australia

Research in recent years has demonstrated that cooperative learning is a highly effective classroom intervention that promotes student learning and development across a range of curriculum areas. This study compared the effects on behavioral interactions and achievement of (1) cooperative learning in which members were trained to collaborate to facilitate each other's learning; and (2) cooperative learning in which members were not trained but were merely told to help each other, on 192 Year 6 children. Stratified random assignment occurred so that each four-person group consisted of one high, two medium, and one low-ability student. All groups were gender balanced. The children worked in their groups on the same social studies unit, three times a week for 12 weeks. The results indicated that the children in the Trained groups were consistently more cooperative and helpful to each other, they used language which was more inclusive (e.g., frequent use of "we"), and they gave more explanations to assist each other as they worked together. Furthermore, the children in the Trained groups achieved higher learning outcomes than their peers in the Untrained groups. (JEF)

Steroids and Other Ergogenic Aids: A Resource Guide.

Virginia State Dept. of Education, Richmond.

Pub Date—93

Note—109p.

Pub Type—Guides - Non-Classroom (055)

EDRS Price - MF01/PC05 Plus Postage.

Descriptors—*Athletes, Athletic Coaches, Athletics, *Drug Education, Drug Use, High Schools, High School Students, *Illegal Drug Use, *Prevention, School Counselors, Social Influences, Social Problems, Teachers, *Youth Problems

Identifiers—*Steroids, Virginia

Steroids have become one of society's "short cuts" to athletic prowess and success. This guide includes information and teaching materials for ed-

ucators and others who work with youth on how to teach that steroids are drugs, that drugs can harm and kill, and that a "no-use" policy applies to steroids as well as to alcohol and other drugs. It is designed to educate students about the dangers of anabolic steroids and other supposed body-enhancing drugs. Chapters are: (1) How to Use this Guide; (2) What are Steroids? (3) The History of Steroid Use; (4) Reasons for Steroid Use; (5) Social Influences that Encourage Steroid Use; (6) How Steroids are Used; (7) Risks and Side Effects of Steroid Use; (8) Signs and Symptoms of Steroid Use; (9) Sources of Steroids; (10) Legal and Ethical Issues of Steroid Use; (11) Testing for Steroids; (12) The Role of Schools in Addressing Steroid Use; (13) The Role of Parents in the Prevention of Steroid Use; and (14) Other Ergogenic Aids. Appendices include references, a steroid fact sheet, glossary, resources, suggested readings and suggested audiovisuals. Transparency masters are also included. (JEF)

Celebrate Life! A Guide for Planning All Night Alcohol/Drug-Free Celebrations for Teens. Fifth Edition.

Virginia State Dept. of Education, Richmond; Virginia State Dept. of Motor Vehicles, Richmond; Virginia State Police Association, Richmond.

Spons Agency—Office of Elementary and Secondary Education, Washington, DC. School Improvement Programs.

Pub Date—Oct 94

Note—147p.

Pub Type—Guides - Non-Classroom (055)

EDRS Price - MF01/PC06 Plus Postage.

Descriptors—Alcohol Abuse, *Drinking, Drug Abuse, Grade 12, *Graduation, *Health Promotion, High Schools, Illegal Drug Use, Intervention, *Partnerships in Education, Program Guides, Recreational Programs, *School Recreational Programs, Youth Programs

Identifiers—*Proms

The two highest risk nights for teens are prom and graduation. Many students feel as if they have not really celebrated if they have not been drinking or using other drugs. Virginia Operation Prom/Graduation (OP/G) addresses the issues of youth drinking, drugging, and driving behavior during these high-risk social seasons. It encourages a positive approach to negative stereotypical perceptions of what teen "rites of passage" traditions have been by providing alternative drug-free teen celebrations. Topical sections are: (1) About Operation Prom/Graduation; (2) Why Bother?; (3) Everyone Benefits; (4) General Information; (5) Party Guidelines; (6) Party Facility; (7) Taxes, Licenses, Insurance, Etc.; (8) PTA-Celebration Committee Relationship; (9) The Steering Committee; (10) Activities; (11) Chaperons/Security; (12) Clean-up; (13) Decorations and Themes; (14) Food; (15) Funding; (16) Prizes; (17) Publicity; (18) Tickets, I.D., Entry Packets; (19) Volunteers; (20) Small Parties; (21) Lack of Resources; (22) Help Each Other; (23) Just for Students; (24) Resources; and (25) Virginia OP/G Honor Roll Awards Program. Appendices include sample letters, forms, and reports. (JBI)

Learning to Manage Anger: Discussion Leader's Manual for the RETHINK Workout for Teens.

Institute for Mental Health Initiatives, Washington, DC.

Pub Date—88

Note—28p.

Available from—Research Press, 2612 N. Mattis Ave, Champaign, IL 61826 (\$4.95); videotape, "Learning to Manage Anger: The RETHINK Workout for Teens" available.

Pub Type—Guides - Non-Classroom (055)

Document Not Available from EDRS.

Descriptors—Affective Behavior, *Anger, *Behavior Modification, *Conflict Resolution, Counseling, Emotional Problems, High Schools, Junior High Schools, *Mental Health, Moods, Psychologists, *Role Playing, School Counselors, School Psychologists, *Self Management, Social Workers, Teaching Guides, Violence

Although anger is a universal emotion, many normal people have great difficulty expressing this feeling. It is associated with physical as well as emotional manifestations, and has serious, destructive social ramifications. Several cognitive skills have been identified in the constructive use of anger: focus strategies, cognitive restructuring, self-in-

struction, impulse control, and problem solving. The goal of RETHINK is to teach young people that they can learn how to manage their anger and encourage them to practice a set of seven skills: (1) recognize anger in yourself and others; (2) empathize with the other person; (3) think about the situation differently; (4) hear what is being said; (5) integrate respect and love when expressing anger; (6) notice your body's reactions to anger; and (7) keep your attention on the present problem. This discussion leader's manual is designed for use with an accompanying video. The manual is divided into several segments, providing periods for group discussion and/or role play. Chapters following an introduction and a synopsis are: (1) Learning Options; (2) RETHINK Workout Procedures; (3) Hints for a Successful Session; (4) Suggested Role-Play Topics; and (5) Leader's Self-Evaluation Checklist. Selected readings and participant handouts are included. (JBI)

Spray, Kristina J.
Personality Traits of Mathematically Advanced College Students.

Pub Date—95

Note—15p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Calculus, College Students, Higher Education, *Mathematical Aptitude, *Mathematics Achievement, Mathematics Skills, Personality Assessment, *Personality Traits, Science Process Skills, Sex Differences

This study examined how students with a minimum background of Calculus IV (n=17) differ from other college students (n=17) on personality traits as determined by the 16 PF, fifth edition. Significant differences were found on Factor A (Warmth), Factor B (Reasoning), Factor F (Liveliness) and Factor H (Social Boldness). Gender differences were also investigated, both within each group, and across groups. No significant differences were found between males and females in the calculus group. However, males and females in the control group significantly differed on Factor L (Vigilance) and Factor Q1 (Openness to Change). Males in the calculus group differed significantly from males in the control group on Factor F (Liveliness). Females in these two groups significantly differed on Factor A (Warmth) and Factor B (Reasoning). Contains five tables. (Author)

Gender In Interviewing.

Pub Date—[95]

Note—11p.

Pub Type—Reference Materials - Bibliographies (131)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Annotated Bibliographies, Career Counseling, *Employment Interviews, Higher Education, *Interpersonal Communication, *Interviews, Sex Bias, *Sex Differences, Speech Communication

The interview is a special case of interpersonal communication. It is a communication event with a serious and predetermined purpose with the basic mode of communication being the asking and answering of questions. People are engaged in interviews throughout their lives from the employment setting to the counseling setting. This annotated bibliography contains 32 references from 1976-1994 where the primary purpose of the investigation was to determine the relationship between gender and the interview outcome. Examples of topics covered are: interview validity for selecting sales clerks; unfair discrimination in the employment interview; importance of researcher's gender in the in-depth interview; contrast effects for black, white, male and female interviewees. Citations come from journals, books, and conference papers. (JBI)

Sherman, Gregory A.
Personality and Substance Abuse Disorders: A Review of the Recent Literature on Their Comorbidity and Implications for Diagnosis and Treatment.

Pub Date—May 95

Note—30p.; Doctoral Research Paper, Biola University.

Pub Type—Information Analyses (070) - Dissertations/Theses - Doctoral Dissertations (041)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Interviews, *Longitudinal Studies, *Mental Disorders, Outcomes of Treatment, Pathology, Patients, Personality, Self Evaluation (Individuals), *Substance Abuse
Identifiers—Millon Clinical Multiaxial Inventory, Minnesota Multiphasic Personality Inventory

The major questions when considering substance abuse/dependence and personality are how these two constructs are related and how they interact. A review of the prevalence literature since 1986 documenting the co-occurrence of substance abuse disorders and personality disorders is presented in this study. Sampled are substance abuse and personality disorder treatment populations in the United States and Europe. The instruments used to assess the correlation between substance abuse/dependence and personality disorders include: (1) self reports; (2) clinical interviews; (3) the Minnesota Multiphasic Personality Inventory; and (4) the Millon Clinical Multiaxial Inventory. Consistent with earlier findings, there exists a high correlation between substance abuse/dependence and personality disorders in both treatment and nontreatment samples. Diagnostic treatment implications for dual diagnosis patients are briefly considered. Comprehensive diagnosis and treatment need to consider both Axis I and Axis II disorders. The 12-step model of Alcoholics Anonymous is recommended because it addresses both types of disorders. Contains 45 references. (SR)

Descriptors—*Alcohol Abuse, *Drug Abuse, *Online Searching, *Resource Materials, Search Strategies, Shared Resources and Services, *Smoking, Substance Abuse
Identifiers—Internet

Written to provide a brief introduction of online resources and searching the Internet, this document highlights Internet sites relating to alcohol, tobacco, and other drug (ATOD) prevention. Information is provided on the following topics: (1) software and hardware needed to access Internet sites; (2) the variety of online services available; and (3) basic search strategies. An annotated directory of useful Internet sites related to alcohol, tobacco, and drug prevention comprises roughly half the publication. Each entry lists the site title, an evaluative description, brief subject classification, the internet address, server type, an electronic mail contact, and a "hotlist" recommendation regarding the value of the information contained within. Also contains a short bibliography of related books and journals. (SR)

Descriptors—*Alcohol Abuse, *Change Strategies, Drinking, *Drug Use, Elementary Secondary Education, *Family Involvement, Intervention, Needs Assessment, Parent Participation, *Prevention, School Activities, Services, Substance Abuse

Intended to aid administrators, school principals, and other program coordinators, this guide was written to improve the effectiveness of family involvement strategies that are necessary for comprehensive school alcohol, tobacco, and other drug (ATOD) use prevention programs. Themes discussed are: (1) reasons for creating many forms of family involvement strategies in ATOD prevention and intervention programs; (2) types of family involvement strategies and how they meet prevention and intervention goals; (3) family involvement strategies for ATOD prevention and intervention programs; (4) criteria for planning effective prevention strategies and outreach; (5) ideas for families with multiple problems; (6) issues blocking implementation and suggestions for overcoming them; and (7) activities for staff development and program planning. An appendix provides samples of awareness, needs assessment, and planning activities designed to improve family involvement strategies in school ATOD prevention programs. Contains 60 endnotes and a 49-item bibliography. (SR)

The Relationship Between Parenting Style and Maternal Employment in Families with Elementary School Students.

Pub Date—96

Note—16p.

Pub Type—Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Child Behavior, Elementary Education, *Elementary School Students, *Employed Parents, *Family Environment, *Mothers, Parent Attitudes, *Parent Child Relationship, Parenting Skills, Parent Role, Questionnaires, Surveys, Unemployment

The relationship between maternal employment and maternal and paternal parenting styles is investigated in this study. Subjects included 117 two-parent families with elementary school children. Responses were obtained from 111 mothers and 24 fathers. The survey was conducted by a telephone interview lasting 10-15 minutes in duration. Questions concerned: (1) parental employment status; (2) spousal relationship; (3) parent-child relationship; (4) and parenting practices. Results showed that nonemployed mothers were most likely to have perceived high spousal support of their parenting. No significant differences were found between families with employed and unemployed mothers for frequency of children's baths, a specific parent preferred for comfort, or the number of breakfasts and dinners the family shared together. Few significant parenting styles emerged. Results suggested that in response to the child pushing another child, nonemployed mothers were more likely to use verbal interventions, whereas employed mothers were more likely to use behavioral and control interventions. Contains 11 references. (SR)

Ruiz, Luz I.

An Anti-Bias Children's Literature-Based Reading Program.

Pub Date—95

Note—41p.; Course Project, Pennsylvania State University.

Pub Type—Dissertations/Theses - Undetermined (040)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Childrens Literature, *Curriculum, Elementary Education, *Language Arts, *Multicultural Education, Program Development, *Reading Instruction, Reading Programs, *Social Bias

Identifiers—Trade Books

This paper presents a Reading/Language curriculum for grades K-4 (but adaptable to middle and high school students) which is anti-bias and literature-based. It is intended to help educators use high-quality multicultural children's literature as a medium for reading instruction, and to show all students why discrimination is harmful, and how bias can be overcome. The paper's first section presents the curriculum rationale, discussing program design, anti-bias definition, field test and population, goals of the program for students, essential components of the program, and selection of materials to accomplish program goals. The second section discusses instruction. Assessment of students as well as program assessment and evaluation are addressed in the third section. Next, creating an anti-bias environment is dealt with, and the final section outlines goals for the collaboration of all educators involved in children's reading success; for the participation of school board, principal, and other school administrators; and for parental participation in the curriculum. Appendixes contain materials which present essential elements of an effective school children's anti-bias program; a definition of multicultural education; some definitions of terms; the principles of whole language instruction; a 26-item annotated bibliography and a 5-item list of other resources; and a 10-page compilation of multicultural curriculum resources for teachers of all levels. Melody, E. Joanne

Implementing Library Reading in Second and Third Grades through Sustained Silent Reading and Motivational Techniques.

Pub Date—87

Note—83p.; Ed.D. Practicum, Nova University.

Pub Type—Dissertations/Theses - Practicum Papers (043) — Tests/Questionnaires (160)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—Grade 2, Grade 3, Independent Reading, *Motivation Techniques, Primary Education, Private Schools, Reader Response, *Reading Improvement, *Reading Motivation, Recreational Reading, *School Libraries, *Student Motivation, *Sustained Silent Reading

Identifiers—Motivational Orientation

A practicum addressed the problem of 8 second and third grade nonindependent readers (students at a small private school) who were not choosing to read library books. The literature review disclosed using sustained silent reading, sharing responses to reading and planning for more available time to read in the classroom and at home as viable ways of increasing library reading. Sustained silent reading periods were used to increase reading time in school. A motivational technique called The Eleven Minute Club was established to increase reading time at home. Peer partner reading sessions were used to give increased opportunity for sharing responses to reading. Results of the practicum were positive. The selected students increased the number of books checked out of the library. Students also appeared to increase their responses to reading. Classroom teachers became more aware of and used reading techniques other than basal reading instruction. (Contains 2 tables of data and 16 references. Appendixes contain practicum materials and data, including a description of the school's library program, classroom reading survey, book count for second and third grade, reading interview sheet, required slips and letter to parents for the Eleven Minute Club, the classroom reading survey instrument, and word recognition scores and data.) Holguin, Roxanna

Early Book Stages, 0-5 Years [and] Creciendo con Libros (Growing up) with Books. [Videotape.]

Pub Date—95

Available from—Roxanna Holguin, c/o Early Book Stages, 1725 Camino del Rex, Las Cruces, NM 88001 (\$35; English or Spanish version).

Language—English; Spanish

Pub Type—Non-Print Media (100) — Multilingual/Bilingual Materials (171)

Document Not Available from EDRS.

Descriptors—*Books, *Developmental Stages, Language Acquisition, *Parent Child Relationship, *Parent Participation, Parent Role, Preschool Education, *Reading Aloud to Others, *Young Children

Identifiers—Family Communication, *Reading Behavior

Using a lighthearted and simple approach, this 23-minute videotape in English and Spanish versions presents interactions between parents and children while reading books. The children in the videotape range in age from 0 to 5 years. The video is introduced by scenes of children enjoying books while narration discussing the impact of reading to children at a very early age is heard. The remaining portion of the video is divided into segments by years: 0-1, 1-2, 3-4, and 4-5 years. The video covers the developmental stages and reading behaviors children go through in each of the growing periods. The video shows infants chewing books and learning how to open books, older infants naming pictures and holding books upside down or turning pages backwards, and still older children gradually using books and listening to stories in a more traditional way. Interaction with the child is stressed in the video. A review of the entire footage is seen at the end of the video (about 1 minute in length) where it is easily observed that children who are used to early on go from "chewing books" to "reading books." The video uses graphics to make developmental points for each year. The video shows clearly what to expect children to do with books at different ages and how parents can facilitate their children's language skills and love of books by reading to them. (NKA)

Identifiers—*Reading Behavior, *Text Processing (Reading)

Reading is invisible. Any report of another's reading (beyond the level of word recognition) must rely on some kind of reproduction of the actual experience; there is no way to tap into the experience itself. After completing a pilot study, a small number of adolescents—5 eighth graders and 5 eleventh graders read the first four chapters of Gillian Cross' "Wolf" and later took the book home to finish reading it. Then, meeting again with the researcher, they worked through these chapters a second time, and finally, they discussed the book as a whole. Results focused on how readers decide if their interpretations of the text are "good enough," a value growing out of a student's own individual balance between momentum and accountability, or in other words, between their need for pace and their need to understand. Some readers have a bias towards momentum and go with the flow of the text, while others have a bias towards accountability and are more careful to understand every detail before going on. A detailed accounting shows how three students in particular wrestled with the problem of "good enough." And one specific issue arose in discussion with the readers—the question of re-reading. Conclusions focus on the triangular tension between the reader's personal experience of the text, the text itself, and the experience others have in reading a text. (Contains 10 references.) (TB)

Descriptors—Comparative Analysis, *Comparative Education, *Educational Environment, Factor Analysis, Family Environment, Foreign Countries, Intermediate Grades, Models, *Reading Achievement, Reading Comprehension, Reading Research, *Teacher Effectiveness
Identifiers—International Assn Evaluation Educ Achievement, LISREL Analysis

A study examined issues related to between- and within-class decomposition of variance in reading achievement. The aim is to find "pure" latent structures of achievement at the between-class level as a basis for further investigation of explanatory factors such as teaching. Multilevel factor analysis (MFA) can give a pattern corresponding to an analysis with perfectly reliable scores. Data were taken from the IEA Study of Reading Literacy which involved 200,000 students from 30 different countries. Narrative texts for 9-year-olds were the focus of the multilevel factor analysis. MFA analysis was based on 39 variables, of which 23 were document items and 16 narrative/expository item parcels. LISREL models were fitted separately for between and within levels. The models were then pieced together into one complete MFA model. Findings demonstrate how a global skill like reading can be decomposed not only into individually based factors but also into factors related to group belongingness where differential influences of schooling conditions and home background could be discerned by reference to demand characteristics of small subsets of individual items. (Contains 19 references, 5 tables of data, and a figure presenting 2 subtests from the document domain.) (RS)

Identifiers—*Family Literacy, *Illinois, Partnerships in Library Services

A variety of articles about family literacy efforts in Illinois is provided in this special report prepared by the Illinois State Library, intended for librarians, adult educators, teachers, and family literacy practitioners. Articles contained in the report are: "Family Literacy: A Definition" (Cyndy Colletti); "Why We Need Family Literacy in Illinois" (Cyndy Colletti); "History of the Family Literacy Initiative" (Cyndy Colletti); and "The Benefits of Partnerships in Programming" (Cyndy Colletti). "Serving Hispanics through Family Literacy" (Jill Rodriguez and Maria Tejeda); "Libraries Can: Family Learning in the Library" (Pamela Martin-Diaz); "Community Participation in Family Literacy: Joint Steps toward Literacy" (Karen Slott); "PACT: Parents and Children Together" (Sandra Mulder); and "Crafting Vocabulary into Family Literacy Workshops" (Robert Hafeman). A section called "Parents are Reading Boosters" contains a chart showing parental influence on reading habits of children. Seven appendices include: Family Literacy Projects (Fiscal Years 93-95); Communities Receiving Family Literacy Grants; a Family Resource Bibliography; Children's Book List; Family Literacy Grant Program Information; Family Reading Videos; and Family Reading Night. Descriptors—Early Intervention, Elementary Edu-

cation, *High Risk Students, Program Effectiveness, *Reading Instruction, Reading Programs, *Summer Programs

Identifiers—*Columbus Public Schools OH, Emergent Literacy, Reading Recovery Projects, Strategic Reading

This study examined the effectiveness of the Title 1 Elementary School Summer program that provided intervention to underachieving kindergarten through grade 5 pupils who were below average in reading ability at 7 schools located throughout the Columbus, Ohio public school district. The program featured group instruction (with many of the activities modeled after the Reading Recovery program) for 3.25 hours daily over a period of 22 days of instruction. The program also featured a parent component. Of the 785 pupils served, 649 (82.7%) met the attendance criterion for inclusion in the treatment group. Results indicated that: (1) 80.6% of the pupils in the treatment group read a minimum of 8 books; (2) 73% of the treatment group of pupils displayed all 3 strategic processing behaviors desired (constructing meaning, monitoring reading, integrating sources of information) at least once during the instructional period; (3) the 649 treatment group pupils (82.7% of all pupils served) represented 90.1% (707) of the total number of different parents or guardians involved in the program and 93.8% (2,702) of the total contacts made (2,881). Findings suggest that inservice sessions for parents should continue, similar parent inservices should be considered for the regular school year, and program developers should focus on developing the observational and instructional skills of the teachers involved rather than increasing the number of pupils served. (Contains four figures of data.) (RS)

Descriptors—*Field Trips, Instructional Effectiveness, Intermediate Grades, *Mathematics Instruction, *Middle Schools, Parent Participation, *Reading Instruction, *Summer Programs

Identifiers—*Columbus Public Schools OH, *Middle School Students

A study examined the effectiveness of the Title 1 Middle School Summer program that provided students at two middle schools in the Columbus, Ohio public school district with background experiences to help them connect learning to living. Mathematics and literacy lessons were developed around travel experiences to museums, zoos, baseball games, Sea World, and German Village. The program also featured a parent component. Pupils attended the program 3 days a week for a total of 12 days during the 4-week program. Of the 45 pupils in grades 5 or 6 served, 43 (95.6%) met the attendance criterion for inclusion in the treatment group. Results indicated that (1) 90.7% of the pupils in the treatment group displayed at least two problem solving strategies; (2) 88.4% of the treatment group displayed at least 2 literacy strategies; (3) 90.7% used at least 2 types of available technology; (4) 95.3% displayed at least 2 of the positive attitudes toward learning behaviors; and (5) 56 different parents or guardians were involved in the program. Findings suggest that the program should be expanded; a follow-up study should determine how successful the summer program pupils are in the regular school-year program; and every effort should be made to include more parents in the program, especially in the area of planning. (Contains 6 figures of data. A data collection form is attached.) (RS)

Descriptors—*Basal Reading, Comparative Analysis, Elementary Education, English Curriculum, Grade 3, Grade 5, Language Arts, *Males, *Reading Attitudes, *Reading Programs, Reading Research, *Whole Language Approach

Identifiers—Elementary Reading Attitude Survey, Kansas, Oklahoma

A study attempted to determine how students in literature-based reading programs compare to students in basal-based, skill-oriented reading programs in terms of their interest in reading. The study was carried out on a sample of 215 pupils in 9 third and fifth grade classrooms from school districts in Eastern Kansas and Northeastern Oklahoma. Students' attitudes toward school were measured with the Elementary Reading Attitude Survey, a standardized, self-report, paper and pencil test normed on students in grades 1-6. There are 20 items on the survey which constitute the total reading score. Results showed that posttest scores were in all cases below pretest scores, probably because reading interest tends to drop off toward the end of the school year. In both third and fifth grades, scores on the posttest, while lower than the pretest, were still higher in classes using the literature-based approach than in those using the skills-based approach. Generally, fifth graders scored lower than third graders on the reading attitude tests. Further, results from this study suggest the literature-based approach is especially important for males, particularly those in fifth grade. (Contains 2 figures, a table of data, and 33 references.) This collection of the 1994 issues of the Japanese-language journal "The Science of Reading" presents 21 articles on a variety of questions dealing with reading. Most articles in the collection have summaries in English. Articles in the April issue are: "Efforts to Enliven the School Library" (M. Takeda); "A Mistake in Comprehending a Literary Work and an Attempt to Correct It" (K. Magara); "The Effect of Information about Seeing-Eye Dogs Disseminated to Local Citizens" (K. Tokuda and T. Mochizuki); "Point of View" in the Story "Gongitsune": A Refutation of the Theory of View-Point Change" (Y. Mochizuki); "The Effect of Different Classroom Learning Activities on Students' Reading Comprehension" (M. Tanaka); "One Teacher's Experience Reading Literature Aloud in High School Classes" (K. Takahashi); and "Adverse Effects of Lower Cognitive Processing Capacity on Achievement: What Can We Do?" (J. M. Furukawa). Articles in the July issue are: "Creating an Attractive School Library" (M. Hori); "The Effects of Expertise on Understanding Cartoon Signs" (N. Murata); "Interpreting 'Vacancies' in Fictional Texts" (H. Tandoh); and "The Construction of Temporal and Causal Relationships in Story Comprehension" (H. Yamamoto). Articles in the October issue are: "Using the School Library as a Reading Center Fostering the Love of Reading in Children" (N. Ogiwara and A. Nakayama); "Film Forms in the Comprehension of Films" (M. Aoyama); "The Concept of 'Stylistic Interference'" (T. Asada); "To Use or Not to Use Romaji—A Psycholinguistic Evaluation of the Arguments against the Use of Romaji for Teaching Japanese with Learners of Alphabetic Mother Tongues" (K. Tamaoka and M. Barbara); and "The Effect of a Teacher's Commentary on Students' Understanding of a Story Read Aloud" (M. Tanaka). Articles in the December issue are: "Thoughts on a School Library Conducive to Studying" (K. Takahashi); "An Alternative Method for the Teaching of Reading of Japanese Classical Literature—Using Weird Stories from

Curriculum Integration in Even Start Programs.
Occasional Paper #3.

Pub Date—Dec 95

Note—15p.

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Early Childhood Education, Evaluation Methods, *Integrated Curriculum, *Literacy, Program Descriptions, Program Effectiveness, Program Evaluation, Program Implementation
Identifiers—*Even Start, *Ohio

A study examined Ohio Even Start programs and their attempts to create integrated curricula within their programs. A survey was sent to all Even Start programs. Results indicated that: (1) most of the programs defined their integrated curricula in terms of the themes they designated as focal points (such as consumer skills, child discipline, childhood safety, and holidays); (2) most programs met regularly to plan and coordinate learning goals and activities; (3) obstacles included the large amount of time, planning, coordination, and materials required; (4) matching topics to families' needs and interests appeared to be the most important factor for success; and (5) most of the programs used informal evaluation measures that allowed the staff to employ their own observations of develop their own instruments. New and existing programs may find inspiration and useful and varied models for their own programs. The survey instrument is attached. (RS)

Identifiers—*England

For thousands of years the craft of reading and writing was the closely guarded monopoly of small elites. Only relatively recently has literacy become available to most people in developed nations. Historical surveys of literacy have used a wide range of definitions of the skills involved, one of the more important of which views reading as a system of decoding written symbols into spoken language. As for the levels of literacy, the media makes new claims all too frequently suggesting that reading and writing abilities are dropping. Consider, however, society's increasing demands on the reading ability of its public. Further, the accelerating advance of technology that has occurred in the latter part of the 20th century can be seen to be partly the result of advanced levels of education and literacy. The organization of society can thus be seen as completely literacy-dependent, and it is up to the schools to "bestow" literacy upon the populace. Unfortunately, for many the process of being educated is not a happy one, and many children do emerge at 16 inadequately literate, and ill-prepared for life. There are some children who arrive at school with more factors that will facilitate the relatively easy transition to literacy than others. There are no doubt some failings in the system. One such failing is that the educational system of England makes little allowance for the varied pace of development of children. (Contains 17 references.) (TB)

Focusing on periodicals that consistently carry materials about reading, this contributor's guide presents 2 lists of information on 198 journals, magazines, newsletters, newspapers, and yearbooks. Every periodical included appears alphabetically on each of the two lists. The first list offers information about editor, address, and editorial procedures. The second list is in the form of a matrix primarily because of the compactness of that format. It provides additional information including audience, the types of material published, editorial processes, and miscellaneous items. A sample of the survey sent to the periodicals is included. (RS)

Identifiers—*Emergent Literacy, Library Services and Construction Act

A compilation of information drawn from Library Services and Construction Act (LSCA) grant applications and final evaluation reports submitted to the Wisconsin Division for Libraries and Community Learning, this book offers information that may be of practical value to other libraries wanting to establish their own emergent literacy programs. Chapter 1 (Preparing for an Early Literacy Program) discusses how to use the book, the proactive public library, informing the community, and useful planning materials. Chapter 2 (Making a Difference to the Very Young: Reaching Out to Infants and Their Parents) addresses initial contacts with parents of newborns, programs for parents, and recommended books and audiovisual materials for ages newborn through 18 months. Chapter 3 (Focusing on Toddlers: Introducing the Library to Children Ages 18 Months through 3 Years and to Their Parents) presents kits for librarians, programs for parents, kits for parent and child, and collection and service enhancement. Chapter 4 (Working with Preschoolers: Providing Services to Children Ages 3 through 5 Years, Their Parents, Other Care Providers, and Teachers) discusses programs for care providers and teachers, kits for care providers and teachers, deposit collections, programs for parents, kits for parent and child, and collection and service enhancement. Chapter 5 (Targeting Beginning Readers: Giving Reinforcement to Children Ages 5 through 8 Years) presents five approaches. Appendixes list the libraries that carried out programs; annotations of 97 resources for parents, 122 professional materials, and 110 information sources and suppliers; notes on child development as related to appropriate early literacy activities in the library; and a glossary. Building Equity in Early Literacy: Two Case Studies on Improving the School Literacy Program. Literacy, Language, and Communication Program Report.

Northwest Regional Educational Lab., Portland, OR. Literacy, Language, and Communication Program.

Spons Agency—Office of Educational Research and Improvement (ED), Washington, DC.

Pub Date—Oct 95

Contract—RP91002001

Note—90p.

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—Case Studies, Change Strategies, *Educational Change, Elementary Education, Equal Education, *Literacy, Program Descriptions, Program Effectiveness, *Program Improvement

Identifiers—*Emergent Literacy, McMinville School District OR, Polson Elementary School District MI

Responding to a need among Pacific Northwest schools for assistance in changing their literacy programs, this paper presents case studies of 2 schools that were part of the Equity in Early Literacy Development program, which supported the schools in moving from individual classroom literacy innovations to schoolwide practices consistent with current understandings of language and literacy development. The paper first outlines the components of the program—school teams participate in a summer institute and individual tailoring for each specific program being foremost. The first case study, "A Team Approach to Student-Centered Literacy Instruction: A Case Study of Cherry Valley School, Polson, Montana," discusses some lessons learned—that literacy program improvements are an on-going process, and that more training in child development is necessary to raise teachers' expectations for student learning. The second case study in the paper, "District Involvement in the Change Process: A Case Study of the McMinville, Oregon, School District," describes: (1) the amount and impact of district-level support for school improvement plans; (2) relationship between individual schools' efforts and the district's work on alternative literacy assessment; (3) balance achieved between schools' autonomy and the district's leadership in overall literacy improvement; and (4) the impact of Oregon's school reform law on the district and school literacy program improvement agenda. Appended to the first case study are a status report form, a survey instrument, learning materials, and program guidelines; appended to the second case study are learner outcomes, timelines, and a status report form. Descriptors—*Content Area Reading, Intermediate Grades, *Metacognition, Middle Schools, Reading Improvement, Reading Motivation, *Reading Skills, *Reading Strategies, Secondary Education, Student Evaluation

Identifiers—Educational Issues

Based on research findings, informed opinions contained in the professional literature, and examples from school personnel of "what works," this report focuses on strategies that educators can use to improve secondary school students' reading skills and enhance interest in reading. Many of the strategies in the report are applicable across the curriculum—not just in English classes, but also in subjects such as science and social studies. Sections of the report are: (1) Introduction: Issues Surrounding Secondary School Reading; (2) Motivational Factors Related to Reading; (3) Approaches for Actively Engaging Students in Reading; (4) Metacognition: Developing Good Reading Strategies; (5) Other Techniques to Improve Reading

Skills; (6) Assessment: Purposes and Approaches; (7) Issues Specific to Content Area Reading Instruction; and (8) Concluding Remarks. (RS)

First Steps: An Early Reading Intervention Program.

Pub Date—[95]

Note—43p.

Pub Type—Reports - Research (143) — Reports - Descriptive (141)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Early Intervention, Grade 1, *Low Achievement, Primary Education, Program Descriptions, Program Effectiveness, *Reading Achievement, *Reading Improvement, Reading Research, Rural Education, *Tutoring

Identifiers—North Carolina, Reading Recovery Projects

A study described and evaluated "First Steps," an intervention program for low-reading first graders that was implemented in four rural schools in western North Carolina. First Steps borrows heavily from Reading Recovery but differs significantly in the areas of pre-post assessment, tutor training, and teaching procedures. Attention was given to the program's sequential implementation across the school year, information provided on the selection of tutors, initial screening of first graders, tutor training procedures, content of the tutoring lessons, and end-of-year results. Results indicated that in four of the five classrooms, First Steps was successful in helping low-readiness first graders learn to read. (Contains 20 references, 7 tables, and 2 figures of data.) Identifiers—Educational Issues, *Emergent Literacy, National Standards

Developed with practicing teachers in mind, this book presents reprints of 22 articles and excerpts from longer works that deal with the most significant trends and issues facing literacy educators—whole language, phonics, literacy materials, emergent literacy, spelling, assessment, content literacy, vocabulary instruction, national standards, and technology. One chapter in the book is devoted to each topic, and each chapter presents a brief introduction to the topic, the article or excerpt, an annotated bibliography, and suggestions for further involvement. The book begins with an introductory chapter on the field of literacy education. Articles or excerpts in the remaining 10 chapters are "Blending Whole Language and Systematic Direct Instruction" (Dixie Lee Spiegel); "Realities of 'Whole Language'" (Sean A. Walmsley and Ellen L. Adams); "Saying the 'p' Word: Nine Guidelines for Exemplary Phonics Instruction" (Steven A. Stahl); "Acquiring Literacy Is Natural: Who Skilled Cock Robin?" (Kenneth S. Goodman); "What Kind of Phonics Instruction Will We Have?" (Patricia M. Cunningham); "Basal Readers and the State of American Reading Instruction: A Call for Action" (The Commission on Reading, National Council of Teachers of English); "The Basalization of America: A Cause for Concern" (Constance Weaver); "An Attack on Basal Readers for the Wrong Reasons" (Patrick Groff); "Emergent Literacy: New Perspectives" (William H. Teale and Elizabeth Sulzby); From: "A Talk with Marilyn Adams"; "Toward an Embedded Model of Spelling Instruction for Emergent Literates" (John F. O'Flahavan and Renee Blassberg); From: "Teaching Spelling" (Edmund H. Henderson); From: "Beginning to Read: Thinking and Learning about Print" (Marilyn J. Adams—A Summary by Steven A. Stahl and others); "Putting It All Together: Solving the Reading Assessment Puzzle" (Roger Farr); "Research Currents: What Is

and What Might Be in Evaluation" (Marie M. Clay); From: "Teaching Content Reading and Writing" (Martha Rapp Ruddell); "Content Literacy: A Definition and Implications" (Michael C. Exploring Connections between Childhood and Adult Literacy Experiences.

Pub Date—Nov 95

Note—13p; Paper presented at the Annual Meeting of the National Council of Teachers of English (85th, San Diego, CA, November 16-21, 1995).

Pub Type—Speeches/Meeting Papers (150) — Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Authors, *Childhood Interests, *Early Experience, Elementary Education, Individual Development, Life Events, *Reading Habits, *Recreational Reading, *Silent Reading

Identifiers—L. Engle (Madeleine), London (Jack), Reading Uses, Welty (Eudora)

Three famous writers—Eudora Welty, Madeleine L'Engle, and Jack London—used their silent reading experiences to survive not only their childhoods, but also to become adult chroniclers of human lives. Pulitzer-prize winning author Eudora Welty credits an extended period of silent reading when she was 7 years old (and home from school for nearly a year) with the discovery of her author's voice. Madeleine L'Engle credits her observations of life and people for starting her on her journey to become a writer. Unlike Eudora, Madeleine had more than one period of solitude in her childhood, and Madeleine's solitude was coupled with the intense loneliness of an only child with physical problems and distant, frail parents. Solitude and loneliness intensified by the need to escape extreme poverty led Jack London to literacy. Jack loved books as much as he loved reading them. These three authors entered the world of literacy fueled by need: Eudora for entertainment during an extended illness; Madeleine to combat shyness and loneliness; and Jack to survive emotional rejection and poverty. Adults must give children uninterrupted time to discover silent reading and to discover themselves through books. It is up to adults to give children both the time and the safety to find the way to adulthood. (RS)

Identifiers—*California

Reaffirming that all students, regardless of home language or socioeconomic background, can and must have an equal opportunity to excel in reading, this booklet presents 10 recommendations that form the basis of a comprehensive and balanced reading program to help children in California learn to read. Recommendations in the booklet address: (1) implementing a research-based balanced reading program that combines skills development with literature and language-rich activities; (2) providing teachers with diagnostic tools to modify instruction continuously; (3) emphasizing early intervention for children by mid-first grade; (4) establishing clear standards at each grade level; (5) redesigning teacher credential programs; (6) providing a high-quality preschool experience to all children;

(7) supplying a large number of high quality, appropriate print and electronic instructional materials; (8) mobilizing all resources to make reading a priority in the elementary grades; (9) working with the entire community to ensure that every child can read; and (10) allocating resources to provide necessary support to teach reading in every public school. A call to action (specific actions for teachers, administrators, local school boards, parents, communities, the California Department of Education, and universities), a sample reading curriculum timeline, and a 38-item selected bibliography are attached. Descriptors—Case Studies, *Dyslexia, Elementary Secondary Education, *Instructional Effectiveness, *Reading Attitudes, *Reading Difficulties, *Reading Improvement, Reading Research
Identifiers—Chicago Public Schools IL

This document presents case studies and information related to the United States patent on a method of and structure for improving the reading efficiency of persons with specific dyslexia in which the reading matter is presented with a brightness substantially greater than the background of the reading material. The paper begins with a description of the background of the invention, an abstract, and a summary of the invention, in the form of a single page extracted from the patent application. The document then presents a description of the methodology employed in gathering data on three male dyslexic students (aged 8, 13.5, and 16 years) from Chicago public schools, offers some responses obtained from the students in diagnoses, and offers a set of conclusions. The paper suggests that the dyslexics' attitudes toward reading, reading vocabulary, reading rate, and fluency increased dramatically. An additional case study of a 16-year-old male and a sample of the reading material (white text on a black background are attached). (RS)

The Influence of Early Field Experiences on the Attitudes of Preservice Teachers.

Pub Date—3 Nov 95

Note—16p.; Paper presented at the Annual Meeting of the College Reading Association (39th), Clearwater Beach, FL, November 3-6, 1995.

Pub Type—Speeches/Meeting Papers (150) - Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Attitude Measures, Elementary Education, *Field Experience Programs, Higher Education, *Preservice Teacher Education, *Student Attitudes, *Teacher Attitudes, Teaching (Occupation)

Identifiers—Jackson Municipal Separate School District MS, *Preservice Teachers, Teaching Research

A study investigated the effects of early field experience on the attitudes of elementary preservice teachers toward teaching. The 32 participants, education majors enrolled in an interdisciplinary movement and the arts class, were assigned to early field experience in elementary school classrooms in Jackson, Mississippi public schools 2 mornings a week for 12 weeks. Pretest and posttest data were collected by means of an instrument employing a semantic differential scale measuring attitudes toward teaching. Results offer support for the inference that these preservice elementary teachers had positive attitudes toward teaching prior to early field experience and had even more positive attitudes toward teaching after their early field experiences. Descriptors—Comparative Analysis, Elementary Secondary Education, *Grade 4, *Grade 8, *Grade 12, *National Competency Tests, *Reading Achievement, Reading Research, Regional Characteristics, Sex Differences, *Student Evaluation, Test Results

Identifiers—*National Assessment of Educational Progress

This report describes students' reading achievements at grades 4, 8, and 12 and within various subgroups of the general population. State-level results are presented for individual states that chose to participate in the 1994 Trial State Assessment. Chapter 1 presents an overview of the 1994 NAEP reading assessment and sample questions and responses. Chapter 2 provides overall average proficiency results for the nation, regions, subgroups of students, and jurisdictions participating in the Trial State Assessment. Chapter 3 describes students' reading performance in terms of achievement levels. Chapter 4 focuses on cross-state comparisons of proficiency results from the state-by-state assessment at grade 4. Chapter 5 describes contextual factors related to students' reading achievement. Chapter 6 describes specific abilities demonstrated by students in the NAEP reading assessment and reports student performance when reading for different purposes. The "most striking" finding from the 1994 assessment is that the average reading proficiency of 12th-grade students declined significantly from 1992 to 1994. Other major findings include: (1) the decline in average proficiency among 12th-graders between 1992 and 1994 was concentrated among lower performing students; (2) reading proficiency at all three grade levels was higher on average for students whose parents had more education; (3) at all three grade levels, female students had higher average reading proficiencies than male students; and (4) students who reported having a greater array of literacy materials in their homes displayed higher average reading achievement. Contains 38 tables and 23 figures of data. Appendixes provide an overview of procedures used in the 1994 assessment and describe students' reading performance; cross-state proficiency and achievement level results; and sample texts and questions. Cross-State Data Compendium for the NAEP 1994

Grade 4 Reading Assessment: Findings from the Trial State Assessment in Reading of the National Assessment of Educational Progress.

Educational Testing Service, Princeton, NJ. Center for the Assessment of Educational Progress; National Assessment of Educational Progress, Princeton, NJ.

Spons Agency—National Center for Education Statistics (ED), Washington, DC.

Report No.—ISBN-0-16-048544-4; NCES-95-157

Pub Date—Dec 95

Note—172p.; Contains tables of cross-state information for the variables discussed in the NAEP 1994 Reading Report Card for the Nation and the States (see CS 012 361) and the NAEP 1994 Reading State Report, and should be used as a companion document to these reports.

Available from—U.S. Government Printing Office, Superintendent of Documents, Mail Stop: SSOP, Washington, DC 20402-9328.

Pub Type—Numerical/Quantitative Data (110)

EDRS Price - MF01/PC07 Plus Postage.

Descriptors—Comparative Analysis, Grade 4, Institutional Characteristics, Intermediate Grades, Professional Development, *Reading Achievement, *Reading Instruction, Reading Interests,

Reading Research, *Statistical Data, Student Attitudes, Teacher Attitudes, Teaching Methods
Identifiers—*National Assessment of Educational Progress

Intended as a companion document to the "NAEP 1994 Reading Report Card for the Nation and States" and the "NAEP 1994 Reading State Report," this compendium presents fourth-grade cross-state results of the National Assessment in Educational Progress (NAEP) 1994 Trial State Assessment in reading—no interpretations of the data are made. Chapter 1 presents the results for the nation; results for each of the four regions; and each of the participating jurisdictions in the context of the overall average reading proficiency, reading proficiency by the two purposes of reading, and the NAEP reading achievement levels. Chapter 2 presents similar information for selected subpopulations: race/ethnicity, gender, type of location, parents' education level, Title I participation, and type of school. School and classroom characteristics and methods of reading instruction are examined in chapters 3 and 4. Chapter 5 contains teachers' reports on their professional development; chapter 6 deals with students' reports of their independent reading behaviors. Contains 65 tables of data. Appendixes provide a summary of participation rates, reporting subgroup(s) definitions, advice on drawing inferences from the results, and revisions to the 1992 and 1994 findings. (RS)

An Independent School Library-Classroom-Parent Partnership Program To Encourage Respect, Responsibility, Courtesy, and Caring for Students Prekindergarten through Eighth Grade.

Pub Date—95

Note—106p.; Ed.D. Practicum, Nova Southeastern University.

Pub Type—Dissertations/Theses - Practicum Papers (043)

EDRS Price - MF01/PC05 Plus Postage.

Descriptors—Childrens Literature, Class Activities, *Educational Environment, Elementary Education, *Elementary School Students, Learning Activities, *Literature Appreciation, Parent Participation, *Social Values, *Student Attitudes, *Student Behavior, Thematic Approach

A practicum was designed to enhance prekindergarten through eighth grade students' standards of conduct with the assistance of parents, teachers, and the school librarian. Literature themes, discussions, and five special programs were the major components for an 8-month period. Students were encouraged to exhibit positive behaviors, and respect, responsibility, courtesy, and caring were highlighted. Values through literature themes were promoted during regularly scheduled library classes, which extended into the classrooms. The literature component arranged by grade used books, poems, read alouds, partner reading, and storytelling, discussions, dilemma situations, and self esteem and mediation techniques, along with role play and video formats. The 5 special programs (Family Poetry Night; Family Stories Read Aloud Day; Sleeping Beauty, An Urban Retelling; International Day; and Keats and Special Friends Day) involved parents and provided opportunities for all grades to participate. Analysis of the data revealed fewer incidents of behavior requiring disciplinary action. Some students were better able to settle differences among themselves and utilize techniques shared and discussed (such as "Stop, Think, Act, and Review"). Literature themes and discussions raised awareness, along with the messages in posters, signs, and quotes. Observations and teacher feedback indicated that the school climate was enhanced, and an environment of cooperation was more evident. Contains 7 figures of data and 71 references. Appendixes contain 11 materials from the practicum, including standards of conduct, attitude survey instrument, character education resources, practicum overview by grade, library bibliography, and mediation techniques. Descriptors—*Content Area Writing, Experiential Learning, Higher Education, Independent Study, Interdisciplinary Approach, Liberal Arts, *Non-traditional Students, Open Education, Student Needs, *Undergraduate Study, *Writing Evaluation

Identifiers—*Competency Based Curriculum, *DePaul University IL

The School for New Learning (SNL) was established in 1972 at DePaul University especially for adult students. SNL students are adults, age 24 or older, who want to accelerate their progress to a degree by using experience as well as classwork for academic credit, and who want to design their own programs with help from an advisory committee of experts. The undergraduate curriculum is competence-based (that is, focused on learning outcomes), student-centered, and interdisciplinary. SNL assesses students on 50 learning outcomes or competence statements, targeted to and organized into 5 domains, each of which is comparable to a discipline found in a traditional liberal arts program. An assessment study of this program was needed to describe the range of written reports assigned in content courses, identify teachers' expectations for the written reports that they assign, and rate students' performance against teacher criteria. The goal of the study was to define problems and to propose reforms for improvement. Two theoretical frameworks undergirded the study: (1) a psychological model of intellectual development in college students; and (2) an instructional design for complex problem solving. Methods included analyses of teachers' descriptions of assignments, categorization of assignments, ratings of student papers, and surveys of student perceptions of teachers' expectations and criteria. Results, which are various and copious, are logged on numerous data sheets. Surveys are appended. (TB)

Popular Culture Images of Gender as Reflected through Young Children's Story.

Pub Date—14 Apr 95

Note—19p; Paper presented at the Annual Joint Meetings of the Popular Culture Association/American Culture Association (Philadelphia, PA, April 12-15, 1995).

Pub Type—Opinion Papers (120) — Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Child Behavior, Childrens Literature, Childrens Writing, Creative Writing, *Cultural Images, Elementary Education, Foreign Countries, Personal Narratives, *Popular Culture, *Sex Differences, *Sex Role, Television, Toys, Video Games

Identifiers—*Gender Issues, Informants, Quebec, *Story Telling by Children

A study investigated the impact of popular culture on young children's conception of gender, as revealed through the stories they write and tell. The research was conducted at Grosse Ile High School on the remote Magdalen Islands in the Gulf of Saint Lawrence, Quebec, Canada, from 1991-1994 with 46 students ages 6-7 years old. The concept of the child as expert informant to promote understanding of how children learn through stories was the guiding principle of the study. Results showed that while girls narrated a social orientation of the world, centered on relationship, boys narrated a world of action. While girls articulated a domestic world in which all ends well, boys narrated a public world of good guy/bad guy encounters wherein the superhero model handles resolution. While girls appear to recount lived experience as it actually happened, boys embellish real-life experience with fantasy elements. Finally, while social interaction and cooperation take priority in feminine childhood culture, power struggle, rules, and the importance of winning take priority in male childhood culture. Evidence suggests that popular culture has a stronger influence on boys than on girls. In assessing the influence of popular culture, research discussion examines these results in light of the influences of electronic media, children's toys (which polarize gender stereotypes), and transmedia intertextuality. (Contains 14 references.) (TB)

A Multicultural Glimpse of Rural and Urban Adolescence in Robert Newton Peck's "A Day

No Pigs Would Die" and Paul Zindel's "The Pigman."

Pub Date—[93]

Note—24p.

Pub Type—Opinion Papers (120) — Reports - General (140)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Adolescent Literature, *Cultural Differences, Ethnicity, *Integrated Curriculum, Language Arts, Literary Criticism, *Literature Appreciation, Multicultural Education, *Rural Areas, Secondary Education, Self Concept, *Urban Culture

Identifiers—Day No Pigs Would Die (A), Pigman "A Day No Pigs Would Die" by Robert Newton Peck and "The Pigman" by Paul Zindel are 2 short novels that offer treasures in the form of many lessons in life to share in the language arts classroom. These two rich novels can serve as sources for multicultural understanding of rural and urban life, as well as for interpreting the protagonists' growth through life experiences. An integrated curriculum can enhance the meaning of the 2 novels for the language arts class as students participate in Robert's and John's quest for identity and adulthood within the contexts of social studies, home and family living, and agricultural studies. In the contexts of multicultural education, the study of these works will enhance multicultural understandings by helping students participate in the aesthetic experiences of at least one other ethnic group. They will experience diverse perspectives of one extreme of ruralism contrasted to the epitome of urbanism on Staten Island. They will encounter a different religious point of view of the Shakers. And, finally, students will be exposed to standard American dialect versus a local New England dialect as a legitimate medium of communication. Through the personal experiences of Peck, students can look at a rural existence that many will find harsh and manual. The more cosmopolitan view of Zindel's insights were inspired by his life among the very diverse and dense populations of Staten Island. (Includes 10 notes.) (TB)

Identifiers—*Standardized Curriculum

Within the literacy education community, the focus on decentralizing curriculum decisions, i.e., returning to teachers the authority to make many decisions, including those about which texts to use, has garnered much attention. But the issue is not quite so straightforward, given the power structure currently found in most K-12 educational settings and the general consensus that curriculum standardization is important. However, the power to regulate curriculum is typically assigned to those who work outside the classroom and often outside the schools. For instance, the authority of state legislatures to establish curriculum standards has been upheld by the federal courts. The press for standardization, however, is also present among teachers themselves. It has been common in schools studied to find teachers working to define a curriculum around a set of core books to be read in a particular course. During one focus-group, a new fourth-grade teacher told of how another teacher removed books from a display she had set up, because fourth-graders were not allowed to read those books as they were part of the fifth-grade curriculum. Also, without a common curriculum, some administrators fear variation in the instruction offered across classrooms. Finally, the press for standardization comes from parents and the general public who seem to want some assurance that all fifth-grade students, regardless of the class assigned, will read the same books. Descriptors—College Curriculum, Educational History, Ethics, Higher Education, *Journalism Education, *Journalism History, *News Writing, *Social Responsibility, *Textbook Content, Textbook Research

Identifiers—*Curriculum Emphases, Hutchins Commission Report, Journalism Schools, *Professional Concerns, Professionalism

Because the Hutchins Commission's report, "A Free and Responsible Press," has served as a benchmark concerning social responsibility of the press, a study compared its ideas about press responsibility and the role of journalism with those in journalism textbooks. Twelve period textbooks were content analyzed in detail as were several books written by press members for general consumption. Results showed that textbooks published between 1891 and 1942 clearly reflected journalism's growing concern with society. But even as this concern shaped ideas of press responsibility and the role of journalism in society, textbooks continued to uphold the basic standards of news writing (9 of the 12 texts dealt with writing). The earliest textbooks reflected journalism's individualistic tradition by characterizing press responsibility as the commitment of journalists to their careers or their newspapers' success. By 1910, however, journalism educators turned their attention outward. Textbook authors promoted professionalism and increasingly recommended a college education for journalists to raise journalism's status. Textbooks of the 1920s revealed a growing interest in the role of journalism in society through simple libertarian descriptions of journalism's purpose in a democratic society. In 1923 the newly formed American Society of Newspaper Editors adopted canons which emphasized the journalist's support of freedom of speech and press. By the end of the decade, journalism was being likened to a public utility—both a private enterprise and a public service. By the 1940s, news writing textbooks were reflecting journalism educators' wholehearted embrace of social responsibility as a fundamental principle of journalism. (Includes 94 notes.) (TB)

Use of an Electronic Discussion Group for High School Publications Advisers: A Descriptive Pilot Study.

Pub Date—Aug 95

Note—21p; Paper presented at the Annual Meeting of the Association for Education in Journalism and Mass Communication (78th, Washington, DC, August 9-12, 1995).

Pub Type—Speeches/Meeting Papers (150) — Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Communication Research, *Computer Networks, Content Analysis, *Discussion Groups, *Electronic Mail, Ethics, High Schools, *Journalism, Online Systems, Problem Solving, *School Publications, *Student Publications, Teaching Methods

Identifiers—Advisers, Computer Networking Research, *HSJOURN

This study aimed to catalog the nature of written message exchanges on a network computer bulletin board, HSJOURN, which caters mainly to high school journalism teachers and publications advisers. The study analyzed the content of messages between December 1993 and January 1995 and cataloged them in the following categories: announcements; chatting; does anybody know?; ethical matters; conducting conferences; editorial guidance; consumer information; legal matters; trading classroom material; expression of opinion; reprints from mass media; sharing problems or solutions; sharing teacher tips; maintenance; and other. A tabulation of the number of messages falling into each category shows that most message activity occurred in 3 categories: announcements, chats, and does anybody know? Another tabulation shows that October was the most active month on the bulletin board and August was the least active. Activity was

fairly consistent over the 7 days of the week. Other tables show: (1) the frequency of messages by classification of poster; (2) the classification of original message leavers versus those who reply; and (3) the frequency of messages posted by individuals. The research did not intend to provide statistically significant analysis but rather to serve as a descriptive snapshot of activity on this bulletin board at a particular time for purposes of later comparison and research. (Contains seven tables of data.) (TB)

Identifiers—Basic Writers, *Saint John Fisher College NY, Writing Contexts

The introductory writing course, English 101, at St. John Fisher College in Rochester, New York, has gone through several stages in the last decade, changing from a course emphasizing writing in the rhetorical modes to an issue-oriented interdisciplinary course, to, at the present time, a course focusing on the writing process and on collaborative learning. One of the changes recently implemented requires all students to take the same course, including both the gifted and remedial writers. The remedial writers—along with any students voluntarily taking part—sign up for a fourth credit, which they earn mainly through work with student and faculty tutors. The success of the college's variable-credit first-year composition course depends, in large part, on the college writing center, which, excluding the director, is staffed entirely by undergraduate peer consultants. Student consultants are particularly apt in moving between the academic discourse of college professors and the more colloquial language of their peers. These peer consultants serve as mediators between faculty and new students, both in the writing center and in the classroom, where they help to facilitate peer review and editing sessions. Further, writing center staff teach writing as a recursive process whereby students use a dialogical rather than linear thought process. Sondra Perl (1980) argues that recursive writers move back and forth among such writing activities as planning, generating, organizing, and editing. (TB)

Identifiers—*Journalism Schools

At the AEJMC (Association for Education in Journalism and Mass Communication) convention, concern was voiced about the news media's ability to present fair and accurate news about minorities. Accordingly, a study examined whether college journalism and communication departments have established multicultural committees to establish and implement diversity goals. The study also compared schools with and without cultural diversity committees to see whether the committees do help in setting and achieving goals. Questionnaires were first sent to administrators to ask about the existence of committees in charge of multiculturalism; then a followup survey was sent to the chairs of the committees. Of the 370 questionnaires initially mailed to administrators, 246 were returned; 203 reported that they did not have curriculum diversity

committees. Of the 40 followup questionnaires sent to chairs of diversity committees, 12 were returned. Of the 40 questionnaires sent to a control group of administrators whose institutions did not have diversity committees, 9 were returned. Of the 12 from committee chairs, 2 denied the existence of the committee, suggesting it existed just on paper. At the 10 institutions with functioning committees, these committees merely had advisory powers; none had the power to change curricula. Two of the 10 institutions reported that their committees had developed a reference list of reading and audio-visual materials, had brought multicultural speakers to their school, and were involved in course enrichment. Identifiers—*Personal Writing

Through three semesters of teaching the nonfiction essay, an instructor has come to terms with the fact that she has yet to attempt the type of personal essay that she asks her students to write, essays in which personal experiences with death are shared. However, a reminiscence on death through a recounting of her reactions to and understanding of various deaths among her friends and family, most notably that of her father, is such an attempt. The essay takes the form of relating a number of less significant deaths which prepare the ground for her father's drowning. As a writer, she realizes now that her mother's wonderful explanation to her at age 4 of what happens to people when they die and her mother's belief in angels allowed her as an adult to accept her father's death and derive some comfort from the knowledge of his ever-present loving spirit in her life. As a result of her own experiences writing this essay, she can conclude with the certainty of experience that allowing students to tap into the need to satisfy what E. B. White called the "audience of one" (that is, the author him- or herself) is the most beneficial aspect of writing the nonfiction essay. Negative attitudes about writing can be turned around in one semester if students are given the chance to explore personal writing with freedom. (TB)

Identifiers—Educational Issues, Professional Concerns, Visual Communication Education

Alliances between members of the visual communication division of the Association for Journalism and Mass Communication (AEJMC) and the National Press Photographers Association (NPPA) can be strengthened without sacrificing the basic liberal arts principles promoted by R. O. Blanchard and W. G. Christ in their book "Media Education and the Liberal Arts." For example, a new journal, "Visual Communication Quarterly," seeks to increase interest among both professionals and scholars and helps to build alliances that benefit all parties, photojournalism educators, students, and practitioners. "Visual Communication Quarterly" was launched for several reasons, but one reason was to increase the flow of information from photo-

journalism educators to practitioners, since no journal was fulfilling that role exactly. Two potential problems that faced the founders of this journal were: (1) obtaining funding; and (2) finding a sufficient supply of quality research. The first problem was solved when the editors of "News Photographer" agreed to absorb the costs and bind the journal as an insert in their magazine. The second problem did not seem formidable, but in fact finding quality articles is no small task. To address this problem, only 9 articles will appear in each of the 1995 issues instead of 12, though the overall length of the journal will not change. (Includes 13 notes.) (TB)

Reading the speeches each year of the program chair of the Conference on College Composition and Communication gives the reader a concrete notion of how the field has been perceived and constructed by these leaders in composition. The more recent articles also construct a surprisingly unified and stable identity for the field which is premised on both a liberal humanist subject and a belief in communitarianism. All of these authors are positing a unity at some cost, however, a unity that bleeds out difference in theory, in practice, and in process. In an effort throughout the past decade to move away from notions of individualism and the individual writer, these writers have moved decisively to perpetuate a belief in the power of community. Difference is then lost in the name of pluralism and community. As Lester Faigley and Iris Young suggest, moving from the relativistic rhetoric of individualism to an argument for communities does not represent any progress away from the modernist belief in liberal humanism. Faigley writes that "like the concept of the autonomous subject that denies difference among people by positing an underlying rational unity for every individual, the concept of community performs an analogous denial by presenting the fusion of its members as the ideal." Analysis of two speeches from recent years, that of Maxine Hairston (1985) and Lee Odell (1986) show in more detail how community is used in constructions of composition studies. (TB)

In the early years of this century, Frank Aydelotte contributed to higher education by teaching at Indiana University and at Massachusetts Institute of Technology (MIT), and by serving as President of Swarthmore. In 1908, Aydelotte accepted his first major academic position at Indiana University, after completing his education at Oxford, England. Here he developed his "thought approach" to teaching writing. Convinced that Indiana's Harvard-influenced freshman English course was less than effective, Aydelotte combined two courses, freshman writing and freshman survey, into a single course. In this course, students read a few seminal texts of a

few seminal authors or essays, poetry or drama; discussed the ideas of those texts thoroughly in class; and wrote essays about the views of life expressed in these works. Working in the tradition of Matthew Arnold, Aydelotte considered significant literature to be that literature that offered solutions to central human problems. Such literature, to use Arnold's terms, offered criticism of life. When writing about this literature, students were not to summarize the texts but to compare the ideas expressed to the students' own ideas; in other words, students were to make ideas read and discussed part of their own mental makeup, part of their own world views. Aydelotte later developed a similar course at MIT, combining the teaching of writing with significant ideas related to engineering. Finally, at Swarthmore, he developed an honors program designed after his own education at Oxford. (TB)

Identifiers—*Aesthetic Reading, Hong Kong

In the Education Commission Report #4 of Hong Kong, three dimensions of learning are noted: cognitive, interpersonal, and aesthetic. In most Hong Kong schools, teaching focuses on the cognitive dimension and to some extent on the interpersonal. The aesthetic dimension is largely ignored, except for the ubiquitous class reader and a handful of schools where literature is included in the teaching program. For example, when poetry (a particularly neglected area) is taught, students are usually so taken up with the literal meaning of the verse and the technical analysis of form, rhyme-scheme, mood, tone, etc., that they miss the affective, emotional, and imaginative aspects of the poem. One way to enhance the intuitive and imaginative side of teaching poetry would be through "deep processing," a strategy used for generating mental pictures, sensations, emotions, and linguistic information about the subject of a thought. When a person thinks about something, he or she usually involves him- or herself in a combination of sensations, thoughts, images, and feelings. Deep processing helps students to experience poetry holistically through exercises that help develop their affective tendencies. It stimulates creative thinking and helps students: (1) expand information; (2) focus on information which has just been presented; (3) think in non-verbal terms; and (4) retrieve information. The poem "Jelly on a Plate" may be used in a lesson that involves primary students in experiencing a poem and miming the movement of jelly. (Contains two figures and copies of the poems used.) (TB)

Identifiers—*Composition Theory, *Discourse Conventions, Merleau Ponty (Maurice), Woolf (Virginia)

In "Common Ground: Dialogue, Understanding, and the Teaching of Composition," Kurt Spellmeyer seeks to familiarize students and teachers with the linguistic and cultural no-man's-land separating them. Reinstating the value of two writing conventions often used by traditional students—expressive and commonplaces—can help expand on the horizons of "Common Ground." Typically, it is argued that personal expression invariably becomes romantic writing or writing for catharsis. Writing for discovery fails as well because students repeat clichéd commonplaces instead of expressing and evaluating

simultaneously. However, a brief study of phenomenological philosophy can further clarify how Spellmeyer's "misreading" thesis encourages the evolution of a linguistic common ground that includes these two conventions. Maurice Merleau-Ponty describes language as a gesture, an act of the body that bears upon language's origin in the carnal world. It cannot be known why a specific word is chosen but once it is, no other can take its place without referring to other contexts. There is a givenness, a quality exclusive to itself, in language, even in students' speech and writing. All this suggests that educators must recognize the value of their students' writing before they suggest ways of making it more academic or conventional. Tampering with a speaker's language twists its given contexts and may rob it of its original force of expression. Excerpts from Virginia Woolf's "To the Lighthouse" illustrate the complex relationship between experience, emotion, and language. (TB)

Educational theorists repeatedly call for more hands-on, authentic, interpretive instruction in social studies. They characterize such instruction as "helping students understand the knowledge construction process" or teaching students "to construct their own historical narratives." While there have been some exceptions, most theorists have called for this type of instruction on the high school level, yet the written work produced by elementary students suggests strongly that much younger students are capable of grasping the complexity of historical selection and explanation. Working with an experienced elementary school teacher, a researcher planned a history unit that was both informative and somewhat emotional, i.e., capable of engaging sixth-graders on a personal level. The core book selected was Jerry Stanley's "I Am an American: A True Story of Japanese Internment." Besides this book, the children read other material, both primary and secondary, which was discussed and responded to in poetry, art, and writing. Children were then asked to write and illustrate their own two-part books: part 1 explained what happened and part 2 explained why a study of the camps is significant. Excerpts from students' books demonstrate an ability among elementary students to come to grips with history in an intelligent, active, responsive way. They respond rather than recite, create rather than copy. (Contains 12 references.) (TB)

Identifiers—Historical Background, Politically Correct Communication, *United States, *Words

Claiming that understanding the social context in which words are formed is necessary to appreciate the richness and vitality of language, this book presents an informal, discursive examination of how and why American speech came to be the way it is, and in particular where the words came from. The book

follows a roughly chronological format from the first European visitors to the backlash against "political correctness" in the 1990s. Some of the many topics addressed in the book include education standards, sexism in language, illiteracy, declining SAT scores, immigration, eating habits, advertising, popular culture, and mass media effects. Chapters in the book are: (1) The "Mayflower" and Before; (2) Becoming Americans; (3) A "Democratic Phrenzy"; America in the Age of Revolution; (4) Making a Nation; (5) By the Dawn's Early Light: Forging a National Identity; (6) We're in the Money: The Age of Invention; (7) Names; (8) "Manifest Destiny"; Taming the West; (9) The Melting Pot: Immigration in America; (10) When the Going Was Good: Travel in America; (11) What's Cooking?: Eating in America; (12) Democratizing Luxury: Shopping in America; (13) Manners and Other Matters; (14) The Hard Sell: Advertising in America; (15) The Movies; (16) The Pursuit of Pleasure: Sport and Play; (17) Of Bombs and Bunkum: Politics and War; (18) Sex and Other Distractions; (19) From Kitty Hawk to the Jumbo Jet; (20) Welcome to the Space Age: The 1950s and Beyond; and (21) American English Today. Notes on sources, a 275-item select bibliography, and an index are attached. (RS)

Identifiers—*Advisers, Advisor Role, *Scholastic Journalism

A study examined how a select group of successful high school journalism teachers face the challenge of applying professional standards in the quest for student press freedom. A total of 162 questionnaires (representing a response rate of 46.5%) were returned by a purposive sample of teachers who advise some of the most highly acclaimed student newspapers in the United States. Results indicated that: (1) 90% of the advisers agreed strongly or somewhat that students must behave ethically if they want to exercise freedom of the press in the high school newspaper; (2) the advisers valued classroom instruction and also the learning that comes from addressing specific ethical issues confronting the professional and student press; and (3) the advisers acknowledged their role as a bridge to the professional press and they put a premium on helping their students acquire the tools to make ethical decisions. Findings suggest that the advisers of acclaimed student newspapers ARE setting high standards for their students and definitely want their publications and students to be identified with the best of professional journalism. (Contains 20 references, 1 note, and 3 tables of data.) (RS)

Identifiers—Traumas

This paper details the introduction of trauma interview instruction to the journalism classroom. The paper begins by summarizing what has been learned from the academic and trade literature, followed by a detailed explanation of the role play exercise, the

principal method of investigation in the paper. The paper also discusses the reactions of the three graduate students chosen to play the bereaved individuals in the role-play and the responses of the undergraduate students who played the reporters sent to interview the victims. The findings support the value of role play in classroom instruction and suggest the need for careful training in preparation for the trauma victim interview. Contains 2 unnumbered tables of data and 25 notes. Appendixes present role-playing information for the victims and for the reporters. (Author/RS)

Descriptors—Censorship, *Freedom of Speech, Higher Education, High Schools, National Surveys, *School Newspapers, *Teacher Role Identifiers—Advisor Role, Hazelwood School District v. Kuhlmeier, *Prior Restraint (Censorship), *Prior Review, *Scholastic Journalism

A study investigated whether scholastic journalism educators agree on definitions of prior review and prior restraint. A total of 83 officers or directors of local, state, or national scholastic journalism organizations, including the membership list of the Scholastic Journalism Division of the Association for Education in Journalism and Mass Communication, completed surveys regarding prior review and prior restraint. Consensus definitions of prior review and prior restraint based upon responses to the survey emerged—prior review is reading newspaper copy before publication by a school employee; and prior restraint is any prohibition against publication made by the adviser, the principal, or any other school employee. Results also indicated that: (1) advisers should correct misspellings and factual errors in copy but should not stop negative stories about the school or stories that may be harmful but not libelous, obscene, or disruptive; (2) advisers should not change the wording of controversial articles or remove them from the newspaper; and (3) respondents felt that the adviser was not ultimately responsible for the content of the newspaper. Findings suggest that the respondents seemed to support the Supreme Court's goal for high standards (as reflected in the "Hazelwood v. Kuhlmeier" decision), but they felt the Court went too far in "Hazelwood" in the type of restrictions that would be allowed on a variety of constitutionally protected speech. Findings also suggest that journalism educators should attempt to think of the adviser's role as one that transcends school official, managing editor, and teacher. A study focused on teachers who have worked in computerized, networked writing classrooms at Purdue University (Indiana) for several years. Each of the subjects was a teaching assistant in the Purdue English Department, and the courses involved were upper division technical writing courses. Three theoretical approaches underpinned the study: feminist research methodologies, Foucauldian theory of the relationship between power and knowledge; and Louise Wetherbee Phelps' discussion of the various types of knowledge making in composition scholarship. The study was conducted in four phases. First, information was gathered about the history of the

training program, the focus of the technical writing course, the sites in which the courses were taught, and the theoretical training of the research assistants. Second, the director of the program was interviewed to determine how the teaching assistants were being mentored. Third, a staff meeting was observed in which new on-line services were being presented by Purdue librarians. Fourth, interviews were conducted with the teaching assistants, using a common set of questions. Results showed that: (1) decentering was a goal for the teachers but they also worked to keep certain kinds of authority in place; (2) teachers were willing to learn technical knowledge from their students but they also considered themselves experts in communication and were confident about this; and (3) teachers recognized that the types of knowledge they use in the networked classroom is less static than knowledge in the traditional classroom. Identifiers—Clarity
There are three distinct ways that the metaphor of "clarity" is employed in rhetorical history and in daily interchanges, correlating to three ways of looking at language, in turn correlating to three approaches to teaching writing. What is being proposed is more of a taxonomy than a pedagogy, but this taxonomy is important because of its implications for teaching. There are three "motives of clarity": (1) the conventional, (2) the economical, and (3) the rhetorical. The first metaphorical understanding of "clarity" has to do with values and power, seemingly non-negotiable rules, right and wrong. Here "clarity" is associated with "correctness" with abiding by conventional rules of grammar, usage, argument and genre. The second metaphorical understanding of clarity is "economic"; it is primarily concerned with the efficiency of written communication. Here, clarity is less concerned with convention than with the cost-effective transmission of information. A lack of clarity, in this sense, is a wordiness or haphazardness or use of the figurative that demands too much time and linguistic attention of the reader. The third metaphorical understanding of "clarity" is "rhetorical," that is, it affirms real and situated readers and writers and is concerned with their capacity to "see" one another, to create meaning together through the text. Here clarity is what works to achieve the writer's purpose with a particular audience. (TB)

Identifiers—*Arkansas, Press Law, *Scholastic Journalism
This paper reviews research concerning the attitudes that principals, journalism advisers, high school journalism press association directors, and student editors hold toward student publications, and it reviews research concerning effective political strategies. The study focuses particularly on the strategies employed by supporters of student press legislation in Arkansas, where such legislation, despite the state's politically conservative orientation, was passed finally in 1995. A detailed history of attempts to draft legislation palatable to all parties

involved shows how convoluted a process it became. Supporters of the Arkansas Student Publications Act found that it was only by applying information from both surveys of those associated with high school publications and surveys of those involved in the political processes that they were able to draft successful legislation. First, supporters built a wide base of support for their proposed bill. When that base of support seemed about to unravel, they framed the issue in terms all could appreciate and also compromised on some issues. Second, supporters found effective legislative sponsors, all of whom were well-respected Democrats with rural constituencies, and two of whom were experienced legislators who had either media or teaching backgrounds. Third, and perhaps most importantly, supporters negotiated with the opposition before the opposition had a chance to mobilize its forces. They managed to convince the opposition that the proposed act was a win-win-win situation for administrators, advisers and students. (Contains 24 references; 5 appendices contain successive drafts of the bill.) (Author/TB)

Desktop Technology for Newspapers: Use of the

Computer Tool.

Pub Date—[95]

Note—126p.

Pub Type—Opinion Papers (120)—Reports—Research (143)—Information Analyses (070)

EDRS Price—MF01/PC06 Plus Postage.

Descriptors—Computers, *Desktop Publishing, *Editing, Electronic Publishing, Futures (of Society), Higher Education, Journalism, *Layout (Publications), Media Research, *Newspapers, Online Systems, Technological Advancement Identifiers—*Electronic Newspapers, Pagination, *Technology Integration

This work considers desktop publishing technology as a way used to paginate newspapers electronically, tracing the technology's development from the beginning of desktop publishing in the mid-1980s to the 1990s. The work emphasizes how desktop publishing technology is and can be used by weekly newspapers. It reports on a Pennsylvania weekly newspaper study's finding on the level of use of desktop publishing and related technologies, noting significant use of basic desktop computer systems and additional desktop publishing-related technologies. Further, that study found use of such technology increases as the number of pages published increases and as the population density of the area in which the paper is published increases. Also reported are interviews with several Pennsylvania weekly newspaper journalists, who discuss how their organizations have used desktop publishing technology and interviews with industry experts on how weekly newspapers can use desktop publishing technology as it existed in spring 1995. The experts outline a basic desktop publishing system that can be started for less than \$9,000, plus the cost of a computer. Finally, the work considers the development of new computer-related technologies that can permit newspapers, weeklies, and dailies to publish in alternative forms, such as online publication, fax news systems, and bulletin board systems. Many of these systems have been developed at universities—for example, Stanford has an interactive Media Link campus news service, and the University of Missouri has tested an electronic newspaper. Appendixes contain the study questionnaire, tables and tests, a rationale for selection of statistical test, uses of technology, and a 335-item selected bibliography. (TB)

Identifiers—Memphis City Schools TN, Trade Books, University of Memphis TN

The "Voices of Love and Freedom" project uses current children's literature to help children connect with their teachers and classmates in a personal way while teaching children ethical decision making skills, multicultural understanding, and literacy. The model also provides teachers with an easily understandable method for integrating subjects using real books about real issues. The teacher shares a personal story with the students and then reads an applicable story to them. A collaborative group of researchers from Memphis (Tennessee) City Schools, the Center for Research in Educational Policy, and the University of Memphis's College of Education evaluated the first year's implementation of the project at Oakhaven Elementary School in Memphis. While it is still too early to reach conclusive results, preliminary indications are that the project approach has the potential to significantly reduce the amount of violence and friction in schools. For instance, the number of students disciplined for fighting dropped dramatically. In addition, "Voices for Love and Freedom" has been a catalyst within the school to focus faculty, staff and students on thinking about and expanding alternative choices to violent behavior. Some of the findings have also affected the way the school's principal thinks about student achievement. A detailed description of how this project got underway at Oakhaven shows that it is a complex undertaking and one that takes more than one school year to implement. (Author/TB)

Identifiers—*Response to Literature
Educators can help students develop enthusiastic, committed readers who are mentally sharp by developing approaches to literature teaching that are based upon informed concepts of reading and response rather than upon conventional inherited ideas of comprehension and criticism. A study of how 15-year-old students responded to a poem indicated that the substance of the responses shared common elements: the strategies for reading and notetaking were markedly individual; and, as storytellers, the students became more deeply involved with the literature. At least three reasons exist which help to explain why reader response has replaced New Criticism's hegemony in literature teaching: it honors both the integrity of the text and of the reader; it reflects the contemporary concern for process as well as product; and it redefines the question of value. The question remains whether response-oriented practices are appropriate for work with second-language students. A series of classroom activities were set up for first-year students in a Danish university to engage them more fully in the process of response. These students found the verbal/visual combinations of the activities as engaging and accessible as had the students in the earlier study. Teaching methods based on reader-response approaches should engage and motivate students, trust the reader, trust the text, and regard the practice of critical evaluation. (Contains figures which illustrate students' responses to poems and 39 references.) (RS)

Identifiers—*England, Historical Background

This paper surveys the study of English in British schools from the 16th century to the present. The paper proceeds chronologically, using key terms operative in education at various times to structure discussion. In the 16th century a key term was "rhetoric," which concerns oral expression. "The Art and Craft of Rhetoric," is one of the oldest surviving textbooks, discussing types of discourse—logical, demonstrative, deliberative, and judicial. By 1700, a key term was "expression"—verse writing in English was encouraged as a skill approved at the highest social levels; imitation and the use of stock expression was the dominant convention. By the middle of the 18th century, literature anthologies were common, as were spelling books and grammar textbooks, but from the middle of the 17th century to the middle of the 18th century it is hard to know how much attention was given to written expression, since no textbooks survive. During that same period, however, social and economic developments caused particular attention to be paid to oral expression, especially for those upwardly bound socially. In the 19th century, educators were asking their students to read and explain particular literature selections and grammar continued to be taught through this century and writing remained unpopular with students. History suggests that English has developed as an alliance of components. Includes 22 notes. (TB)

Identifiers—England, Genre Studies, *Response to Literature

This paper is the beginning of a plea for a reconsideration of the way in which educators teach short stories. It is only the beginning because the paper's main purpose is to draw together literary critical perspectives on the short story and then briefly examine their implications for teaching. It is the convenient yet evasive nature of short stories that forms the basis of this argument. An examination of broad ranging critical approaches to the short story raises a number of important questions concerning classroom practices. First, what students expect from short stories is considered, comparing responses to a novel with those to a short story. The paper then considers how educators can help students read the lack of resolution in many short stories, noting that students could be asked to summarize the plot in a single sentence, thereby calling attention to what has been left out. How educators can help students to see the significance of the story frame is examined next. In this context, students must be encouraged to predict pasts and futures for the characters, preferably over a broad time span to encourage summarizing. Last, students need to be made aware of short story theories, in the same way that educators want knowledge of literary theory or of poetic diction to inform their responses to novels or poems. Contains 48 references. (TB)

Identifiers—Virginia (Richmond), Writing Contexts

The decision to organize English 112 courses around a research project entitled "A Survey of the Freshman Composition Requirement at Richmond Area Colleges and Universities" resulted from concerns as the fall of 1993 approached. English 112 emphasizes the study of literature and the production of a research paper that presents an argument by paraphrasing information in books and periodicals. Since the instructor himself has an aversion to writing this type of perfunctory paper, he assumed that his students would have the same aversion. In an article, Richard L. Larson argues that the concept of a research paper has no substantive identity, that is, it is impossible to differentiate between texts that incorporate and evaluate new information and those that do not. In the composition classroom, a research paper is any attempt by writers to gather information for themselves, the world, or others as they make meaning for a purpose. What is the purpose of Freshman English but to prepare students to be self-critically aware as they revise their discourse for a variety of audiences and purposes. With these considerations in mind, a research project was devised that would involve the entire class and serve a real purpose. That project raised important questions such as: (1) what qualifies a researcher as competent? (2) what is the role of students as researchers and writers? and (3) how can educators rethink information literacy so that they can kill the mistaken perception of the so-called research or terminal paper? Descriptors—Analysis of Variance, Communication Research, *Hazardous Materials, Higher Education, *Information Seeking, *Journalism, *Research Methodology, Risk, Theory Practice Relationship, Undergraduate Students

Identifiers—*Behavioral Intention, Environmental Issues, Message Responses, News Stories, *Protection Motivation Theory

A study explored Protection Motivation Theory (PMT) in the context of news reports about a hazard. Content elements of outcome severity, vulnerability, and response efficacy were systematically varied in stories about a fabricated risk: fluorescent lighting lowering student academic performance. Research subjects were 206 students in an introductory journalism and mass communication class who received extra credit for their participation. Subjects received different versions of the fluorescent light story, and at the end of an experimental session they were debriefed as to the purpose of the study, apprised of the deception involved and informed that the hazards mentioned in the experiment did not exist. Results from this laboratory experiment suggest that information about the severity of consequences results in greater information seeking about a hazard. In addition, information about vulnerability, severity, and response efficacy jointly combined to produce higher levels of behavioral intention to take actions designed to avoid the hazard. Overall, results suggest on both theoretical and practical grounds—that Protection Motivation Theory can and will continue to serve communication researchers as a vehicle for conducting fruitful research. (Contains 8 endnotes, 31 references, a figure, and 3 tables of data. Appendixes contain a summary of research results and summary statistics of variables used in analysis.) (Author/NKA)

Identifiers—*Writing to Learn

Designed for education majors and minors in all subjects and as a resource for experienced teachers, the central theme of this book is writing to learn. The chapters are entitled: (1) Writing across the Curriculum; (2) Writing as a Process; (3) Levels of Writing; (4) Journals; (5) Writing as a Means for Learning; (6) Improving Writing Skills; (7) Writing in Math and Science; (8) Writing in Social Studies; (9) Writing in Art and Music; (10) Evaluation of Writing; and (11) Interdisciplinary Units. Each chapter is followed by a summary, discussion questions, suggested activities and references. Chapter 3 is devoted to describing the levels of writing, which are then incorporated throughout the book. While research and theory provide the backbone of this book, the general focus is practical application. Suggestions for teaching in the book include small groups, whole class, and individual work. Descriptors—Attitude Measures, *Futures (of Society), Higher Education, Journalism, *Media Adaptation, Media Research, Q Methodology, *Student Attitudes, *Teacher Attitudes, *Technological Advancement

Identifiers—Diffusion of Innovations Research, *Media Adoption, *Professional Concerns

A study used Q-methodology to examine attitudes of 42 journalism students and educators at a midwestern university toward new media technology. Subjects read a sample of opinion statements and placed them along an 11-point scale. Four factors were identified: "Champions of Change"; "Pessimistic Prophets"; "Laid-Back Liberals"; and "Skeptical Optimists." Results indicated that Champions of Change were eager, seeing technology primarily as a tool empowering users. Other factors expressed profound concerns about issues ranging from manipulation potential to an increasing knowledge gap among media consumers. Stated in terms of diffusion theory, Champions of Change—while they may not currently be using new media technology as they define it—are likely to become the early adopters, and perhaps even the innovators, of new media technology. EDRS Price—MF01/PC04 Plus Postage.

Descriptors—Freedom of Speech, High Schools, *Journalism Education, Journalism Research, National Surveys, Public Schools, *School Newspapers, *Teacher Administrator Relationship, *Teacher Attitudes, Teacher Student Relationship

Identifiers—*Advisor Role, *Scholastic Journalism

A study examined the extent to which high school journalism advisers strive to achieve a balance between the right of school authorities to control the educational process and students' First Amendment rights. Questionnaires were sent to a stratified ran-

dom sample of 500 public secondary schools across the United States. A total of 248 journalism advisers responded, for a response rate of 50%. Results indicated that: (1) most teachers supported the position that the student editor has the final responsibility for content decisions; (2) advisers with journalism certification, those with a heavy journalism class load, veteran teachers and suburban teachers were more likely than their counterparts to assume responsibility for supporting student freedom of expression across the involvement continuum; (3) most advisers would not seek the principal's approval before a sensitive, critical or controversial story is published; and (4) stories about school personnel competency and sex and sexuality were the stories that teachers, students, and administrators were most apt to disagree about. Findings suggest that the answer to the journalism teacher's dilemma is a pragmatic or situational one. Maintaining the balance between the ideals of journalism and the pragmatic realities of everyday school life is difficult but possible. Findings also point toward establishing policies that favor the hiring of certified journalism teachers. (Contains 51 notes and 31 tables of data. The questionnaire is attached.) (RS)

Identifiers—International Reading Association, National Council of Teachers of English, *National Standards

This book describes standards for the English language arts and defines what K-12 students should know about language and be able to do with language. The book presents the current consensus among literacy teachers and researchers about what students should learn in the English language arts—reading, writing, listening, speaking, viewing, and visually representing. The first chapter of the

book (Setting Standards in the English Language Arts) addresses defining the standards and the need for standards. The second chapter (Perspectives Informing the English Language Arts Standards) discusses the content, purpose, development, and context of the standards. The third chapter presents the 12 standards in detail. The fourth chapter (Standards in the Classroom) presents elementary, middle-school, and high-school vignettes which illustrate how the standards might be implemented in the classroom. The book concludes that these standards represent not an end but a beginning—a starting point for discussion and action. A glossary (containing more than 100 terms), a list of participants, a history of the standards project, an overview of standards projects, state and international English language arts standards, a 115-item annotated list of resources for teachers, and a comment form are attached. Intercultural Confidence Building for the Speech Communication Teacher/Student: A Conceivable Short Course.

Pub Date—Apr 95

Note—18p; Paper presented at the Annual Meeting of the Central States Communication Association (Indianapolis, IN, April 19-23, 1995).

Pub Type—Speeches/Meeting Papers (150) — Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Course Descriptions, Cultural Awareness, Cultural Differences, Higher Education, *Intercultural Communication, *Minicourses, *Multicultural Education

Identifiers—Communication Strategies, *Diversity (Student), Politically Correct Communication, Student Empowerment

Noting that recent descriptions of "political correctness" give multiculturalism a negative connotation, this paper explores the role of intercultural communication in a re-considered 1990s view of multicultural education and discusses the design of a conceivable short course that will serve as the foundation for increasing teacher/student intercultural confidence. The paper notes that multicultural education is making enormous progress, and that one course where multicultural education principles can be embraced is intercultural communication. The paper then discusses a 3-hour experiential-based teacher/student intercultural confidence building short course that will focus upon individualism/collectivism to help the teacher/student participants to perceive classroom diversity as an asset rather than a dreaded liability. The short course proposed in the paper will include a brief lecture followed by the participants (professors, graduate students, and secondary school professionals attending a Central States Communication Association conference) crafting classroom scenarios which they will then role-play and follow-up with analysis and evaluation of the communication that occurred. Contains 35 references. (RS)

Celebrating the "Intellectual Heart": Emergent

Meanings from a Post-Earthquake Organizational Communication Culture Perspective.

Pub Date—Feb 95

Note—24p; Paper presented at the Annual Meeting of the Western States Communication Association (Portland, OR, February 10-14, 1995).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Administrator Role, *College Administration, Communication Research, Discourse Analysis, *Earthquakes, Higher Education, *Organizational Communication, *Public Relations

Identifiers—*California State University Northridge, Emergent Meaning, *Organizational Culture

The Organizational Communication Culture (OCC) method, designed by Charles A. Bantz (1993) was utilized as the primary method for analyzing messages coming from the administration of California State University, Northridge, after the earthquake. Bantz feels that communication interactions in an organization bring meanings and expectations to that organization and that by analyzing these symbolic forms, the researcher has some insight into the culture of the group being studied. Results of the study were organized around three key constructs: harmony, family community, and spirit/dedication. It is important to note, however, that no single construct is representative of the entire culture of the university—this study concerns only the administration's vision as it is represented in its documents. First, the documents emphasized team work and collaboration as though the harmony displayed among the participants in the project reorganization were representative of an organism back in harmony with nature and not at odds with nature. Second, the university became a refuge or family for students who had lost their homes or were in some way displaced by the earthquake. Third, letters from the president's office explained, defined, and expressed how the slogan, "Not Just Back...Better" reflected an attitude of what the administration was trying to do. Key documents are analyzed according to themes outlined by Bantz: vocabulary, themes, temporality, and architecture. (TB)

Using the Movie, "The Gods Must Be Crazy," in Interpersonal Communications Classes.

Pub Date—Apr 95

Note—8p; Paper presented at the Annual Meeting of the Central States Communication Association (Indianapolis, IN, April 19-23, 1995).

Pub Type—Opinion Papers (120) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Audience Response, *Critical Viewing, Cultural Awareness, *Cultural Differences, Ethnic Stereotypes, *Films, Foreign Countries, Higher Education, Instructional Effectiveness, *Intercultural Communication, *Interpersonal Communication, *Multicultural Education

Identifiers—Africa, *Gods Must Be Crazy (The)

Opening in 1981 to moviegoers in Japan, France, and the United States, "The Gods Must Be Crazy" became an international hit. Set in Botswana, the film covers a relatively small geographic area yet nevertheless can open classroom discussions about how many cultures and how much cultural diversity can exist in a small area. It has three main groups of characters: (1) a tribe of simple and unpretentious bushmen, hunting and gathering natives who live in the Kalahari desert; (2) 600 miles to the south, there is a city where a modern newspaper office employs men and women of different races; and (3) in still another setting, there are revolutionaries—black Africans in military-type outfits. According to good dramatic writing, these three groups will meet at some point in the movie: each group has goals which conflict with those of the other groups. What does the film tell us about intercultural communication? For one thing, the viewer sees these different groups in a limited geographical region—a picture of Africa that runs contrary to stereotypes. Any "all" statement about these African scenes will have no validity. Not only is the viewer unable to make any "all" statements about Africans, but he or she is also unable to make any "all" statement about a particular country in Africa. Charges that the film is racist have been laid to rest by critics and writers such as Tim O'Brien, who notes that the humor of the film is at everyone's expense. (TB)

Throwing Out the Relativity Bath Water without Losing the Diversity Baby: Teaching Diversity versus Relativity in a Communication Ethics Course.

Pub Date—Apr 95

Note—15p; Paper presented at the Annual Meeting of the Central States Communication Association (Indianapolis, IN, April 19-23, 1995).

Pub Type—Opinion Papers (120) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Course Content, *Critical Thinking, Cultural Awareness, *Cultural Differences, Cultural Pluralism, *Cultural Relevance, Decision Making Skills, Ethics, Higher Education, Models, *Multicultural Education, *Speech Communication

Identifiers—*Communication Ethics

This paper holds that despite, or perhaps because of, the development of recent ideas about diversity and cultural relativity, universities are obligated to teach communication ethics. Further, it holds that the implications of giving bachelor's degrees to students who do not have a solid grasp of universal ethical guidelines are potentially dangerous and far-reaching. The paper argues that a solution lies in presenting communication ethics courses which embrace diversity and its benefits but which reject relativism, that is, the tendency to accept all approaches, views, or practices as equally valid. The paper proposes a communication ethics course based on the effort to encourage students to critically examine options. The paper presents an overview of such a course which begins by stating that a communications ethics course is culturally situated: it holds to certain values, like rational decision-making and the importance of valuing and understanding other cultures, that may not be universally shared—students would be required to identify their own values and biases when making decisions. The paper states that as students progress through the course, they will be asked to offer rationales for their positions and to consider how these rationales reflect the biases and values they identified earlier in the course. A day-by-day overview is offered of what might be done in the first 2 weeks of the course and how course objectives might be met. The paper concludes with a list of "key definitions" and some "troubleshooting" questions. (TB)

The Future of Agenda Setting Research: New Audiences and New Gatekeepers.

Pub Date—Apr 95

Note—28p; Paper presented at the Annual Meeting of the Central States Communication Association (Indianapolis, IN, April 19-23, 1995).

Pub Type—Opinion Papers (120) — Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Agenda Setting, *Audience Analysis, Broadcast Journalism, Higher Education, *Mass Media Effects, *Mass Media Role, *Media Research, Newspapers, Periodicals, *Public Opinion, Television

Identifiers—*Gatekeeper Role

The topic of agenda setting has been one of the most researched fields in mass communication since its introduction in 1972. M. E. McCombs and D. L. Shaw (1972) began a research collection of over 200 projects by upholding the hypothesis that the media cannot tell viewers what to think but it can tell them what to think about. The question arises as to what extent this study could be replicated today. A current study retraced the steps of the study, asking at each juncture how differences in the media landscape between 1968 and the present would affect agenda setting research. In the area of television news, results report considerable differences between the time periods. While McCombs and Shaw worked from the assumptions that two network newscasts commanded a mass audience, the same assumptions would not be operative today, as the menu of television newscasts has diversified. Further, fiber optics promises to offer viewers individual choices about movies, television shows, and newscasts. In the area of news magazines, results report again that while McCombs and Shaw work from the assumption that "Time" and "Newsweek" are representative, no such consensus exists today. While the circulation of these two magazines has been dropping, the number of magazines in print has

more than doubled, reaching 3,000 in 1990. This is not to suggest that agenda setting research is no longer possible, but that given the changes noted above, it will move in two directions: toward homogeneous research groups or toward personal gatekeepers. (Contains 25 references.) (TB)

Brown, David H.

Non-Traditional Approach to Teaching Speech-It's Effective.

Pub Date—23 May 95

Note—16p; Paper presented at the Annual National Institute for Staff and Organizational Development Conference (Austin, TX, May 21-24, 1995).

Pub Type—Opinion Papers (120) — Speeches/Meeting Papers (150) — Guides - Classroom - Teacher (052)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Audience Awareness, Class Activities, Community Colleges, Group Dynamics, Higher Education, *Instructional Effectiveness, Introductory Courses, *Public Speaking, *Student Evaluation, Student Needs

Identifiers—Student Centered Assessment

The purpose of teaching speech is to give students enough basics and practice so they can become more confident and effective at the podium. Theory may be useful but there is no substitute for practice: students in a speech class taught at a community college gave six speeches during the semester, three of them solo speeches and two in groups. The process of making students into confident speakers begins with the instructor's getting to know each student and his or her fears, weaknesses or concerns. Students are then introduced to a system of speech preparation, outlined in a recently published book, "I Would Rather Be Audited by the IRS than Give a Speech." The instructor first talks about the PA system, which stands for "purpose" and "audience," both of which the speaker must be well aware. Then he introduces his "Popeye System," or POPI, which stands for preparation, organization, presentation, and improvement. All these areas are key to controlling anxiety. Most fears stem from not turning on the "PA system," and from lack of "preparation" and "organization" because the purpose and audience are not clear. A speaker cannot correctly present if the preparation and organization are haphazard. After the speeches are given, the instructor gives a grade for each element of the POPI system because some students are better at preparation and/or organization than presentation. Group exercises are enjoyable—lesson in interpersonal communication. (Grid grade system is attached, as well as an outline of the course.) (TB)

Holm, Todd T.

A Dialogue on Monologues in Dramatic Interpretation.

Pub Date—Nov 95

Note—15p; Paper presented at the Annual Meeting of the Speech Communication Association (81st, San Antonio, TX, November 18-21, 1995).

Pub Type—Opinion Papers (120) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Drama, Higher Education, *Monologues, *Oral Interpretation, *Persuasive Discourse, Poetry, Prose, *Student Development, *Student Educational Objectives

Identifiers—Interpretation Analysis (Debate)

It is a surprising fact that a student of speech can compete in prose, poetry, drama, and program oral interpretation without ever needing to develop two characters, without ever needing to establish two separate focal points in the same piece, and without ever learning to adapt to a new style of writing. This can be done if the student simply picks the right type of material. Free verse poetry and prose sound very similar. Monologues and soliloquies sound very similar to prose also. Part of the reason that so many performances appear to cross genre lines is because students watch what is being done in competition and then seek out pieces that emulate the qualities they see in winning performances. This develops trends, which become norms, which then become rules. Ballots often tell students they need to conform to the norm in an event or that the selection is not right for the competition. Another reason for the crossing of genre lines is that students take the path of least resistance and so do educators: why not have a student perform the type of work they are best at? The damage this trend causes is significant

because it undercuts the most basic premise of forensic studies: the need to educate students, to push them toward new, challenging, and growth-inducing experiences. The solution to this problem is not a correction to the event descriptions but a commitment among educators to drive their students toward learning experiences. (TB)

Children's Narrative and Pedagogical Attentiveness: From Silence to Resilience.

Pub Date—19 Apr 95

Note—24p; Paper presented at the Annual Meeting of the American Educational Research Association (San Francisco, CA, April 18-22, 1995).

Pub Type—Speeches/Meeting Papers (150) — Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Case Studies, Child Neglect, Educational Environment, Elementary Education, *Personal Narratives, *School Role, *Student Behavior, Teacher Student Relationship

Identifiers—*Childhood Experiences, Huckleberry Finn

Schools offer the possibility of providing safe, supportive structures for children whose lives have been marked by chaos. They can enable vulnerable children to develop competencies which can help to protect them from the effects of traumatic backgrounds. When a child's lived experience falls outside the boundaries of normative experience, as in the situation of the maltreated child, schools offer the possibility of an environment in which the child's experiences can be heard and acknowledged. A child's narrative of vulnerability, though, is awkward and painful in both the telling and the listening. Often a complicity of silence exists in the classroom; the child does not tell, and the teacher does not hear. The role of the school in hearing and responding to children's narratives of non-normative lived experience is explored in both fiction and in the real world. Huckleberry Finn is discussed as an American icon of youthful resilience; 2 case studies of vulnerable children are presented which illustrate different ways schools hear and respond to children's narratives. Inviting International Students into the Communication Classroom: The Wayne State University Global Communication Course.

Pub Date—Apr 95

Note—17p; Paper presented at the Annual Meeting of the Central States Communication Association (Indianapolis, IN, April 19-23, 1995).

Pub Type—Speeches/Meeting Papers (150) — Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Course Descriptions, *English (Second Language), Foreign Students, *Global Approach, Higher Education, Instructional Improvement, *Intercultural Communication

Identifiers—Communication Strategies, Diversity (Student), *Wayne State University MI

The Department of Communication and the English Language Institute at Wayne State University in Detroit are one year into an experimental project in intercultural communication instruction that brings international students and metro-Detroit undergraduates into a shared classroom. The Detroit project design was partly funded by the Ford Foundation through the Wayne State Diversity Project, and is of potential use to more than 150 colleges and universities nationwide with intensive ESL (English as a Second Language) programs. The Detroit Project's experience suggests that the curricular intents and requirements of classic undergraduate intercultural communication courses can mesh well with the administrative and curricular intents of programs designed to teach English to international visitors. Further, the global student mix permits simultaneous intercultural instruction at cognitive, affective, and behavioral levels in a manner much less possible in a standard undergraduate setting. This paper describes the administration, implementation, and curriculum of the course at Wayne State University, as well as its historical antecedents elsewhere, especially in the Intercultural Communication Workshop movement of the 1970s. (Contains 2 notes and 11 references. Two newspaper articles concerning the course are appended. (Author/RS))

 "Hill I'm Your Instructor...BELIEVE IT OR NOT?": An Exercise Confronting Stereotypes in the First Day of an Interpersonal Communication Class.

Pub Date—Apr 95

Note—12p.; Paper presented at the Annual Meeting of the Central States Communication Association (Indianapolis, IN, April 19-23, 1995).

Pub Type—Speeches/Meeting Papers (150) — Guides—Classroom—Teacher (052)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—Class Activities, Higher Education, Instructional Effectiveness, *Interpersonal Communication, Nonverbal Communication, *Stereotypes, *Student Attitudes, Student Reaction Identifiers—Communication Behavior

A 25-year-old male instructor of Korean, Japanese, Hawaiian, American, and Australian background teaching predominantly 20-year-old, white students at a midwestern university developed an activity to introduce interpersonal communication to the students on the first day of class. Objectives were to develop in learners: (1) an awareness of sociopsychological processes embedded in interpersonal communication; (2) an awareness of the students' own assumptions and how they relate to interpersonal communication; (3) a greater understanding of the role of nonverbal cues; and (4) an appreciation of communicating on an interpersonal level and not stereotyping. An intern entered the class, told the students that the instructor was running late, and played an audiotape recording of the instructor, which asked the students to write down details of the instructor based on the tape recording. The instructor (who entered the classroom earlier and took a seat among the students) then walked to the front of the class and revealed that he was the instructor. Subsequent class discussion focused on issues raised in the students' writing. The 64 students who were exposed to this exercise in the Spring of 1995 were asked to respond anonymously to questions regarding the exercise. Major themes that emerged were stereotyping (including how strongly some stereotypes are embedded); vocalics (such as how vocalics influenced people's thoughts); introduction to later material in the course; and ice-breaker (indicating that the exercise was a creative introduction to the class. The exercise, or some variation, can be used in any interpersonal or intercultural communication course. (RS)

Descriptors—Acculturation, Communication Research, *Graduate Students, Higher Education, *Socialization, *Student Attitudes, Student Surveys, *Teaching Assistants Identifiers—Communication Behavior, Research Suggestions

A preliminary study explored the components of the assimilation stage of graduate teaching assistant (GTA) socialization. Subjects, 64 GTAs attending a large midwestern university, completed 4 survey instruments concerning their attitudes on mentoring and communication support, information seeking strategies, teacher communication concerns, and organizational socialization tactics. Results indicated that supportive communication relationships correlated with information-seeking practices, teacher communication concern, and organizational socialization tactics. Partial correlation analysis revealed three significant findings: supportive communication relationships and organizational socialization tactics; information-seeking practices and teacher communication concern; and supportive communication relationships and information-seeking practices. Findings suggest that communication is a central component of GTA socialization. Future research should explore mentor-protégé relationships, peer relationships, and information seeking.  The Social Acceptability of Sexual Slang: Functions of Biological Sex and Psychological Gender.

Pub Date—Nov 95

Note—14p.; Paper presented at the Annual Meeting of the Speech Communication Association (81st, San Antonio, TX, November 18-21, 1995).

Pub Type—Speeches/Meeting Papers (150) — Reports—Research (143)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—Communication Research, Higher Education, Identification (Psychology), Language Role, *Language Usage, *Sex Differences, Student Attitudes, Undergraduate Students Identifiers—*Gender Issues, *Slang

A study explored the social acceptability that accompanies the expression of sexual slang. The study of gender differences in language use is nothing new. Previous research has indicated that men and women differ in their use of tentative language, topic selection, control techniques, and conversational style. However, this research has examined differences due to male and female biological sex, and has not examined differences due to psychological gender. Subjects, 49 male and 92 female undergraduate students enrolled in an introductory communication course at a large midwestern university, completed the Social Acceptability of Language Scale and the Bem Sex-Role Inventory. Results indicated that, for the most part, neither biological sex nor psychological gender accounted for differences in the social acceptability of sexual slang. Findings suggest that men and women are moving toward a universal use of sexual slang. (Contains 48 references and 1 table of data.) (Author/RS)

This study examines textual analysis methodology as applied to mass communication studies. It focuses particularly on the theoretical basis of textual analysis, the analytical process, and congruent

theoretical perspectives. Although the term "textual analysis" is often used generically, this study differentiates textual analysis as developed by the British cultural studies tradition from other textual approaches, such as qualitative content analysis and discourse analysis. Particular attention is given to making the specialized vocabulary of textual analysis more accessible and providing concrete examples of the analytic process. The need for qualitative studies to delineate an integrated research design and specific methodology to obtain methodological rigor is stressed. Contains 50 references and 17 additional sources. Descriptors—Discourse Analysis, Intellectual History, Nazism, Politics, *Rhetorical Criticism, *Rhetorical Theory, Sciences, Theory Practice Relationship

Identifiers—Knowledge about Science and Scientists, *Political Rhetoric, *Rhetoric of Inquiry

Noting that discussions about the interaction of science and politics are often heard, this paper addresses how these discursive arenas are defined and distinguished. It argues that political and scientific discourse may be distinguished by the roles they assume on the rhetorical stage, and the relevant roles which emerge as implementers and investigators. The paper first defines and elaborates on these roles, then states that rhetoric of inquiry first emerges when discourse is appropriated by different audiences or is placed in a different genre—for example, the appropriation by different audiences might occur when a debate within a scientific community becomes a topic for discussion beyond the context of academic journals or laboratory experiments. The paper states that another situation that calls attention to rhetoric of inquiry involves the shift and possible conflict among different standards for testing and certifying truth claims—the idea of reality held by a community may be understood by examining how it establishes and tests what it considers true. The paper cites three conditions for conflict between implementers and investigators: perceived antitheses between political and intellectual endeavors; epistemological division between pure and applied knowledge; and the separation of power from knowledge. The major part of the paper examines the philosophical basis of these conditions in relation to scenarios in which they become actualized, citing scientific method in intellectual history and focusing on Nazi political discourse regarding racial science. Based on the ideas of Habermas and Foucault, the paper concludes that investigation and

implementation interact dynamically. (Includes 60 notes.) (NKA)

Descriptors—Case Studies, *Child Abuse, Communication Research, Discourse Analysis, *Females, Participant Observation, *Rehabilitation, *Research Methodology, *Sexual Abuse, Victims of Crime

Identifiers—*Expert Witness, *Healing, Research Suggestions

Using a feminist and subversive perspective, a study examined the testimonies of five adult females each having experienced childhood sexual abuse. All the subjects-participants in a multi-medium art show sponsored by an urban mental health center contacted the researcher voluntarily. Participants ranged in age from 39 to 54; sexual orientation and marital status were not deemed relevant. All were of western European descent; education ranged from high school diploma to Master's degree. Separate discussions were carried out over a period of 4 weeks in the homes of the participants. The study's original intent was to examine the significance and meaning of art in the women's lives, but it was transformed into an examination of a process of self-healing which they described in detail. The term "participant" also gradually changed to "Expert I-witness." Data is essentially the discourse of the subjects. The participants provided an expanded view of what the "experts" discuss rather than simply affirming the testimony of experts. Statistics may lead to a general acceptance that women are the victims, but the possibility should be entertained that child male victims are also out there. Until social science and society acknowledge this, child and adult male victims will continue to be left unhealed. Future studies should expand the role of expert and search for identifiable patterns of healing rather than focus on the negative effects of child sexual abuse. (Contains 30 references.) (NKA)

Conversational Analysis of Cross Examination in Intercollegiate Debate: Using a Model of Relational Control.

Pub Date—Nov 95

Note—33p; Paper presented at the Annual Meeting of the Speech Communication Association (81st, San Antonio, TX, November 18-21, 1995). Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Communication Research, *Debate, *Debate Format, Discourse Analysis, Higher Education, *Interpersonal Communication, Pilot Projects

Identifiers—Cross Examination Debate Association, *Relational Models

A pilot study examined whether a relational control model can be used to evaluate cross examination in academic debate. Four cross examination periods in the 1994 Cross Examination Debate Association Nationals final round were videotaped, transcribed, and coded (using the Relational Communication Control Coding Scheme). Results indicated that the same types of assertions and questions that exist in interpersonal conversations also exist in cross examination and the basic premise of relational control is the same. Results also indicated that the context of cross examination seemed to be close enough to the interpersonal communication context that the model was useful. Future research should look at other contexts which the study of relational control can be applied to, in addition to further studies in cross examination. Identifiers—International Public Relations, *Professional Concerns

The 1987 Commission on Undergraduate Public Relations Education report "Design for Undergraduate Public Relations Education" is examined. Much has changed since that document was published yet much remains the same. Some specific challenges to the existing document include but are not limited to these: (1) multicultural and international demands placed on public relations practice; (2) demands for accountability by college and university administrators, accrediting agencies, governmental bodies, the tax-paying population at large, as well as students and their parents; (3) dynamic tension between industry demands and the goals of public relations educators; and (4) continuing resentment of and discrimination against public relations by other mass communication and communication educators. In spirit and in its specific recommendations, the 1987 commission report is analogous to the 1990 Gold Paper No. 7 of the International Public Relations Association entitled, "Public Relations Education-Recommendations and Standards." However, the Gold Paper was far more realistic and far-sighted. A landmark "must read" book for all communication educators is R. O. Blanchard and W. G. Christ's "Media Education and the Liberal Arts: A Blueprint for the New Professionalism"—a must read because of its provocative theses. While their criticism of sequentially organized curriculums has some virtue, it could, if misapplied, take public relations programs in a direction that the authors are attempting to steer clear of, e.g., a program in which students become jacks of all trades and masters of none, a program with no discernible standards. Public relations needs to continue to assess its place in the academy and as a professional area of practice. (Includes 23 notes.) (TB)

Descriptors—College Outcomes Assessment, *Educational History, *Educational Objectives, Higher Education, *Outcomes of Education, Program Effectiveness, *Public Relations, Student Development, Undergraduate Students

Identifiers—Professional Concerns

It is unlikely that Harvard University (Massachusetts) considered "outcomes assessment" for its first class of nine students in 1640, and most certainly the oldest institution of higher learning in the United States did not offer a public relations curriculum. A short history of education in the United States shows increasing numbers of students attending college, while interest shifts from Ancient Greek Classics to science and math. Although the United States is recognized as the leader of education in the world today, criticism of the educational system is widespread. Indeed, to many it appears that students have been entering college unprepared and that they are leaving 4 years later with a degree but little value added. During the past decade, consequently, demands for accountability have resulted in the mandate for "outcomes assessment" to better measure what students are learning. Misguidedly, educators in public relations have not been much involved in discussions about outcomes assessment. Outcomes assessment could do much for public relations. For a professional community, outcomes assessment should occasion deliberation about what public relations is, together with appropriate definitional parameters. Educators need to consider what knowledge and skills practitioners must have and what are suitable valid and reliable measurements to determine whether a practitioner has these skills. Make no mistake about it, discussions of outcomes assessment will determine the agenda of universities

into the next century. (Contains 35 notes and 30 references.) (TB)

Descriptors—*Futures (of Society), Global Approach, Higher Education, Multicultural Education, *Organizational Communication, *Professional Development, *Public Relations, *Student Needs

Identifiers—Cultural Sensitivity, Internationalism, *International Public Relations

Predictions for a "third wave" in which power and productivity will be based on developing and distributing information should interest public relations practitioners and educators since public relations will be a critically needed professional specialization. A future of communication technology barely fathomable today, together with a resultant need for multicultural/international understanding among diverse peoples who will readily exploit this ability to communicate with each other, is envisioned. A public relations practitioner must be a highly educated human being, with a strong sense of history and current events, who is taught to think and to solve problems in a certain way. Furthermore tomorrow, the practitioner increasingly will need to be culturally astute and cosmopolitan and particularly sensitive to the multicultural and international nuances of the organization's publics. The practitioner's role will change fundamentally as institutions and society change. Consideration of Cold War dichotomies, such as capitalism vs. communism or democracy vs. totalitarianism, will become old-fashioned or irrelevant for those practitioners called upon to defend and ultimately examine base ideological assumptions of their organizations and their very societies. For future practice, public relations scholars and practitioners will need to consider, not only theories of communication, but also theories of society that satisfactorily transcend more narrow political ideologies. Students need to become professionals who can examine, maintain and modify as necessary the traditional organizational and societal values and belief systems in an age in which those values, beliefs, and ideologies will be continually challenged. (Contains nine notes.) (NKA)

Descriptors—Communication Research, Culture Conflict, English (Second Language), *Foreign Students, Higher Education, *High Risk Students, *Student Attitudes, Student Subcultures, *Teacher Student Relationship

Identifiers—*Nonnative Speakers

A study examined a set of assumptions and expectations held by six male Japanese students (who came to the United States to learn to speak, read, and write English) upon their arrival and 6 months later. These students were considered at-risk because their marginal university status and their inability to function in an English language environment cut them off from traditional support services. Students' responses to both sets of open-ended interview questions were terse, succinct, and unelaborated. Responses were gathered into a first-person narrative. Results indicated that the students' shifted their assumption that the best thing in the United States would be "freedom" to expressions that the best thing in the United States is that "it's cheap." Students also shifted from the belief that they would get to know and be liked by United States students to the reality that their new friends were all foreigners like themselves. Findings suggest four techniques for teachers to use with at-risk students from the moment they arrive: (1)

visit at-risk students in their home environment to gain a better understanding of who the students are; (2) examine assumptions about the university and at-risk students' place in it; (3) follow-up on a regular basis to determine shifts in assumptions and expectations; and (4) use this information as a starting point for meaningful dialogue between teacher and student. (Appendixes present survey instruments and answers.) (RS)

Toward a Systems Theory of Family Socialization, Public Opinion, and Social Movements.
Pub Date—18 Nov 95

Note—36p.; Paper presented at the Annual Meeting of the Midwest Association for Public Opinion Research (20th, Chicago, IL, November 18, 1995).

Pub Type—Information Analyses (070) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Attachment Behavior, *Interpersonal Competence, Models, Political Attitudes, Public Opinion, Research Methodology, *Socialization, *Systems Approach

Identifiers—*Family Systems Theory, Historical Background, Research Suggestions, Social Movements

Integrating concepts from family systems theory, attachment theory, and family socialization theory within a systems theory of public opinion and social movements, this paper concentrates on linkages between family socialization and political attitudes, adding the influence of social structure. The paper holds that family systems theory contributes 2 concepts in particular—"dysfunction," maladaptations of families responding to stress arising from normal life events; and "multigenerational transmission process," by which positive and negative elements are transmitted to future generations, especially unresolved emotional conflicts and their role in the formation of political ideology. Noting that the family is a major socialization agent of attitudes toward authority (parents are the first authorities children know), the paper states that this topic was highly popular between 1940-1960, and that the 1950 work, "The Authoritarian Personality" (criticized for its psychoanalytic approach) is still relevant today. The paper suggests that family systems theory demonstrates how authoritarian, punitive, restrictive responses can develop as people pass through normal life stages. The paper also states that new research on family socialization, attachment theory, and authoritarianism has been published, and new scales have been proposed, although problems remain in determining the concepts at the "left" end of the scale and in researchers' being objective about their own political ideology. Future work on the theory will concern the relationship between political attitudes and social movements, especially the primarily leftist student activist movements of the 1960s and the newer right-wing movements. (Contains a theoretical model, 2 tables of data, and 105 references.) (NKA)

Descriptors—Audience Awareness, *Mass Media Role, *Newspapers, *Research and Development, Research Needs, Technological Advancement

Identifiers—Business Role, *Electronic Newspapers, Research Suggestions, *Technology Integration

In the mid-1980s, when early electronic newspapers failed to live up to their promise, industry analysts declared them dead as a mass medium. But just 10 years later, "E-papers" are once again receiving much media hype, although little academic research has been done on them. Academic literature, trade articles, online discussions, and personal communications with industry leaders to build a foundation for the academic study of electronic newspapers are reviewed. The emphasis is on basic research that will address industry needs as E-papers reemerge.

RIE APR 1996

The following scholarly areas are reviewed with initial research questions formulated for each section: (1) history; (2) network culture; (3) media sociology; (4) management and economics; (5) new media elements; (6) news content features; (7) information processing; (8) commercial messages; (9) ethical and societal concerns; and (10) legal and regulatory issues. Given constraints of length, the paper offers a broad perspective but only a cursory review of an extensive literature. Contains a 153-item list of references in text and a 20-item list of other references regarding electronic newspapers. Two tables of data and a figure are included. (Author/NKA)

Identifiers—ERIC Digests, *Oral Communication across the Curriculum, Oral Learning, *Speaking across the Curriculum

Noting that speech is not simply basic communication, this digest discusses ways in which teachers can help children develop oral language proficiency. The digest holds that speech involves thinking, knowledge, and skills, and that it requires practice and training. After setting out three criteria for oral language competence—fluency, clarity, and sensitivity—the digest suggests that oral language development has largely been ignored in the classroom. It points out that oral language provides a foundation for the development of other language skills and that the literacy process actually begins with speaking. The digest sees the teacher's role as that of a facilitator of the learning process and offers suggestions for instructional strategies. (Contains 10 references.) (NKA)

Identifiers—Arkansas, *Community Needs, Gatekeeper Role, Message Responses, Missouri, Oklahoma, *Public Service Advertising, Texas

A pilot study surveyed radio broadcasters in Arkansas, Missouri, Oklahoma, and Texas to further an understanding of their role as gatekeepers for public service announcements (PSA) to educate audiences about AIDS and bring about "safe" behavior. A total of 300 stations were in the sample. Respondents were asked to provide information about their stations and their stations' use of HIV/AIDS PSAs. Most broadcasters reported using HIV/AIDS PSAs (76.1%). About one-third of broadcasters who reported not using the PSAs claimed they had never been offered any such announcements to broadcast. Most respondents agreed that HIV/AIDS is a significant national and local public health threat (almost 70% reported knowing someone with HIV or AIDS). Yet many broadcasters expressed reservations about the ability of PSAs to effect necessary behavioral change in the audience. Statistically significant differences

were found between broadcasters who use PSAs and those who do not, in five areas which relate to message content and acceptance by audiences. (Contains 33 references; appendixes list stations for survey (by market) and provide a breakdown of how the survey instrument addressed the questions. Survey instrument is also attached.) Identifiers—*Communication Strategies, *Dialogic Communication

This paper introduces an exercise that aims to facilitate interaction between international and American students, arguing that the best place to facilitate such interaction is in an intercultural communication course. The exercise is primarily aimed at strengthening the abilities of American students, who possess greater host language proficiency and cultural literacy, to interact with their international peers. The exercise proposed in the paper consists of a panel of about four international students engaging in active dialogue with a class. The paper addresses seven questions concerning the exercise: (1) when the exercise should be introduced into the course; (2) what the instructional objectives of the exercise are; (3) who will comprise the panelists; (4) what specific issues will be covered before, during, and after the panel discussion; (5) how the objectives can be evaluated; (6) what are some of the pitfalls to be avoided; and (7) what the logistics should be for conducting the exercise. A 3-item list of useful references for the exercise is offered, as well as a 10-item list of selections for background reading. (NKA)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Communication Skills, Evaluation Methods, Higher Education, *Introductory Courses, *Public Speaking, Student Improvement, Video Equipment

Identifiers—*Technology Integration

For a public speaking instructor, his involvement in forensics as a graduate student led to the use of cameras as an instructional tool. Video technology can be used in the classroom to maximize overall student performance. All graded speeches were videotaped and evaluated in class, which allowed students an extra opportunity to view their peers, as they were required to write extensive critiques of all performances. Technological advances make it easier to place smaller camcorders, tripods and microphones in cramped classrooms. The videotapes also help students improve their presentations by being able to watch them over and over again in the privacy of their homes or dorm rooms. Students also occasionally use short video clips as visual aids in persuasive or informative speeches. Video should be a component of public speaking courses to enhance student improvement. (RS)

Descriptors—*Class Activities, Higher Education, Instructional Effectiveness, *Introductory Courses, Skill Development, *Speech Communication, Student Improvement, Units of Study
Identifiers—*Communication Strategies

This paper presents 10 units in an introductory oral communication course which utilize instructional techniques necessary for student success in attaining 15 course objectives. Each unit consists of a goal statement and sections on objectives, content description, enabling activities, and instructional resources. The time frame for instruction suggested in the paper is the first day of the semester to a point prior to the first graded assignment. In the paper's presentation of the units, teaching strategies extend to Unit 10, just before demonstrative speeches are to be delivered by the students. The paper points out that by the time all non-graded presentations have been delivered, students have actively practiced goals and objectives necessary to be proficient in their graded speeches. The teaching tips suggested in the paper serve as a guide to ensure overall class improvement during the term. (NKA)

Descriptors—*Critical Thinking, Field Trips, Higher Education, Instructional Effectiveness, *Mass Media, *Nontraditional Students, *Public Speaking, Research Papers (Students), *Thinking Skills, Undergraduate Students
Identifiers—*Southern Arkansas University

More than 800 students at geographically isolated Southern Arkansas University, many of whom are commuters, would be considered nontraditional students. For the most part, these individuals study harder and produce work of higher quality than many students entering college directly from high school. Critical thinking skills are especially necessary for such students, and one useful assignment in the research paper in diverse mass media courses where analysis forces students to take real world media concepts and assess underlying factors or individuals shaping them. Students can also be required to subscribe to professional media publications, both as resource material and to provide a knowledge base from experts in the field. Field trips can also aid critical thinking foundations of nontraditional broadcasting majors. In public speaking classes, nontraditional students are initially afraid of how they will be perceived by their younger colleagues, but this fear usually disappears after the first class session. The result of various broadcasting and public speaking critical thinking strategies is an increased awareness on the part of nontraditional students to ask the question, "Why?" (NKA)

Identifiers—Capstone Programs, *Central Missouri State University

The convergence of the teaching as assessment movement and Total Quality Management (TQM) has implications for higher education, and communication department should adapt their pedagogy to the best of the thrusts in higher education. The Department of Communication at Central Missouri State University contains 2 of the original 10 programs that started the TQM-driven "Continuous Process Improvement" on that campus. Current models of learning, stemming from cognitive psychology, emphasize the constructivist view that the student must be an active participant in the learning process. The assessment as learning and TQM convergence may suggest to faculty that a university degree should be granted only when agreed-upon abilities can be demonstrated. The movement from an emphasis on competition to a stated curriculum of cooperative, problem-solving activities coupled with collaborative learning approaches will be a challenge for faculty. Assessment should not be an end in itself and should be based upon the notion that learning is complex, multidimensional, and integrated. Steps in the process for creating ability assessment activities include deciding on outcomes, examining learning materials, deciding on students' final products, identifying specific skills for successful completion of the task, providing activities that honor different learning styles, and developing a scoring rubric which clearly identifies performance standards. The Communication Department has applied these principles by conducting national studies of what employers expect of graduates, establishing a professional advisory board, adopting capstone experiences for students, adopting a portfolio approach to assessment, and developing a mission statement. Identifiers—Group Attitudes, *Interethnic Communication, Research Suggestions
An empirical summary of 33 studies considers the relationship between racial group orientation and self-concept of an individual. This issue represents a fundamental assumption of afrocentric education practices, that the racial group orientation of the individual is related to the self-esteem of the individual. The results demonstrate a positive relationship between the degree to which a person has a positive orientation towards his or her own racial group and the person's level of self-esteem. Communication scholars increasingly need to consider the issues of interethnic communication—so much of communication scholarship deals with the issues of how a person relates to another as an individual. The development of additional insights and more refined analysis in this investigation will improve the understanding of how persons identify themselves as members of some particular cultural group. This document describes the accomplishments of the Iowa Distance Education Alliance (IDEA). The Iowa Distance Education Alliance (IDEA) is a partnership involving educational institutions across Iowa that received funding from the federal Star Schools Program to demonstrate the use of the Iowa Communication Network's (ICN) fiber optic technology for K-12 instruction. Iowa Public Television (IPTV), the Iowa Department of Education, the state's 3 public universities, 15 community colleges, 15 area education agencies (AEAs), and many local

school districts participated in the project over a 2-year period. The project focused on accomplishing six major goals: (1) coordinating the use of the ICN; (2) informing Iowans about the ICN; (3) preparing teachers to use the ICN; (4) connecting schools to the ICN; (5) improving instruction in five content areas through use of the ICN; and (6) documenting the effectiveness of the ICN. The first part of the report summarizes activities and evaluation findings related to the regional partnerships, Iowa's community colleges and AEAs working in collaboration with local school districts in each of the state's 15 regions. The second part summarizes the activities and evaluation findings related to the Teacher Education Alliance, which consists of the three state universities. Part 3 summarizes the activities and evaluation results related to the Communication and Resources Clearinghouse, which promotes communication between and among the Iowa Distance Education Alliance partners. The fourth section summarizes the 2-year accomplishments of the IDEA by the six project goals. The final section presents conclusions and recommendations resulting from the evaluation activities. Appendices contain a summary of regional coordinator reports, copies of the surveys used to collect data, and a list of research projects funded through Iowa's Star Schools Project. (LMI)

This publication, part of a series entitled "Guide to Secondary Education in Europe," contains a brief description of secondary education in Bulgaria. Chapter 1 offers a general overview of Bulgarian education, including educational policy and innovation, research and development, and information delivery services. The second and third chapters describe educational finance, budgets, and the school-society relationship. Other chapters cover the administration and organization of the education system, education and culture, curriculum, student evaluation, school personnel, and European-influenced components of Bulgarian secondary education. The appendix contains three figures and three tables. (LMI)

Identifiers—*Great Britain

This book examines the American and British perspectives of effective schools to answer the following questions: How effective have schools been? Are they effective now? How do we know? and What do we mean by "effective schools"? The book analyzes the changes and reasons for the changes in ways in which schools have been considered effective. A major focus is the research-based movement that developed in the 1970s in Great Britain, the United States, and elsewhere. The book traces the development of the American and British research and the ways in which it affected American school policy and practice, and failed to do so in competition with national policies aimed at a national curriculum and assessment. To understand the nature of effective-schools research, the book places it in the context of 19th- and 20th-century assessments of what, in Great Britain, has constituted a good school. The book describes the power of inspectors, examinations, governments, managers, and others to make judgments and to define evaluation criteria, and discusses ways in which research became influential. Each chapter contains references. (LMI)

Identifiers—*United Kingdom

Education in the United Kingdom has been shaped by the advent of local school management and the rapid growth of grant-maintained schools. Total Quality Management (TQM) offers a new way of looking at management principles and structures by identifying the needs of both internal and external customers. This book applies principles of TQM specifically to educational management. Chapter 1 explains the origins of TQM and chapter 2 offers stories of two outstanding American teachers who applied the TQM paradigm to their work. Chapters 3 through 5 present suggestions for defining quality, developing a positive school-marketing approach, and understanding organizational processes. Ways to change the corporate culture and

transform members of an organization are described in the fourth and fifth chapters. The sixth and seventh chapters deal with changing the culture and transforming staff. The eighth and ninth chapters describe the costs of achieving quality and statistical process control in the classroom. Chapters 10 through 14 describe how to plan for quality, why TQM programs sometimes fail, the core values of Deming's work, the teacher-student relationship, and the customer-transformation plan. Appendices contain guidelines for a worker-performance experiment and a sample TQM training program. (Contains 22 references.) (LMI)

Identifiers—*United Kingdom

The United Kingdom's approach to planned educational change is called school improvement. This book presents a new approach to school improvement based on the experiences of 30 British schools that are being monitored by the Improving the Quality of Education for All (IQEA) project. Following the foreword by Michael Fullan and the preface and acknowledgements, part 1 briefly reviews the history of educational change in Great Britain. Part 2 presents theoretical models of effective schooling and school improvement. Five chapters link classroom, school, and school-environment perspectives on change. A conclusion is that the development of collaborative work cultures is the key to bringing about sustained school improvement. Part 3 focuses on practice, using a combination of theoretical constructs developed in part 1, excerpts from the literature, and vignettes from teachers and administrators in the IQEA school-development project to illustrate the practice of school improvement. Chapter 7 describes in more detail the school-improvement framework used in an earlier work on schools. Six key conditions that support the school-development process form the subjects of chapters 8 through 13. These include staff development, involvement, inquiry and reflection, leadership, coordination, and collaborative planning. Part 4 presents an interim and reflective account of how the school-improvement process works in practice, describing how some of the schools coped with the development process and discussing trends in the change of school cultures. A school-conditions rating scale, subject and author indexes, 7 figures, and 10 tables are included. (Contains 231 references.) (LMI)

Identifiers—*Supreme Court

Many states are looking at education vouchers and asking whether a market solution can improve the quality of public education. The answer partially depends on how government and religion will interact and whether states' constitutions or the religion clauses in the United States Constitution will permit

voucher plans to include religious schools. This information brief examines the constitutionality of education vouchers under state and federal law. It discusses Minnesota's relevant constitutional provisions, constitutional challenges to education vouchers in other states, and federal constitutional provisions that are implicated in the discussion. A conclusion is that if government supplies or lends equipment or material, it must be to the religious-school students and their parents. If government supplies teaching or administrative services, the personnel who supply the services must not be subject to control of the religious school. If government supplies health, diagnostic, remedial, testing, or counseling services to students in a religious school, it must provide all but the most impersonal and limited services off the school campus. If government provides state payments for students to attend a religious school, the aid must flow to the students and parents; the students and parents must also be allowed to make individual choices about school attendance. Finally, if government funds aid programs that benefit religious schools, the age of the students is important because young students may be more likely to see state aid as a symbol of government endorsement of religion. A chart illustrates the permissible and impermissible forms of public aid to nonpublic schools. (LMI)

Identifiers—Lethbridge School District AB

This paper presents findings of a study that examined the effect of participation in community education on citizens' attitudes during the school years 1985-86 through 1987-88. Community-education programs stress citizen involvement in democratic process, leading to self-actualization and community development. Bronfenbrenner's ecological research model (1976) was adapted to the study of community education. Data were collected through a survey of residents, school personnel, and service-agency personnel at two schools in Lethbridge School District, Alberta; interviews with community residents; and observation of community forums. One school was a community school, designed and staffed to follow the Alberta (Canada) Community School guidelines, and one was a mandated fine-arts elementary school. Findings indicate that the two samples held different attitudes toward their relationships with peer groups, the informal neighborhood social network, service agencies, and local political system. However, the two groups held similar perceptions of their roles and participation at the school and family level. Involvement at the community school was more divergent and participatory than at the elementary school, suggesting that residents tended to develop linkages with the community-school process in the ecological community farthest away from the actual school setting. The implementation of community-school processes seemed to have little impact on school personnel's views of their roles and participation at each of the four system levels (micro, meso, exo, and macro). Although differences in attitudes existed between the service-agency personnel at the two schools, the school personnel in each sample shared similar attitudes. Two figures and 11 tables are included. (Contains 13 references.) (LMI)

Identifiers—Lethbridge School District AB

This paper presents findings of a study that examined the effect of community education on citizens' attitudes over the school years 1985-86 through 1987-88. Bronfenbrenner's ecological framework (1979) for describing the interdependency of community relationships was used to assess the impact of the community-education process on citizens' and students' attitudes. Data were collected through a survey of residents, school personnel, service-agency personnel, and students at two schools in Lethbridge School District, Alberta (Canada); interviews with community residents; and observation of community forums. One school was a community school, designed and staffed to follow the Alberta (Canada) Community School guidelines; and the other was a mandated fine-arts elementary school. A significant difference in citizen participation was found to exist among the four ecological system levels (micro, meso, exo, and macro). Community education appeared to affect citizens' attitudes differently, depending on the ecological distance of the relationships between citizens and the school process. The ecological model was successful in differentiating citizens' and students' attitudes toward their relationships with the school process. The model generated moderately significant results when used to determine differences between the community schools and the control school. A tentative conclusion is that the ecological model was effective in describing the neighborhood school environments and in assessing how and to what extent the school process interacts with students; it was moderately effective in assessing the effect of school process on citizens. Two figures and six tables are included. (LMI)

Identifiers—Lethbridge School District AB

This paper presents findings of a study that compared the attitudes of students in a community school, designed and staffed to follow the Alberta (Canada) Community School guidelines, and a mandated elementary fine-arts school over the school years 1985-86 through 1987-88. Bronfenbrenner's (1976) ecological research model was used to: (1) identify the relationships between the community-school programs/processes and the ecological environment in which they occur; and (2) define the relationships between these variables. Data were collected through a survey of second-, fourth-, and sixth-grade students at the two schools in Lethbridge School District, Alberta, Canada. More community-school students reported participating in the school program with their teachers and parents than did those at the elementary school. The data suggest that the community-education process has decentralized the school environment, facilitating more student and parent participation. However, the process did not extend to increased participation in the school program with friends, neighbors, clubs, and local politicians. Sixth-grade students accounted for most of the difference. Three tables and two figures are included. (LMI)

The Maryland Middle Grades School Policy Initiative addresses the policies and practices that support improved school and student performance. To document changes in policies and practices, this series of publications entitled "Milestones" was developed. Each publication traces the development, implementation, evaluation, and refinement of school-based, school-improvement models based on the experience of four Maryland schools. The models reflect a comprehensive approach to school-based improvement as organized, identified, developed, planned, implemented, and evaluated over months 1-12 (milestones I), months 13-18 (milestones II), and months 19-36 (milestones III). The first part outlines structures, policies, and planning procedures for school-based change. The second part describes comprehensive interagency service-delivery models to support at-risk students and their families. The third part identifies programs to improve student achievement and models for instructional intervention. Finally, professional-development process models, including applications of technological innovation, are examined. The process was based on collaboration among school personnel, state and local agencies, business, and community-service agencies. A glossary is included. Appendices contain graphics that illustrate comprehensive service delivery, the Vision for Maryland Schools 2000, and the Maryland Middle Grade School State Policy Initiative. (LMI)

This guidebook was designed as a planning aid for districts participating in the Junior Reserve Officers' Training Corps (JROTC) Career Academy Program, a partnership among the United States Department of Defense, the United States Department of Education, individual school districts, and the business community. The program personalizes instruction through schools-within-schools and provides leadership and vocational and academic training to at-risk youth. The program emphasizes high school graduation through academic instruction; critical skills development through a career-field focus; and citizenship, leadership, responsibility, values, and discipline through the JROTC course of instruction. Following the introduction, chapter 2 describes the academy model (its theoretical basis and overview) and chapter 3 discusses the roles of various participants. One table is included. The appendix contains an implementation timeline. A list of National Center for Research in Vocational Education publications is included. (Contains 10 references.)

Successfully educating at-risk populations depends in part upon adequate and equitable funding. This General Accounting Office (GAO) report examines the current status of and trends in public-education spending. National and state trends in education spending and revenues were examined using data from the Department of Education's National Center for Education Statistics (NCES) and other sources. Measures of states' ability and willingness to raise revenues for education were also developed. Findings show that since 1980, total real expenditures in public elementary and secondary schools have increased, while the average national per-pupil expenditure increased and then stabilized after 1989. Such leveling off is due, in part, to a leveling off in the states' share of education funding. In addition, the number of poor children is increasing at a higher rate. Education's share of state budgets decreased between fiscal years 1987 and 1994, while Medicaid and corrections increased their shares. States' willingness to raise revenues for education grew more slowly than willingness to raise revenues for overall spending. Ability and willingness to raise revenues also varied widely among states. Appendices describe the research design and present data on school-age population characteristics; expenditures; federal, state, and local revenue shares; education's share of state budgets; and states' ability and willingness to raise revenue. Fourteen figures, 15 tables, and a list of GAO contacts and acknowledgments are included. (LMI)

Descriptors—*Citizenship Education, Compliance (Legal), *Court Litigation, Elementary Secondary Education, Ethical Instruction, Ethics, Legal Problems, Moral Values, *Public Schools, *School Role, *Student Behavior, *Values Education

Identifiers—Nebraska

Some educators and public officials view schooling for character and citizenship as a basic purpose of public education. However, education that touches on personal beliefs and behaviors has become a subject of legal controversy. This paper explores ways in which public schools might deliver instruction about character and citizenship that are both legally defensible and educationally sound. The first part reviews selected statutes, in particular, Nebraska State statutes and sections of the Goals 2000: Educate America Act. The next part reviews selected cases pertaining to general education, special education, behaviors and beliefs, freedom of religion, freedom of expression, and schools' responsibility. Schools should expect civil and respectful student behavior; maintain a safe, orderly environment; teach students about individual responsibility to society; prevent student behavior from disrupting the educational process; explore controversial ideas with students; and help students reflect on the role of rules. EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Developmental Programs, Economic Development, Federal Government, Government Role, Incentives, *Job Training, *Labor Force Development, *Public Policy, Retraining, School Business Relationship, *Tax Credits, Tax Deductions

This paper identifies federal social policy concerning tax credits as it applies to work force training—its history, participants, implications, and impact. The paper outlines five programs—the Targeted Jobs Tax Credit (TJTC) program of 1978, the National Individual Training Account Act of 1984, the Job Training Partnership Act (JTPA) of 1983, the National Training Incentives Act of 1985, and tax breaks for employee education through Section 127 of the Internal Revenue Code. A conclusion is that public policy should encourage investment in human capital. Human-resource-development professionals are potentially successful lobbyists who can assess existing and future training needs, evaluate the benefits of training in economic terms, and build coalitions among diverse publics for successful policy implementation. (Contains 18 references.) (LMI)

Skills Needs Assessment Process To Support Economic Development. HRD & ALL Research Series. Paper 90-01.

Colorado State Univ., Ft. Collins. Office for Applied Research.

Pub Date—Oct 90

Note—27p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Action Research, Adult Learning, *Job Analysis, Job Skills, *Labor Force Development, Needs Assessment, Retraining, *Strategic Planning, *Task Analysis

The purpose of skills-training needs-assessment is to identify what type of skills and knowledge are needed to support economic strategies and, as a result, improve organizational decisionmaking related to training investments and general work force development. This paper presents findings of 11 skills-retraining, needs-assessment, action-research studies, which were conducted from 1987 to 1989. The studies sought to gather information about skills-needs-assessment processes, their supporting theoretical bases, and work force training and deployment-decision paradigms. The studies involved six organizations, two industries, and two regional planning efforts. The paper describes a set of interactive issues that relate to locus and type of control, purposes, and type of needs-assessment intervention. It also identifies decision-making paradigms to support work force training and redeployment. Four hypotheses were supported, which conclude that a skills-assessment process should: (1) be client-

centered, pragmatic, and focused on utility outcomes; (2) have generalizable, practical outcomes; (3) be grounded in economic, research, and systems theories; and (4) show a relationship between the data and decisions to support work force training. Five figures are included. Appendices contain case-study profiles of the 11 organizations and commonly used decision-making paradigms. (LMI)

Descriptors—*Academic Achievement, *Access to Education, Educational Finance, Elementary Secondary Education, *Expenditure per Student, Expenditures, Finance Reform, *Resource Allocation, School District Spending, School Funds, *Socioeconomic Status

Identifiers—*Indiana

The education-production function has become the dominant paradigm for analyzing the effects of education resources on student outcomes. This paper presents findings of a study that investigated the education-production function and its relationship to educational policymaking. Fiscal data and student-achievement test scores for Indiana during the 1993-94 school year were analyzed using Fortune and O'Neil's (1994) methodology as an alternative to traditional production-function analysis. The model uses t-tests for determining significance and comparing homogeneous subgroups. Although the alternative methodology is more likely to reveal relationships between inputs and outcomes, the Indiana data revealed no significant relationships between expenditures and student achievement. However, when analysis of socioeconomic status and student achievement was conducted, there was a high correlation between these variables. Fortune and O'Neil concluded that the only constitutionally relevant outcome of education is whether or not students receive equal access to state resources. This study demonstrates that all students in Indiana do not have equal access to resources. One problem with production-function analysis is that it assumes that all schools pursue the same goals and that the goals are related to student achievement. Second, production-function analysis inadequately identifies inputs and ignores processes. For example, production-function analysis overlooks curriculum and instruction as an input. A conclusion is that increased revenues must be used to find new strategies for improving student achievement. Five tables are included. (Contains 14 references.) (LMI)

Descriptors—*Academic Achievement, Accountability, Curriculum Evaluation, Elementary Education, Formative Evaluation, Inservice Teacher Education, Intervention, Program Evaluation, *Program Implementation

Identifiers—Broward County Public Schools FL

The Alliance of Quality Schools is a research-based, learner-verified, academic, and behavioral intervention model involving reading, spelling, writing, and mathematics. The alliance provides coordination and support to students and fosters academic success as well as social skills, self-esteem, and positive attitudes toward school. This report presents findings of a formative evaluation of program implementation in 10 elementary schools in Broward County, Florida. Information was gathered through a literature review, interviews with selected program staff, document analysis, focus group interviews with staff from other disciplines, a teacher survey, site visits, discussions with school administrators and staff, observation, and review of student records. The findings suggest that the schools successfully implemented staff training

and support and integrated the reading, writing, and spelling components into the curriculum. Children showed appropriate reading progress, and teacher morale improved. Recommendations are to: (1) readdress the feasibility of the Integrated In-depth Enhanced Applications of Science (IDEAS) component; (2) readdress the parent-outreach component; (3) ensure that teachers are proficient in the content and methodology of alliance mathematics or science before implementation; and (4) strengthen documentation in the area of feedback/recognition to alliance staff. Twelve charts are included. Appendices contain teacher-survey data, a list of implementation outcomes, and descriptions of program components. (LMI)

Snyder, Carolyn J.
Managing Change from a Quality Perspective.

Pub Date—Apr 95
Note—22p.; Paper presented at the Annual Meeting of the American Educational Research Association (San Francisco, CA, April 18-22, 1995).
Pub Type—Speeches/Meeting Papers (150)—Reports—Research (143)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—Elementary Secondary Education, Institutional Mission, Leadership, *Organizational Change, *Organizational Climate, *Organizational Development, Participative Decision Making, *Principals, School Administration, Strategic Planning, Systems Approach, *Total Quality Management

This paper presents findings of a study that examined the change process in 28 schools, with a focus on how principals went about transforming traditional school-work cultures into quality systems. The principals had participated in Managing Productive Schools (MPS), a comprehensive systems-approach program based on quality management concepts. Data were derived from interviews with the principals, a teacher survey, and administration of a school/work profile to teachers. This paper presents findings based on the interview data. It discusses themes of visionary leadership, cooperative strategic planning, systems thinking and action, innovative information systems, continual improvement, human-resource development, quality programs and services, quality culture, and customer satisfaction. A conclusion is that change is determined by a faculty's readiness to address challenges and that developing staff readiness is the principal's responsibility. The principals provided the knowledge and skills for a systemic framework of change. The strength of their vision of success for all students and belief in their faculty's capacity to respond to students' needs were crucial for successful change. Transforming the work culture of schools from bureaucratic patterns to more responsive structures requires leaders who understand the challenge, embrace systems thinking, and have the facilitation skills to engineer school development over time. Two figures are included. (Contains 21 references.) (LMI)

Identifiers—*Kentucky Education Reform Act 1990

Under the Kentucky Education Reform Act (KERA), School-Based Decision Making (SBDM) is the provision that creates school councils and delegates to them the authority to make important educational decisions to improve student performance. This paper describes findings from the third year of a 5-year study of SBDM that focused on early examples of connections between council decision making and changes in curriculum and in-

struction. Data were derived from interviews in 13 schools in 9 Kentucky districts as well as several statewide data sources. Findings indicate that more schools are establishing councils, although the rate of increase has slowed, and that councils are tackling more complex issues. Most council decisions continue to have a nonacademic focus. Parent involvement in councils was limited and instructional changes were visible. Features of councils that are effectively involved in decisions about curriculum and instruction are identified. However, councils will continue to face the following challenges: understanding new expectations, blending traditional with new approaches, and debating differences constructively. For councils to continue to evolve, they need strong site leadership, instructional guidance, opportunities and time to learn, and survival skills for making the transition. One table and a map of regional service centers are included. (LMI)

Descriptors—*Access to Education, Computer Mediated Communication, *Distance Education, *Educational Technology, Elementary Secondary Education, Information Systems, Inservice Teacher Education, *Online Systems, Program Implementation, Telecommunications

This report describes 2-year outcomes of the Iowa Distance Education Alliance (IDEA), a partnership involving educational institutions across Iowa that received funding from the federal Star Schools Program to demonstrate the use of the Iowa Communication Network's (ICN's) fiber-optic technology for K-12 instruction. First-year project activities focused on teacher training and public relations. When the fiber-optic network was "lit" during the second year, the focus changed to using the network to deliver programming for K-12 students and teachers. Data were obtained from surveys of regional partnerships and coordinators, Iowa citizens, students, teachers, department chairs of teacher-preparation programs, workshop participants, and members of the Teacher Education Alliance. Database user logs were also analyzed. The data show that the project has been extremely successful. All of the objectives outlined in the proposal were accomplished. Cooperation and collaboration among educational organizations improved and innovative instructional activities were initiated. Students and teachers who use the system view it positively, as do other Iowans who have seen the system in operation. However, implementation occurred at a slower pace than anticipated. Continued success may hinge on future developments in the following key areas: access to the system, policy issues, operational issues, teacher inservice, preservice teacher education, information access and coordination, and collaboration. Descriptors—Educational Economics, Educational Planning, Elementary Secondary Education, Foreign Countries, *Institutional Advancement, *Marketing, Organizational Theories, *Strategic Planning, Supply and Demand

Identifiers—*Great Britain

To guarantee their funding, schools in Great Britain must compete to attract students. This handbook describes how marketing is critical to a school's economic survival and offers guidelines for those in educational management who must make

long-range decisions regarding the direction and position of their institution. Part 1 covers basic marketing theory. Chapters 1 and 2 introduce basic terms and concepts used in marketing, and chapters 3 and 4 describe marketing strategies for identifying customers and understanding buying behavior. The second part focuses on the practice of marketing. Chapter 5 examines some of the processes involved in obtaining information on customer needs, competition, and social trends. It presents examples in which educational institutions have used marketing research in making decisions. The sixth and seventh chapters provide guidelines for conducting a marketing audit to establish a school's current position and for developing a strategic-planning process. Chapter 8 discusses alternative approaches to marketing strategy and explains how to design a particular marketing mix. Aspects involved in developing innovative products are discussed in the ninth chapter, and communication and promotional activities are described in chapter 10. The 11th chapter offers suggestions for implementing marketing research in schools or colleges. Issues of ethics and quality are discussed in the final chapter. Two tables, 28 figures, and subject and author indexes are included. (LMI)

How Education Spending Matters to Economic Development.

National Education Association, Washington, D.C.

Research Div.

Pub Date—95

Note—36p.

Available from—NEA Professional Library, P.O. Box 509, West Haven, CT 06516.

Pub Type—Reports—Research (143)

EDRS Price—MF01/PC02 Plus Postage.

Descriptors—*Academic Achievement, *Economic Development, *Educational Finance, Elementary Secondary Education, *Expenditures, Performance, Resource Allocation

This booklet presents findings of a study that examined the link between state education spending and economic development. Chapter 1 defines economic development and identifies principles of successful economic development. Chapter 2 examines in what way education (described in terms of human capital) is important to economic development and how this is known. The third chapter examines the link between education spending and economic development and describes how education spending has been shown to have a positive impact on a variety of economic outcomes, including jobs and earnings. Chapter 4 explores the important relationship between education spending and student achievement by looking at both sides of the debate over whether "money matters." The economic-development consequences of acting as though money did not matter are examined in the fifth chapter. Chapter 6 presents the conclusion that increased spending on education can have a significant impact on a city's, region's, or state's economy, if done properly, and suggests ways that states can make education investments to achieve this impact. The conclusion is that simply investing more money in education—without changes in the way education dollars are spent—will not alone lead to greater student outcomes. Economic spending must be increased, especially in poor districts, if all students are to be provided with equal opportunities to learn the skills required for success in the new economy. Cities and states can make wise choices by looking at education spending as one of the most critical investments in long-term economic health. Two figures are included. (LMI)

ucation, Potential Dropouts, *Program Effectiveness, Rehabilitation Programs, Special Needs Students

Identifiers—*School Dropout Demonstration Assistance Program

In 1988, the United States Congress passed legislation that created the School Dropout Demonstration Assistance Program (SDDAP). The program provides funding for local educational agencies, community-based organizations, and educational partnerships to establish effective programs to identify potential student dropouts and prevent them from dropping out and to encourage youth who have already dropped out to re-enter school. This report, the first of two volumes, presents findings of a two-part evaluation to assess the effectiveness of dropout-prevention strategies used by the 89 projects that were awarded grants. Data were collected through annual surveys of all SDDAP projects and in-depth studies of activities and achievements at 15 selected project sites. The report identifies the organizational characteristics of effective dropout programs and the program strategies that were most effective in preventing students from dropping out of school and in encouraging dropouts to reenter school. Outcomes for elementary, middle, and high school students are described. The following recommendations are offered: (1) use individualized strategies in regular classrooms instead of pull-out programs; (2) deliver the special services in unobtrusive ways; (3) deliver the special services within a supportive climate that includes adults as student advocates; (4) provide students with substantive incentives to participate; and (5) carefully select, train, and support service-delivery staff. Identifiers—*Colorado, *National Education Goals 1990

This document contains the 1995 report card for Colorado education, which provides information about how Colorado public schools have performed and are moving toward meeting district, state, and national education goals. Section 1 contains a message from Bill Randall, Colorado Commissioner of Education. Section 2 presents Colorado's model for educational change and describes a variety of state initiatives for systems change. The third section reports on the state's progress toward the National Education Goals, based on Colorado indicators of progress. Suggestions for parents who want to help Colorado education meet its goals are also offered. Data on Colorado students' educational performance are provided in section 4, including academic achievement, graduation rates, and attendance rates. Sections 5 and 6 present profiles of school-age students and educational personnel. An overview of Colorado's educational system is provided in section 7, including information on state educational programs and school district revenues and expenditures. A list of school districts by geographic setting categories and of boards of cooperative educational services are included. Contains 66 figures. (LMI)

Schumaker, Paul

The Justice and Injustice of Alternative Approaches to School Desegregation: The Perceptions of School Board Members.

Pub Date—Sep 95

Note—33p.; Paper presented at the Annual Meeting of the American Political Science Association (Chicago, IL, August 30-September 3, 1995).

Pub Type—Speeches/Meeting Papers (150)—Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Access to Education, *Boards of Education, Busing, *Desegregation Methods, Desegregation Plans, Educational Opportunities, Elementary Secondary Education, Equal Education, *Justice, Minority Groups, *Policy Formation, *Policy of Education, School Choice, *School Desegregation, Social Attitudes, Voluntary Desegregation

This paper presents findings of a study that examined 60 school board members' perceptions of school desegregation and other policies aimed at enhancing the educational attainment of minority groups. Interviews were conducted with school board members in 12 American cities: Atlanta, Georgia; Austin, Texas; Baltimore, Maryland; Green Bay, Wisconsin; Kansas City, Missouri; Minneapolis, Minnesota; Orlando, Florida; Pasadena, California; Providence, Rhode Island; Salt Lake City, Utah; San Jose, California; and Seattle, Washington. In general, the board members believed that mandatory two-way busing policies conform to Rawlsian justice precepts, but that they violate utilitarian, libertarian, and feminist principles of justice. Other strategies employed in the 12 cities to promote opportunities for minorities—voluntary one-way busing, closing predominantly black schools, establishing sixth-grade centers, redrawing boundaries, reallocating resources, and enhancing resources in minority neighborhoods—also conform to certain justice precepts while violating others. A conclusion is that "administrative" and "market" policy processes are defective in making educational policy in this area because they are ill-suited to reconcile multiple justice concerns. The best policy process for enhancing minority educational attainment is a political one that is moderately comprehensive and deliberative, employs collaborative decision-making processes, and implements its decisions in ways that provide citizens with choices within well-defined constraints. Sharp, William L. Walter, James K.

The Health of the School Superintendency.

Pub Date—Oct 95

Note—15p.; Paper presented at the Annual Meeting of the Mid-Western Educational Research Association (Chicago, IL, October 12, 1995).

Pub Type—Speeches/Meeting Papers (150)—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Administrator Attitudes, *Board Administrator Relationship, Boards of Education, Elementary Secondary Education, *Job Satisfaction, *Quality of Working Life, School District Size, *Superintendents, *Work Attitudes, Work Environment

This paper presents findings of a study that examined the "health" of the superintendency as perceived by superintendents in two states. Questionnaires sent to 307 Illinois superintendents elicited 227 responses, a 74 percent response rate, and questionnaires sent to 137 Massachusetts principals yielded 104 responses, a 76 percent response rate. Superintendents in both states expressed satisfaction with their salaries and relationships with the community. Both groups of superintendents agreed that the board tended to micromanage the school district and that the job adversely affected their family lives. However, the percentage of Massachusetts superintendents expressing adverse effects on their physical and mental health was much higher. A greater percentage of Massachusetts superintendents than Illinois superintendents described their relationships with school boards in negative terms. The data show that Massachusetts superintendents had little input into their contracts, were not initially hired for the maximum number of years allowed by law, and were not selected unanimously by their boards. Massachusetts superintendents were also older and from larger school districts than were their Illinois counterparts. (LMI)

Identifiers—*Quality Work Teams

A growing number of schools and districts are considering using teams to handle all types of decision making and advisory activities. The term "teams" can be applied to a wide spectrum of groups with various purposes or powers. This bulletin was designed to assist those who want to create efficient, successful teams. It provides suggestions on effective structures and practices for different types of work teams at the district and school levels. The total-quality-management principles of W. Edwards Deming provide the philosophical foundation for successful teamwork in schools. Chapter 1 introduces the concept of total quality management and explains what districts and schools have learned from the business world's experience with work teams. Chapter 2 provides the rationale behind the work-team approach to decision-making in schools and education, highlighting the advantages of using a team approach. The third chapter lists various types of teams used in education and offers examples from Oregon schools and districts. Team functions and members' roles are described in chapter 4, with a focus on the facilitator's relationship to other team members. The fifth chapter cites common problems and offers a platform for experienced team members and consultants to give advice on how to overcome those problems. The final chapter summarizes steps schools can take to ensure the success of their teams. A summary of quality work teams is included. (Contains 37 references.) (Author/LMI)

The Effect of In-school Suspension on the Academic Progress of High School Science and English Students.

Pub Date—Aug 95

Note—35p.

Pub Type—Reports - Research (143) — Tests/Questionnaires (160)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Academic Achievement, Discipline Policy, English Instruction, High Schools, *High School Students, *In School Suspension, Science Instruction

This paper presents findings of a study that explored the effects of assignment to an in-school suspension (ISS) program on high school students' academic performance. The study compared the before- and after-ISS grades in English and science of 32 ninth- and tenth-grade students who had spent a minimum of 5 days in an ISS program during a 6-week grading period. The data showed no significant difference in the academic achievement of students in science and English classes before and after being assigned to an ISS program. Seven tables and two figures are included. Appendices contain a copy of the cover letter, questionnaire, and one scattergraph. (LMI)

Descriptors—*Action Research, *Administrator Education, Collegiality, Educational Administration, *Effective Schools Research, Elementary Secondary Education, *Participatory Research, *School Effectiveness, Teacher Education

Identifiers—*Kentucky
This paper presents findings of an action-research study that examined the characteristics of schools in eastern Kentucky that were recognized as effective by the State Department of Education. Eighteen students who were in an educational leadership class at Morehead State University, and who held teaching or administrative positions in Kentucky public schools, conducted interviews with 63 educators from 20 effective schools. The study utilized a constructivist approach described by Egon Guba (1989) a hermeneutic dialectic process that allows interaction between the people being studied and those conducting the study. Specifically, the study looked at the status of academics, teacher collaboration, school-based decision making, and discipline in the schools. Data indicate that the schools fit the profile described in effective-schools literature. The majority of the schools were rural and elementary and served economically disadvantaged students. They also featured small classes and an average student body of 190 students. Findings indicate that goal congruence was the greatest predictor of school success, and that effective schools were perceived as workplaces that provided autonomy and involvement in educational decisions. Suggestions for improving future course action-research projects are offered. Five tables are included. (Contains 17 references.) (LMI)

Descriptors—Classroom Techniques, *Conflict Resolution, Crisis Intervention, Curriculum Design, Elementary Secondary Education, Organizational Communication, Partnerships in Education, *Peace, *Prosocial Behavior, School Community Relationship, *School Safety, School Security, Violence

Identifiers—*Peace Education

This book was written for educators at all levels and individuals who are concerned about making schools safe, orderly places. It offers guidelines to promote and increase peace in the schools. The introductory chapter, "Moving toward a Peaceable School," endorses the national commitment to violence-free, peaceful, and productive schools, and presents the principles for a peaceable school. Chapter 2, "Creating a Peaceable Environment," suggests ideas for a safe school environment and a crisis-management plan. The third chapter, "Encouraging Peaceful Communication," discusses various forms of communication for peaceful interactions among students, faculty, and staff members. The need for social and multicultural peace objectives in curricula at all levels is emphasized in the fourth chapter, "Planning for Peace across the Curriculum." Chapter 5, "Changing Instruction: The Hard Realities," advocates the use of differentiated instructional approaches and the development of multiple intelligences. Practical ways for school personnel to work effectively with parents are described in chapter 6, "Working with Parents." The seventh chapter, "Building Family-School-Community Partnerships," discusses collaborative support systems for creating family-school-community partnerships, as well as the development of a peace-building action plan. Each chapter contains concluding questions, which provide opportunities for discussion, and a list of suggested activities. An index and 20 tables are included. Appendices contain sample curricula for elementary, middle, and high schools; and an annotated list of programs, resources, and organizations. (Contains 89 references.) (LMI)

Descriptors—*Administrator Role, *Educational Administration, Educational Change, Elementary Secondary Education, Individual Development, *Institutional Mission, *Leadership, Organizational Climate, *Organizational Development, Principals

This book was written for teachers and principals who wish to exercise leadership in the ongoing work of school renewal. The book presents a new theory of educational leadership, examines the essential elements of leadership, and provides an indepth look at what "vision" means for educational leaders. Chapter 1 describes the roles of the principal as an agent of multiple constituencies and as the agent of the local community. Chapters 2 through 6 offer a synthesis of the elements of educational leadership from a "new vision" and from a historical point of view. Chapters 7 through 9 explore some foundational meanings such as personal formation and moral leadership that underlie the vision of educating leaders for tomorrow's schools. The book discusses the factors that can impede a school's vision and offers suggestions for overcoming them. It also discusses student leadership possibilities within the school community; how schools are affected by the larger political, economic, social, and cultural forces in society; the challenges of educating for a mature citizenship; and how these challenges speak to the moral leadership of the principal. Four figures, three tables, and an index are included. (Contains 97 references.) (LMI)

Descriptors—*Administrator Role, Age Groups, Classroom Techniques, Cross Age Teaching, Elementary Education, Heterogeneous Grouping, *Mixed Age Grouping, *Multigraded Classes, Public Relations, Self Directed Groups, *Student Development, *Teacher Role

This guidebook integrates basic strategies for developing a multitasking-classroom design. The book begins by describing developmentally appropriate practice (DAP), which is based on a curriculum and an instructional-delivery methodology that address the physical, social, intellectual, emotional, and aesthetic needs of young students. Students are thus permitted to move through an integrated curriculum at their individual pace. Chapter 1, "The One-Room School Revisited," provides a historical look at multitasking grouping as practiced during the days of the one-room schoolhouse, and compares the one-room schoolhouse with today's multitasking classrooms. Chapter 2, "Planning for Multitasking Instruction: The Teacher's Role," explores the multiple roles and responsibilities of teachers in multitasking classrooms, providing information on curriculum planning, instructional delivery systems, classroom organization and management, student self-directed learning, and peer tutoring. The third chapter, "Inside a Multitasking Classroom: The Physical Arrangement," outlines the physical arrangements required to provide an effective environment for learning in

a multiage classroom, and the fourth chapter, "Guiding and Managing: The Administrator's Role," sketches the roles and responsibilities of the principal. The final chapter, "the Multiage Classroom: Questions and Comments," presents comments from teachers, principals, parents, and community members about their perceptions of multiage classrooms. (Contains 20 annotated references and 30 references.) (LMI)

Virtual Reality in Educating Leaders: First Renew the Professor.

Pub Date—Dec 95

Note—16p.

Pub Type—Guides - Non-Classroom (055)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Administrator Education, College Instruction, *Cooperative Learning, *Educational Administration, *Educational Change, Higher Education, Instructional Improvement, *Instructional Innovation, *Problem Solving, Self Directed Groups, Theory Practice Relationship

Despite demands for innovative classroom techniques, many educational-administration professors continue to use the lecture paradigm in their courses. This paper argues for a "virtually real" classroom, which demonstrates to students the reformed school that they will facilitate as future administrators. It also discusses the need for professors of educational administration to assume new roles in their classrooms, that of facilitators and mentors. The most important component in the virtually real classroom is considered to be the student. Some innovative components of an educational administration course include: (1) student choice; (2) team work and collaborative learning processes; (3) school-based problem solving; (4) authentic tasks focused on problem solving; and (5) authentic assessment. Pawan, Barbara Nelson

First Year District Superintendents: Women Reflect on Contradictions between Education and Politics.

Pub Date—Oct 95

Note—18p.; Paper presented at the Annual Meeting of the University Council for Educational Administration (Salt Lake City, UT, October 27-29, 1995).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Board Administrator Relationship, Elementary Secondary Education, Interprofessional Relationship, Leadership Qualities, *Leadership Styles, *Politics of Education, Public Relations, School Districts, *Superintendents, *Women Administrators

Identifiers—*Beginning Superintendents

Despite passage of affirmative-action legislation in the United States, the percentage of women school superintendents has increased at a very slow pace. This paper identifies the major challenges faced by four female entry-level superintendents and the strategies they used to deal with them. Data were collected during a group interview with the four superintendents at the end of their first year on the job. All had entered new school districts after gaining experience as assistant superintendents. The superintendents, three white and one African-American, utilized some similar strategies to handle issues. During their first year on the job, the women: (1) learned to recognize and accept politics as a reality; (2) entered the job with a formal entry plan and later developed a district plan; (3) engaged in learning and open communication with all stakeholders; (4) studied past practices; (5) practiced creative problem solving rather than confrontation; (6) protected their personal/family time; and (7) educated and provided information to the school board. (Contains 17 references.) (LMI)

RIE APR 1996

Descriptors—Educational Change, Elementary Secondary Education, Organizational Change, Program Design, *Program Development, *Program Implementation, *School Districts

Identifiers—*Accelerated Schools

The National Center for the Accelerated Schools Project at Stanford University has recognized that district-level change is necessary if changes at accelerated schools are to gain permanence and become widespread. The Center has therefore initiated a research and development project to design a set of models on which districts can reconstitute themselves as accelerated districts. These districts will support and perhaps even mirror their accelerated schools in their guiding philosophy and organization. This paper describes the Center's effort to develop models of accelerated districts, including the history of and rationale for accelerated schools. It also describes the Center's first attempt at school-district transformation, a collaboration with San Jose Unified School District (California). The San Jose experience taught participants the following lessons: (1) include all stakeholders in the "buy-in" decision; (2) design a fully developed model before implementation; (3) accurately assess needed and available resources; (4) build trust and belief among participants; (5) address external and internal politics; and (6) identify effective forms of communication. Recent accomplishments of the Center include the development of three organizational models for district implementation and a plan for creating a district design team. (Contains 15 references.) Alternative Methodologies for Identifying Effective Schools.

Pub Date—Apr 95

Note—133p.; Paper presented at the Annual Meeting of the American Educational Research Association (San Francisco, CA, April 18-22, 1995).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143) — Numerical/Quantitative Data (110)

EDRS Price - MF01/PC06 Plus Postage.

Descriptors—Academic Achievement, *Effective Schools Research, Elementary Secondary Education, Multiple Regression Analysis, Predictive Measurement, *Regression (Statistics), Research Methodology, *School Effectiveness

Identifiers—*Dallas Independent School District TX

If an effective school is defined as a school that causes student improvement on a number of important educational outcomes, the problem of identifying effective schools becomes one of establishing legitimate predictions of student performance and comparing those predictions to actual student or school outcomes. In attempting to identify effective schools, it is essential that methodologies be applied that are value-added and that account for student-entry characteristics as well as student growth on the outcomes of interest. This paper examines the similarities and differences between the student-based regression-based model used by the Dallas Independent School District (DISD), Texas, for the past 3 years and a number of models using two-level hierarchical linear modeling. Specifically, the study sought to determine the differences in results produced by a regression model using first- and second-order interactions and a two-level hierarchical linear model (HLM). The results suggest that student-based models that account for first- and second-order interactions among variables and two-level hierarchical linear models produce very similar school ranks. Ranking schools purely on the basis of absolute test scores is clearly biased against schools with large populations of poor students, minority students, and black students. It is recommended that two-level HLMs be used to rank schools in combination with a first regression and prediction stage that accounts for the variance associated with student-level background variables. It is important that both student-level and school-level contextual information be included in models for identifying effective schools. (Contains 21 references and 14 tables.) (LMI)

Descriptors—Accountability, Audits (Verification), *Educational Assessment, Educational Improvement, *Educational Planning, Elementary Secondary Education, Foreign Countries, *Inspection, *Institutional Evaluation, Standards Identifiers—*United Kingdom

The United Kingdom's 1992 Education Act established the Office for Standards in Education (OFSTED), which was mandated to oversee an inspection system for all schools. This paper presents findings of a study that examined the extent to which the inspection process helped schools with their school-development planning. A survey was mailed to headteachers at 282 schools that had been inspected during the 1993 fall term. A total of 170 replies were received, a 60 percent response rate. Most headteachers said that the OFSTED inspection process had made a positive contribution to their schools' development. The data suggest that some tension existed between the OFSTED inspection-action plan and the school's own development plan. Headteachers at schools with some overlap between the OFSTED action plan and the school-development plan expressed positive views about the inspection process. Schools that had favorable experiences with the inspection process had involved their governing bodies and external advisors in formulating their inspection-action plans. Eight tables, a sample questionnaire, and survey data are included. (LMI)

Rhetoric and Realities of Parent Involvement in Schools: A Case of a Restructuring Middle School.

Pub Date—Apr 95

Note—46p.; Paper presented at the Annual Meeting of the American Educational Research Association (San Francisco, CA, April 18-22, 1995).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Educational Cooperation, Intermediate Grades, Interprofessional Relationship, Junior High Schools, Middle Schools, Parent Attitudes, *Parent Grievances, *Parent Participation, *Parent Responsibility, Parent Role, *Parent School Relationship, Politics of Education, *School Restructuring

This paper presents findings of a study that examined forms of parent involvement in a restructuring middle school. Data for the 18-month case study were obtained through observation, interviews, and document analysis. The paper focuses on the relationship of the Parent Council, a parent group attempting to influence school decision making, and the principal. Findings show that the rhetoric of parents as collaborators conflicted with the reality of educators' attempts to maintain boundaries between their professional domain and parents' involvement. The conflict was manifested in three ways: in differences over goals for parents' actions; in struggles for control; and in a lack of trust on both sides. An exception to the norm, a situation in which the principal invited parents to participate in a critical decision about the direction of restructuring in the school, is described. (LMI)

Descriptors—Developing Nations, *Economic Factors, *Educational Demand, Elementary Education, *Enrollment Influences, Family School Relationship, Foreign Countries, *Parent Influence, Public Schools, Rural Areas, Rural Economics, School Choice, *Socioeconomic Influences, Socioeconomic Status

Identifiers—*Ethiopia

This paper presents findings of a study that examined the role of economic, social, and logistical factors in Ethiopian parents' decisions whether or not to enroll their children in public primary school.

Data were obtained from a survey of four rural regions in Ethiopia—130 households per region. Findings indicate that parents made enrollment decisions based primarily on economic conditions. Because formal sector employment is difficult to obtain, many parents elected to keep their children away from school, preferring them to engage in productive household/farming activities. Although parents cited economic opportunity as the primary motivation for sending children to school, they identified economic constraints as the major obstacle for doing so. A positive relationship was found to exist between parental socioeconomic status and their children's enrollment status. A significant relationship was not found between parents' educational level and enrollment of their children. Seven tables are included. (LMI)

Descriptors—Academic Achievement, *Economically Disadvantaged, *Educationally Disadvantaged, Elementary Education, Family School Relationship, *Parent Influence, *Parent Participation, Parent Student Relationship, Program Effectiveness, Special Needs Students

Identifiers—*Chicago Public Schools II

This paper presents findings of a study that investigated parent's views of their involvement with their children in Elementary and Secondary Educational Act (ESEA) Chapter 1 programs, in school activities, and at home. Chapter 1 students in the study were low achievers from economically disadvantaged family backgrounds in the Chicago Public Schools. There are four types of compensatory educational programs for Chapter 1 students: self-contained, pullout, pullout-in-class, and extended-day. The study examined the degree of parental involvement, the impact and effect of Chapter 1 parent-training programs on types of parental involvement, and the effect of parental involvement on children's academic achievement and school attendance. Data were collected from a survey of 212 parents from 96 Chicago public schools. Parents reported much higher levels of involvement at home than at school. Parents' ratings of their involvement with their children at home were very high and similar across Chapter 1 programs. Comparison of parents' responses across the programs indicates that parents of self-contained program students were more involved in school and with their children than were parents of students in pullout and extended-day programs. No significant positive relationship was found between parental involvement indices and student achievement in reading, mathematics, and school attendance. However, parent involvement was significantly correlated with student achievement in a few cases. Recommendations to increase parental involvement in meaningful ways are included. (Contains 34 references and 6 tables.) (LMI)

Descriptors—*Academic Persistence, Attendance Patterns, Birth Rate, Births to Single Women, Dropout Prevention, *Educational Attainment, Employment Opportunities, High School Equivalency Programs, High School Graduates, *Potential Dropouts, Poverty, Pregnant Students, Program Effectiveness, Secondary Education, *Unwed Mothers, Welfare Services

Identifiers—*Welfare to Work Programs

This document presents findings of a General Accounting Office (GAO) study that identified approaches and Aid to Dependent Children (AFDC) program activities that help teenage mothers complete their secondary education. Data were obtained from visits to 13 local programs in New Jersey, New Mexico, Oregon, Texas, Vermont, and Wisconsin and interviews with AFDC and JOBS program administrators in 15 cities. In addition, published impact evaluations of five other programs were synthesized. The synthesis of program evaluations suggests that close monitoring of teenage mothers' educational activities with followup, when their attendance drops, is effective in increasing the likelihood that they complete their education. Three of the 15 cities reported that they monitored the school attendance of teenage mothers. Leveraging the welfare benefit as a sanction or reward for attendance has contributed to high school completion. Providing supportive services to overcome barriers to continued attendance, with or without financial incentives, also seems to be effective, especially for dropouts. Finally, assistance in meeting their child care and transportation needs may be particularly helpful but did not appear to be sufficient, without attendance monitoring. The 13 programs provided examples of innovative approaches that differed from the programs included in the evaluation synthesis: alternative schools for pregnant and parenting students, residential facilities for homeless teenage mothers on AFDC, home visiting, and school-based programs for at-risk students. Two figures and one table are included. Appendices contain information on the evaluation-synthesis methodology, program descriptions, comments from the Department of Health and Human Services, and lists of GAO contacts, staff acknowledgements, and related GAO products. The report does not distinguish between voluntary and mandatory programs. (Contains 30 references.) (LMI)

Identifiers—*Midwest States (Midwest)

School-reform efforts have forced administrators and board members to pay increasing attention to school-community relationships. This paper presents findings of a study conducted during 1993-94

that examined public-relations practices in 168 school districts in 4 midwestern states. A survey of 200 superintendents in Illinois, Indiana, Minnesota, and Wisconsin elicited 168 replies, an 84 percent response rate. Findings show that many school districts were doing little in the public-relations arena. Nearly one-half of the districts (42 percent) did not have a plan or policy directing public-relations activities and about 20 percent had not designated a person responsible for public relations. The most widely used public-relations technique was the issue of news releases. Few superintendents viewed their public-relations role as more than providing information to the public. Respondents identified funding and time allocation as the greatest barriers to program implementation. One-way, sporadic communication designed to influence public opinion continued to be the norm, and public-relations success was usually evaluated in terms of gains in public support. Twenty-one tables are included. (Contains 13 references.) (LMI)

Identifiers—*Wisconsin

The Healthy Meals for Healthy American Act of 1994 requires that a variety of meal-planning approaches be available for schools to plan menus. The United States Department of Agriculture (USDA) regulation "School Meals Initiative for Healthy Children," published in 1995, implements the provisions of the 1994 legislation and incorporates other proposals. The changes updated the nutrition standards for school meals, providing a variety of menu-planning alternatives and streamlining administration. This guidebook provides information to help school food-service professionals decide which menu-planning system best meets their needs. The book describes options for meeting the dietary guidelines for food-based menu planning, NuMenus, and Assisted NuMenus; presents information on compliance with nutritional standards; and compares the previous requirements with the new provisions. "Nutrition Power," a comprehensive training initiative to improve the learning readiness and lifelong nutritional health of Wisconsin children, is also described. Information on computer-hardware requirements and USDA-approved software for nutrient analysis is provided. (LMI)

Identifiers—*Crisis Management

This booklet presents information on school-crisis management, based on the work of a New Haven, Connecticut, regional crisis team that was initially created to address the mental-health needs of school children during the Persian Gulf War. The goals of

the regional crisis committee were to develop a school-crisis intervention model, train school-district personnel, and promote and coordinate emergency mental-health services and resources. The book presents assumptions and logic necessary for dealing with a crisis; a general model and practical guidelines to prepare schools for crisis situations; and information on implementing a crisis plan in the face of an actual crisis. Suggestions for providing clinical support for students and developing an integrated mental-health delivery system are also offered. Five figures are included. Appendices contain a list of committee members; guidelines for developing a school-crisis plan; and sample plans, forms, checklists, and resources for use in crisis training, preparation, and response, including vignettes for crisis-team planning. (Contains 23 references.) (LMI)

EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Educational Planning, Elementary Education, *Flexible Scheduling, Principals, *School Schedules, *Specialists, Time Blocks

This information brief describes problems involved in scheduling elementary-school specialist teachers and offers suggestions for resolving them. Poor scheduling results in fragmented classes, unequal distribution of instructional time, and lack of common planning time. Poor scheduling is usually due to lack of congruence between school mission and schedules, schedule design conducted by individuals or the central office, and periods of unequal length. Two samples of effective schedules are described—a master-block schedule and a four-day rotation cycle. The following recommendations are offered for designing specialists' schedules: (1) base decisions on what is best for the core instructional program; (2) determine needs and resources; (3) have the central office negotiate equitable arrangements among schools that share traveling personnel; (4) negotiate equal-length specialist periods, or at the very least, modular-length periods; and (5) break away from the Monday-through-Friday, once-a-week schedule. Two figures are included. (LMI)

Three federal initiatives—Title I of the Elementary and Secondary Education Act (ESEA), the Goals 2000: Educate America Act, and the School-to-Work Opportunities Act—are working together to assist secondary schools in meeting current challenges. This pamphlet describes a two-volume book that presents a mix of research-based ideas and promising approaches to secondary schooling. The first volume describes a variety of promising practices and principles for reform supported by current research. Volume 2 illustrates how some secondary schools have successfully put to work the principles of good practice. The innovative efforts suggest ways in which new federal initiatives can together support secondary schools' efforts to raise their students' academic-achievement levels. The programs incorporate the following principles: (1) strengthening and enriching the secondary school curriculum; (2) adapting organizations to increase learning; (3) linking schooling to the future; (4) creating networks of support for students; and (5) providing resources for improvement. The Title I program, the federal government's largest elementary and secondary school program, has been redesigned in order to make improvements in the nation's poorest schools. This brochure describes a two-volume book that provides examples of schools and communities working together to provide children with more time to learn. The strategies provided in the book suggest that Title I, working with schools and communities, can contribute to enhanced learning outside of the traditional school day, work, or year. The featured programs base their activities on goals specifically set to address students' needs. Promising practices include the following: careful planning and design; links between the extended time and the regular academic program; a clear focus on using extended time effectively; a well-defined organization and management structure; parent and community involvement; a strong professional community; cultural sensitivity; a continuous search for funding; a willingness to resolve and work around obstacles; extended-time tutoring and homework-help sessions; and thoughtful evaluations of program success. Identifiers—*Education Consolidation Improvement Act Chapter 1

The Title I program, the federal government's largest elementary and secondary school program, has been redesigned in order to make improvements in the nation's poorest schools. This handbook comprises the first of two volumes that provide examples of schools and communities working together to provide children with more time to learn. The book describes promising strategies used by 14 programs to extend learning time for disadvantaged students in diverse settings. The strategies provided in the book suggest that Title I, working with schools and communities, can contribute to enhanced learning outside of the traditional school day, work, or year. The featured programs base their activities on goals specifically set to address students' needs. Promising practices include the following: careful planning and design; links between the extended time and the regular academic program; a clear focus on using extended time effectively; a well-defined organization and management structure; parent and community involvement; a strong professional community; cultural sensitivity; a continuous search for funding; a willingness to resolve and work around obstacles; extended-time programs which reinforce particular skills needed in the classroom; and thoughtful evaluations of program success. The report has three chapters. Chap-

ter 1 presents the rationale for extended-time programs, drawing on research that examines the relationship between time and achievement for disadvantaged students. It also discusses the background and purpose of the book, describes the criteria for selecting the programs, and provides brief descriptions of the programs. The second chapter identifies promising practices associated with these programs, the challenges they face, and the solutions that some have found. The third chapter draws conclusions about extending learning time for disadvantaged students. (Contains 59 references.) (LMI)

Identifiers—Education Consolidation Improvement Act Chapter 1

The Title I program, the federal government's largest elementary and secondary school program, has been redesigned in order to make improvements in the nation's poorest schools. This handbook comprises the second of two volumes that provide examples of schools and communities working together to provide children with more time to learn. The book includes detailed profiles of 14 programs that extend learning time for disadvantaged students in diverse settings. The featured programs base their activities on goals specifically set to address students' needs. Each of the program descriptions provides information on school context and major program features such as academic focus, organizational management/structure, professional environment, funding, parent and community involvement, cultural inclusiveness, and assessment and accountability. Implementation issues and evidence of program success are also highlighted. The programs illustrate how Title I, working with schools and communities, can contribute to enhanced learning outside of the traditional school day, work, or year. Appendices contain contact information, a list of planning resources, and a planning/implementation checklist. (LMI)

This paper presents the contents of an address given by Richard W. Riley, United States Secretary of Education, on February 28, 1996, in St. Louis, Missouri, on the state of American education. Policymakers are divided on the future of public education; some want to cut or abolish it, others seek to rebuild and expand it. The paper describes current challenges to public education and outlines seven goals for improving it: (1) increase the national literacy rate; (2) support families so that they can help their children learn; (3) create safe, orderly, and disciplined schools; (4) set and achieve high standards; (5) promote educational innovation, including the use of technology and optional school

choice; (6) prepare students for success in the work force; (7) sustain access to and find new ways to finance higher education; and (8) work together to find common ground to improve education. (LMI)

Identifiers—*National Education Goals 1990

This document, one of four volumes comprising the 1995 Goals Report, is the fifth in a series of annual reports. This core report for 1995 focuses on approximately two dozen indicators that show the progress made by the United States toward the National Education Goals. National performance has improved in five areas, gotten worse in seven, and, in eight areas, no significant changes in national performance have occurred. Progress has occurred in the areas of student readiness and mathematics achievement; participation in Advanced Placement examinations such as English, mathematics, science, and history; and early prenatal care. However, there has been some decline in the area of providing safe environments conducive to learning. The report focuses on the essential role that families play in helping to achieve the National Education Goals and suggests ways in which schools can involve them in partnerships. State and national progress on the core indicators is presented in detail. Twenty-five figures and eight tables as well as the 1995 National Education Goals Report Questionnaire are included. Appendices contain technical notes and a list of the National Education Goals panel staff. (LMI)

Identifiers—*National Education Goals 1990

This document, one of four volumes comprising the 1995 Goals Report, is the fifth in a series of annual reports. This document provides in-depth information for the progress toward the National Education Goals at the national level. The report is divided in sections pertaining to Goals 1-8. Each section discusses the Goal, identifies objectives, and presents a series of exhibits representing indicators for the national volume. Changes in progress are noted for the charts and sidebars highlight important information. The nation has made encouraging progress in mathematics achievement; prenatal care; and participation in Advanced Placement examinations in core areas such as English, mathematics, science, and history. Other areas, however, call for improvement. Data show that the United States has fallen behind in achieving the goals of adult

literacy and lifelong learning and safe, disciplined, and alcohol- and drug-free schools. One essential step is for schools and families to form strong partnerships to improve education. The National Education Goals Panel's plans for supporting state and community development of academic standards and assessments are highlighted. Eighty-nine figures and a 1995 National Education Goals Report Questionnaire are included. Appendices contain technical notes and sources, acknowledgments, and a list of National Education Goals Panel staff members. (LMI)

Identifiers—*National Education Goals 1990

This document, one of four volumes comprising the 1995 Goals Report, is the fifth in a series of annual reports. This document provides in-depth information on the progress toward the National Education Goals that each state, the District of Columbia, American Samoa, Guam, the Northern Mariana, Puerto Rico, and the Virgin Islands has made against its own baseline. A 4-page profile, including graphs and tables, for each state lists each of the goals and information concerning the status of each state's progress toward reaching the goals. Direct measures of the goals and objectives are given in all areas, sidebar graphs pertain to such areas as child health and nutrition; high school completion and dropouts; and other measures of academic achievement, including advanced placement programs, adult literacy, educational environment, and school safety. Two appendices contain technical notes and acknowledgments. The 1995 National Education Goals Report Questionnaire is also included. (LMI)

Identifiers—*National Education Goals 1990

This booklet, one of a set of four documents comprising the 1995 Goal Report, contains the executive summary for the fifth in a series of annual reports to measure progress toward the National Education Goals. The first part summarizes the nation's progress toward each of the goals. It provides baseline measures of progress, the most recent measures of performance, and indicators of overall progress. The data show that on the whole, progress has been modest. Although some encouraging progress has been made, ground has been lost in many areas. The efforts of educators, families, community members, and businesses are required to reach the goal of providing a world-class education for all students. The second part discusses the importance and potential of family-school-community

partnerships and describes partnership programs at various schools across the country that have addressed specific National Education Goals. A list of program contacts and additional resources and suggestions for creating family-school-community partnerships are included. (LMI)

Learning Disabilities and the American Public: A Look at American's Awareness and Knowledge.
 Roper Starch Worldwide Inc.
 Spous Agency—Emily Hall Tremaine Foundation, Inc., Hartford, CT.
 Pub Date—Mar 95
 Note—79p.

Pub Type—Reports - Research (143) — Tests/Questionnaires (160)

EDRS Price - MF01/PC04 Plus Postage.
 Descriptors—Adults, Elementary Secondary Education, Information Sources, Interviews, *Knowledge Level, *Learning Disabilities, Majority Attitudes, National Surveys, *Public Opinion, Resource Allocation

Identifiers—*Attitudes toward Disabled
 This study examined 1,200 adults' understanding of and attitudes toward learning disabilities, through a telephone survey. Additional objectives included the identification of various information sources and testing of potential messages about learning disabilities. Halfway through each telephone interview, a definition of learning disabilities was provided, thus allowing both a "blind" discussion and a "pre-test/post-test" structure. Among major findings are the following: (1) 3 in 10 Americans claim direct experience with learning disabilities; (2) most Americans believe nine conditions (such as blindness and mental retardation) are associated with learning disabilities; (3) most Americans believe learning disabilities should be identified as early as preschool; (4) Americans' primary information sources about learning disabilities are schools, doctors, and libraries; (5) the term "learning differences" is seen as more acceptable than learning disabilities; (6) Americans were evenly split on whether more resources should be devoted to children with learning disabilities or to basic services for all children; (7) funding discussions cannot be framed as a zero-sum game if increased spending to teach these children is to be supported; (8) increasing knowledge about learning disabilities is associated with greater support for increased spending; and (9) most Americans agree that adults with learning disabilities suffer injustices. Results are detailed in chapters on personal experience, relationship of education to learning disabilities, knowledge level, schools and teaching, information sources, and messages. An appendix details the methodology and provides the questionnaire. (DB)

Effects of Inclusion on Academic Outcomes.
 Pub Date—Aug 95
 Note—41p.; Research Paper, Sam Houston State University.

Pub Type—Dissertations/Theses - Undetermined (040) — Tests/Questionnaires (160)

EDRS Price - MF01/PC02 Plus Postage.
 Descriptors—Academic Achievement, *Disabilities, Grade 5, *Inclusive Schools, Intermediate Grades, Mainstreaming, *Mathematics Achievement, *Outcomes of Education, Program Effectiveness, *Reading Achievement, Standardized Tests

This study compared math and reading achievement in the fifth grades of two suburban elementary schools, one which utilized a traditional approach of pull-out special education classrooms and the other which utilized an inclusion program for special education services. The Texas Assessment of Academic Skills (TAAS) was used to measure the math outcomes of 98 fifth graders and the reading outcomes of 80 fifth graders at the inclusion school, and the math outcomes of 143 fifth graders and the reading outcomes of 129 fifth graders at the traditional school. Chi square analysis reflected no significant difference in passing rates on the TAAS in math and reading between the two groups. The study concluded that the decision as to which program is more beneficial cannot be made based solely on expected academic improvements. Appendixes in-

clude a student attitudes survey instrument, data tables, and a paper on inclusion. (Contains 20 reference notes.) (DB)

Pub Type—Books (010) — Guides - Non-Classroom (055)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—Attention Deficit Disorders, Cognitive Processes, Elementary Secondary Education, Emotional Development, Hyperactivity, Learning Activities, *Learning Problems, Movement Education, Neurology, Nutrition, *Perceptual Motor Learning, *Physical Development, *Psychomotor Skills, *Sensory Integration, Stress Management

This book examines the body's role in learning, by reviewing recent scientific insights into the ways that movement initiates and supports mental processes. Part 1 focuses on the brain and physical development, emphasizing the growth of the body/mind capacities with which we learn. It explores three distinct but interconnected kinds of body/mind processing: sensation, emotion, and thought. It also examines the ties that bind body, emotion, and thought together and looks at how movement anchors thought. In part 2, the book discusses the importance of movement and introduces Brain Gym, a coordinated set of integrative movements to enhance learning. Part 3 examines the need to manage stress, nutrition, and other physical requirements of learning. Stress is seen as extremely damaging to learning potential and as the root cause of many of the learning problems seen in people labeled as hyperactive or having attention deficit disorder or attention deficit hyperactivity disorder. (Contains extensive reference notes for each chapter.) (DB)

Dealing with Sensory Integrative Dysfunction in the Classroom: A Guide for Early Elementary Teachers.

Pub Date—25 Feb 95
 Note—22p.; Paper presented at the American University College of Arts and Sciences Student Research Conference (Washington, DC, February 25, 1995).

Pub Type—Guides - Non-Classroom (055) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.
 Descriptors—Attention Control, *Classroom Techniques, Early Childhood Education, *Perceptual Impairments, Perceptual Motor Learning, *Sensory Integration

This paper offers teachers basic information about sensory integration and suggests strategies for managing classrooms which include children with sensory integrative dysfunction. The first section looks at what sensory integration is, noting especially the roles of the three "near senses": the vestibular system, the proprioceptive system, and the tactile system. Next, sensory integrative dysfunction in children is considered, including the hypersensitive child and the hyperresponsive child. Specific ways that sensory integration dysfunction can become a problem in the classroom are considered, including problems with peers, with controlling aggression, with motor planning, and with maintaining alertness. Suggestions for classroom management while managing a child with sensory integrative dysfunction are offered, including suggestions for setting up the classroom, managing instructional time, and being flexible in teaching styles. Teachers are urged to seek the support of colleagues, administrators, parents, and providers of support services. (Contains 21 references.) (DB)

The Fast Lane to High School: Transition from Middle School/Junior High to High School.
 Pub Date—Oct 95
 Note—15p.; Paper presented at the Conference of

the Council for Exceptional Children Division on Career Development and Transition (Raleigh, NC, October 19-21, 1995).

Pub Type—Speeches/Meeting Papers (150) — Guides - Non-Classroom (055)

EDRS Price - MF01/PC01 Plus Postage.
 Descriptors—Decision Making, *Disabilities, Educational Practices, High Schools, Individualized Education Programs, Junior High Schools, Middle Schools, Secondary School Curriculum, *Transitional Programs

This paper offers a structured framework for the transition of students with disabilities from middle or junior high school to high school. First, it outlines a transition decision tree to help decide whether a formal transition plan is needed. Next, the paper offers a 10-step set of practices appropriate for all students with disabilities in the last year of middle/junior high school. Steps include gathering and compiling relevant information into a student portfolio; determining the student's attitudes, preferences, concerns, and interests about high school; selecting high school courses and activities; and planning and conducting an Individualized Education Program (IEP) meeting. Suggestions for refocusing middle/junior high school curriculum to facilitate transition include assessing available course offerings that match IEP goals and other transitional curriculum areas, assessing the gaps between what is being taught and what the student needs, and developing resources and strategies for bridging the gaps. Appropriate curriculum practices are suggested in the areas of vocational training/pre-employment, personal management and independent living, community participation, recreation and leisure, and preparation for continued education/training. Critical skills for college bound junior high/middle school students with learning disabilities are listed as are quality indicators of effective instruction for a functional curriculum. (DB)

The Adverse Implications of Full Inclusion for Deaf Students.

Pub Date—Jul 95
 Note—10p.; Paper presented at the International Congress on Education of the Deaf (18th, Tel Aviv, Israel, July 16-20, 1995).

Pub Type—Speeches/Meeting Papers (150) — Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.
 Descriptors—Advocacy, Civil Rights, Court Litigation, Deaf Interpreting, *Deafness, *Educational Practices, Educational Trends, Elementary Secondary Education, Federal Legislation, *Inclusive Schools, Mainstreaming, Peer Relationship, Social Integration, *Student Placement, *Student Rights

This paper addresses the advocacy movement for the inclusion of children with disabilities in general education classrooms, especially the meaning of this movement for children who are deaf. First the ideology of the militant push for full mandatory inclusion is considered. This ideology is seen as having been fueled by two events. The first event was the 1975 Individuals with Disabilities Education Act which focused on providing all children with a "free and appropriate public education" in the "least restrictive environment." The ideology of mandatory inclusion is seen as actually contradicting the law and defying the logic of how individual needs can best be met. Second, the civil rights rationale underlying the U.S. Supreme Court decision 40 years ago that banned racially segregated schools has been applied to educational placements for children with disabilities. Instead of safeguarding the rights of children, inclusionists are seen as denying children the right to attend school in alternative settings. The reality of inclusion for many deaf children is considered, and research is cited showing that the social communication between hearing and deaf children in inclusive settings is predominantly negative and does not promote social assimilation. Difficulties with using an educational interpreter are identified, including the denial of normal peer interaction to the deaf child and serious pedagogical limitations to an interpreted education. The paper urges educators not to abandon the continuum of alternative educational placements for deaf children in favor of mandatory full inclusion. (Contains 11 references.) (DB)

Descriptors—Audiology, Auditory Evaluation, *Deafness, *Demonstration Programs, Early Childhood Education, *Early Intervention, Educational Methods, *Family Programs, *Hearing Impairments, Infants, Models, Parent Education, Parent Participation, *Program Design, Toddlers

This paper describes five programs of early intervention for children with hearing impairments and their families. Programs are described according to their mission, services, and unique contribution to the field of early intervention. First, essential components of all programs are identified. These are evaluation, audiological management, parent support and education, and one-to-one work with the child. Philosophical controversies in the field over the best ways to teach deaf children language are briefly addressed. The five programs described are: (1) Infant Hearing Resource in Portland, Oregon, which focuses on reducing the effects of hearing loss in the child and increasing the parents' knowledge about deafness; (2) the SKI*HI program, a widely adopted comprehensive, home-based support model designed to be used with children and families through interagency coordination in Utah; (3) the Thayer-Lindley Family-Centered Nursery (Boston, Massachusetts) which focuses on empowering parents by identifying and resolving emotional issues surrounding the diagnosis of hearing loss in their child; (4) the Visiting Infant and Parent Program (Northampton, Massachusetts), which is a comprehensive evaluation and short-term intervention program; and (5) the Hearing, Speech and Deafness Center: Parent-Infant Program which is implementing a bilingual/bicultural philosophy in which English and American Sign Language are equally valued and deaf adults are involved on a variety of levels. Addresses, telephone numbers, and individuals to contact are listed for each program. (Contains 15 references.) (DB)

Descriptors—Access to Education, Advocacy, *Comparative Education, *Deafness, Educational History, Educational Philosophy, *Educational Practices, Elementary Secondary Education, Foreign Countries, International Programs, Organizations (Groups), Professional Education, *Special Education, Teacher Education, Total Communication

Identifiers—*Caribbean, *Central America, Gallaudet University DC, South America

This paper describes the current state of education for deaf children in Central America and the Caribbean (with some mention of parts of South America), focusing on an historical description of events and forces impacting these regions; current educational philosophies; adult associations of deaf people; intra/intercountry networking; educational and medical aspects; and visions for the future. The countries included are: Guatemala, Honduras, Nicaragua, Costa Rica, Panama, Dominican Republic, Jamaica, Antigua, Dominica, and the Bahamas, with mentions of Argentina, Venezuela, Ecuador, and Colombia. The historic importance in deaf education of individual visionary educators or international organizations in particular countries is noted. The role of the International Center on Deafness at Gallaudet University (Washington, D.C.) is also noted. The influence of the "total communication" philosophy and the development of Associations of the Deaf are briefly discussed. The lack of professional training programs in this area is illustrated by a table showing training possibilities across Central America. Effects of the ownership of teacher preparation centers by otolaryngologists are also noted (such as a medical pathology approach to deafness). (DB)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Accessibility (for Disabled), *Attention Deficit Disorders, *Classroom Techniques, Educational Strategies, Elementary Secondary Education, *Inclusive Schools, Individualized Instruction, Mainstreaming, Student Behavior, *Teaching Methods

Identifiers—Behavior Management

This how-to guide for teachers suggests ways to help children with attention deficit disorders (ADD) in the general classroom, by means of specific instructional practices to be used as part of an instructional program based on classroom accommodations, behavior management, and individualized academic instruction. Basic steps in developing an effective educational program for the ADD student are outlined, including evaluating the child's individual needs, selecting appropriate instructional practices, and integrating appropriate practices within an individualized program. The recommended instructional strategies are grouped into the following categories: general instructional principles, individualized instructional practices, language arts and reading comprehension, phonics and grammar, handwriting, mathematics, solving word problems, special materials, organizational skills, study skills, behavior management, verbal reinforcement, counseling, and classroom accommodations. Pub Type—Reports—Evaluative (142)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—Advocacy, Compliance (Legal), Data Analysis, Educational Legislation, Educational Quality, Educational Trends, Elementary Secondary Education, Federal Legislation, Government Role, *Inclusive Schools, Mainstreaming, *Mental Retardation, State Programs, *Student Placement, *Trend Analysis

Identifiers—*Arc (Association for Retarded Citizens), Individuals with Disabilities Education Act

This report evaluates progress in including children with mental retardation in integrated educational environments and provides detailed tables providing state-by-state comparisons. A prologue by the executive director of The Arc, a national organization on mental retardation, notes that, for children with mental retardation, placement in segregated educational environments continues to be the rule of the land, with only 7.1 percent of such children receiving their education in regular classrooms during 1992-93, up only slightly from the 6.7 percent reported during 1989-90. A large discrepancy between integration data for children with other disabilities and children with mental retardation is noted. Vermont is presented as an example of the successful implementation of inclusion of children with mental retardation. Concerns of The Arc regarding reauthorization of the Individuals with Disabilities Education Act are noted, such as proposals regarding easing of requirements to educate all children and elimination of categorization of disability. The main body of the report has sections which address: principles of inclusion in education affirmed by The Arc; benefits of inclusion; educational environments of children with mental retardation; national changes in educational placements; state-by-state comparison of the use of regular classroom placements; changes in the use of regular classrooms; state comparison of combined regular class and resource room placement; state comparison of overall use of inclusive settings for children with mental retardation; "report card grades" for

each state; an overview of findings; limitations of the data; the quality of education received by children with mental retardation; and renewal of The Arc's call to action by the federal government, state governments, local school systems, and chapters of The Arc. (Contains 15 references.) (DB)

This document is designed to be a resource for individuals and agencies concerned with the topic of linkages between education and human services. It begins with an overview of the topic of school-linked services, including background information and project characteristics concerning the long and somewhat unconventional history of collaboration between education and human services. The remainder of the document is an annotated list that includes one-page descriptions of approximately 85 resources that have been selected, reviewed, summarized, and catalogued according to the following topical areas: general information, program planning, program components, program implementation, and program evaluation. The resources include reports, policy briefs, journal articles, informational briefs, conference report articles, newsletters, books, and project descriptions. Entries were chosen to meet various levels of information needs, ranging from introductions to the topic to items suitable for those already involved in a coordination venture. Information generally provided for each resource includes: type of item, title, author/source, date, length, publisher/address, and description. Topical and author indexes are provided. (DB)

Descriptors—*Emotional Disturbances, Family Involvement, Family Problems, *Mental Disorders, *Mental Health, Neurosis, Psychosis

This bibliography for families lists 44 print resources on mental health and mental illness published from 1987 through 1994. The list is organized into the following categories: directories and bibliographies, other print resources, and information in Spanish. The names, addresses, and telephone numbers of publishers are provided at the end of the bibliography. Information is also provided on newsletters of the National Alliance for the Mentally Ill and publications of the National Institute of Mental Health and the National Mental Health Association. (DB)

This bibliography for schools lists 49 print resources on mental health and mental illness published from 1989 through 1994. Resources are listed alphabetically by author within the categories of directories and bibliographies, and other print resources. The names, addresses, and telephone numbers of publishers are provided at the end of the bibliography. Sources of materials for families from several organizations such as the National Institute of Mental Health and the National Mental Health Organization are noted and information is provided on newsletters from the National Alliance for the Mentally Ill. This bibliography of 85 items is intended to help parents and professionals identify books that are written about or include characters who have a disability. The bibliography begins with a list of other resource guides to disability literature. The list of children's literature is then presented, grouped according to the following disabilities: attention deficit disorder, blindness, cerebral palsy, deafness, Down syndrome, learning disabilities, serious or life-threatening conditions, physical disabilities, and other disabilities. The age group or grade level for which each book is appropriate is indicated, along with publisher and publication date. (DB)

This report presents a plan of the National Association of State Directors of Special Education's Project FORUM to establish and implement the on-going process of identifying national program information needed for improving the management, administration, delivery, and effectiveness of programs and services under the Individuals with Disabilities Education Act. The report identifies issues and considerations for such a plan and explains the process used to develop this plan, including selection of strategies, the involvement of stakeholders,

and determination of the activity's scope. Specific results of meetings and interviews to obtain stakeholder input into the plan are outlined. Key features of the plan, which is based on a marketing model, are described, including: (1) creation of a polling panel to provide initial and ongoing consumer input; (2) creation of an initial list of national program information needs (based on those identified by a 2-day focus group of experts); (3) verification of the list of identified needs by the polling panel; (4) prioritization of the categories of identified needs by a selected subgroup of the polling panel using a Delphi process; and (5) periodic re-evaluation of the proposed process for identifying national program information needs. Also noted are additional recommendations for consideration by the Office of Special Education Programs. Appendices include a paper by Cynthia L. Warger entitled "A Draft Background Paper Outlining a Process for Identifying Information That is Needed To Improve Programs for Students with Disabilities"; background information for meeting participants; a meeting agenda; and an initial list of national program information needs. This paper attempts to define the role of special education and special educators in current educational reform efforts and to provide direction to the National Association of State Directors of Special Education (NASDSE), by reviewing current reform initiatives in the context of the past, present, and future of educating children with disabilities. First, common elements in the educational reform movement are identified, with emphasis on development of a performance-based educational system. The history of special education policy and performance within the legal context is reviewed. The present environment is seen as fostering a stagnant service delivery system that limits opportunities to develop creative solutions to problems of policy and practice. A clear national, public demand for accountability and reform and a general dissatisfaction with public education is seen as pushing special education into a reactive posture. Special education is seen as doing no better or worse than the rest of education in producing measurable results. Principles which underlie the special educators' role in school reform are identified, stressing the promotion of collaborative intra- and inter-agency relationships, broad-based community support, collective responsibility for learning, and advocacy for students and families. The change from an input system to a performance-based system is felt to require that educators address the continued protection of students with disabilities and the provision of greater flexibility in special education in the areas of certification, administration, service delivery, and finance. Initiatives and strategies in the following areas are urged: prevention/early intervention, inclusive schooling, school-based/school-linked health and social services, technology, personnel preparation, identification of performance standards and assessment strategies, and decentralization. (Contains 14 references.) (DB)

Identifiers—Diversity (Student)

This report describes a 2-day meeting of experts to identify and discuss the ramifications of inclusive school system proposals on the management, administration, delivery, and effectiveness of education programs and services for children with disabilities and to initiate development of a national action plan to address the issues. The policy forum included state and local special and general education administrators, university researchers, policy analysts, and parents as well as staff from the Office of Special Education Programs and the National Association of State Directors of Special Education's Project FORUM. Preparation for the meeting and the process of the meeting are briefly summarized. The meeting resulted in the identification of four challenges seen as critical to the realization of reform to improve educational outcomes for all students. They are: (1) realignment of special education and regular education orientations and philosophies to embrace the diversity of student abilities, backgrounds, and needs; (2) funding structures that allow for the flexible utilization of resources to meet individual student needs; (3) examination of regulatory impediments to innovation without losing sight of the need to protect the educational rights of vulnerable individuals; and (4) implementation of effective instructional strategies and new approaches to preservice and inservice personnel preparation and deployment. Each of these challenges is discussed in terms of major obstacles and solution strategies. Attachments include a list of policy forum participants and a background paper by Eileen M. Ahearn titled "The Impact of Inclusive School Initiatives on the Education of Students with Disabilities," which contains 51 references. (DB)

An Overview of Standards and Policy on the Use of Time-Out as a Behavior Management Strategy.

National Association of State Directors of Special Education, Alexandria, VA.

Spons Agency—Special Education Programs (ED/OSERS), Washington, DC.

Pub Date—12 Jul 91

Note—6p.; Prepared by Project FORUM.

Available from—National Association of State Directors of Special Education, Inc., 1800 Diagonal Road, Suite 320, King Street Station 1, Alexandria, VA 22314 (\$5.50).

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Behavior Disorders, Behavior Problems, Court Litigation, *Disabilities, *Discipline Policy, Educational Policy, Individualized Education Programs, School District Autonomy, *Standards, State Standards, *Timeout

This study investigated state policy, court litigation, and accreditation standards with respect to the use of time-out as a behavior management strategy in special education programs. The study's emphasis was on existing standards concerning the use of locked time-out rooms and student supervision requirements during the application of time-out. The first section reviews a sample of applicable state policy on the use of time-out from Arkansas, Pennsylvania, Delaware, Massachusetts, and Kentucky. The second section looks at case law, focusing on a recent briefing paper published by EDLAW, Inc. titled "Disciplining Disruptive Handicapped Students" (K. S. Mehrouf and S. J. Rosenfeld). This paper makes recommendations regarding the use of time-out, such as its inclusion in the student's Indi-

visualized Education Program, and also provides specific procedural recommendations for implementing time-out interventions. The third section discusses accreditation standards pertaining to the use of time-out in residential and health care facilities. The paper concludes that most states leave the development of behavior management procedures, including time-out, to local education agencies; that time-out rooms should not be locked and the child should be constantly observed while confined to the room; and that it is important to keep consistent data on the frequency of the target behavior to make sure time-out is having its intended effect. Descriptors—*Age, Chronological Age, Compliance (Legal), *Disabilities, Educational Attainment, Educational Certificates, *Educational Policy, *Eligibility, Graduation, Graduation Requirements, Individualized Education Programs, School Districts, School Responsibility, Secondary Education, *State Standards, *Student Certification

Identifiers—*Aging Out Process

This study investigated the upper age educational mandates of 15 states and the policies regarding alternative awards to the regular diploma in 19 states. The study was based on analysis of state policy documents, a 1990 state survey of exiting procedures, and telephone conversations with state education agency officials. The first section addresses the upper age mandates established by the states of Alabama, California, Georgia, Illinois, Iowa, Kansas, Louisiana, Nebraska, New Mexico, New York, North Carolina, Ohio, Oklahoma, Texas, and Virginia. Three questions were addressed: (1) the upper age limit for service eligibility in the selected states and whether students are allowed to complete the school year during which they reach this age; (2) conditions placed on serving students over the age of 18; and (3) state provisions allowing local education agencies to determine whether students above the age of 18 will be served. The second section presents information on how state policies define "program completion," as well as what types of awards are given to recognize program completion or graduation. The paper concludes that the most common forms of alternative award were certificates of completion or completion of the Individualized Education Program. States were found to vary widely in their interpretation of "certificate of completion." An appendix, which comprises most of the document, provides excerpts from state policies on this issue. Information is provided for Alabama, California, Georgia, Iowa, Kansas, Louisiana, Mississippi, Nebraska, New York, Oklahoma, Texas, and Virginia. (DB)

Identifiers—*Discretionary Programs, *Individuals with Disabilities Education Act Part B, Michigan, Wisconsin

This report discusses the findings from two case studies of state use of discretionary funds under the Individuals with Disabilities Education Act (IDEA), Part B. The two states involved in the study were Michigan and Wisconsin. Documents and interviews were used to gather detailed descriptive information from both states regarding: (1) the establishment of priority areas for Part B discretionary projects; (2) the process for selecting discretionary projects; (3) the use of discretionary funds for the administration of complaint investigation and monitoring; (4) the discretionary projects funded between 1990 and 1992; (5) the discretionary projects funded in 1993; and (6) the evaluation of discretionary projects. The paper also discusses the IDEA requirements with respect to discretionary funds, the importance of flexibility in the use of these funds, and the overall impact of discretionary money on the ability of states to exercise leadership in special education program improvement. Descriptors—Compliance (Legal), *Costs, *Data Analysis, Data Collection, Delivery Systems, *Disabilities, Educational Finance, Elementary Secondary Education, *Expenditure per Student, National Surveys, Program Costs, *Special Education

This resource paper describes two recent studies and one report on special education costs and the methodology used in their analyses. Each study and its data source are summarized with a short discussion on the quality of the data and its usefulness and limitations in generating reliable cost estimates for special education. The paper summarizes information from the following three sources: (1) the examination of special education costs presented in the "12th Annual Report to Congress on the Implementation of the Education of the Handicapped Act," U.S. Department of Education (1990); (2) "Special Education: Views from America's Cities" prepared by the Council of the Great City Schools (1988); and (3) "Patterns in Special Education Delivery and Cost" prepared by Decision Resources Corporation (1988). A section on terminology and definitions is followed by a section which looks at each of the three sources for cost determination. A concluding discussion notes that the three reports draw different conclusions. A table compares results of the three studies for the 1985-86 school year. The paper stresses that distinguishing between the concepts of "total cost" versus "excess cost" is central to the correct use and interpretation of a cost ratio estimate. The Decision Resources Corporation report is seen as yielding the most accurate cost estimates and ratios. This study estimates "excess costs" incurred by the student with disabilities as ranging from 0.9 to 9.6 times the average per pupil expenditure, depending upon the student's special education program. The diversity of local conditions is seen as making any system for evaluating special education costs difficult. (DB)

Descriptors—Educational Finance, Elementary Secondary Education, *Emotional Disturbances, *Financial Policy, *Institutionalized Persons, *Mental Retardation, Public Policy, *Residential Schools, School Districts, Special Schools, State Agencies, State Departments of Education, State Schools, State Surveys

A nine-state survey determined fiscal policies regarding educating children with disabilities residing in state institutions of mental health or mental retardation. States included California, Colorado, Massachusetts, Michigan, Minnesota, South Carolina, Vermont, Virginia, and Wisconsin. It was found that predominantly state-appropriated dollars were used to pay for educating institutionalized children whose school was located at the institution. In some states, federal Chapter 1 monies were used to provide services supplemental to the state-operated special education programs. The states in the sample were about equally divided on the question of which state agency, Education, Mental Health, or Mental Retardation, pays the educational costs. Only in Minnesota and Colorado are the school districts directly involved in paying for some or all of the educational costs for children with disabilities residing in state mental retardation or mental health institutions. In Virginia, some State Department of Education monies that normally would flow to the home school district were diverted to the State Department of Mental Retardation. When special education took place off institutional grounds, there was a tendency for the State Education Agency and the local school districts to become involved in financial and programmatic areas. Identifiers—*Goals 2000

A chart/graph format illustrates the overlaps between the national educational goals contained in the Goals 2000: Educate America Act and with "National Agenda for Achieving Better Results for Children and Youth with Disabilities" document. Included among the topics addressed by these two initiatives are the following: increasing diversity, school-community collaboration, employing well-prepared professionals, professional development, provision of services to address individual student needs, new funding systems, accountability and student assessment, and appropriate technology. Commonalities between these two initiatives are identified to facilitate discussions about educational reform and restructuring in a special education context. The report notes that the missions of the two documents are the same—educating all of America's children and youth to reach their full potential and to take their places as productive members of society. Identifiers—*Individuals with Disabilities Education Act

This background paper for a policy forum provides a framework for discussing the issue of determining eligibility for special education programs and services according to the Individuals with Disabilities Education Act (IDEA). Included is a review of the role of assessment in special education, concerns about assessment practices, and constraints on change. Examples are provided of alternative approaches to improve the eligibility determination process, which have been implemented in Pennsylvania, Iowa, Ohio, Michigan, Florida, and American Samoa. It is suggested that existing special education requirements constrict movement toward using eligibility assessment results to measure a student's current status for important outcomes. It is claimed that there is little if any use of assessment data to plan or evaluate the intervention provided under special education. Although schools are required to review each child's individualized education program at least once a year, there is no requirement that assessments be used to track progress or measure outcomes. Many of the constraints to change involve legal and/or fiscal issues, including the link between categorical identification of a disability and due process and protection of individual rights. (SW)

Descriptors—*Beginning Teachers, *Disabilities, Elementary Secondary Education, Job Satisfaction, *Labor Turnover, *Special Education Teachers, State Programs, Teacher Morale, *Teacher Persistence, *Teacher Recruitment, Teaching Conditions

Strategies for teacher retention are presented, including successful approaches and elements for operating a state system for personnel recruitment and retention in special education. Such initiatives as the Utah Mentor Teacher Academy; the Texas Teacher Recruitment, Retention and Assistance Program; and the Kansas Recruitment/Retention Project are briefly discussed, along with elements of beginning teacher programs implemented in 34 states. Major components of a state personnel recruitment and retention system are identified, including data collection and analysis, marketing and recruitment, training and certification, and professional support and enhancement. Appendixes offer strategies which can influence job satisfaction and commitment through teacher supports or work environment changes, in excerpts from four papers: "Fourteen Tips to Help Special Educators Deal with Stress" (ERIC Clearinghouse on Disabilities and Gifted Education); "The Problems of Getting Started: What Administrators Should Know about Beginning Special Education Teachers" (D. J. Gallagher); "Finding and Keeping Experienced Special Education Teachers" (J. M. Schnorr); and from "Recruiting, Retaining, and Developing Exceptional Teachers: Strategies for Florida School Districts" chapter 3 "Retention: Keeping Qualified Personnel" (Florida Department of Education). External, employment, and personal factors which influence teacher decisions to stay, leave, or transfer from teaching assignments are discussed, with emphasis on special education teachers. Factors attributed to teacher attrition in urban and rural environments also are briefly reviewed, along with attrition of related services professionals. External factors affecting teachers include economic trends, societal factors such as changing birth rates, and institutional factors. Employment-related variables include professional qualifications, work conditions, work rewards, and commitment. Personal factors encompass demographic, family, and cognitive/affective variables. The following aspects of district or school environments have been found to be associated with teacher attrition: lack of administrative support, lack of collegial and parent support, and insufficient involvement in decision-making. Factors linked to job dissatisfaction among related service professionals (including speech/language pathologists, occupational and physical therapists, and school psychologists) in school settings include salary, inadequate work and/or office space, inadequate equipment or materials, excessive caseloads,

limited staff development, and isolation from colleagues. (Contains 17 references.) (SW)

Identifiers—*Office of Special Education Programs

Information is presented on selected projects funded by the U.S. Office of Special Education Programs (OSEP), including projects which present promising practices or effective strategies and/or were intended for national information dissemination. The categories of projects are as follows: services/programs for the deaf/blind, early intervention, inclusion, educational outcomes, finance, secondary school to work transition, social relationships, teacher training (distance education), and multimedia productions for teacher education, and technology. Project profiles state the purpose of the project and outcomes and include the name of the project, the contact person and address, the project expiration date, and the types of materials available for dissemination. Descriptors—*Academic Standards, *Disabilities, Educational Improvement, Educational Legislation, *Educational Objectives, *Educational Policy, Elementary Secondary Education, *Federal Legislation, Public Policy

Identifiers—*Goals 2000

Highlights of Public Law 103-227 (Goals 2000: Educate America Act) are presented. Contents include: a summary of how this Act will provide a framework for meeting the national education goals for all students, including those with disabilities; selected definitions of terms used in the legislation; and objectives of the eight national education goals, which comprise Title I of the Act. Summary information also is provided on provisions of the other titles of the legislation, as follows: National Education Reform, Leadership, Standards, and Assessments (Title II); State and Local Education Systemic Improvement (Title III); Parental Assistance (Title IV); National Skill Standards Board (Title V); International Education Program (Title VI); Safe Schools (Title VII); Minority-Focused Civics Education (Title VIII); Educational Research and Improvement (Title IX); and Miscellaneous Provisions (Title X). Additional tips are provided concerning standards for teaching and learning and opportunity-to-learn standards. (SW)

The Adult Sequelae of a Childhood Diagnosis of Attention-Deficit/Hyperactivity Disorder: A Review of the Literature for the Past Decade.

Pub Date—May 95

Note—50p.; Doctoral Research Paper, Biola University.

Pub Type—Information Analyses (070) — Dissertations/Theses - Undetermined (040)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Adjustment (to Environment), Adults, Alcohol Abuse, *Antisocial Behavior, *Attention Deficit Disorders, Clinical Diagnosis, Drug Abuse, *Hyperactivity, *Incidence, Mental Disorders, Multiple Disabilities, Psychiatry, Psychopathology, Research Methodology, *Substance Abuse

This paper reviews literature on the adult outcomes for children diagnosed with attention deficit/hyperactivity disorder (AD/HD). It critiques methodological issues, including diagnostic definitions, research designs, sample characteristics, and assessment instruments. It examines the relationship of AD/HD to a variety of adult disorders and pathology, including: (1) impaired lifestyle functioning (continuance of AD/HD symptomatology and educational or occupational problems); (2) substance abuse (alcohol and drugs); (3) social pathology (antisocial behavior, criminality, and pathological gambling); and (4) psychiatric symptoms (mood disorders, anxiety disorders, and antisocial personality disorder). The paper concludes that some individuals diagnosed with AD/HD in childhood continue to experience the full or partial syndrome in adulthood, tend to have lower educational and occupational status, have an increased risk for alcohol and substance abuse, and appear to be at greater risk for psychopathology. In particular, there seems to be a link between AD/HD in childhood and antisocial personality disorder in adulthood. (Contains 49 references.)

Descriptors—Cognitive Processes, Community Based Instruction (Disabilities), *Education Work Relationship, *Generalization, Instructional Effectiveness, *Interpersonal Competence, Intervention, Job Skills, Maintenance, *Mental Retardation, Peer Influence, Prevocational Education, Social Behavior, *Teaching Methods, Theory Practice Relationship, *Transitional Programs, Vocational Education

This paper reviews the research and attempts to identify instructional techniques and settings to promote generalization of appropriate work-related social behavior in individuals with mental retardation. First, it provides a definition of transition and discusses the importance of training for generalization, discrimination, and maintenance. Three techniques are then explained: (1) cognitive process approaches to instruction, (2) using peers as change agents, and (3) community-based instruction. The paper finds support for all three techniques and recommends that transition for students with mental retardation involve enrollment in vocational education programs, instruction in community-based environments, paid part-time employment, cognitive process approaches, and peer-mediated interventions. Antisocial Behavior in School: Strategies and Best Practices.

Report No.—ISBN-0-534-25644-9

Pub Date—95

Note—480p.

Available from—Brooks/Cole Publishing Co., 511 Forest Lodge Rd., Pacific Grove, CA 93950-9968.

Pub Type—Books (010) — Guides - Non-Classroom (055)

Document Not Available from EDRS.

Descriptors—*Antisocial Behavior, Behavior Patterns, *Classroom Techniques, Demonstration Programs, *Discipline, *Educational Practices, Educational Principles, Elementary Secondary Education, *Etymology, Interpersonal Competence, *Intervention, Parent Participation, Socialization, Student Behavior, Student Characteristics, Symptoms (Individual Disorders), Violence

This text is intended to provide educators with increased understanding of the nature, origins, and causes of antisocial behavior and to offer information on the best available practices, interventions, and model programs for preventing and remediating antisocial behavior disorders occurring in school. The book is based upon principles of social learning. The 13 chapters are entitled: (1) Antisocial Behavior Patterns in Children and Youth: Characteristics, Causes, and Outcomes; (2) Issues and Procedural Recommendations Regarding Effective Interventions for Antisocial Behavior in School; (3) The Acting-Out Behavior Cycle of Antisocial Students in the Classroom: A Conceptual Model; (4) Strategies for Managing the Phases of Acting-Out Behavior; (5) Establishing a Schoolwide Discipline Plan; (6) Instructing and Managing the Classroom Environment; (7) An Instructional Approach to Teaching Adaptive Behavior Patterns; (8) Instruction and Managing the Antisocial Student on the Playground; (9) Social Skills: Importance and Assessment; (10) Social Skills: Implementation and Generalization; (11) Parent Involvement in the Schooling of Antisocial Students; (12) Case-Study Applications of Best Practices with Antisocial Students; and (13) School Violence, Gangs, and Safety: Toward Proactive Strategies. Appendices provide a summary of empirical investigations on antisocial behavior in school and at home, an article entitled "The Case of Judge Hargreaves: Society Is Failing Its Children, Forsaking Its Future" (by James Hargreaves) and an excerpt from an article by Carla Marinucci and Scott Winokur entitled "Generals in the War on School Violence." The Use of Portable Computers with Dyslexic Students. Occasional Papers 26.

Southampton Univ. (England). Centre for Language Education.

Pub Date—Jul 94

Note—29p.

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Assistive Devices (for Disabled), Attitude Change, *Computer Uses in Education, *Dyslexia, Educational Media, Elementary Secondary Education, Foreign Countries, *Learning Disabilities, Microcomputers, Participant Satisfaction, *Student Attitudes, Writing Skills

Identifiers—*Laptop Computers, United Kingdom

This British study evaluated the effectiveness of use of individual portable computers by seven students (from elementary through college age) having severe specific learning difficulties or dyslexia. The study also examined the impact of the machines on pupils' levels of independence and the practicalities of using the machines. This report describes the project's objectives and management, criteria for selection of students, and student preparation and machine set-up. Use of the computers was analyzed in terms of frequency of use and diversity of use. Emphasized throughout the project was student control of machine use. Frequency of use was sometimes limited by the machines' weight, as well as by individual student personality and group dynamics. Diversity of use was somewhat dependent upon the student age and type of written work expected at different stages in the educational setting. The study found that students improved substantially in their notetaking skills, attitudes toward work, attitudes toward spelling, writing skills, and keyboarding skills. Other changes included increased independence in learning style. Minimal organizational accommodations were required of the schools involved. Factors determining success of such a project are noted, along with implications of the project in terms of the relationship of computers to teaching style, handwriting in the National Curriculum, and requirements for "written" assessment. (Contains 22 references.) (DB)

Metacognition and Reading in Children Who Are Deaf: A Review of the Research.

Pub Date—95

Note—20p.; Paper presented at the International Congress on Education of the Deaf (18th, Tel Aviv, Israel, July 16-20, 1995).

Pub Type—Information Analyses (070)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Deafness, Elementary Secondary Education, *Metacognition, *Reading Instruction, *Reading Strategies, Teaching Methods

This paper provides a review and synthesis of the research literature on metacognition and reading in children who are deaf and draws implications of the research for classroom instruction. The review is organized into three categories of studies: descriptive, correlational, and intervention research. The review also includes research on word awareness, an aspect of metalinguistics associated with reading achievement. The review identifies three trends. First, the research suggests that current instructional practices used to teach reading to deaf children might actually hinder their development of mature metacognitive strategies; second, skilled deaf readers resemble skilled hearing readers in their use of reading strategies; and third, deaf students can benefit from metacognitive strategy instruction. An attached table provides comparative data on the major studies reviewed. (Contains 33 references.) (DB)

Determining the Leisure Needs of People Having Disabilities: Commonwealth of the Northern Mariana Islands Needs Assessment Survey Report.

Northern Mariana Islands Governor's Developmental Disabilities Council, Saipan.

Pub Date—[95]

Note—87p.

Pub Type—Reports - Research (143) — Tests/Questionnaires (160)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—*Accessibility (for Disabled), Agencies, Community Recreation Programs, Delivery Systems, *Disabilities, Elementary Secondary Education, Foreign Countries, Higher Education, *Leisure Time, *Needs Assessment, Program Evaluation, *Recreational Programs, Social Integration, Surveys

Identifiers—*Northern Mariana Islands

This needs assessment survey attempted to determine if community recreation programs, including school-based and college-based programs, are meet-

ing the needs of citizens with disabilities living on the Northern Mariana Islands. The survey polled 35 people with disabilities about the effectiveness of community recreation programs and services and asked 26 recreation service providers to rate their effectiveness in supplying recreation services to this population. Introductory information summarizes island characteristics and demography. Sections of the report then list participating agencies and recreation entities; compare results of the two surveys; describe an agency evaluation process; present on-site survey results for the three large islands of Rota, Tinian, and Saipan by individual agency; and present recommendations for the islands as a whole and for each of the three islands individually. Recommendations include the provision of better public information by agencies offering recreational programs, better accommodation to the needs of people with disabilities, and help with transportation and financial assistance. Also encouraged is creation of a program where local inhabitants would receive funds for postsecondary education in the areas of nursing, recreation, speech pathology, occupational therapy, physical therapy, and teacher certification. Extensive appendices include project letters, survey forms, and detailed results. Also included are the questionnaires used in the survey. (DB)

Descriptors: *Child Rearing, Communication Skills, Coping, *Deafness, Elementary Education, Inclusive Schools, *Mainstreaming, Oral Communication Method, *Parent Child Relationship, *Parent School Relationship, Personal Narratives, Preschool Education, *Social Integration, Special Classes, Total Communication

The mother of a deaf child recounts her family's experience from her daughter's infancy to her successful adjustment and high achievement in elementary school. Worries during the child's infancy and reaction to the diagnosis at 18 months are documented, as are the mourning process and choosing an educational approach, in this case mainstreaming. The child was first enrolled in an oral/aural parent-infant program, which was later combined with a regular community nursery school program. This combined approach of a smaller "self-contained class" plus a "larger mainstreamed class" was continued in kindergarten while the family became educated in sign language and the deaf culture. In first grade the child was fully mainstreamed, with cued speech used to supplement her predominantly oral education. Her successful adjustment in the mainstream elementary program was felt to be aided by the fact that her parents taught her hearing coaches, teachers, and friends how to communicate with a severely hard-of-hearing person. The importance of fully integrating the deaf child into family conversations is stressed. Suggestions are offered to facilitate the child's transition from elementary to middle school, including advocating for the deaf, cultivating social ties within the deaf community, utilizing social support groups, using assistive listening devices, obtaining professional counseling, and meeting adult deaf and hard-of-hearing role models. (DB)

Descriptors: *Adults, *American Sign Language, *Deafness, *Developmental Disabilities, Group Homes, Interpersonal Competence, *Intervention, Multiple Disabilities, Program Development, Program Effectiveness, Program Implementation, Recreational Activities, *Socialization

This paper describes the need for and the struc-

ture of a socialization program designed to provide a social environment for five deaf adults with developmental disabilities residing in two different group homes. The program was developed to address the isolation experienced by such adults living in a community with others who do not use sign language. The program's focus was on fostering socialization among group members and strengthening participants' poor sign language skills. The program involved weekly group sessions in which five new signs were introduced and practiced in a social context, often a group game. Other activities included community dinners and outings. Attendance by group home staff members at some sessions led to staff gaining some sign language skill. An unsuccessful effort to teach the residents signed English led to adoption and use of American Sign Language. The program has been very successful, with enthusiastic involvement by participants. Staff at the group homes and the sheltered workshop where the residents work also report more positive attitudes and fewer discipline problems. (DB)

Educational Implications of an Interactive Model of Reading Disability.

Pub Date—Apr 95

Note—9p; Paper presented at the Annual Meeting of the American Educational Research Association (San Francisco, CA, April 18-25, 1995).

Pub Type—Opinion Papers (120) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors: Beginning Reading, *Cognitive Processes, *Developmental Stages, *Disability Identification, Elementary Secondary Education, Environmental Influences, Interaction, Models, Phonetics, Reading Ability, *Reading Difficulties, Reading Instruction, Word Recognition

This paper presents a cognitive model of reading disability that looks at how the disability develops across the age and grade span and how it relates to the process of reading acquisition in normal-achieving readers. The model uses the metaphor of a "road map," which identifies the normal road to proficient reading through six phases: visual-cue word recognition, phonetic-cue word recognition, controlled word recognition, automatic word recognition, strategic reading, and proficient reading. Reading disability is conceptualized as involving departures from the normal path in one or more of the first four phases, leading to four possible patterns of reading disability (nonalphabetic, compensatory, nonautomatic, and delayed), which may or may not involve the same underlying causal deficit. The model also emphasizes that reading disability always involves interaction between the child's intrinsic cognitive characteristics and environmental influences. Features which distinguish this model from others include its relatively broad scope, its developmental nature, and its interactive view. Educational implications include recognition that the many cognitive deficits seen in reading disability change developmentally; that the measures most useful in identifying the disability vary with its pattern; that all children benefit from a combination of code-oriented and meaning-oriented approaches to reading instruction; that early identification of reading disability is important because of the cognitive and motivational consequences of longstanding reading failure; and that there is little scientific support for the practice of identifying poor readers based upon IQ-achievement discrepancies. (Contains 16 references.) (DB)

Identifiers—Vermont

This manual provides guidelines and forms for implementing a planning team approach to support students with emotional and behavioral difficulties in regular education settings, developed as part of a 3-year federally funded project to enhance the capability of 30 Vermont public schools. Following an introduction, a student profile is reviewed from the points of view of the regular educator, parent, student, and special educator. The first section discusses establishing the student support team, with information on obtaining family input, identifying age appropriate needs, and reviewing team membership and working together. The second section addresses identifying student strengths and needs. Subsections cover: the study history; major areas of educational emphasis and student goals; factors that impact on the student's ability to learn; and challenging behaviors that need to be addressed. The third section is on developing student support plans and includes guidelines for encouraging replacement behaviors and appropriate responses to challenging behaviors. Information sections of the manual are supplemented with typical viewpoints and with sample completed forms in reference to a specific case. Additional sections provide evaluation procedures and an overview of the support plan. An appendix includes 37 blank forms used in the program. (DB)

Descriptors: *Academically Gifted, *Classroom Techniques, Curriculum, Educational Strategies, *Enrichment Activities, *Heterogeneous Grouping, Individual Differences, *Individualized Instruction, Intermediate Grades, Junior High Schools, Mainstreaming, Middle Schools, Student Needs, Teaching Methods

Identifiers—*Differentiated Curriculum (Gifted), ERIC Digests

This brief paper summarizes guidelines for adapting instruction for advanced learners in inclusive, mixed-ability middle school classrooms. A rationale for differentiating instruction is followed by consideration of what differentiation is and is not. Characteristics of a differentiated class are enumerated, including: instruction is concept focused and principle driven, on-going assessment of student readiness and growth are built into the curriculum, and flexible grouping is consistently used. Suggested ways to differentiate instruction are grouped into interest-based adjustments, adjustments based on learning profile, and readiness-based adjustments. These last adjustments involve offering students a range of learning tasks developed along eight continua as follows: (1) concrete to abstract, (2) simple to complex, (3) basic to transformational, (4) fewer facets to multi-facets, (5) smaller leaps to greater leaps, (6) more structured to more open, (7) less independence to greater independence, and (8) slower to quicker. Suggested strategies for managing a differentiated classroom include: use of multiple texts and supplementary materials, interest centers, learning contracts, compacting, and group investigation. Teachers are urged to prepare students and parents for a differentiated classroom, attend to issues of classroom structure and management, and plan with team members and other colleagues interested in differentiation. Descriptors—*Disabilities, Educational Change, *Educational Practices, Elementary Secondary Education, Federal Aid, *Inclusive Schools, Mainstreaming, National Surveys, Outcomes of Education, Parent Attitudes, *Program Effectiveness, Program Evaluation, Program Implementation, School Districts, *School Restructuring, State Aid, Teacher Attitudes

This report summarizes findings of a study to identify key factors of inclusive education practices, as identified by school districts implementing such practices. The study involved contacting chief state education officers for state-level information and identification of local school districts conducting inclusive education programs and then contacting local school district superintendents. Key findings from the data included: (1) the number of school districts reporting inclusive education programs increased significantly between 1994 and 1995 (from 267 districts in 47 states to 891 districts in 50 states); (2) outcomes for students (both general and special education students) in inclusive education programs are positive; (3) teachers participating in inclusive education programs report positive professional outcomes for themselves; (4) the range of disabilities in inclusive education programs is increasing; and (5) school restructuring efforts are having an impact on inclusive education programs, and vice-versa. Separate sections of the report present the study's findings on the following topics: initiation and process of inclusive education programs in local school districts; the role of inclusive education in restructuring; the extent of inclusive education; staffing and school organization; staff attitudes; instructional strategies and classroom supports; parental response; student outcomes and program evaluation; and fiscal issues. The report also presents recommendations such as renewal by

Congress of basic student rights enumerated in the Individuals with Disabilities Education Act, full inclusion of inclusive education in all aspects of educational reform, and reform of federal and state funding practices to support inclusive education. (DB)

Identifiers—Kansas

This theme issue focuses on the relationship of fathers and their children with disabilities. It reports a study of 86 Kansas fathers of children (ages 5 to 8) with and without disabilities. The study was conducted in order to identify more options for fathers wishing to increase their involvement with their children. The study sent surveys of parenting competence and three measures of time spent in various activities to fathers randomly selected from Kansas school districts. About half the 86 fathers included in the study had children with mental retardation. The study's main finding was that having a child with a disability did not seem to alter a father's concept of his fathering competence, nor the amount of time he spent caring for his child. The study resulted in the following recommendations for service providers: (1) learn from fathers their priorities for their children and suggest activities that respond to those priorities; (2) work with fathers to talk more with their children; and (3) tap the problem-solving orientation of fathers, such as discussing ways to adapt toys. The newsletter also provides contact information and a brief description of seven resources for fathers, a vignette describing the coping strategies of one father whose daughter was severely brain damaged as a result of spinal meningitis, a discussion of how fathers may feel left out when dealing with service providers, and suggestions for involving fathers more with their special needs children. Identifiers—*Group Size

This study investigated the ability of six first graders with moderate to severe hearing impairment to recall a story using four reading presentation conditions: (1) group reading with interaction, (2) group reading without interaction, (3) individual reading with interaction, and (4) individual reading without interaction. Four books (one book for each condition) were simultaneously signed in American Sign Language and read aloud to the children. The children waited approximately 20 minutes after the stories were read and then retold them to the classroom teacher. Analysis of the videotaped retellings revealed that the group interactive reading presentation seemed to be more effective in facilitating children's recall of the story compared to the other three conditions. The group interactive condition

was consistently more effective in each of the three categories assessed (number of spoken and/or signed utterances used in retelling, number of events recalled, and inclusion of primary story elements). Results are discussed in light of other research suggesting that reading to small groups of children is more effective than reading to either individual children or larger groups. Descriptors—*Classroom Communication, Classroom Techniques, *Communication Skills, Daily Living Skills, Elementary Education, *Hearing Impairments, *Interpersonal Communication, Interpersonal Competence, Language Acquisition, Preschool Education, Skill Development, *Teaching Methods

Identifiers—*Scripts (Knowledge Structures)

This paper discusses the oral and written communication demands of school on children with hearing loss from a script viewpoint, which emphasizes describing the role of actors, actions, props, routines, and possible variations of a given event. The paper first distinguishes among the schema, the script, and the routine. It also considers the role of the parent, teacher, speech-language pathologist, and other special educators in helping children with hearing impairments to develop strong scripts and match appropriate communication to those scripts. Examples of common preschool and school scripts and strategies for teaching the scripts and appropriate communication are provided. Such scripts include beginning the day, recess, reading group, taking tests, show and tell, following teacher directions, sharing information with the teacher, getting clarification, giving directions, and chatting with peers. Guidelines are offered for determining classroom scripts, identifying the teacher's cues for defining and activating the scripts, and determining the child's level of knowledge of the classroom scripts and associated cues. Suggested strategies for helping the child learn a script include outlining the routine with the child, brainstorming variations on the routine, specifying the cues for activating the script, role playing the script, talking through the script as it occurs, and cuing the child within the natural environment. A model for using scripts as a framework for supporting children's language development is provided. (DB)

This document contains 13 papers presented at a national forum on special education teacher satisfaction, retention, and attrition. The forum focused on results and implications of three studies: (1) the San Diego State University/American Institute for Research (California) study of variables related to the satisfaction, attrition, and retention of special education teachers; (2) the Research Triangle Institute (Tennessee) study on improving the retention of special education teachers; and (3) the Eugene Research Institute (Oregon) study on attrition/retention of urban special education teachers. A paper

titled "Overview of the Three Research Projects" (by Patricia Thomas Cegielka) introduces the collection and is followed by "The National Picture: Messages from SASS (Schools and Staffing Survey) Data" (Erline E. Boe et al.). Other papers include: "The Attrition Picture: Lessons from Three Research Projects" (John Pyecha and Roger Levine); "Working Conditions: Job Design" (Russell Gersten et al.); "Working Conditions: Administrator Support" (Bonnie Billingsley et al.); "Impact of Job Design Problems and Lack of Support" (Russell Gersten et al.); "Personnel Preparation: Relationship to Job Satisfaction" (Patricia Cegielka and Donald Doorlag); "Strategic Planning for Special Education Teacher Retention" (Peggie Campeau and John Pyecha); "Attrition/Retention of Urban Special Education Teachers: Multi-Faceted Research and Strategic Action Planning" (Martha Morvant and Russell Gersten); "Teachers' Perceptions of Working Conditions: Problems Relating to Central Office Support [and] Section 2: Administrative Support" (Russell Gersten et al.); "Attrition of Special Educators: Why They Leave and Where They Go" (Mary T. Brownell et al.); "Retention and Attrition in Special Education: Analysis of Variables That Predict Staying, Transferring, or Leaving" (David Miller et al.); and "Retention, Transfer, and Attrition of Special and General Education Teachers in National Perspective" (Erline E. Boe et al.) (DB)

This paper summarizes findings of three special research projects on special education teacher attrition rates. An introductory section describes the purposes of the federally funded projects, identifies the institutions and school districts involved, and notes the varying availability of attrition rates from 1987 through 1993 in the five data bases involved. Following a discussion of a general definition of "leavers" and study limitations, the attrition rates for the districts involved are presented and discussed. Characteristics of the exited special education teachers are then examined. Some of the studies' findings include the following: there was a tendency toward increased attrition rates over the time period evaluated; relatively similar exit rates were found for the six districts involved; attrition rates were substantially below previously reported figures; data from a California database suggest an average annual attrition rate of 24.2 percent for special educators, however the 6 districts in this study had only a 9.1 percent average attrition rate; the mean age of leavers in the studies ranged from 36 to 39 years; most leavers who remained in their districts transferred to general education teaching positions; and most leavers who left their districts either retired or continued teaching special education. Attached exhibits present details of the findings for each of the six school districts involved in the studies. (DB)

Stress Variables, *Teacher Attitudes, Teacher Morale, Teacher Role, Urban Education

This summary report presents an integration of findings on teachers' perceptions of their working conditions, based on survey and interview data from special educators in six large urban school districts. Emphasis is on perceptions of problems related to job design, the highly interrelated set of structures, systems, and processes intended to support major work objectives. Major findings include: (1) perceived role conflicts and difficulties prioritizing their many diverse responsibilities; (2) a sense of role overload and increasing work challenges further intensified by shortages of resources; (3) a sense of weakened autonomy regarding their professional judgment; and (4) difficulties relating to the larger school culture and collaboration with general educators. This combination of factors is seen to lead to high levels of stress, worsening feelings about the ability to teach effectively, and, in some cases, lower commitment to the field. Recommendations resulting from the study include: increase the information flow from central offices to special education teachers at school sites; provide more relevant professional development opportunities; and provide more opportunities for meaningful shared decision-making. The body of the report addresses each of the four identified areas of difficulty and includes quotations from teachers interviewed. (DB)

This summary report presents an integration of major findings on teachers' perceptions of working conditions, based on survey and interview data from about 375 special educators in six large urban districts. The report focuses on special educators' perceptions of administrative support at two levels—building and central office. Major findings concerning building-level support included the following issues related to the principal: lack of understanding of what teachers do in their classrooms; failure to recognize the significance of teachers' work challenges and accomplishments; limited assistance with specific problems; and reluctance to involve teachers in determining the shape of the school's special education programs. Teachers often reported that they do not feel fully included in their schools and receive limited assistance from principals in their efforts to integrate students. In regard to perceptions of central office support, most teachers formed perceptions about administrative priorities, not based on direct discussion with administrators, but rather on their interpretations of administrative decisions and/or actions taken over time. Misunderstanding was exacerbated by infrequent contact. Major conclusions included the following recommendations for administrators: (1) treat teachers like knowledgeable professionals; (2) focus on effective communication; and (3) provide assistance to teachers by helping them with their needs. Appended tables provide details of survey responses. (DB)

ment, Job Satisfaction, Labor Turnover, Path Analysis, Principals, Professional Development, Role Perception, *Special Education Teachers, Statistical Analysis, Teacher Administrator Relationship, *Teacher Attitudes, Teacher Morale, Teacher Role, Teaching (Occupation), Teaching Experience, Urban Education, *Work Environment

This paper presents implications of the path analysis procedures used to interpret data from a study of urban special education teachers' perceptions of working conditions. The analysis looked at a broad range of factors that could affect teacher plans to leave the field. An overall finding emerging from the analysis was that the same fundamental relationships among variables held in all three study cities. Other major findings included: (1) principal support is critical to job satisfaction and is associated with stronger teacher commitment to special education and a lower likelihood of leaving; (2) perceived opportunities for professional growth are influenced by both central administration and building principals; (3) role conflict and a sense of weakened autonomy are strongly related to stress and to teacher satisfaction with the current assignment; and (4) intent to leave the field of special education is strongly influenced by commitment to the field and special education experience. Figures illustrate the path analyses for each of these four findings. (DB)

This paper reports findings from three studies on attrition of special education teachers, with particular focus on teachers' responses concerning their own preservice preparation in both general and special education and evaluations of their levels of preparation to perform various components of their jobs. Major findings were: (1) the four skill areas in which teachers rated themselves the least well-prepared included responding to linguistic diversity, interfacing with the core curriculum, dealing with severe behavior disorders, and collaborating/consulting with general education teachers; (2) teachers felt ill-prepared to work with general education teachers, manage disruptive behaviors, and work effectively with consultants; (3) the skill areas in which teachers felt the least well-prepared are those typically associated with operating effective inclusion/mainstreaming programs; (4) recent graduates reported a higher level of agreement between their philosophy of special education and that of their districts; and (5) teachers who had left special education or were considering doing so tended to feel at odds with district policies and directions toward mainstreaming/full inclusion. Comparison by California respondents of their preservice preparation for the required general education credential with that of their special education preparation revealed that teachers rated the quality of their special education training higher in all areas than their general education training. Special education teachers reported feeling isolated from, and unappreciated by, their general education colleagues. The degree of teacher satisfaction with principals was found to be highly correlated with decisions to remain in special education. (DB)

Descriptors—Case Studies, *Change Strategies, *Disabilities, Elementary Secondary Education, *Faculty Mobility, Labor Turnover, Models, School Districts, *Special Education Teachers, *Strategic Planning, *Teacher Persistence

This report examines results of strategic planning components of three studies which investigated special education teacher retention and attrition. Introductory information enumerates the strategic planning process. The next section highlights similarities and differences among the three strategic planning models that were implemented. The models are compared on the following aspects: timing, selection of stakeholders, roles of stakeholders and researchers, planning method, process, and product. The strategic planning processes and results are then described for each of the three projects. Conclusions include recognition of the quality of the participation of various stakeholder groups in strategic planning activities in all three projects and increased appreciation by stakeholders of the value of a data-based approach to decision making. However, there was insufficient evidence with which to claim impact of the planning models on the teaching and learning environments of the participating districts. Much of the document consists of three appended case studies, which look at strategic planning for teacher retention in the Silver City Unified School District (a pseudonym in Arizona), Memphis City Schools (Tennessee), and San Diego and San Jose Unified School Districts (California).

Descriptors—Decision Making, *Disabilities, Elementary Secondary Education, *Faculty Mobility, *Influences, Interviews, *Special Education Teachers, Surveys, Teacher Attitudes, Teacher Morale, *Teacher Persistence, Urban Education

This paper reports on a study investigating the issues that most significantly influence urban special education teachers' decisions to leave the field voluntarily or transfer to a different type of educational position. First, it presents the results of post-attrition interviews with 17 special educators who left their positions during or immediately following the 1991-92 school year and then reports results of a survey of 868 special educators in three urban areas. The first section of the report describes the sample; explains the interview design, guide, and process; and reviews data analysis procedures. The second section focuses on three recurrent themes drawn from the interviews: job design, the nature of relations with the central office, and the professional and/or personal fit of their special education teaching assignment. The report then describes the development of the questionnaire used in the survey and procedures employed for descriptive analysis, including factor analysis of all teachers who completed the survey, analysis of those who expressed an intent to leave in the near future, and analysis of differences in profiles of work-related leavers and those who stayed. Data are reported by factors relating to support, preparation, stress related to job design and workload manageability, affective issues related to students, satisfaction and personal assessment of rewards, and role conflict. Appendices provide additional analytical detail. (DB)

Descriptors—Administrator Role, Change Strategies, Decision Making, *Disabilities, Elementary Secondary Education, Faculty Mobility, *Job Satisfaction, Principals, Professional Development, Quality of Working Life, Regular and Special Education Relationship, *Special Education Teachers, *Teacher Administrator Relationship, *Teacher Attitudes, *Teacher Persistence, Teaching (Occupation), Work Environment

This report summarizes results of a survey of special educators regarding first, their working conditions related to central office support and, second, the impact of administrative support on their job satisfaction, commitment, and intent to leave. Major findings regarding teacher attitudes toward central office administrators include a perceived administrative distance with a sense of being managed from a distance and a lack of proactive assistance and a perceived dissonance in priorities and values between teachers and central office administrators. Suggested directions for improving the central office-teacher relationship include expanding opportunities for meaningful and relevant information exchange between central office staff and teachers and expanding opportunities for professional development and learning. The second section of the report notes that teacher attitudes toward building support and central office support were not often highly correlated. It stresses the importance teachers gave to the role of the on-site administrator, the principal, both positively and negatively. Additionally, many special educators reported that they do not feel included in their schools. The suggested directions for improving the teacher/administrator relationships mentioned above are reaffirmed. (DB)

Identifiers—Florida

Telephone interviews concerning special education teacher attrition were conducted with 96 former special education teachers in Florida. Both qualitative and quantitative techniques were used to analyze the interview data. Participants had not returned to their special education teaching positions after the 1992-93 school year. The majority of these leavers indicated that they had taken positions that were education-related. Disgruntled teachers (n=49) made up the largest category of leavers. Nondisgruntled teachers (N=36) made up the second largest category with the remaining 11 being unclear. Disgruntled teachers rarely left because of one factor. Instead, the interaction of factors often resulted in a teacher's decision to leave. Frequently cited reasons included feeling overwhelmed, unsupported, unprepared, and/or disempowered. However, 23 of the disgruntled teachers said they would become a special education teacher again. Nondisgruntled leavers indicated that they enjoyed teaching special education and usually left because of external factors such as other job opportunities, certification requirements, family influences, retirement, position not reoffered, and inadequate pay. Overall, when leavers were asked what could be done to encourage them to return to special education teaching, the largest portion said that no incentives would encourage their return. Others mentioned that more administrative and instructional support would be necessary, or that increased salary and/or a reduced work load would encourage their return. When asked about their future career plans, 54 of the leavers indicated that they wished to remain in education but not in the special education classroom. An attached table details teacher

responses. (DB)

Descriptors—Age Differences, *Disabilities, Educational Environment, Elementary Secondary Education, *Faculty Mobility, Influences, Job Satisfaction, *Predictor Variables, Quality of Working Life, *Special Education Teachers, Stress Variables, Teacher Attitudes, Teacher Certification, *Teacher Persistence, *Teacher Transfer, Teaching (Occupation)

Identifiers—Florida

This study attempted to determine the personal and workplace variables which predict a special educator's decision to stay, transfer, or leave the classroom. A stratified random sample of 1,576 special education teachers in Florida was surveyed, resulting in 1,152 usable responses. Two models were estimated with forward stepwise logistic regression methods: the first to differentiate leavers (those no longer teaching in special education) from stayers and transfers, the second to differentiate stayers (teaching in the same school) from transfers (still teaching in special education but in a different school). For the first model, both current certification status and stress were significant predictors of likelihood of leaving special education. An inappropriately certified teacher with high stress had the highest probability of leaving (.43) while an appropriately certified teacher with little stress had the lowest probability of leaving (.11). For the second model, both climate and age were significant predictors of staying or transfer status. The probability of transferring increased with decreases in age or climate. Results raise questions concerning the practice of placing uncertified teachers in special education classrooms, particularly classroom situations where teachers are likely to experience high levels of stress. Attached tables list the independent variables used in the analyses, examples of questions and coding, and probabilities of leaving special education (by certification status and stress levels) or of transferring to another school (by age and climate). Identifiers—Schools and Staffing Survey (NCES), Teacher Followup Survey (NCES)

This study used existing databases to analyze, from a national perspective, the specific components of retention, transfer, and attrition of special education teachers (SETs) in comparison with general education teachers (GETs). The study used data from the 1990-1991 Schools and Staffing Survey (SASS) and the 1992 Teacher Followup Survey (TFS). Analysis evaluated the following factors: teaching field retention, teaching field transfer, attrition, school retention, school reassignment, district migration, district retention, district attrition, entering teachers, and private school migrants. Districts were categorized as either urban, suburban/-

large town, small town, or rural. Major conclusions included the following: (1) retention of SETs in specific assignments from one year to the next (89 percent) is significantly less than the retention of GETs in specific assignments (94 percent); (2) the lower percentage of retained SETs is due primarily to transfer of SETs to general education (5 percent); (3) intervention designed to improve the retention of SETs might most productively focus on the higher rate of teaching field transfer; (4) approximately the same percentage of SETs and GETs remained in the same teaching field transfer to different public schools each year, with the vast majority of both groups remaining in the district; (5) the retention of SETs and GETs in the same district from one year to the next is not a function of urbanicity; and (6) while the annual transfer of SETs to general education (about 14,600 teachers) is a major source of open positions, the annual transfer of GETs to special education (about 9,300 teachers) is a major source of supply. Appendices provide data tables and more information on the SASS and TFS surveys. (DB)

 Identifiers—Minneapolis Public Schools MN

This booklet of individual handouts was prepared to assist Minneapolis mainstream school teachers to work with limited-English-proficient (LEP) students. Topics discussed include current research on how LEP students best learn in mainstream classes, social versus academic English, and adapting instructional procedures for and integrating LEP students into the regular classroom. Classroom management models are presented as well as recommendations for parent/family involvement meetings, especially for students from Cambodia and Laos. Asian cultural values are reviewed, and self-concept builders for the students are suggested, including what a second language learner may bring into the classroom in terms of cultural differences, nonverbal communication; and interpersonal skills. Implementing Cultural Elements in Chinese Teaching.

Pub Date—[95]

Note—20p.

Pub Type—Guides - Non-Classroom (055)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Advanced Courses, *Chinese, *Classroom Environment, Classroom Techniques, *Communicative Competence (Languages), *Course Content, *Cultural Awareness, Cultural Education, Second Language Instruction, *Second Languages, Testing

A discussion of the role of cultural education in the advanced Chinese language course first outlines a communicative approach to second language teaching and testing, defines culture and looks at its importance to the second language learner, and describes methods for creating a language classroom environment reflecting Chinese culture. The communicative approach discussed emphasizes the importance of rules of language use within a given culture, and the need to know that culture. A distinction is made between cultural information and behavioral patterns in a culture, and it is stressed that cultural information alone is not an adequate basis for adults to use the language communicatively because it does not reflect norms of communicative behavior. At the advanced level, focus is on development of learners' sociocultural and strategic competence, and a topical approach is used to teach both language and culture. Topics are: introduction to varieties of Chinese language; government structure and politics; economic reform; military; social problems in contemporary society; modern history; legal system and practices; educational system; agriculture and industry; culture and value system; family issues; political movements; mass media and public opinion; population and ethnic issues; business practices; and foreign policies. Classroom activities include reading, listening, lecture, discussion, and student reports. Specific techniques and requirements for each are outlined. A brief bibliography is included. (MSE)

Comparative Analysis, Educational Strategies, Elementary Secondary Education, *English (Second Language), *Immersion Programs, *Language of Instruction, Longitudinal Studies, Mainstreaming, Program Effectiveness, Program Evaluation, Teaching Methods, *Transitional Programs, *Whole Language Approach
 Identifiers—El Paso Independent School District TX, *Sheltered English

A study assessed and compared the effectiveness of two distinct approaches of bilingual education used within a single school district in El Paso (Texas). The program designs, one a traditional transitional bilingual and the other a bilingual immersion, were implemented under similar conditions of resources, school year length, class size, and other instructionally relevant variables. The immersion program used whole language, natural language, and sheltered English methodologies; the transitional program was characterized by teaching of basic concepts, basic language arts, and subject matter in the native language, with gradual introduction of English to teach subject matter and concepts. Data on student achievement were collected between 1985 and 1991 on over 350 limited-English-proficient students in 10 elementary schools, and a detailed longitudinal analysis was conducted on 230 students. Results show that in fourth grade, immersion students performed better in all aspects of academic performance, and particularly language skills, but by seventh grade, no significant differences were found in any aspect. Surveys of and interviews with bilingual program teachers, parents, and students revealed strengths and weaknesses, but general support. These results are detailed. Contains 59 references. (MSE)

Identifiers—*Guam, *Micronesia

The study of language reference materials, particularly dictionaries and grammar works, for languages of Guam and Micronesia includes a brief history of their evolution and an annotated bibliography. An introductory section describes the geographic situation of Micronesia and chronicles numerous periods of foreign influence: Spanish Colonization (1668-1898), German Period (1898-1911), The Japanese Era (1912-1944), and American Influence (since 1898). Establishment of the Trust Territories of the Pacific Islands after World War II, independence, and the ongoing relationship with the United States are outlined. Efforts to preserve the indigenous languages through development of orthographic systems are noted and the Micronesian language groups are detailed. The annotated bibliography that follows includes new sources since the 1970s and only items currently in print. They are presented in these categories: the Chamorro Language; Saipan Carolinian; Kosraean; Pohnpeian; Mokilese; Kapingamarangi; Nukuoro; Trukese; Puluwat; Yapese; Ulithian; Woleaian; Kiribati; Marshallese; Nauruan; Palauan; and Pulo Annian. Appended materials include a map of Micronesia and a chart outlining the separate geographic areas and languages, with numbers of speakers, dictionaries and grammars, libraries and collection sizes, and economic bases. The Role of Mass in Promoting African Indigenous Languages (Case Study of Nigeria).

Pub Date—Feb 95

Note—17p.

Pub Type—Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*African Languages, Case Studies, *Community Role, *Cultural Influences, Foreign Countries, *Indigenous Populations, *Mass Media Role, Social Influences, Uncommonly Taught Languages, Yoruba
 Identifiers—*Nigeria

This report assesses the threat posed to Nigerian national culture by foreign cultural values through manipulation of the local media, stressing that the Nigerian media is not people-oriented, but rather government dominated. This study sought to prove through content-analysis the level of commitment of media in promoting and integrating traditional folk media into the modern media technology. First, the content of two newspapers, for example, "Daily Time" published in English and "Gbongboun" published in Yoruba Language. The research method of "Directional Relation Analysis" was applied. The aim of the study was to find out if the audience of either newspaper is getting a balanced information about the political and socio-economic situation in the country. A major problem is the inability to have a socially accepted language of wider communication. The report discusses how the media in Nigeria was largely influenced by the two factors: missionary activities and colonial administration. These two factors changed the pattern of information dissemination but failed to create a people-oriented communication system. A more ethnic- and people-oriented media is recommended to foster a feeling of collective participation in government, beginning in the rural areas and especially using radio as the community communication medium. Local Nigerian media should be restructured to reflect the socio-cultural dimension of the country; its people; and their culture, language, and education. Media in indigenous languages epitomizes a people-oriented communication approach to programs of national development and the preservation of socio-cultural values, ensuring in the process cultural self-determination. Descriptors—Cognitive Processes, College Students, English (Second Language), Foreign Countries, Higher Education, *Interference (Language), *Japanese, Language Research, Linguistic Theory, Second Language Learning, *Translation, *Writing Evaluation, Written Language Identifiers—Canada

In this Canadian college study, 22 Japanese, English-as-a-Second-Language (ESL) learners' translation processes and writings were examined and contrasted with the same group's first-language (L1) and second-language (L2) writing performance. All subjects (aged 19-23 years) had been educated in Japan in Japanese prior to attending English-language college in Canada. Half had already been trained in translation, while the other half had no translation training. Data were analyzed with special attention to three cognitive theories of language learning: Cummins' 1986 theories of cross-linguistic interdependence of cognitive academic skills; Schmidt's 1990 theories on conscious attention; and McLaughlin's 1990 theories on restructuring. Cross-linguistic interdependence among translation, L1 writing, and L2 writing was not found. However, evidence was found that translation processes prompted conscious attention and restructuring, as considered necessary for L2 learning. An appendix includes actual student writing samples. Descriptors—*Assistantships, Communicative Competence (Languages), English (Second Language), *English for Special Purposes, Evaluation Methods, Feedback, *Foreign Students, International Cooperation, International Educational Exchange, *Language Teachers, Pragmatics, Role Playing, *Teaching Assistants

This contains 12 articles that focus on the specific issues related to the language needs of international teaching assistants (ITAs) as related to the broader field of applied linguistics and English for Specific Purposes (ESP). This volume demonstrates the uniqueness of problems related to classroom discourse and to the training of ITAs unfamiliar with the pedagogical as well as cultural customs of U.S. classrooms. The articles include: (1) "Communicative Competence as a Theoretical Framework for ITA Education" (Barbara Hoekje and Jessica Williams); (2) "Discourse Competence in a Framework for ITA Training" (Peter A. Shaw); (3) "Enhancing Curricula for ITA Development" (Jan Smith); (4) "Using Performance Assessment Methods to Screen ITAs" (Sarah L. Briggs); (5) "Question-Based Discourse in Science Labs: Issues for ITAs" (Cynthia L. Myers); (6) "Student Questions: When, Where, Why, and How Many" (Patricia L. Rounds); (7) "Effective Role-Play Situations and Focused Feedback: A Case for Pragmatic Analysis in the Classroom" (Andrea E. Tyler); (8) "The Functional Language of the U.S. TA During Office Hours" (Beverly J. McChesney); (9) "Discourse Strategies for ITAs Across Instructional Contexts" (Elizabeth R. Axelson and Carolyn G. Madden); (10) "ITAs, Interaction, and Communicative Effectiveness" (George Yule); (11) "Demystifying Cross-Cultural (Mis)communication: Improving Performance Through Balanced Feedback in a Situated Context" (Catherine E. Davies and Andrea E. Tyler); and (12) "Native and Nonnative Teaching Assistants: A Case Study of Discourse Domains and Genres" (Dan Douglas and Larry Selinker). (Contains over 280 references.) (NAV)

Descriptors—*English (Second Language), Foreign Countries, *Instructional Effectiveness, *Instructional Innovation, Language Teachers, Models, Program Development, *Second Language Instruction, Teacher Education

During the last 40 years, there has been a great number of innovations in English Language Teaching (ELT). The method by which these innovations have been diffused in many parts of the world has been through the project approach. This paper explores the suitability and effectiveness of this approach as a model for the diffusion of ELT innovation, using Havelock's three models of innovation, Fullan's process approach, and Henrichsen's link model. It proposes a change of emphasis within project design, implementation, and evaluation to empower the insider, and suggests ways in which this might be achieved. The creation of insider-generated project documents should help to establish a databank for research and development into the diffusion of ELT innovation, which would hopefully lead to new innovation. A historical review of ELT since the 1950s is included. (Contains 14 references.) (Author/NAV)

Lam, Wendy Y. K.
Investigating the Oral Fluency of 15 EFL Teachers: A Quantitative Approach Revisited.

Pub Date—Dec 94
Note—23p; Paper presented at the International Language in Education Conference (Hong Kong, December 16, 1994).

Pub Type—Speeches/Meeting Papers (150) — Reports - Descriptive (141)
EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*English (Second Language), Foreign Countries, *Language Fluency, *Language Teachers, *Oral Language, Secondary School Teachers, Second Language Instruction, Statistical Analysis, *Teacher Education

This report describes a research study designed to adopt a predominantly quantitative approach to investigating three related aspects of oral fluency: fluency improvement, correlation between subjective judgments and objective counts, and variation of fluency in different speech interactions. Subjects were 15 English as a foreign language (EFL) secondary school teachers before and after a 20-week, full-time, in-service course. Variables measured were pruned words per minute, number of filled pauses per T unit, and percentage of T units followed by a pause as suggested by P. Lennon (1990). Fluency under two different speech contexts was also observed. Findings confirm that the three quantitative parameters were not sufficient to track progress in oral fluency that may have reached a ceiling effect, that speech rate was a powerful predictor for verbal fluency and is possibly a core component of fluency, and that speech rate did vary in the reporting and interview tasks. (Contains 12 references and 3 tables.) (Author/NAV)

Tarzan Learns To Read, and Other Literary Language Lessons.

Pub Date—Mar 95
Note—29p; Paper presented at the Annual Meeting of the American Association of Applied Linguistics (Long Beach, CA, March 25-28, 1995).

Pub Type—Speeches/Meeting Papers (150) — Opinion Papers (120)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Descriptive Writing, *Discourse Modes, English Literature, French, German, Language Styles, *Literary Devices, *Second Language Instruction, *Second Language Learning

This paper examines several language learning and teaching experiences described in the literary works of Burroughs' "Tarzan of the Apes," Shakespeare's "Henry V," Scott's "The Jewel in the Crown," and Alcott's "Little Women." In all cases, the language being learned was not necessary for daily activities, yet each case demonstrates that language learning is more than learning pieces of lexicon or grammar. Learning is cultural and personal in context; sometimes coinciding, sometimes conflicting. Analysis findings reveal teaching methods both traditional and modern, with tremendous variation from induction association to learner-chosen words. The relationships of language and power and human and cultural identity through language are found, especially in "Henry V" and "Tarzan." It is suggested that perhaps the author's own language learning experiences affected his or her description and methodology in the texts. Most striking is the more modern learner-centered teaching approach and curriculum found in "Henry V," "Little Women," and "Tarzan"; in "Little Women," even affect is related to content of the learning materials. A Tarzan vocabulary is appended. (Contains 12 references.) (NAV)

Identifiers—Africa, Asia, England, Europe (East)
This report describes the British Voluntary Service Organization (VSO) training model and its implications for teacher education. VSO posts teachers with experience in English as a Foreign Language (EFL) or mainstream education to teacher training posts in countries in Asia, Africa, and Eastern Europe. All volunteers must participate first in a skills training course in England that includes professional teaching, country specific, and health and general briefings. The methodology involves a team of trainers who work with a core belief that to be-

come a trainer you need to experience planning, delivering, and evaluating training events. Initial stages are tutor-planned and tutor-lead, to ensure that all participants are up-to-date on current thinking on core English Language Training (ELT) topics and methodologies. The remainder of the course is negotiated with participants who choose sessions to plan and deliver as a team with the tutors. Courses have been generally well-received by participants. The only negative reaction led to a course maximum limit of 20 participants. Pre-planned and completed timetables for a typical course are appended. (NAV)

Descriptors—English (Second Language), *Graduation Requirements, Higher Education, *Language Teachers, *Masters Programs, National Norms, *Required Courses, *School Surveys, Second Language Instruction, Teacher Education
This paper reports on a study conducted to assess number of credits completed nationally for a degree in Teaching English as a Second Language, what portion were required courses, and what courses were actually required. Data were gathered by a survey mailed to 159 institutions in November 1994; 94 responses were usable that covered 39 U.S. states, the District of Columbia, and Puerto Rico. Average credits completed were 36, ranging from 27 to 75. The "typical" program was found to include at least six required courses, at least one methods and materials course; four more courses selected from linguistics, English structure, language acquisition, research methods, reading in a second language, intercultural communication, and testing/evaluation; and a practicum or internship. Literature courses or other extraneous subjects were a minuscule part of the corpus of required work, and there was never a distinction made between "syntax" and "English syntax." Particular courses are ranked by frequency of listing for the Master's degree. (NAV)

Descriptors—English (Second Language), Field Experience Programs, Higher Education, Internship Programs, *Language Teachers, Models, *Practicums, *Preservice Teacher Education, Program Descriptions, Second Language Instruction, Student Teaching

This report describes a campus-based, student-centered model for practicum for Teachers of English to Speakers of Other Languages (TESOL). It incorporates teaching and non-teaching activities and develops the self-knowledge and skills associated with effective classroom practice. The distinguishing feature of the program is the combination of activities included and the intensity and degree of integration achieved in the experience. Each session consists of phases in student orientation, student observation, mentored teaching, and personal portfolio development; the mentored teaching is the most intense. The practicum model presented provides pre-service students with an integrated, developmental experience that takes them from novice to professional in abilities; it connects knowledge about teaching with the act of teaching and lays the foundation for continued personal and professional development. The model contributes as much to the individual as it does to the profession as a whole. (Contains 10 references.) (NAV)

Identifiers—Czechoslovakia, Hong Kong, Israel, Mexico

This report presents the unique educational challenges of five programs in English for Science and Technology (EST) in Japan, Mexico, the Czech Republic/United States, Israel, and Hong Kong, including the challenges stemming from different educational/political systems and financial/technical resources. The five presentations cover typical EST concerns such as needs analyses, student motivation, faculty research, curriculum design, materials development, testing, high- and low-tech supported language learning, and teacher training. The first report details the EST training program at the University of Aizu in Japan, including a description of its students, its educational philosophy, courses offered, curriculum, and research activities. The program from the Center for Biological Research in La Paz, Mexico, has no official English learning program, but its 125 researchers and graduate students are forced to learn English to be able to publish their findings. For five consecutive summers, the Delaware County Community College in Pennsylvania has been sponsoring an intensive, 4-week English language program at the Czech Technical University in Prague; the curriculum, faculty, and students are described. The students, faculty, and curriculum of the architectural school program in Haifa, Israel, are also outlined; their classes are taught in Hebrew, but most of the texts are English. The details of the English Centre of the University of Hong Kong program in engineering and computer science are also presented. (NAV)

Exploring Language through Multicultural Literature.

Pub Date—[95]

Note—16p.

Pub Type—Reports - Descriptive (141) — Guides - Classroom - Teacher (052)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Childhood Interests, *Children Literature, Cognitive Processes, Cultural Influences, *Language Experience Approach, Language Processing, *Language Skills, Language Universals, Metalinguistics, Multicultural Education, *Second Language Learning

This report describes a project that used children's literature to introduce 6- and 7-year-old children (n=25) in the United States to other languages to arouse their interest in finding out more about language. Most of the children were monolingual and spoke English; two boys spoke some Spanish. The study was conducted to see if young children's awareness about languages could be raised by their examination of children's books written in several different foreign languages, several of which were similar to stories that the children had read in English. The children were grouped into groups of 4 or 5 for about 45 minutes; each group met to look at the books on four separate occasions. The children were fascinated with the books and were quick to pick out similarities and differences in the print; they were curious, perceptive, and eager to talk about the languages. Findings demonstrate that children's literature can be one meaningful way to introduce young children to other cultures and languages while, at the same time, raising their awareness of their own first language. This report offers guidance to those involved in bilingual education who may be or may want to mentor novice teachers in the field. The concept of mentoring is defined, and issues of mentoring implementation and alternatives in bilingual education are discussed, such as language of instruction, culture and instruction, language and cognitive development, and transformation and power relationships. More importantly, there is a discussion on the importance of preparing teachers who will help language minority students become partners in shaping the future and who will help create partnerships with non-bilingual teachers to support this process. Implications for the national education reform movement, such as Goals 2000, are also reviewed. (Contains 51 references.) (NAV)

ment Rate, Identification, *Limited English Speaking, National Surveys, Private Schools, Public Schools, *State Departments of Education, Student Characteristics

The report summarizes information submitted by state education agencies (SEAs) on the survey of states' limited-English-proficient (LEP) persons and available educational services for the 1993-94 school year. Results indicate that enrollment of LEP students in public and private schools continued to increase, comprising 7 percent of public school enrollment in grades K-12. California enrolled the largest number; New Mexico and Alaska had the highest proportion of LEP students. Data on progress of these students was found to be incomplete, but they indicated that dropout and retention rates were 1.7 and 2.5 percent, respectively, among institutions providing data. Definition and methods of identification of LEP students varied between and sometimes within states. Almost 2.4 million LEP students were reported enrolled in special programs to meet their educational needs; in public schools this represented 78.5 percent and in private schools, 30.4 percent of LEP students. The largest proportion (72 percent) were served by state and local programs. (Author/MSE)

Two reports on institutional change and its effect on the education of limited-English-proficient (LEP) students are presented. The Task 12 report addresses the content and processes of change through which federal efforts can best benefit LEP students. It gives an overview of the review, discusses that nature of educational and institutional change, and looks at the use of strategic planning for change within school districts, concluding with a model for describing school change efforts. The Task 13 report presents the findings of a focus group concerning the purposes and approach of such a study, models for studying both content and process of school change, and methodology. Specific recommendations are made in each area. Substantial appended materials include a list of focus group participants, schedules and agendas for focus group meetings, and the written recommendations of each participant. (MSE)

Identifiers—*Language Minorities

Two reports concerning the education of limited-English-proficient (LEP) students are presented. The Task D100 report summarizes demographic characteristics and key research issues associated with high-school-age youth, including students and dropouts, who are identifiable as language minority and LEP in the National Educational Longitudinal Study of 1988 (NELS:88). It also examines the aspirations of these students at the base year and in a follow-up survey, describes school programs and courses for this population, and describes student persistence and academic performance through high school. The Task D150 report focuses on first-grade cohort data from an earlier study and explores other data describing services available to language minority and LEP students. Special attention is given to Chapter 1 programs. (MSE)

Two reports concerning the evaluation of language minority and limited-English-proficient students are presented. The Task D170 report provides conclusions of a written focus group on the issues involved in defining appropriate outcome variables, outcome variables to be used, and the relative importance of LEP student outcome variables for school accountability and for assessing program effectiveness. Group results are summarized, and the responses of each focus group member on each of five questions are presented. The Task D190 report presents the results of a written focus group on five questions about panelists' experiences with communications technology for this purpose, potential uses, potential for improving the effectiveness and cost effectiveness of assessment, specific technologies holding the most promise, possible difficulties in developing and implementing communications technology for assessment. Two reports concerning the education of limited-English-proficient students are presented. The Task D160 report presents information on current and planned state certification requirements for bilingual education and English-as-a-Second-Language (ESL) teachers, and the ways in which these requirements address or do not address the challenge of preparing teachers to enable limited-English-proficient (LEP) students to meet high academic standards. Numbers of certified teachers in each state are also presented. The Task D210 report presents information on the status of state efforts toward the development of statewide student performance standards and assessment systems, and the extent to which LEP students have been included in these state systems. State-by-state summaries are appended. (MSE)

The purpose of this fastback is to help teachers find out how children acquire a second language and explore the linguistic foundations on which sound English as a Second Language (ESL) curricula can be developed. It is intended for the regular classroom teacher, not the ESL specialist. Central findings in research on second language learning include these: that there is an order in which language structures are acquired; this order differs from the traditional grammar sequence taught; fluency develops gradually and subconsciously; and formal learning of grammatical structures follows. Three conditions are necessary for second language learning: perception of a need to communicate in the target language; comprehensible input; and a low-anxiety environment. Children go through four stages in second language learning: pre-production; early production; speech emergence; and intermediate fluency. They proceed through these stages at their own pace, and forcing can delay progress. The teacher's role is to structure an environment in which the learner finds it necessary to communicate, using a variety of techniques so the message transmitted is understood. Above all, the teacher should take an interest in the child's first language and culture, and should accept all attempts made to communicate. Caretakers should provide an environment rich in language experiences and cooperate with the school in second language teaching efforts. Teachers must understand that the child learned his native language easily, and can learn the second similarly. Teacher knowledge of the native language is not required for effectiveness. (MSE)

Bridging the Evaluation Gap in ESL.

Pub Date—95

Note—12p. Paper presented at the Annual Meeting of the Teachers of English to Speakers of Other Languages (29th, Long Beach, CA, March 26-April 1, 1995).

Pub Type—Reports - Evaluative (142) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*English (Second Language), *Language Tests, Peer Evaluation, Second Language Instruction, Self Evaluation (Individuals), *Student Evaluation, *Test Format, *Testing Problems, Test Wiseness

A discussion of testing in English-as-a-Second-Language (ESL) instruction focuses on the gap between ESL students' test performance on the one hand and their own and teachers' assessments of their competence on the other. First, a number of issues, drawn from the literature, are examined

briefly, including the appropriateness of current testing methods, the teacher's role in evaluation, and variation in learners' test-taking strategies and skills that affect evaluation. Three ways to improve ESL student evaluation are explored: (1) clarification of evaluation criteria and use of criterion- vs. norm-referenced tests; (2) student participation in the assessment process, through self-monitoring and peer evaluation; and (3) improved use of technology, both to tailor test items to the learner's level and to provide useful feedback. The report resulting from a colloquium of scholars on teacher development and promising educational practice for ethnolinguistically diverse populations is summarized. The group met to discuss the urgent need for teacher preparation to meet the needs of increasingly multilingual school populations. Two major conclusions were reached: that educators no longer concentrate on knowing students as individuals; and that educators do know some things about teaching linguistically diverse populations but are slow to begin to use them in the classroom, preferring to use familiar methods rather than struggle to understand new ones. Additional studies are recommended. (Contains 39 references.) (MSE)

Identifiers—*France (Caen)

An elementary school English second language program in Caen (France) is described and evaluated. The program evolved from national policy initiatives to reintroduce modern foreign languages in the primary schools. The eventual National Experiment involved a selected number of schools in which a foreign language was to be taught. Data for this study were gathered in site visits to six schools, through interviews with eight teaching assistants and administrators and classroom observation of 16 lessons. The report offers background on the project, describes the study's methodology, and details aspects of the project's design and implementation. The latter includes: organization of lessons; emphasis on language awareness rather than language teaching; instructional techniques and materials used; integration of the program curriculum with the elementary school curriculum; head teachers' views; links with secondary schools and their curriculum; overseas exchanges; parent and pupil attitudes; and the views of teaching assistants. Comments are made on three program aspects: organization; classroom teaching techniques; and role of the teaching assistants. Based on findings concerning this program and another in England, remarks are made on three key issues: use of foreign language assistants untrained in teaching techniques and strategies, political and cultural dimensions of such

a project; and the need for a more clearly defined and coherent syllabus. (MSE)

Descriptors—Curriculum Design, Elementary Secondary Education, Foreign Countries, *Language Role, *Languages, *Minority Groups, Political Influences, *Public Policy, Social Change, Trend Analysis, *Uncommonly Taught Languages

Identifiers—England, *Europe, Wales

Discussion of the current language situation in Europe looks first at the compelling political changes affecting language policies, then examines progress toward implementation of the modern languages component of the National Curriculum for England and Wales. It is noted that Europe differs from other eastern hemisphere regions in that in most countries, the native language of the majority of the population is the largest language spoken. Another trend in Eastern Europe is the emergence of smaller, independent countries, reducing the number of states with large linguistic minorities and creating a closer relationship between linguistic community and nation-state. These developments have in common an increase in the status and functions of minority/former minority languages and consequent increase in language-related policy formation. With regard to implementation of languages component of the National Curriculum of England and Wales, it is concluded that notable advances have been made in some areas, particularly better funding and improved academic standards, increased use of the target language in the classroom, interest in language learning processes, integration of languages within the general curriculum, and better language teaching in special education. Inservice teacher education and teacher assessment persist as areas of concern. (MSE)

Identifiers—*Comenius (Johann Amos), *Europe

The speech, given to commemorate the tercentenary of the visit of Jan Komensky (Johann Amos Comenius—the latinised form of his name) to England, outlines the educational reforms suggested by him and chronicles his life. Komensky, born in 1552 in southeast Moravia, was personally affected throughout his life by war and disease and traveled about Europe, writing profusely about education. Komensky was interested in acquisition of native and second languages, and was a pioneer in insisting on the importance of early second language instruction. Another area of concern for him was the state of higher education, which then took as its purpose the transmitting of existing knowledge, not creation or questioning of it. He made plans for a Universal College, more diverse in composition than any other, which would enable scholars to experiment freely and exchange discoveries across national frontiers. Among his ideas about education were also these: equality of opportunity for children; equal opportunities for women; education beginning at birth; need for education for parenthood; and a number of current approaches to second language teaching and learning, including use of visual aids,

direct association of language and referent, functional vocabulary, and use of concrete examples rather than abstract rules. A 25-item bibliography is included. (MSE)

Identifiers—*United Kingdom

The report summarizes a British research project, part of a larger initiative on educational quality, concerning the extent of secondary students' knowledge about the nature of language, native and foreign, alongside development of practical language skills. The main study was an empirical investigation of the teaching of English and foreign languages at year 9 in three schools. It documented teachers' beliefs and practices with regard to knowledge about language (KAL) and the current state of year 9 pupils' knowledge in five areas (language as a system, language learning/development, language variation by use and by user, language change). The pupils' use of KAL in language performance and the relationship between their developing understanding of language and language learning were also studied. Results of another study were also re-analyzed for data concerning these issues at year 7. Overall, the project revealed substantial levels of KAL-related activity in English and foreign languages within the schools, and some suggestions of its positive contribution to learning, especially in writing. It is concluded, however, that given the fragmented and episodic nature of much KAL work, its full potential contribution to pupils' development as language users is not being realized. Suggestions for improvement are made. (MSE)

Issues in the design of research to describe educational practice are examined, and arguments for and against particular methodologies are summarized. A single study is used for illustrative purposes; it explores the relationship between English taught as a second language in school and English language needs in the workplace. The study uses both ethnographic and quantitative research techniques. The report first outlines the variables in the study. A discussion of procedures describes the need analysis, sampling, establishment of a systematic classroom observation schedule, audio recording of classroom interaction, interviews with teachers and students, and examination of teacher records. Rationales for these and additional procedures are then explained. The subsequent section describes construction of the classroom observation instrument and the method for merging quantitative observational data with data drawn from the audio recording. The conducting of interviews is then discussed, including interview types, interviewer attributes, questions, problems, and administrative issues. A 45-item bibliography is included. (MSE)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Dialects, English, Foreign Countries, *Identification (Psychology), *Language Attitudes, Language Research, Language Role, Language Variation, Oral Language, *Pronunciation, Secondary Education, *Standard Spoken Usage

Identifiers—*England

Attitudes toward usage, accent, and dialect in spoken English are examined, drawing on literature in the field and data from a British study of year 9 students' (pupils aged 13-14) language awareness. The dilemma inherent in teaching standard spoken usage while encouraging maintenance of ethnic and regional identity is examined, with attention given to ambiguity and discrepancy in some public policy and policymakers' statements, particularly in regard to national curriculum policy. Comments and discussions occurring in the mass media are also addressed, and utterances of students in the study are analyzed. It is concluded that further discussion of language attitudes, particularly concerning accent and dialect and concepts of "good" and "bad" usage is needed, and that teachers can play an important role by bringing discussion of language issues into the classroom. A brief bibliography is included. (MSE)

Descriptors—*Cultural Pluralism, *Ethnicity, Foreign Countries, *Identification (Psychology), Indigenous Populations, Language Attitudes, *Language Role, *Language Variation, Nationalism, Official Languages, *Spanish, Spanish Speaking, Uncommonly Taught Languages

Identifiers—*Latin America

A discussion of the relationship between national identity and language in Spanish-speaking Latin America focuses on issues concerning indigenous languages, education, and literacy. The sociolinguistic history and configuration Spanish-speaking Latin America are outlined briefly, noting the influences of indigenous populations, non-Spanish immigrant languages, the influx of African-born slaves, and the influence of English. Language policy supporting castilianization and adoption of Spanish as the official language in most countries is also reviewed. Situations in individual countries are examined briefly. A look at the situation in modern Latin America finds a persistence of Spanish colonial influences, coupled with delayed attention to literacy and education, particularly for indigenous populations. It is concluded that while these populations have generally opted for education in Spanish, probably because Spanish is widely perceived as a vehicle of social mobility and political power, marginalization and alienation have grown. It is suggested that greater attention needs to be given to the complex relationship of language and national identity. (MSE)

Descriptors—*Applied Linguistics, *Educational Trends, Foreign Countries, *Language Research, *Political Influences, *Scholarship, *Social Change, Trend Analysis

Identifiers—*United Kingdom

A discussion of recent research trends in British applied linguistics looks at the way in which social processes, sociology, anthropology, and media stud-

ies appear to have replaced pedagogy, linguistics, and psychology as major areas of investigation. In examining this trend, two models of literacy (autonomous and notional) are examined and extended to other branches of applied linguistics. A shift from autonomous to ideological is then traced as it relates to two relatively recent political processes: (1) a series of government initiatives in language education in the late 1980s, including a model of the English language for use in schools and development of a national curriculum, and (2) a more general redefinition and critique of liberalism. Four possible directions are envisioned for applied linguistics research in such an emerging political order, characterized by free market economics and cultural authoritarianism: service to the state; competition in the market; independent analysis and critique; and new social movements. Implications of these directions for applied linguistics in general, and for new Ph.D.'s in particular, are examined. (MSE)

Descriptors—*Academic Achievement, *Bilingual Students, Classroom Communication, *Core Curriculum, Elementary Secondary Education, English (Second Language), Foreign Countries, *Language Dominance, Language of Instruction, Language Role, Language Usage, *Minority Groups, Native Language Instruction, Parent Attitudes, Punjabi, Research Methodology, Second Language Instruction, Student Needs, Teacher Attitudes

Identifiers—*England (Southampton)

A study and associated development work concerning bilingual elementary and secondary students in British schools is reported. The study was designed to examine the progress and needs of bilingual students in several schools in the Southampton (England) area. It arose from concern about possible marginalization of minority language students in the context of the new National Curriculum. Existing documentation on bilingual/multilingual learners was examined through a survey of area schools and agencies, and was found to be inadequate. A more substantial study was then undertaken in one elementary/middle school with a high language-minority population, using classroom observation and both oral and written surveys of both monolingual and bilingual students. Sixteen parents were also surveyed, and 21 teachers were interviewed for their perceptions of the impact of the National Curriculum on bilingual learners. School support of and participation in the project was found to be widespread and helpful. Results suggest that: (1) documentation on this population needs improvement; (2) the changing nature of the population requires constant monitoring; (3) tendency is toward bilingualism with English dominance; (4) teacher attitudes about the curriculum remain mixed; (5) patterns of Punjabi speaker dispersal are not as anticipated; and (6) parents want native-language classes. Descriptors—Contrastive Linguistics, English Teachers, Foreign Countries, Geographic Distribution, *Grammar, Knowledge Level, Language Attitudes, *Language Role, Language Teachers, Language Usage, *Linguistics, Questionnaires, Second Languages, *Student Teachers, Surveys, Teacher Education

Identifiers—England, University of Southampton (England)

A survey of teacher trainees at the University of Southampton (England) investigated trainee knowledge level of English grammar and of language use

around the world. Responses of English and modern language teacher trainees ($n=19$), non-language teacher trainees ($n=35$), and in some cases, undergraduates from the general student population ($n=238$) were compared. Questions elicited knowledge of language-related terms (e.g., "mother tongue, dialect, paraphrase"), grammatical forms (e.g., "passive verb, adjective, adverb, infinitive"), grammatical functions (e.g., "subject, predicate, direct object"), spelling, pronunciation, plurality, English in comparison with other languages, language names and distribution, and language interrelationships. Attitudes about accent, dialect, and standard usage were also explored, and information on where/how the students had received their linguistic knowledge was requested. Results are summarized here. It is concluded that overall, for teachers preparing for a multilingual society about to enter a much closer association with continental Europe, greater linguistic knowledge is needed and should be included in preservice teacher education. The questionnaire is appended. (MSE)

Identifiers—United Kingdom

Results of a survey of college and university students of modern languages in Great Britain are presented in three separate reports. The first concerns current classroom practice in language teaching, including how students spend their time on language-related activities (e.g., attending lectures in a foreign language, doing translations, using a computer or language laboratory) within and outside language classes. A wide range of responses was received, suggesting little clear pattern. Students were also asked which activities they found most useful and enjoyable. The second report presents student attitudes about what skills language graduates should have (e.g., converse with near-native fluency, pick up topical or cultural allusions, read specialist material), and how they themselves meet those criteria. Results indicate a low level of agreement about needed skills and a high level of students' complacency about their own language capabilities. Few saw literature or linguistics as features of an ideal modern language program. The third report addresses the content and perceived value of a year of study abroad, including how the study period was arranged, how it was spent, patterns of foreign language use, cultural knowledge gained, and other personal benefit. Identifiers—Content Area Teaching

This instructional unit is aimed at Grade 4, limited-English-proficient (LEP) students in language arts, mathematics, social studies, science, music, art, physical education, and drama. It uses the California "Gold Rush" historical time period to teach students English language, concentrating on pre-production, early production, speech emer-

gence, and intermediate fluency. The lesson plan includes a description of the theme and rationale of the unit, content outline, instructional objectives, and description of assessment. The unit is to be taught over 1 week, in 40-minute lessons, and includes a day-by-day lesson content, with vocabulary building lists. Homework assignments and parent/community involvement are suggested. Instructional components include English language development, primary language instructions, especially designed academic content in English, cross-cultural/self-esteem building, and parent/community involvement. Identifiers—*Two Way Bilingual Education

This lesson plan for the second grade uses information on the solar system to provide science education for limited-English-proficient (LEP) students in San Diego, California. The lesson has been developed to be taught in a bilingual class, a Spanish-language immersion class, or a two-way bilingual class. Lessons are arranged so that native English speakers can assist the non-native speakers. The lesson unit is for one week, 25-30 minutes per day. Language levels include pre- and early production, speech emergence, and intermediate fluency. Instructional components are second language development, primary language instruction, specially designed academic instruction in second language, cross-cultural/self-esteem building, and parent/community involvement. Instructional objectives, unit goals, homework, and assessment are described. Included is a vocabulary development talking chart in English and Spanish. (NAV)

Descriptors—Community Involvement, Cooperative Learning, *Dinosaurs, Educational Objectives, *English (Second Language), Grade 2, Grade 3, Homework, Lesson Plans, *Limited English Speaking, Parent Participation, Primary Education, Science Education, Second Language Instruction, Second Language Learning, Self Esteem, Spanish, State Departments of Education, Student Evaluation, Whole Language Approach

This lesson plan for the second and third grades uses information on dinosaurs, their adaptations and survival, to provide science education for limited-English-proficient (LEP) students in San Diego, California. The primary text is "Los Dinosaurios Gigantes," a core literature book used in the school district. Lessons are based on the whole language philosophy and cooperative grouping strategies, exploring language arts/science, mathematics, social studies, and English language development. Hands-on activities and opportunities are highly recommended. The lesson unit is for one week, 25-30 minutes per day. Language levels include pre- and early production, speech emergence, and intermediate fluency. Instructional components are second language development, primary language instruction, specially designed academic instruction in the second language, cross-cultural/self-esteem building, and parent/community involvement. Instructional objectives, unit goals, homework, and assessment are described. Appendixes contain English and Spanish handouts. (Contains 7 references.) (NAV)

Descriptors—*Basic Skills, Community Involvement, Elementary Education, *English (Second Language), *History Instruction, Lesson Plans, *Limited English Speaking, Native Language Instruction, Parent Participation, *Primary Sources, Science Instruction, Self Esteem, Spanish, Spanish Speaking, State Departments of Education, Units of Study, Vocabulary Development
Identifiers—*California

These elementary school lessons plans in English and Spanish are described to offer assistance in basic study skills on California history/social studies using multilingual, primary source documents, such as photos, maps, newspaper articles, and pictures, and copies of official documents for limited-English-proficient (LEP) students. Four basic instructional components are detailed: English Language Development; Specially Designed Academic Instruction in English; Primary Language Instruction; and Self-Esteem/Positive Self-Image Cross-cultural component. Amount of instruction time for the 5-day lesson varies with student abilities in English. Instructional components cover second language development, primary language instruction, specially designed academic instruction in second language, cross-cultural/self-esteem building, and parent/community involvement. Identifiers—California, Content Area Teaching.

This lesson plan for the first grade uses information on transportation, with sub-themes of communities and careers, to provide history/social science education for limited-English-proficient (LEP) students in San Diego, California. Activities and materials from the State scholastic science kit are also used, as are songs, poems, music, and games. Instructional components include second language development, primary language instruction, specially designed academic instruction in second language, cross-cultural/self-esteem building, and parent/community involvement. The time span of the lesson plan is 3-5 weeks. Language levels include pre- and early production, speech emergence, and intermediate fluency. (NAV)

Descriptors—Classroom Communication, College Faculty, Community Colleges, English (Second Language), English Teachers, Language Attitudes, Language of Instruction, Language Role, Language Usage, School Surveys, Second Language Instruction, Spanish, Teacher Attitudes, Two Year Colleges

Identifiers—Imperial Valley College CA

A survey investigated the attitudes of one community college's English-as-a-Second-Language (ESL) teachers concerning the use of native language in the classroom, particularly by the teacher. Twenty-one ESL teachers, both part- and full-time, responded. Most were Hispanic, many were bilingual, and they represented a range of experience and training. A majority believed all ESL teachers at the college should know some Spanish for classroom use. Only 10 percent had a rule of English use only in the classroom, but many reported that their students use English over 90 percent of the time. Some expressed frustration over students' apparent unwillingness to persist in English, particularly during group work. Others found limited first-language talk acceptable if related to the work at hand. (MSE)

Identifiers—Illinois (Chicago)

This report describes Teamworks, a 3-year project in Chicago, Illinois, that addressed the need for greater collaboration and teamwork between general program and bilingual/ESL teachers in the teaching community. Infrequent communication between these two teacher groups caused fractured education for the limited-English-proficient (LEP) students who participated in the bilingual/ESL program. The project reviews the Chicago programs, from inception to conclusion and follow-up in this large, urban setting. The 4-member Teamworks staff provided a variety of support services to the schools involved, such as needs assessment and help with

specific problems. Teamworks staff conducted individual teacher interviews, surveyed school principals, and coordinated teacher interaction. Pre- and post-data surveys revealed that the instructional competencies of both mainstream and bilingual teachers were enhanced by the Teamworks effort and discovered the need for greater involvement by school principals in such program activities. Appendixes list sample activities to improve coordination between teachers and sample training topics for enhancing instructional competencies. (Contains four references.) (NAV)

Descriptors—English (Second Language), Foreign Countries, Graduate Students, Higher Education, Participative Decision Making, Peer Groups, Reading Comprehension, Second Language Learning, Simulation, Surveys, Writing (Composition), Writing Instruction, Written Language

Identifiers—International Trade Institute (Taiwan)

This paper describes the basic features of a collaborative writing exercise used to help 40 English-as-a-Second-Language (EFL) students write reader-based prose. It presents an actual study that examined the use of collaborative writing to help students draft reader-based prose in intermediate and advanced EFL composition classes at the graduate-level International Trade Institute in Taiwan. Using a student-centered, competitive, simulation exercise called "Personnel," students had to simulate selecting a store manager using argumentative, written, reader-based prose in memo format. By the end of the exercise, students understood more deeply the advantages and disadvantages of choice in the written word when that word had to be understood by others. Overall, the task motivated students to learn from one another and to value interaction with peers as much as they valued teacher feedback. Post-game surveys indicated that students enjoyed the exercise and respected their peers' input. (Contains 11 references.) (NAV)

Identifiers—Hong Kong

A Hong Kong program to train secondary school teachers in the use of English as the medium of classroom instruction is reported and discussed. The program provides assistance to teachers accustomed to using mixed code in the classroom and who must use English consistently, and helps English teachers understand how they can support teachers of other subjects in an English-medium instruction (EMI) school. The report first outlines the qualities needed by an EMI instructor, including language proficiency, skills and strategies for teaching through a second language, and attitude and background knowledge that contribute to a commitment to change. It then describes briefly the design and content of the program that helps teachers improve in those areas. Lessons learned in the first year about the adequacy and acceptability of the course to teachers, and consequent course changes, are then examined. It was found that the most important areas needing strengthening are those relating di-

rectly to the special role of an immersion teacher in teaching both content and second language. Finally, other forms of support needed and Hong Kong efforts to provide these are noted. (Contains five references.) (MSE)

Descriptors—Bilingual Education, Classroom Communication, Classroom Environment, English (Second Language), Foreign Students, High Schools, High School Students, Immigrants, Language Proficiency, Second Language Instruction, Student Attitudes, Student Participation

Identifiers—Asian Students

A study of 30 Asian high school students (9 males, 21 females), who were in U.S. schools for a variety of reasons, ranging from extended visits to families of relatives to temporary academic or occupational appointments of parents in U.S. universities or corporations investigated student perspectives on English-as-a-Second-Language (ESL) instruction and bilingual classrooms. The subjects represented a variety of nationalities and educational backgrounds. The students were interviewed, most individually, and all but one in their native languages. They were encouraged to speak openly about their experience in classrooms, with teachers, and with other students. It was found that ESL classes offer a haven for student to relax and relieve some of the tension of other classes, and also provide students with many more opportunities for active participation. The students were sensitive about being understood. Some negative comments reflect feelings of isolation and lack of incentive to learn. Clear differences between bilingual programs and ESL programs were perceived, and these students preferred an environment in which the teacher: (1) provides good instruction; (2) is sensitive to their needs; and (3) tries hard to engage them in the ongoing life of the classroom, school, and culture. A brief bibliography is included. (MSE)

Descriptors—Case Studies, English (Second Language), Foreign Countries, Graduate Study, Higher Education, Inservice Teacher Education, Language Teachers, Professional Development, Second Language Instruction, Supervisory Methods, Teacher Supervision

Identifiers—International Trade Institute (Taiwan)

This article introduces the concept of democratic supervision, a macro-approach of in-service supervision of instruction for helping teachers and supervisors work together to select an appropriate strategy for professional development. A case study from the International Trade Institute graduate school in Taiwan is presented that examines the application of this concept to improve an English-as-a-Second-Language (EFL) teacher's instruction technique. Democratic Supervision uses five principles. In the first, the supervisor serves as a resource for the teacher. In the second, negotiation between supervisor and teacher are stressed. The third principle states that supervisor and teacher should negotiate to select a specific supervisory approach and in-service instruction, while the fourth principle calls for the application of Clinical Supervision's eight-stage supervisory cycle. Finally, the fifth principle is that Democratic Supervision encourages professional growth toward more teacher self-reliance. The paper concludes by discussing implications of this study for supervisory theory, practice, and research. (Contains 31 references.) (Author/NAV)

Identifiers—Taiwan

This article reviews the development of interactive business letters as a form of peer review of writing, presents the activities' general operation, and discusses its benefits by presenting examples of actual student peer reviews from the International Trade Institute graduate school in Taiwan. Rather than have students read and critique each other's work using peer review sheets, this English-as-a-foreign-language (EFL) teacher in Taiwan had students assume the roles of players actively involved in a written, business negotiation. Throughout the game, the teacher would read, respond to, and evaluate the correspondence to balance peer responses with instructor feedback. Results revealed that student interactive letters injected a strong element of realism into the peer review process; that students received peer feedback from at least two readers; and that, because of the international student body at the school, students were exposed to different cultural interpretations of their written letters. By using the game approach, students received feedback on their writing through unpredictable, real-world social interaction rather than uninterested, obligatory student peer reviews. Descriptors—Computer Assisted Instruction, *Electronic Mail, *English (Second Language), Language Teachers, Second Language Instruction, *Telecommunications

Identifiers—*Internet, World Wide Web

This book is designed to provide essential information for English teachers to begin using electronic mail (e-mail) and the Internet as tools for teaching English, as well as for Internet veterans, to take a look at new approaches and ideas. It includes ways that teachers can use the Internet for their own research and communication and a myriad of ways that teachers can involve students in using e-mail and new tools like MOOs and the World Wide Web. Throughout, the book highlights pedagogical factors for teachers to consider when bringing students into collaborative groups referred to as computer learning networks. Chapter 1 explains what e-mail is and how to use it; chapter 2 introduces ways teachers can use e-mail and the Internet on their own, for collaboration and communication with colleagues, and accessing resources. Chapter 3 discusses uses of e-mail and computer networking in a single classroom, while chapter 4 discusses possibilities for using e-mail and the Internet for cross-cultural communication. Chapter 5 introduces the use of e-mail in distance education to teach language, provide cultural orientation, and train teachers. Chapter 6 discusses how teachers and students can gather data from around the world using special tools for the Internet, and chapter 7 discusses ways of integrating all of the above within an educational program. Appendixes list journals, contacts and

organizations, electronic mail sites, and an electronic mail glossary. Contains 13 references. (NAV)

Descriptors—Bilingual Students, *Class Activities, *Classroom Communication, Discourse Analysis, *English (Second Language), *English for Academic Purposes, Grade 5, Intermediate Grades, Language Research, *Language Role, Language Usage, Linguistic Theory

The purpose of this report is to explore academic language on a broader discourse-level of analysis. Examining three linguistic exchanges from a bilingual elementary school, the report discusses how academic tasks influence academic language discourse styles (registers) in fifth-grade class lessons. Two dominant theories are drawn from the literature: (1) that academic language is a compilation of unique language functions and structures that are difficult for language minority students to master; and (2) that in a dichotomy between academic language and conversational language, the former provides fewer contextual clues. An alternative model views academic language as register, adjusted in lexical and syntactic features according to context. The study presented here examined classroom interaction in two fifth grade bilingual classes taught in English. Three samples of classroom discussion are analyzed, each revolving around a discrete academic task. It is concluded that the academic language registers used are shaped by the particular academic tasks. A survey of 132 English-as-a-Second-Language (ESL) teachers elicited definitions, descriptions, and examples of academic language. Results indicate significant conceptual differences between teachers and the research literature concerning academic language, suggesting a need for communication between teachers and researchers on this topic, and further research. A Comprehensive Dropout-Prevention Program To Increase the Number of Spanish-Speaking ESL Students Remaining in High School.

Pub Date—95

Note—96p; Ed.D. Practicum, Nova Southeastern University.

Pub Type—Dissertations/Theses - Practicum Papers (043) — Tests/Questionnaires (160)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—Acculturation, Conversational Language Courses, *Dropout Prevention, English (Second Language), High Risk Students, High Schools, *High School Students, *Immigrants, *Limited English Speaking, Parent Participation, Parent School Relationship, Problem Solving, Program Descriptions, Program Effectiveness, School Orientation, *Spanish Speaking, *Student Adjustment

The practicum reported here addressed the difficulty some newly-immigrated Spanish-speaking, limited-English-proficient high school students experience in adjusting to a new culture, putting them at risk of dropping out of school. A program was designed for this population in a suburban high school with a substantial and increasing immigrant population. Program components included initial screening and interviews, four English classes, including a new one in conversational English, a small-group acculturation counseling program, and parent orientation workshops concerning the school system. Results of this intervention were positive for 33 of the 35 participating students; two dropped out of school. The majority of participants felt that the new conversational English course was valuable, and the counseling sessions helped students adjust to the new culture, community, and school more readily and deal with problems more effectively. Appendices include: preliminary ESL/bilingual survey (English and Spanish versions); preliminary teacher interview; follow-up ESL/bilingual survey

(English and Spanish); family interviews; parent night flyers A&B (Spanish and English); 10 most-asked questions and answers; and parent-night evaluations (Spanish and English). (Author/MSE)

Identifiers—Hong Kong, *Names, Pen Pals

Classroom exercises designed to help students learn phonetic symbols more effectively are described. The exercises were developed for use in a Hong Kong school. The idea behind their creation was that use of the symbols in communicative situations would emphasize their utility for learning English pronunciation. Each exercise uses contextualized tasks that are not limited to language learning. The first requires students to transcribe the names in a letter written to a pen pal; the second has students answer a questionnaire in an activity designed for students to get to know each other; the third involves transcribing signs to assist and extra-terrestrial being visit a park; in the fourth, students order vegetables from a greengrocer. Variations on each exercise are suggested. Worksheets and visual aids used in the exercises are appended. A brief bibliography is included. (MSE)

Language Development in Extended-Day Pro-

gram: Prospects for Second Language Learners.

Pub Date—4 Oct 95

Note—15p; Paper presented at an Invitational Conference on Extended School Day (Maastricht, Netherlands, October 4, 1995).

Pub Type—Reports - Evaluative (142) — Guides - Non-Classroom (055) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*After School Education, Art Education, Class Activities, Classroom Techniques, *Cultural Pluralism, Elementary Secondary Education, English (Second Language), English for Academic Purposes, *Extended School Day, *Interpersonal Communication, Lesson Plans, Limited English Speaking, Literacy Education, Music Activities, Physical Education, Second Language Instruction, Second Language Learning, *Second Languages

Identifiers—*Content Area Teaching

A discussion of second language learning among language minority students looks at the increasing multiculturalism of the U.S. classroom and a number of related issues, including the relationship between first language development and second language learning, academic language needs, and literacy development, and concern about the appropriateness of standardized testing for linguistically and culturally diverse student populations. It then gives an overview of developments in and principles of integrated language and content (ILC) instruction, or the teaching of content in a second language. Finally, language development is examined in the context of extended school day programs. Basic principles are outlined, and simple strategies for promoting such development through language usage and organization of activities are offered. ILC is seen as a promising technique for additive language development in extended school-day programs because content can be not just academic, but also recreational. Implications for immigrant children in Dutch extended school-day programs are discussed briefly. (Contains 20 references.) A set of strategies and sample activities for ILC instruction in art, music, and physical education, including lesson plans, is presented separately. (MSE)

A Developmental-Functional Approach to Child Language.

Report No.—ISBN-0-8058-0520-6

Pub Date—95

Note—236p.

Available from—Lawrence Erlbaum Associates, Inc., 10 Industrial Avenue, Mahwah, NJ 07430-2262 (\$45; \$22.50 prepaid).

Pub Type—Reports - Evaluative (142) — Books (010)

Document Not Available from EDRS.

Descriptors—Case Studies, *Child Language, Children, *Developmental Psychology, *Language Acquisition, Language Research, Linguistic Theory, Psycholinguistics

Identifiers—*Functional Linguistics

A study of child language development that takes a combined developmental and functional view of language acquisition is reported. It has three parts. The first outlines a variety of functional approaches in linguistics, links linguistic theory with what is known about children's emerging conceptual and social development, particularly in the areas of agency and control, and describes the methodology of the study reported. The second part presents an analysis of six children's language development, three of whom are ego-anchored and three of whom are not. These case studies focus on the protracted nature of language development as viewed from the functionalist perspective. The third part elaborates on mechanisms of development, presenting various proposals concerning the organizational and re-organizational processes, drawing on both conceptual and environmental accounts. Further areas of research are suggested. A substantial bibliography and author and subject indexes are also included. (MSE)

Descriptors—*Chinese, Classroom Techniques, College Students, Contrastive Linguistics, *English (Second Language), Foreign Countries, Grammar, Higher Education, *Interference (Language), *Language Patterns, *Language Usage, Linguistic Theory, Second Language Learning, *Writing (Composition)

Identifiers—Chinese People, Hong Kong

A study investigated the frequent choice of the term "always" instead of the more appropriate term "often" in the essay writing of native Chinese-speaking learners of English as a Second Language (ESL), focusing on how problematic usage of "always" can adversely affect perceptions of the student's competence in undertaking an academic discussion. Successful diagnoses of the problem and useful treatments are then sought in grammar textbooks. The apparent persistence of the problem among Hong Kong undergraduate students is then related to choices available in Cantonese and to linguistic analyses of the descriptive facts and communicative options in English. A small sample of concordance data is examined to suggest how the practice of ESL student writers at the University of Hong Kong compares with the usage of other writers in locally published academic writing. Classroom techniques for teaching alternative lexico-grammatical possibilities and their implications are discussed. (MSE)

Identifiers—*Authentic Materials

The textbook in intermediate Czech is designed for second-year students of the language and those who already have a basic knowledge of Czech grammar and vocabulary. It is appropriate for use in a traditional college language classroom, the business community, or a government language school. It can be covered in a year-long conventional university course or a 10-week intensive course. Lessons are based on authentic reading passages from Czech daily newspapers and magazines, and introduce students to contemporary culture. After each passage, a set of 20 communicative activities and grammar exercises are presented. Topics of the 14 lessons are: traveling; cooking; education; Prague; the Czech anthem; health; life in the city; writer Karel Polacek; work; business; traveler and collector Vojtech Napstek; history; holidays; and humor. Language and Institutional Capacity Building in Cambodia: A Case Study of the Faculty of Business in Phnom Penh.

Pub Date—12 Apr 95

Note—12p; Paper presented at an International Conference on Language in Development: The Stakeholders' Perspectives (2nd, Denpasar, Bali, April 12-15, 1995).

Pub Type—Reports - Descriptive (141) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Business Administration Education, Case Studies, Change Strategies, *Curriculum Design, Curriculum Development, Developing Nations, Educational Change, Educational Policy, English, Foreign Countries, French, Higher Education, *Language Role, Program Descriptions, Second Language Instruction, *Second Languages, Uncommonly Taught Languages, Vietnamese

Identifiers—*Cambodia

The recent restructuring of the curriculum of the Faculty of Business of the Ministry of Education, Youth, and Sports in Phnom Penh (Cambodia) is described and offered as a model of the kind of reorganization occurring within Cambodia's higher education system. The history of language policy in the higher education system is chronicled briefly, identifying three phases: strong influence of Vietnamese language and curriculum (1980s); resurgence of former French influence (early 1990s); and expanding influence of English (1993-present). The rationale for and structure of the new four-year curriculum at the Faculty of Business, which includes general and business English throughout, are then detailed. The roles of Georgetown University (District of Columbia) in faculty development and of the University of San Francisco (California) in establishing a business law school are noted. The further development of a community-oriented small business training program in cooperation with Georgetown University, and the design of the program, are also described. It is noted that the Faculty of Business is the first academic institution in Cambodia to adopt the Anglo-Saxon curriculum model and English as the primary language taught. Need for further technical assistance in this area is highlighted. (MSE)

What the Heck is a MOO? And What's the Story with All Those Cows?

Pub Date—95

Note—7p; Paper presented at the Annual Meeting of the Teachers of English to Speakers of Other Languages (29th, Long Beach, CA, March 26-April 1, 1995).

Pub Type—Reports - Descriptive (141) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Computer Networks, *Computer Software, English (Second Language), *Games, Humor, *Information Transfer, Internet, *Interpersonal Communication, Second Language Instruction

Identifiers—*Adventure Games, *MOOs

One segment of a computerized adventure game system (Multi-User Dimensions, or MUD) designed for learners of English as a second language (ESL) is described. The acronym MOO refers to MUD Object Oriented, the programming language used for the system. The system allows for individuals in different locations to communicate directly with each other, through Internet, in the game context. The segment discussed is "schMOOze U," a

game based on a virtual university. Users, identified as characters by fictional self-descriptions, can move about within this context and according to a set of rules and regulations defined by the user community. This networked virtual reality game is intended to remove ESL learners' communicative inhibitions. Users can learn commands in a "classroom," engage in word games, write texts for the library, participate in grammar exercises, have conferences, and stage events; one user hosted a party. An online dictionary is provided. A characteristic of the game system is the common use of puns. Within the first year of its existence, the game logged in 350 permanent characters and guests from over 1,000 sites around the world. The report concludes with a brief essay about schMOOze U written by one Hong Kong user. (MSE)

Engineering Research Presentations: Three Units of Analysis.

Pub Date—95

Note—29p; Paper presented at the Annual Meeting of the Teachers of English to Speakers of Other Languages (29th, Long Beach, CA, March 26-April 1, 1995).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Coherence, Discourse Analysis, *Engineering Education, English (Second Language), *English for Special Purposes, Foreign Countries, Language Patterns, *Language Styles, *Oral Language, *Speech Communication, *Technical Writing

A study investigated the genre, structure, and delivery of oral presentations in engineering delivered in English as a first and as a second language. Eleven manufacturing engineering presentations, four by non-native speakers of English and seven by native speakers in Loughborough, United Kingdom, were analyzed with reference to the discourse community's expectations concerning "good" and "bad" presentations, as determined through interviews and questionnaires. Two aspects of genre were examined: communicative purpose and conventionalized knowledge of linguistic and discursive resources. Analysis of structure focused on characteristics of the introduction, body, and termination (conclusion) of the presentation. These included listener orientation, content orientation, discourse type, summary, presentation of technical information, use of visual aids, circumstantial comments, and comments on the research process. Analysis of delivery looked only at its extemporaneousness, as reflected in mode of delivery: memorization; reading aloud; and/or "fresh talk." In each case, performances are compared with expectations. Contains 35 references. (MSE)

ED 389 224 FL 023 444

Wazke, John

Inter-Level Articulation: A New Paradigm for the Profession.

Pub Date—Nov 94

Note—27p; Paper presented at the Annual Meeting of the American Council on the Teaching of Foreign Languages (28th, Atlanta, GA, November 1994).

Pub Type—Opinion Papers (120) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Articulation (Education), *Curriculum Design, *Educational Objectives, Higher Education, *Interprofessional Relationship, *Language Enrollment, Secondary Education, Second Language Instruction, *Second Language Programs

A discussion of articulation in second language education between instructional levels looks at the current state of articulation, issues in the transition from secondary to higher education, and proposes a new approach that shifts the focus from product to process. Three forms of articulation are distinguished: vertical; horizontal; and multi-disciplinary. It is noted that most current articulation from secondary to college levels is vertical, and the horizontal aspect is underdeveloped, which may be associated with a high rate of attrition in language enrollments between these levels. It is suggested that articulation efforts focus on reconciling the fundamentally different goals and educational agendas at the two instructional levels, and that communication between professionals at both levels be improved. The proposed shift is from the traditional

normative input/language replication paradigm to an authentic input/language creation paradigm that focuses on the learner and variables such as different language background knowledge, maturation levels, and motivations that affect curriculum design at different levels. A longer sequence of language study is an anticipated result of this approach. Contains 26 references. (MSE)

Descriptors—Classroom Communication, Classroom Techniques, *Communicative Competence (Languages), Cultural Context, Elementary Secondary Education, *English (Second Language), Evaluation Criteria, *Films, Foreign Countries, Instructional Materials, *Language Role, Language Usage, Learning Motivation, Listening Comprehension, *Media Selection, Second Language Instruction, Teacher Student Relationship, Videotape Recordings, Vocabulary

A discussion of the use of movies for teaching English as a Second Language looks at some basic principles in using movies as instructional materials and discusses a number of issues in selecting materials and developing classroom instruction. It is argued that film communication offers links between classrooms and society, contains a wide range of vocabulary, can help explore cultural context, may be integrated easily into the curriculum, are entertaining, allow flexibility of materials and teaching techniques, can be related to students' personal experiences, act as a focus for teacher-student interaction, can be used to promote awareness of the interrelationship between modes (picture, movement, language, sound, captions), and should be used in their entirety. Movies can also be considered as a form of text. They are controllable teaching instruments, and offer great variety of subject, communicative language, language environment, and cultural content. Criteria for selecting films and techniques for using them in the classroom are discussed, drawing on related literature. Five criteria are proposed concerning film length, language quality, cultural aspects of theme, adaptability to communicative teaching methods, and potential for provoking thought and discussion. Contains 25 references. (MSE)

Document Not Available from EDRS.

Descriptors—*Classroom Communication, *Classroom Environment, Classroom Techniques, Communicative Competence (Languages), English (Second Language), Instructional Materials, Interaction, Interpersonal Communication, Knowledge Level, Language of Instruction, *Language Patterns, *Language Role, Language Usage, Second Language Instruction, *Second Languages, Student Attitudes, Teacher Behavior, Teacher Student Relationship

This book focuses on communication as the central feature in teaching and learning within second language classrooms. It examines the classroom as a unique communication context with highly regulated patterns of communicative behavior that are actively negotiated between teacher and students, and explores how and why these patterns of communication are established and maintained. Dynamics of classroom communication are viewed as shaped by the moment-to-moment actions and interactions that occur during face-to-face communication between teachers and students. The first part outlines a framework for understanding communication in second language classrooms, including

teacher control of communication patterns, student perceptions of classroom communication patterns, and students' knowledge and use of language in the classroom, both in general and for the purpose of learning. The second part examines a number of patterns of communication: teacher-student interaction; student-student interaction; and patterns that relate to community-based issues such as English-as-a-Second-Language instruction and use of commercial materials. Part 3 offers suggestions for expanding communication patterns, allowing for variability in communication patterns, and establishing and extending classroom communicative competence. A substantial bibliography is included. (MSE)

Teaching English as a Second Language: How Young Children Learn.

Pub Date—May 95

Note—12p; Paper presented at a Conference on Cued Speech (Perpustakaan Negara Malaysia, May 25-27, 1995).

Pub Type—Guides - Classroom - Teacher (052) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Bilingualism, Classroom Communication, Classroom Techniques, Educational Strategies, Elementary Secondary Education, *English (Second Language), Immersion Programs, Language Attitudes, Language of Instruction, *Language Role, Language Skills, Language Usage, Parent Attitudes, *Program Design, Second Language Instruction, Second Language Learning, *Second Languages, Time Factors (Learning), *Young Children

A discussion of English-as-a-Second-Language teaching techniques and approaches for young children focuses on principles found to contribute to successful program development. First, characteristics of successful language immersion programs are outlined: parental involvement and support; students who are members of a majority group; positive attitudes toward the target language and culture; and optional participation. Additional principles of second language program design are then enumerated, including: a natural setting in which language can be used in a meaningful way; positive attitudes about the first language and culture; minimal code-switching; supportive home and school environments and adequate home language development; and attainment of a threshold level of linguistic competence in both languages. This implies that teachers provide broad exposure to the target language but allow response in the first language, emphasize spoken language in the early grades, allow experimentation with language, and include parents in language program planning and implementation. Teaching techniques should promote substantial student initiation of communication, and may incorporate role-playing and dramatization, literature, theme-based lessons and problem-solving, and discovery. Contains 13 references. (MSE)

Descriptors—Advertising, Class Activities, Classroom Techniques, Communication Apprehension, Debate, Dialogs (Language), *English (Second Language), Feedback, Humor, Interpersonal Communication, *Listening Skills, News Reporting, Persuasive Discourse, *Pronunciation Instruction, Role Playing, Second Language Instruction, Skill Development, *Speech Skills, Story Telling, Student Evaluation, Student Projects, *Videotape Recordings, Writing Skills

Six class activities for 16 advanced students of English as a Second Language that used videotape recording are described. All are designed to improve pronunciation and general listening and speech skills, and all use videotaping and classroom and home playback for peer and self-assessment. The activities involve: (1) oral interpretation of jokes, humorous sayings, and stories; (2) role playing and

impromptu dialogues; (3) brainstorming and debate; (4) creation of commercials; (5) transcription of news reporting and preparation of a news broadcast; and (6) transcription of an English narrative told by a friend. The activities are designed to reduce inhibitions about speaking in English, provide practice in improvising in English in real-life situations, teach use of persuasion and information-giving, promote creativity, and integrate listening, reading, and writing in English. One student's narrative is included. (MSE)

Orr, Thomas And Others

An Analysis of Lexical Frequency and Discourse Need for Instructional Purposes. Technical Report 95-5-002.

Aizu Univ., Aizuwakamatsu (Japan). Center for Language Research.

Pub Date—17 Apr 95

Note—16p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Computer Science, Computer Software, Discourse Analysis, *Educational Needs, English (Second Language), *English for Special Purposes, Foreign Countries, *Freshman Composition, Higher Education, Second Language Instruction, Technical Writing, *Vocabulary, *Word Frequency, Writing Instruction

The report details a study to identify vocabulary needed by Japanese students of English as a Second Language to function successfully in college computer science courses and research laboratory apprenticeships. The vocabulary was then to be taught in the first two semesters of freshman English composition. The study involved development of simple computer software and administration of an electronic questionnaire and individual interviews. The software was designed to study lexical frequency in the published annual review of the university's school of computer science and engineering. Software specifications are given here. The resulting vocabulary is also presented, in four categories: university academic vocabulary; university physical environment vocabulary; people-related vocabulary; and computer science discourse vocabulary. It was found that most of the words students need to know to negotiate computer science content materials in English are words common to general English rather than words of a semi- of highly technical nature. Contains 17 references. (MSE)

Identifiers—*Discontinuity
The first in a series of three reports on philosophy of human existence focuses on human activity in the economic context, or more specifically, the role of the entrepreneur. A variety of treatments of entrepreneurship in the literature of economics and cognitive psychology are examined, and it is found that analyses of entrepreneurship are inhibited by the unclarified relationship between the singular (individual) and the super singular (society). Concepts of human existence are then explored across the classic theories of Karl Marx, Wilhelm Friedrich Hegel, Auguste Comte, A. N. Leontjew, Emile Durkheim, C. Horton Cooley, George Herbert Mead, L. Feuerbach, Sigmund Freud, and Max Weber. It is concluded that these theories can not solve the problem arising from the relationship of singular and super singular. It is also found that these theories have some elements in common: canalization that encompasses transference of something from one to another; correlation that encompasses reciprocity, which is the basis of generalization; and combination, which encompasses production of the new. The classic theories also point to the problem of self-reference. Subsequent reports examine theories

of discontinuity and explore the use of perspective text analysis to study the notion of competence. (MSE)

Identifiers—*Discontinuity
The third in a series of three reports draws on earlier discussion of theories of discontinuity in human existence to develop a method for studying individual perceptions of existence. The method is Perspective Text Analysis, a form of discourse analysis that focuses on self-reference as a reflection of competence. The model for the methodology is first outlined, and the computer program used to perform the text analysis is explained. Application of the analysis to one text, a Danish company employee's comments concerning a job for which he was applying, is examined and the results compared with the subject's self-assessment and a psychologist's report on the individual. The text that was analyzed is also presented. Contains 20 references. (MSE)

This paper explores the personal and professional changes that took place for a teacher who taught English in two Washington State prisons. A gradual change in teacher behavior and authority resulted from a self-examination of the role of teacher in this special teaching environment; the teacher found she could learn from the students as well as teach them. Comments and perceptions by other teachers are included. The corrections students are described, and the particular challenges and characteristics of teaching English as a Second Language (ESL) in this population is examined, including the special challenges regarding professional versus institutional authority and security. Appendixes include the history of prison education, a prison teacher questionnaire, and the Washington State core competencies questionnaire. (Contains 35 references.) This report reviews government-funded, English-as-a-Second-Language (ESL) projects for adults at three schools in Arlington (Virginia) public schools, in an El Paso (Texas) community college, and in the Massachusetts Department of Education. The Arlington Adult Learning System (AALS) demonstrated how coordination by a community-based organization, a vocational institution, and an institution of higher education helped adults prepare for job training and academic study. The Texas Success Through Transition English Project (STEP) worked with community-based organizations and the community college to deliver services to adults for academic and technical programs. The Massachusetts English Literacy Demonstration Project (MELD) illustrated how a State education agency supported partnerships with community-based organizations and community colleges to strengthen educational and employment opportunities for linguistic minorities in urban and rural areas of the state. Each model is described in detail, with the key elements of success extrapolated. Appendixes include project summaries, Federal Register announcement, and resource information. This manual offers assistance for those working with adult, English-as-a-Second-Language (ESL) learners who have been long-time residents of Australia. Two specific units of instruction concentrate on past experiences and health concerns for the learners. Unit 1 focuses on past experiences and Unit 2 on health. Various learning approaches are described: whole word recognition versus phonics; psycholinguistic approach to reading; language experience approach; process, genre-based, and composition-based writing approaches; and general language development. Sample programs are described, and worksheets used are included for reference. Each unit contains an introduction, contents list, teachers notes with worksheets, readings, and resources at three experience levels. (Adjunct ERIC Clearinghouse for ESL Literacy Education) (NAV)

tration, *Student Financial Aid, *Student Loan

Programs

Identifiers—Higher Education Act Amendments

1992, Reauthorization Legislation, Stafford Student

Loan Program, Supplemental Loans for Students

Program

This report presents the results of a survey of 808

postsecondary education institutions concerning effects

of the 1992 Higher Education Act reauthorization

on federal student financial aid. The survey was

conducted in the 1994-95 school year through the

Postsecondary Education Quick Information System

(PEQIS). The reauthorization legislation made

changes in the number of aid applicants that institu-

tions were required to verify, created a new unsub-

sidized loan program, increased loan limits, and

changed needs analysis methodology. The survey

found that institutional verification policies and the

percent of applicants verified were generally not

affected by changes in the law, probably because

most institutions were already verifying more than

30 percent of aid applicants, as required by the new

law. Most institutions reported increased borrowing

in the subsidized and unsubsidized Stafford and

Supplemental Loans for Students programs, with

the majority ranking an increase in loan limits or

changes in needs analysis methodology as the most

important reason for the increased borrowing.

Identifiers—Educational Leadership Enhancement

Grant Program, *Florida

This report presents an evaluation of the Educa-

tional Leadership Enhancement Grant Program,

(LEGP), established in 1992 by the Florida legis-

lature to support projects designed to strengthen the

professional preparation of women and minorities for leadership positions in public higher education institutions in the state. During 1993-94 six projects were awarded grants totaling \$100,000, representing nine institutions statewide and serving 86 selected faculty and administrators. These programs included career counseling, supplemental training and educational opportunities, and mentoring. An evaluation of the programs found that participants reported overwhelmingly that their experience in ELEGP enhanced their professional confidence, as well as their leadership, communications, administrative, financial, and legal skills. Eight participants reported that ELEGP contributed to their advancement and promotion, and three reported that they had begun a doctoral program as the result of the professional encouragement of ELEGP. An appendix provides demographic data on institutional and individual participants, the ELEGP legislative statute, a copy of the participant evaluation form, and four participant mini-case studies. This document lists the typical tuition and re-

quired fees and room and board charges assessed to

college students in 1994-95 based on a national "In-

stitutional Characteristics" survey which is part of

the Integrated Postsecondary Education Data Sys-

tem. The data were collected from over 5,000 of the

5,775 4-year, 2-year, and public less-than-2-year

postsecondary institutions in the United States and

its outlying areas. Included are tuition and fee

charges to in-state and out-of-state students at the

undergraduate and graduate levels, along with the

costs for room and board, and the number of meals

per week covered by the board charge. These

charges are not weighted by enrollment. Included are several tables with national statistics on tuition and required fees at postsecondary institutions for academic year 1994-95 followed by tables showing charges at individual institutions and tuition and required fees for first-professional programs. A summary of the publication's statistics notes that the median charge at public 4-year institutions for tuition and fees was \$2,445 for undergraduate, in-state students; that at public 2-year institutions tuition and required fees averaged \$1,461 for in-state students; and that undergraduate tuition and fees at private, non-profit 4-year institutions averaged \$8,967 for in-state undergraduate students. Study

This report uses data from the National Post-

secondary Student Aid Study of 1993 to examine

how undergraduate students enrolled in the

1992-93 academic year financed their education.

The report begins with an essay that explores in

detail the relationships between the type of institu-

tion in which students were enrolled and their total

cost of attendance, the distribution of financial aid

among students by type of institution, and the net

cost of enrollment among aided and non-aided un-

dergraduates. The compendium of tables that fol-

lows provides additional data on each of the topics

addressed in the essay. In addition, the compen-

dium tables include data on the demographic char-

acteristics of students enrolled in each institution

type and on the distribution of financial aid by type

(grants, loans, work-study, and other) and data by

source (federal, state, institutional, and other). The

table compendium (contains four sections which

cover: (1) student demographics, (2) the cost of

postsecondary education, (3) the distribution of fi-

nancial aid, and (4) the net costs of postsecondary

education. Each section is prefaced by a summary

of the finding highlights. Appendixes contain a glos-

sary and technical notes. (JB)

Identifiers—*National Postsecondary Student Aid Study

This study uses data from the 1992-93 National Postsecondary Student Aid Study to describe the financing of graduate and first-professional education. It begins with an essay on student borrowing that briefly profiles graduate and first-professional students and then examines the role of borrowing in financing graduate and first-professional education. The essay concludes that there are notable differences among degree programs and attendance patterns in the proportion of students who borrow and in the average amounts borrowed which reflect the length of programs, tuition and fees, and the varying amounts of grants and other aid received. Master's degree students were the least dependent on loans: about 10 percent of these borrowed in 1992-93. Forty percent of doctoral students had borrowed for an average cumulative debt of \$19,300. First professional students, who pay the highest tuition, on average, and who are primarily full time, full year (77 percent), were the most dependent on loans. Of these 65 percent had borrowed an average of \$38,900 by the time they graduated. The compendium of tables that follows the essay provides detailed data on student characteristics, types of financial aid awarded, sources of aid, and financing through family support and work. Each section of the compendium is prefaced by highlights summarizing the major findings related to the section's topic. Appendixes contain a glossary and technical notes and methodology information. Identifiers—*United Kingdom

Employment legislation in the United Kingdom from before 1970 to the 1990s has changed and with it collective bargaining in higher education. Industrial relations before 1970 were treated as a voluntary activity virtually unregulated by law. Then the Remuneration of Teachers Act 1965 set up the Burnham Committees, which until 1987 were the forum for salary negotiations and associated matters. In the 1960s and 1970s the normal pattern of collective bargaining was that unions made demands and management resisted, trying to minimize the concession they needed to make. The Donovan Commission and the resulting Donovan Report (1968) led to a great deal of legislation between 1970 and 1978 aimed at encouraging better regulated collective bargaining at workplace level. Legislation from 1979 onwards was aimed at regulating the power of the trade unions and bringing about a shift in the balance of power between unions and employers. As a consequence employers are now likelier to take a tough line in their handling of disputes and resulting defeat for the unions. Whatever policies higher education adopts for labor relations, college industrial relations should be a priority concern for managers and governors in the run-up to incorporation. Relevant Acts of Parliament are listed. (JB)

Descriptors—College Role, *Democratic Values, Educational Philosophy, *Experiential Learning, Graduate Study, *Higher Education, Professional Education, Program Descriptions, Program Im-

plementation, *School Community Relationship, Student Attitudes, Undergraduate Study

This book describes and reports on a new approach to higher education that is experiential and democratic. The approach uses discussion and interaction, laboratory work and field learning, community involvement and service, democratic citizenship and skills training, and student-initiated participatory learning in courses, projects, and clinical work that goes beyond traditional classroom education. The book is divided into two parts. Part 1 (chapters 1 through 3) concerns creating a new educational vision and describes how universities appear from the point of view of students and communities and a democratic experiential philosophy of education that comes out of strong traditions in American culture. Part 2 (chapters 4 through 10) describes ideas for revitalizing American higher education through the model's "student adventures." Included are detailed descriptions and how-to materials for several different university courses that have already been tested successfully and for an international policy project and other detailed ideas for experiential courses at all levels of the university curriculum, including graduate and professional schools and complementing courses in several disciplines. Finally, the book proposes a fundamental change in the structure of higher education and its funding and links to the community and its view of its role and the roles of faculty and students. Identifiers—New York, *State University of New York

Data were gathered and analyzed in fall 1994 on the use of residence hall facilities at all New York state operated colleges with residence halls, and these data were also analyzed for trends in comparison with data since 1985. Twenty-six institutions were surveyed. Findings included the following: (1) total utilization of residence hall facilities (headcount) was 58,054, a decline for the fourth consecutive year and the smallest headcount in the past 10 years; (2) net revenue producing adjusted design capacity also decreased from 1993; (3) the average number of students per resident assistant for the system as a whole remained relatively constant for the past 10 years; (4) percent utilization of net revenue producing adjusted design capacity was 95.8 percent, marginally lower than the previous year of 96 percent; (5) at the University Center at Binghamton, percent utilization surpassed 100 percent and rose to 100.7 percent from 98.7 percent in 1993; (6) percent utilization at colleges of technology and agriculture increased from 96 percent in Fall 1993 to 103.8 percent in 1994; (7) of the institutions surveyed, eight were over-utilized or crowded and one was exactly at capacity. Twelve tables present the data in detail. Appendixes contain a map of institutions and a chronology of their establishment. (JB)

*Enrollment Trends, Higher Education, *Intellectual Disciplines, *Noncredit Courses, *School Statistics, *State Colleges, State Surveys, State Universities, Tables (Data)

Identifiers—New York, *State University of New York

This report summarizes the response of the State University of New York (SUNY) constituent institutions to the biannual survey of non-credit instructional activities for the period: July 1, 1994 through December 31, 1994. It provides statistical data and tables that summarize overall registrations and non-credit instructional activities and reports trends in non-credit instructional activities and registrations from 1983 through 1994. The bulk of the report consists of a listing of each non-credit instructional activity by subject area, title, and campus. Each listing includes the course name, campus, number of sections, registrations, clientele, contact hours, activity type, and location. An appendix provides a map of the SUNY system and a chronology of dates of establishment of SUNY institutions. A list of other publications offered by the SUNY Central Staff Office of Institutional Research is attached. (JB)

Identifiers—Idaho, Iowa, Minnesota, Montana, Nebraska, North Dakota, *South Dakota, Wyoming

This report provides a comprehensive examination of student costs at four-year public colleges and universities in South Dakota and nearby states including Minnesota, Iowa, Nebraska, Wyoming, Montana, North Dakota, and Idaho. Mail and telephone surveys were used to collect data in the eight states on undergraduate and graduate tuition, fees, room, and board. The bulk of the report consists of tables and graphs detailing the results. The survey found that undergraduate residents in South Dakota, on average, paid \$2,520 for tuition and fee costs which is 8.9 percent higher than the eight state average of \$2,314. South Dakota's average cost was 14.3 percent higher than the eight state average in 1989. Only Minnesota ranks higher than South Dakota based on the average cost by state for 1995. Undergraduate residents in South Dakota, on average, pay \$5,030 for tuition, fees, and room and board which is 4.8 percent less than the eight state average of \$5,281. Similar data for graduate student costs are presented. (JB)

Identifiers—South Dakota

This publication presents data on enrollment at South Dakota's public and private colleges and universities at the close of the second week of the 1994 Fall Term. The 90 tables and two graphs present data by headcount and full-time equivalent enrollment. The first 32 tables present data on state supported public university enrollment and private institution enrollment tables covering topics like special or terminal students, graduate students, resident versus nonresident comparisons, nonresident student statistics, distribution by undergraduate and graduate categories, degree-credits, new registrants, student age and ethnic origin, and geographic origin. The next 29 tables present data on self-supported public university enrollment covering similar topics. The last 29 tables report unduplicated total public university enrollment on similar topics. Includes a glossary of terms, historical notes, and list of reporting institutions. (JB)

Descriptors—Business, Responsibility, *Educational Assessment, Educational Quality, *Education Work Relationship, Environmental Standards, Equal Education, Equal Opportunities (Jobs), Higher Education, *Partnerships in Education, School Business Relationship

Identifiers—*National Education Goals 1990

Tomlinson testified on Goal 5 of the National Education Goals, which states that "every major American business will be involved in strengthening the connection between education and work," and particularly on methods to assess progress toward that goal in higher education and postgraduate training. The testimony proposed that the National Education Goals should maintain a "check and balance" approach to progress assessment by evaluating how qualified businesses are to contribute to the competence of the target populations, what these businesses contribute to the partnership, and how they contribute. Participating businesses should demonstrate competence in contributing to this goal in ways that are supportive of and informative of environmental ethics and socio-economic equity. Specifically, (1) student participants in partnerships should be able to demonstrate how or why each level of skill that they learn contributes to the ultimate product, goal, or gain; (2) high-tech instructional services should employ staff to assist users in developing competencies; (3) student support service programs for disadvantaged and minority college students should be established where they do not exist and carefully assessed where they are in

place; and (4) critical thinking, communication, and problem solving assessments should include relevant, contemporary tasks. Attached are the text of Goal 5 and a list of assessment elements. (JB)

Descriptors—College Faculty, *College School Cooperation, Cooperative Programs, Elementary Secondary Education, Group Dynamics, Higher Education, *Partnerships in Education, *Professional Development Schools, Program Development, *Program Implementation, Public Schools, Public School Teachers, *Schools of Education, Teacher Attitudes, Teacher Education

This study investigated faculty perceptions and attitudes toward organizational change in colleges and schools of education with regard to building collaborative partnerships with public school professionals. The purpose of the study was to confirm the existence of and describe the collaboration formation process within the conceptual framework of Professional Development Schools (PDSs). An inquiry-based, qualitative research design was employed. The basic unit of analysis was the College of Education. Seven research institutions were chosen using purposeful sampling. Sixty-two individual interviews were conducted with selected deans, faculty members, teachers, and relevant stakeholders. A prescribed set of open-ended questions was used to conduct the interviews. Specifically, questions focused on the structural, process, and political dimensions of creating collaborative relationships. The results of the study revealed that there is a clearly defined process that is virtually identical across all seven institutions of higher education involved in establishing PDSs. Collaboration as a process appeared to involve several distinguishable phases of development namely: formalization and conceptualization, centralization in terms of who governs what, when, and how; and implementation of a mutually agreed upon event to initiate the collaboration process. Equally important were the issues of administrative support and politics, which were perceived to be influential in the collaboration formation process. (Contains 48 references.) (Author)

Mower-Popiel, Elizabeth
Mentoring College Bound High School Seniors.

Pub Date—[93]

Note—20p.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*College Bound Students, College Freshmen, College School Cooperation, College Students, *Dropout Prevention, Higher Education, *High School Seniors, *Mentors, Partnerships in Education, Program Proposals, Secondary Education, Student Alienation, *Transitional Programs

This article examines causes of the high rate of attrition of college freshmen during the first few weeks of school and describes a plan for mentorships between successful college students and college-bound secondary seniors prior to entrance into college. In discussing the challenges facing freshmen, the article suggests that they suffer stress due to shock, competition, and independence, and that if they were guided through this transitional time the "sink or swim" approach could be avoided. It also discusses the cultural emphasis on independence which leaves students feeling alone, and is particularly difficult for minority group students who feel they have entered an alien culture. The paper suggests a program that would target college-bound high school seniors in a collaborative mentoring program between colleges and schools. College students would facilitate the transition of college-bound high school seniors from high school to college by assuming the role of teacher, guide, counselor, role model, and friend. Through participation in concurrent courses offered by the community high school and nearby colleges, mentors and proteges might address topics such as career options and majors, university procedures, student life, stu-

dent support services, library orientation, student skills and time management, test taking strategies, and common problems of freshmen. (Contains 24 references.) (JB)

Monahan, Thomas C. Fortune, Jim C.
Using Institutional Variables To Predict Success in Grants Acquisition.

Pub Date—Apr 95

Note—34p.; Paper presented at the Annual Meeting of the American Educational Research Association (Atlanta, GA, April 18-22, 1995).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*College Administration, *College Faculty, Faculty Workload, Grants, *Grantmanship, Higher Education, *Incentives, National Surveys, Program Proposals, Released Time, Resource Allocation, School Policy

This national study of colleges and universities examined 33 variables found to act as incentives to motivate faculty to engage in grant-related activities. A survey questionnaire was sent to 163 colleges and universities, and of these, 104 returned them. The results of a series of statistical analyses suggested that a small, but significant, predictive relationship exists between the provision of institutional resources for released time to write proposals, reduced faculty loads to work on successful grants, graduate and research assistants, a return of some of the indirect costs to faculty or sponsoring departments, and other selected resources and services, and success in grants acquisition as measured by the amount of funding attracted to the institutions in successful grants. The results also suggest that institutions may prefer to look to successful grants to fund released time, reduced faculty loads, and other resource-consuming incentives as a way of avoiding having to expend institutional resources to support grant-related activities. Finally, overall, most colleges and universities provide more in the form of policies, practices, grants training and other services than financial and other institutional resources, such as released time, as incentives. Buske-Zainal, Patricia M.
Being Open to the Possibilities: A Phenomenological Approach toward Appreciating Diverse Ways of Knowing.

Pub Date—95

Note—36p.; Paper presented at the Annual Meeting of the American Educational Research Association (Atlanta, GA, April 18-22, 1995). Based on a Doctoral Dissertation.

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Cognitive Style, *College Faculty, Engineering Education, Epistemology, Higher Education, Individual Development, Intellectual Disciplines, Interdisciplinary Approach, Lifelong Learning, *Phenomenology, Qualitative Research, Sex Differences, *Teacher Attitudes

"What is it like to be in teaching together?" has been the guiding question for this hermeneutic phenomenological study with the full-time faculty of a small engineering college. It notes the faculty struggles and conflicts arising from diverse ways of knowing associated with gender and academic discipline differences. It also explores differing faculty orientations toward meeting with each other, learning, being teachers versus doing teaching, and teaching in an engineering environment. Finally, the paper makes specific recommendations on ways of "being open to the possibilities" in the teaching life in order to have the opportunity to realize one's full potential as a human being. This involves encouraging teachers and students to be creative inquirers who appreciate diverse ways of knowing that cross academic boundaries from the spiritual, literary, and artistic domains to those grounded in logic often associated with science and technology. Identifiers—Albuquerque Technical Vocational Institute NM

A study of the feasibility of establishing a Center for Advanced Technology Training (CATT) at the Albuquerque Technical Vocational Institute (TVI Community College, New Mexico) was conducted by members of the Albuquerque business community, government representatives, and college administrators. Phase 1 of the study was an examination of the conceptual feasibility of the CATT, and Phase 2 was the initial implementation plan. The Phase 1 study found a clear gap in the ability of the TVI Community College to meet the needs of the growing economy and employers in the Albuquerque area. Area businesses and industry, as well as the college's administration, found the proposed CATT to be viable and innovative. The second phase continued the team approach of the first phase to plan for: (1) an industry hub and service center; (2) teaching factories; (3) program incubators and catalysts; (4) outreach offices/extension services; and (5) educators and gateways to work. Specific plans for management are detailed. Four appendices list the workgroup members, present detailed concepts of new technologies and skills, discuss key characteristics of CATT models, and offer a list of New Mexico occupations generally requiring postsecondary education. Four unnumbered tables in the text and three in the appendices provide supplemental information about the planned CATT. (Contains 24 references.) (SLD)

Teachers' Stages of Concern Towards Internet

Integration

Report No.—TAC-B-459

Pub Date—Nov 95

Note—9p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Case Studies, *Computer Mediated Communication, *Computer Uses in Education, Curriculum Development, Higher Education, *Integrated Activities, Questionnaires, Sex Differences, Student Attitudes, *Teacher Attitudes, Teacher Education

Identifiers—Internet, West Virginia University

A course was designed at West Virginia University to provide educators with the fundamental skills and knowledge needed to successfully integrate and use computer-mediated communication (CMC) in their educational settings. Content was divided into progressive levels and delivered in the following three phases: (1) Internet hierarchy and access skills; (2) communication infrastructures; and (3) curriculum integration. Throughout the semester, in each of the phases of instruction, an opportunity was provided to assess individual concerns. The stages of concern questionnaire was used to measure participants' attitudes in an evaluation study; a repeated measures design was used, examining seven stages of concern to measure any changes across the semester. The study focused on assessing: (1) the effect of Internet instruction on students' attitudes toward Internet integration before, during and after instruction; and (2) the relationships of gender and computer knowledge on students' attitudes toward Internet integration before, during and after instruction. Results from the internal stages-awareness, informational, personal and management-yielded mixed results, with a general trend towards mitigation of initial concerns regarding the integration of this new innovation. All of the external concerns—consequence, collaboration and refocusing—increased as computer experience increased. Females were found to have higher mid concerns for external collaboration and refocusing. (AEF)

Descriptors—*Classification, *Computer Assisted Instruction, Concept Formation, Elementary Education, *Elementary School Teachers, Holistic Approach, *Integrated Activities, Methods Courses, Models, Science Instruction, Teaching Methods, Thinking Skills, *Videodisks

Identifiers—*Concept Attainment Strategy, HyperCard, *Preservice Teachers

An instructional program was constructed that explored the responses and perceptions of preservice elementary school teachers while finding and using characteristics to construct categories or concepts. The program integrated ideas about teaching thinking skills using computers. HyperCard and videodisk images were used to develop a program so that students could organize and explore concepts based on the concept attainment model, which helps students learn to determine the characteristics of a category. Of 52 preservice elementary teachers viewing the pilot program during a science teaching methods course, 36 students indicated a preference for using a partitive strategy of alternating examples and nonexamples, and 16 preferred a holistic approach in which a set of examples preceded nonexamples. When 26 preservice elementary teachers participated in a second study that compared the construction of categories from line drawings and from the videodisk pictures, it was found that use of line drawings influenced the type of information they recorded. The preservice teachers thought that concept attainment was appropriate for the elementary school curriculum. Further studies will investigate the factors that affect elementary students' responses to a concept attainment task. (Contains 3 figures, 6 tables, and 10 references.) (SLD)

Descriptors—Access to Education, *Distance Education, Elementary Secondary Education, *Formative Evaluation, Higher Education, *Interactive Video, Models, Teaching Methods, *Video Equipment

Identifiers—Informal Communications, *Production Quality, Prototypes, *Rapid Prototyping, Sequencing Skills

Educators participating in distance education have generally not received training in the production of effective video, although they do need to be able to appear in video suitable for effective instruction. The level of video quality required is referred to as "informal" video. Rapid prototyping is a concept in which formative evaluation is implemented using low-fidelity products that simulate the high-fidelity product used in summative evaluation. This technique, which is helpful in the early stages of development, can be used in video production. To find examples of exemplary and problematic techniques, over 32 hours of distance education classes were scanned, and the points of view that operate in a distance education context were identified. Using study results, a prototype was constructed that showed points of view and provided information about sequencing. An appendix contains a pedagogical table, samples of scripts and a video log, and a nonlinear editor screen sample. (SLD)

sion, Models, Program Development, *Teaching

Methods, *Videotape Recordings

Identifiers—Prototypes

"Adapting Instructional Techniques" was developed at Indiana University to improve the performance of teachers in classrooms equipped for interactive audio or video in a distance education setting. The formative evaluation of this videotape is described. The tape suggested modifications for five common instructional techniques used in conventional classrooms: (1) demonstration; (2) discussion; (3) group work sessions; (4) lecture; and (5) question and answer. Three researchers reviewed the initial version of the tape and submitted it for review by eight experienced distance education instructors. The third phase of evaluation consisted of a survey review completed by eight experienced school teachers, who were contemplating offering a distance education course. The prototype version was judged favorably by most evaluators, but some specific suggestions for improvement were given that included use of an advance organizer, more explication, more examples, and improved clarity and legibility of the graphics. An appendix contains the survey instrument. (SLD)

Descriptors—*College Faculty, Computer Literacy, Computer Uses in Education, *Distance Education, Educational Change, Educational Technology, Feedback, Higher Education, Instructional Effectiveness, Interaction, *Teaching Methods, Technological Advancement, *Training, *Videotape Recordings

Identifiers—*Vignettes

During the 1994-95 academic year, a research team at Indiana University expanded the faculty distance education training curriculum to include video vignettes that illustrate instructional techniques used in the regular classroom adapted for distance education settings. This paper summarizes the research literature supporting these efforts and the findings of the researchers. The theoretical basis for the paper is a model that views technological advancement as a series of substitution processes, with change occurring when the new technology is easily substituted for the old. The literature review and preliminary work resulted in informal guidelines for the production of training materials that suggest that a manual and live training can present the basics of technological "button pushing" and that vignettes should include examples of different perspectives and limitations of feedback, as well as examples of use of the document camera. Numerous examples of interaction between students and the instructor and classroom management issues should be given. (Contains 1 figure and 50 references.) (SLD)

Identifiers—UNESCO

UNESCO (United Nations Educational, Scientific and Cultural Organization) aims to ensure that all countries, both developed and developing, have access to the best educational facilities necessary to prepare young people to play a full role in modern society. Understanding information technology (IT) and mastering IT's basic skills and concepts are now regarded by many countries as part of the core of

education alongside reading and writing. To give practical help to all UNESCO countries, the International Federation of Information Processing (IFIP) has been asked to specify a curriculum in informatics for secondary education, designed to be capable of implementation throughout the world. The curriculum has been designed in modular form so that education authorities can select appropriate elements to meet their objectives at the phase of development reached in their countries. Curriculum objectives include: computer literacy; application of IT tools in other subject areas; application of informatics in other subject areas; and application of informatics in professional areas. Three curriculum units are detailed (general education at the foundation level, general education at the advanced level, and vocational education at the advanced level). A section on general implementation issues examines the automation, information, and communications phases. Appendices include: Computer Literacy Units; Informatics in Other Disciplines; General Advanced Level Units; Vocational Advanced Level Units; and a bibliography. (MAS)

Identifiers—Corporation for Public Broadcasting, Language Minorities
In May 1995 the Corporation for Public Broadcasting commissioned a national study into attitudes and perceptions about public television. The study was conducted by Yankelovich Partners un-

der the Omnibus Survey and included Asian, Black, Hispanic, and White Americans. The results demonstrated that public television is a well-established and regularly viewed institution among the great majority of Americans. Awareness of public broadcasting was somewhat lower for Hispanics and viewing was lower among African-Americans, but among minorities overall, the programs most watched were those most watched by the country as a whole. Patterns of public television viewing paralleled those of television viewing overall. All viewers prized public television for its children's programming, its overall educational value, its freedom from violence, and its balanced and realistic portrayals of people from different races and ethnic backgrounds. Public television children's programs are evidently playing an important role in the households of racial and ethnic minorities. However, public broadcasters will have difficulty in serving more Hispanic viewers unless the issue of language is addressed. (Contains 16 unnumbered tables.) (SLD)

Reaching Older Kids with Public Television. CFB Research Notes, No. 81. Corporation for Public Broadcasting, Washington, D.C.

Pub Date—Aug 95

Note—7p.

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Adolescents, Age Differences, *Audience Response, Educational Television, *Preadolescents, *Programming (Broadcast), *Public Television, Surveys, *Television Viewing

Public broadcasting increased the number of programs for older children during the 1994-95 television season. Data from the Yankelovich Youth Monitor, a survey of 1,211 subjects aged 6 to 17 years, provide some information about response to these programs and give some insight into serving the 9 to 11 age group in particular. Television continued to be a significant part of the lives of American children, with the average child reporting viewing nearly 20 hours of television a week. About 23 percent of all children aged 6 to 11 years are using television at any time between 4:30 and 6 p.m. Children regard public broadcasting as generally suitable for family viewing. However, adding programs targeting older children has not increased their viewing. Older children remembered their preschool viewing favorably. While their viewing of public broadcasting has not increased with the additional programming, they are aware of these programs and are not neglecting them because of lack of awareness. It appears that stations can use their facilities and community ties to create activities that encourage public television viewing. (SLD)

A practicum was designed to interest and motivate students to participate in social studies, an area in which lack of motivation has caused many elementary students to do poorly. An active learning, cooperative, and collaborative approach to social studies was taken with a class of 30 fourth graders. Through cooperative learning, simulated touring, thematic units, technology, and online communication, students became interested in social studies to the point that social studies became their favorite activity during "free time." Online experiences were provided through the National Geographic Society Kids Network project "What Are We Eating?" in which 12 schools located throughout the United States worked cooperatively. Analysis of the data revealed that the goals set forth for the practicum were met. Not only did the students become inter-

ested in social studies, but the new attitudes and participation were reflected in improved report card scores. Cooperative grouping and learning were essential elements of the approach. Appendix A lists 15 curriculum resources, and Appendix B gives telephone numbers for state instructional plans. (Contains 5 tables and 49 references.) (Author/SLD)

Identifiers—*Hands on Experience, *Preservice Teachers

This practicum was designed to lessen the computer anxiety of early childhood education majors enrolled in General Curriculum or General Methods courses, to assist them in learning more about computer applications, and to increase the amount of time spent using computers. Weekly guidelines were given to the students, and a hands-on approach was used in a laboratory setting. Students were encouraged to explore applications beyond the minimal guidelines with the understanding that their grades would not be affected adversely by their computer experiences. The 10 students were allotted a 2-hour block of time each week in the technology lab and were encouraged to use the facilities during regular lab hours. Each student used the various types of computers available. Analysis revealed that all of those enrolled demonstrated basic knowledge about computers and basic operating skills, with a majority indicating an increase in their knowledge of computer applications. All students showed an increase in computer usage and a majority of participants expressed a higher level of confidence in using computers and a reduced level of anxiety, and all indicated that they would use computers more extensively in the future. Three appendices present a use checklist, a usage log, and the study questionnaire. (Contains 2 tables and 20 references.) (Author/SLD)

Identifiers—Reform Efforts

Well-constructed Information Management Systems (IMSs) are designed specifically to allow for the unobtrusive and automatic acquisition of data describing the key operations associated with the interlocking cycle of relationships between curriculum, instruction, and assessment. This paper argues that IMS software is an essential element to be integrated into the conceptualization, adoption, and maintenance of any curricula and instructional processes that are designed or implemented. Good responsive software design allows for the establishment of relationships among curriculum elements, instructional process, and assessment and evaluation. Moving toward outcomes-based education will help schools monitor their performance more effectively, but realizing this goal requires heavy demands of teachers and administrators, demands that can be alleviated through IMSs. The new information technology available can assist in

the transformation of schools for the future. (Contains one figure and eight references.) (SLD)

Identifiers—*Nova Southeastern University FL

Almost half of the students at Nova Southeastern University (Florida) are enrolled in field-based programs taught through distance education. Technology of one kind or another has been the backbone for delivering masters and doctoral level education for students at a distance from the Fischler Center for the Advancement of Education at Nova Southeastern University since its inception in 1964. Two programs that rely heavily on technological delivery are the Graduate Teacher Education Program leading to a Master of Science degree and the Child and Youth Studies program leading to a Doctor of Education degree. Facilitated classes using a combination of audio teleconferencing discussions, individual phone calls, and a local facilitator are a recent approach for the master's program. The computer-assisted format of the doctoral program uses a combination of national cluster sessions twice a year with electronically delivered interaction through various means in the intervals. A survey of 25 students in two clusters suggested that e-mail was the most popular student communication choice. Student satisfaction with delivery systems was generally high, even though many had entered the program with minimal or no computer experience. An appendix presents the student survey. Distance education and related technologies make possible the sharing of information and techniques between countries to improve teaching and learning for all students, including those with special needs. Distance education delivery tools include computers, phones, and, more recently, compressed video. These tools have been used in the United States and in other countries, including Costa Rica. In that country, online communications techniques and computers are utilized to develop creativity, logical thinking, and a new attitude of preschool and elementary level students towards technology. Students with special needs are especially helped by the technology. Some of the current and future applications of distance education technologies for this category of students are described. Identifiers—*China, *United States

This paper briefly compares the uses of video as a medium of instruction in higher education in the United States and China and makes tentative explanations from a sociocultural perspective of the differences between these countries in using this medium. Video has been used similarly in a number of ways in both countries, but the ways it is used and the frequency of use have been different. Video as a supplement to instruction is used more frequently in the United States than in China. In the United States it is also used more often to provide input for discussion or other kinds of further work, but in China it is used as an end in itself. The difference lies in the fact that the United States has more equipment and easier access. Chinese teaching still relies on the instructor's delivery, rather than video, and students still tend to feel that the instructor's delivery is superior to video use. To make video more important in Chinese higher education, it will be necessary to change perceptions about delivery as well as to improve access. (Contains 10 references.) (Author/SLD)

This practicum was designed to improve the research and communication skills of eighth-grade students with the integration of technology, mathematics, and science when doing real-experience problem solving. Four units were developed that related the use of technology to skills that are also used in gathering, organizing, and manipulating research data and in communicating the findings in a written or oral presentation. Instruction was given during computer literacy class. Units focused on word processing, using a spreadsheet to organize data and create graphs, using design layout principles, and setting up a database and manipulating data. Six of the original 103 subjects, who excelled in scientific research projects, learned to create presentations using Hyperstudio. Analysis of the data indicated that five of the expected outcomes were achieved. The post performance-based test indicated that 92% of the students mastered outlining and reporting skills, and 93% mastered the graphing skills. Student portfolio assessments revealed that 99% learned how to create slides and overheads. Student confidence in the use of skills to enhance presentations rose substantially. Appendixes contain a student self-assessment and a five-item annotated software bibliography. (Contains 6 tables and 28 references.) (Author/SLD)

Identifiers—ERIC Digests, Internet

A Local Area Network (LAN) allows computing equipment to share information from any device on a network with other devices on the same network. Uses for LANs in schools include sharing printers and programs, centralized file sharing, access to library databases and catalog, cost-effective connection to external networks, electronic mail, school bulletin boards, and sending and receiving faxes. A LAN provides a school information system for administrators, teachers, students, parents and the community. School district uses for LANs include all of those uses in schools, particularly file sharing for student information, transmission of records, electronic mail and shared use of one district connection to the Internet. Common types of LANs are Ethernet and Token Ring; Ethernet predominates because it is easily designed and is composed of data transfer devices which are less expensive than similar Token Ring devices. There are many aspects of LAN design to consider when developing a technology plan for a school building or school district. These considerations include cabling medium, wiring plan, network and electrical outlets, furniture and fixture location, and potential use of space. An additional factor in design planning is the number of network connections per room; the needs of regular, special, technology, and computing classrooms should be considered, as well as the library, administrative offices and other offices. Identifiers—Australia

This paper examines the notion of whether computers can provide teachers with the necessary tools to alter the constraints of the traditional classroom and allow for constructivism and independent learning. The study was carried out at Methodist Ladies' College, a girls' school in Melbourne, Australia; information was collected through teacher interviews, classroom observation, questionnaires, attendance at meetings and professional development activities and small group discussions. Independent learning was found to have a strong chance of succeeding because the generous provision of resources was matched with the demands of the expanded educational goals. Traditional structures, which appeared to inhibit innovation in its early stages, were both challenged and changed as a result of the interplay between goals and resources; however, the environment into which the innovation was introduced was often at odds with teacher attitudes. Overall, it was found that technology may have the potential to free teachers from the moment by moment demands of whole class teaching, enabling them to concentrate on challenging students and catering to students as individuals. Identifiers—Australia

New electronic technologies provide powerful tools for managing and processing the rapidly increasing amounts of information available for learning; teachers, however, have often been slow in integrating computers into the curriculum. This study addresses the question of how prospective teachers construct affective and cognitive models about computer environments. The study involved 177 first year students taking two different courses at a rural university in Australia; the first group was composed of 92 pre-service elementary school teacher trainees who were involved in a technology subject containing a computing component and the second group was made up of students majoring in computer studies. Students in both groups were administered a mixture of instruments that included affective (anxiety and attitude) and cognitive (knowledge and mental models) measures through questionnaires and interviews. Teacher education students as a group were found to be less knowledgeable, more anxious, less confident, and to have less liking for interactions with computers than the other group. Among teacher education students, female students were found to be more anxious and less confident with computers than male students; there were no anxiety differences between male and female students in the computer science course. Carefully planned courses and application experience addressing both affective responses and cognitive understandings are needed in order for teacher education students to be able to use technology effectively in classroom teaching and learning. An analysis and evaluation by the State of North Carolina on its effective use of technology revealed that the state was highly fragmented in the use of and access to technology; the result of this evaluation was the vision of a state-wide network that would link 3,400 sites on a state-of-the-art telecommunications system. Southern Bell created a set of guidelines designed to assure broadcast quality audio and video production and to maintain high standards of construction for North Carolina Information Highway (NCIH) sites. On July 1, 1993, Guilford County Schools (GCS) merged three school systems; it was proposed that by rebuilding the budget inherited from three systems and capitalizing on savings made possible through the merger, GCS could allocate 1.7 million dollars to construct 17 of the 104 technology sites scheduled for the first year. Once constructed, GCS could address the following issues: equity, increased achievement, efficient use of financial resources, enhanced learning opportunities, expanded communication and evaluation. The classroom design for GCS makes the operation of the distance learning lab simple enough to encourage novice users. The use of new technologies in GCS's advanced information infrastructure fuels the creative development of new educational approaches and demonstrates the potential of electronic communication. Identifiers—*South Korea

The purpose of this study was to investigate the present status of computer use and educators' attitudes toward computers in South Korean schools. The questionnaire, mailed to 300 urban and rural elementary, middle, and high schools (response rate: 61 percent) consisted of: (1) demographic data on respondents; (2) computer-using teachers' experiences with computers; (3) availability of hardware and software in schools; (4) school policy on computer education; (5) students' access to computers; (6) factors hindering computer use in schools and factors solving the hindrance problem; (7) evaluation of the results of computer education in schools; and (8) teachers' attitudes toward computers. Overall, South Korean schools have a relatively high level of technology due to the strong governmental support. Computer-using teachers' attitudes tended to be positive and the results of computer education were generally effective. A number of problems were also revealed in the survey that need to be examined further in order to provide insights into problems that occur in computer education and governmental policies. Through thoughtful policy-making and planning, along with the provision of sufficient resources, schools and teachers can expect positive outcomes of computer use in both instruction and administration. Learning As the New Form of Labor.

Pub Date—Apr 95

Note—25p; Paper presented at the Annual Meeting of the American Educational Research Association (San Francisco, CA, April 18-22, 1995).

Pub Type—Reports—Research (143)—Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Computer Attitudes, Computer Literacy, *Design Requirements, *Educational Theories, *Employees, Foreign Countries, Inservice Education, *Learning Processes, Staff Development, Work Attitudes

Identifiers—Dewey (John)

Increased attention in organizational theory on how to improve the design of a learning organization has indicated a need for the development of a theory on how employees learn in, and in relation to, organizations. This paper focuses on the part of the learning process that deals with how learners understand the object at hand, in this case, learning how to use a computer at work. An empirical research project is presented, which evaluates learners' perceptions of outcome from participation in in-service training. Two different employee perceptions are revealed: (1) the computer as a concrete, practical tool which employees must learn to use, and (2) the computer as a tool of information and communication. These different perceptions of computers are related to employees' positions in the organizational division of labor. Based on an instrumental understanding of tools, the two perceptions may be interpreted in terms of the continuity between action and cognition. The general educational theories of John Dewey are also discussed in order to provide a platform for considering the computer as an information tool. (Contains 29 references.) (AEF)

Elman, Lee H.

A Case Study of Channel One in the Instruction and Curriculum of a Middle School.

Pub Date—Apr 95

Note—40p; Paper presented at the Annual Meeting of the American Educational Research Association (San Francisco, CA, April 18-22, 1995).

Pub Type—Reports—Research (143)—Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Case Studies, *Curriculum Development, *Educational Television, *Instructional Materials, Intermediate Grades, Junior High Schools, Middle Schools, Programming (Broadcast), Use Studies

Identifiers—*Channel One, Reality, *World Views

The study examines the instructional use of Channel One in a middle school over 18 months' time. Channel One is a 12-minute educational television news program broadcast daily to over 12,000 U.S. secondary schools. It is argued that while many students watch the programming, there is only a small minority of the classrooms where teachers actively incorporated it into their teaching. Two surveys of students, teachers, and parents were conducted, as well as class observations and teacher and administrator interviews. It is found that the teachers actively using Channel One create a curriculum fragment that leads to "real world" as distinct from "school" knowledge. Students are made aware of personal, political and social ideas not previously understood, and they are found to act on this knowledge by using newly acquired language in venues outside the formal school curriculum. Channel One forces a teacher to choose between the two kinds of knowledge; the majority of teachers in this study decided to forgo any serious consideration of Channel One's worldly knowledge in favor of the formal school knowledge already part of the curriculum. It is suggested that in ignoring Channel One, opportunities for exploring issues of direct relevance to young adults are lost, as well as the chance to contextualize and reflect on worldly knowledge. Descriptors—Access to Information, Adult Education, Computer Assisted Instruction, *Computer Uses in Education, Costs, Distance Education, Educational Change, *Educational Development, Educational Finance, Electronic Mail, Elementary Secondary Education, Equal Education, *Information Technology, Multimedia Materials, *Professional Development, *Telecommunications, Teleconferencing

Identifiers—Internet

This conference was designed to offer a variety of experiences for novice and experienced technology users to facilitate new ways of incorporating information technologies in education. The topics covered in these proceedings range from elementary to adult education and cross all disciplines. The following major themes are discussed: (1) professional development; (2) distance education; (3) funding and costs; (4) partnerships in education; (5) integrating the Internet and multimedia; (6) educational change; (7) equal access; and (8) student and teacher connections through teleconferencing and electronic mail. The proceedings are organized alphabetically by the author and include abstracts (for all) and full text (for some) of the papers. (AEF)

Identifiers—*Charles Sturt University (Australia), Distance Education Centers, Iconicity, Modularization, Open Learning, World Wide Web

Six papers examine innovations and trends in distance learning, frequently drawing upon empirical

research or informal observations on distance learning studies at Charles Sturt University (Australia). "On-Line Study Packages for Distance Education: Some Considerations of Conceptual Parameters" (Dirk M. R. Spennemann) discusses issues in the design and use of interactive teaching packages on the World Wide Web. "A Hypermedia Teaching/Learning Resource for 'Grape and Wine Production'" (Peter Donnan and others) focuses on a hypermedia program used to teach a class in grape and wine production; it reflects on the program's development and evaluates the utility and possible advantages of CD-ROM over print materials. The remaining papers are largely survey results. "Study Duration of Post-Graduate Distance Education Degrees Offered by Australian Universities" (Dirk M. R. Spennemann and Lesley H. Montfort) studies the duration of the average graduate degree program for Australian distance learning students, in light of emerging debate about the benefits of compressing coursework into shorter, high-intensity programs. "Student Evaluation of 'Concepts of Biology'" (Helen Wood) describes a student survey evaluating a biology course. "The Implementation of Modularisation in Tertiary Institutions in Australia" (Sue Davies and Terry Harden) examines the extent to which Australian tertiary institutions have modularized course materials; and "Icons in Teaching Materials—Distraction or Salvation?" (Helen Wood) presents survey results in which students overwhelmingly endorsed the use of icons as visual cues in course materials. (BEW)

Kirkland, C. Eric. *And Others*
The Effectiveness of Television Captioning on Comprehension and Preference.
National Captioning Inst., Inc., Falls Church, VA. Spots Agency—Department of Education, Washington, DC.

Pub Date—Apr 95
Note—17p. Paper presented at the Annual Meeting of the American Educational Research Association (San Francisco, CA, April 18-22, 1995).
Pub Type—Reports—Research (143)—Speeches/Meeting Papers (150)

EDRS Price—MF01/PC01 Plus Postage.
Descriptors—Advance Organizers, *Comprehension, Educational Benefits, Educational Technology, Grade 8, Junior High Schools, *Learning Disabilities, *Special Needs Students, *Student Attitudes, *Videotape Recordings
Identifiers—Captioned Media

The educational and motivational benefits of captioning have been established for people who are deaf or hard-of-hearing as well as for students who have a learning disability or who have limited English proficiency. The primary goal of this study was to determine whether technological enhancements to captioning would benefit children with learning disabilities and the general population of students. An evaluation was conducted of the effects of the speed of captioning on comprehension and the secondary effects of advance organizers on comprehension and preference. Middle school students with learning disabilities were the focus of this study; 317 eighth grade students, 68 with learning disabilities or special education needs, were examined. Half of the classes were asked questions that served as advance organizers for videos on a science topic; the other half viewed videos without advance organizers. All classes were assigned three captioning levels: standard, edited, or highlighted. The use of videos enhanced by captioning and the use of advance organizers was shown to positively affect students' comprehension and attitudes. Irrespective of advance organizers and group identification (general or special education), students' comprehension dropped when captioning was withdrawn. Interest ratings did not correlate significantly to comprehension scores. (Contains 19 references.) (AEF)

Cohen, Andrew
Mediated Collaborative Learning - How CSILE Supports a Shift from Knowledge in the Head to Knowledge in the World. Draft.
Pub Date—Apr 95

Note—39p. Paper presented at the Annual Meeting of the American Educational Research Association (San Francisco, CA, April 18-22, 1995).
Pub Type—Reports—Research (143)—Speeches/Meeting Papers (150)

EDRS Price—MF01/PC02 Plus Postage.
Descriptors—Cognitive Processes, *Computer Assisted Instruction, *Computer Mediated Commun-

ication, *Cooperative Learning, Databases, Elementary School Students, Foreign Countries, Grade 5, Grade 6, Intermediate Grades, Learning Activities, *Problem Solving
Identifiers—*Learning Environment

In Computer-Supported Intentional Learning Environments (CSILE), students use a computer-database system as a tool to store and organize their curriculum-related knowledge as a means of sharing information and thoughts with peers, supporting both individual and collaborative learning. This study contrasts two conditions: face-to-face collaboration and CSILE mediated collaboration where the students can pursue individual learning and collaborative learning flexibly through both oral and written discourse. The subjects were 30 students from a grade five/six elementary classroom. Students worked in groups of 3 for a total of 10 groups; the topic was "Gravity and the Solar System." The study then focused on the roles of three students and how they used oral discourse in the face-to-face and CSILE sessions. Results indicated that in the face-to-face condition, oral discourse is mainly a tool for pursuing or supporting others' individual learning goals, as opposed to constructing and pursuing collaborative ones. In the CSILE condition, students, through oral discourse, construct a joint problem-space, resulting in individual learning that is both a contribution to their own learning and the group's learning. A trace of each individual's process of learning and knowledge is recorded in the database, making it available for inspection, evaluation, and for building on and integrating by themselves or others. (AEF)

Pina, Antonio R. Bartolome
Interactive Multimedia in Western Education.
Pub Date—Jun 95
Note—17p.

Pub Type—Reports—Research (143)
EDRS Price—MF01/PC01 Plus Postage.
Descriptors—Computer Interfaces, Costs, *Educational Objectives, Foreign Countries, Hypermedia, *Multimedia Materials, *Program Evaluation, Quality Control, Questionnaires, *Users (Information)
Identifiers—North America

The purpose of this study was to examine how end-users participate in the evaluation of multimedia programs in North America. Questionnaires were sent to over 100 projects (26 returned) focusing on instructional objectives. Results are discussed in terms of graphics, the user/machine interface, costs, program design, quality indicators, such as help and feedback availability and user control, team production, end-user participation, and the overall product quality. The following conclusions were made: (1) 50 percent of the educational programs were "information distribution programs"; (2) the hypermedia model is widely suited; (3) there was continuous evaluation during the production of the program and participation of end users in this evaluation; (4) an objective mechanism for quality control is not systematically used; (5) the multimedia programs depend heavily on the text; (6) the mouse is the most common interface for the user; and (7) the multimedia conception of communication is being used at a high and costly level by developers and at a low level by professors, due to authoring tools, and because there is no consideration of the personal costs, the differences between budgets have no relation to the quality of results. (Contains 25 references.) (AEF)

Technology, Elementary Secondary Education, Equal Education, Information Sources, Policy Formation, *School Districts, Staff Development
Identifiers—Internet, *Technology Plans

This document shows how education leaders nationwide—many of them part of the National School Boards Association's 345-district Technology Leadership Network—have addressed technology-related policy issues such as copyright, purchasing, network/Internet use, and ethics as well as technology planning topics including staff development, classroom application, school/community communications, facilities and maintenance, equitable access and others. Plan and policy excerpts, including detailed budgets, from over 35 school districts are featured, and the plans of two school districts, Penn-Harris-Madison (Indiana) and Orange County (Florida), are reprinted in full. Appendices include a "toolkit" of planning tips for school administrators and board members, a resource list that offers additional avenues for investigating technology planning and policy-making issues, sample survey forms and job descriptions, and contact information for school districts mentioned in the compendium. Descriptors—Administrator Role, *Boards of Education, *Educational Administration, Educational Change, *Educational Development, *Educational Planning, *Educational Technology, Information Sources, Leadership, Models, Staff Development
Identifiers—*Technology Plans

Board members' role in technology implementation ranges from prompting development of technology plans to gathering community support for funding technology initiatives; they need substantial knowledge to enable them to ask the right questions, absorb new information, make good decisions, set appropriate policies, and lead confidently as technology and their districts develop. This document opens with a six-step model for how boards can assist in their district's technology planning process, then offers tips and exercises to help school boards develop as teams, work with school administrators, and overcome a natural hesitancy toward change. A section is provided recommending top books and journals that board members should review regularly in order to keep up with the opportunities technology offers schools. Topical issues—such as whether computers should be placed in labs or classrooms, when to seek alternative funding sources, how to deter software piracy, why staff development needs special attention, developing safe online networking behaviors, understanding assistive technology for special education, and conducting technology-supportive public relations—are treated in a discussion-guide format backed by factual information and resources. Each topic begins with a central question, background information, tips for success, traps to avoid, and references. Also included are a list of publications from the National School Boards Association's Technology Leadership Network and a calendar of meetings of the Institute for the Transfer of Technology to Education. Identifiers—Academic Computing

New instructional programs and services involving technology are being established which have significant implications for the way teaching and learning will be conducted in the future. This volume contains 10 papers which examine some of the current trends in instructional technology in higher education and discuss implications for teaching and learning in the postsecondary setting. The papers are: (1) "Instructional Technology and the Faculty Member" (Michael J. Albright & David L. Graf); (2) "New Directions in Presentation Graphics: Impact on Teaching and Learning" (J. Thomas Head); (3) "Multimedia and the Teaching-Learning Process in Higher Education" (Annette C. Lamb); (4) "Academic Computing: How to Address the Teaching and Learning Challenge" (Margaret Hazen); (5) "Computer Communications and Learning" (Beryl L. Bellman); (6) "Distance Education: Meeting Diverse Learners' Needs in a Changing World" (Marcia A. Baird & Mavis K. Monson); (7) "The Emerging Potential of Virtual Reality in Postsecondary Education" (James P. Randall); (8) "The Research Library and Emerging Information Technology" (Lucy Siefert Wegner); (9) "The Future of Campus Media Centers" (Michael J. Albright); (10) "Faculty Development's Role in Improving Undergraduate Education" (David L. Graf and others). (AEF)

Descriptors—Annotated Bibliographies, *Audiovisual Aids, Career Counseling, College Entrance Examinations, College Preparation, Computer Networks, *Computer Software, *Educational Counseling, *Educational Resources, Higher Education, International Communication, Nonprint Media, Optical Data Disks, Student Adjustment, *Videotape Recordings

Identifiers—*Internet

This document informs advisers about nonprint information sources on college programs, college adjustment, preparation for college entrance examinations, financial aid, and career planning. The perspective is international; items aimed exclusively at an American audience are avoided. The first chapter concentrates on computer resources for advising—software on compact disks, diskettes, and videotapes. This chapter also concentrates on videotapes, most of which are less than one hour in length. The last chapter brings together printed resources on nonprint materials for advising. Each entry gives the title, date of production, equipment specifications such as type of computer operating system, price, vendor or producer, and a description of the item's contents. Items are coded with symbols indicating whether "essential to overseas advising" or "would be useful as a reference resource," as appropriate. Other features include a list of distributors, procedures, publishers and subject and title indexes. (BEW)

Educational Communications Technology and Its Uses in Wisconsin. Staff Brief 94-5. Wisconsin State Legislative Council, Madison.

Pub Date—14 Sep 94

Note—56p.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—*Computer Mediated Communication, *Computer Uses in Education, Educational Planning, *Educational Technology, Educational Television, Elementary Secondary Education, Federal Regulation, Governmental Structure, Grants, Local Government, *State Federal Aid, State Government, *State Legislation, State Regulation, *Telecommunications

Identifiers—*Wisconsin

This document discusses the uses of educational communications technology in the state of Wisconsin. The report is divided into five parts. Part 1 describes the state and local educational organizational structure in Wisconsin, including the numbers of each type of institution and the students enrolled in their courses or programs. Part 2 examines specific communications technologies available to educational institutions, such as fiber optics, instructional television, satellites, telephones, magnetic media, CD-ROM, and the Internet. Part 3 provides examples of uses of existing communications technologies as well as planned applications. Part 4 discusses recent state legislation relating to the regulation of telecommunications utilities, including planning for the deployment of new high capacity telecommunications equipment and services to educational institutions and grants for telecommunications projects. Part 5 identifies certain federal funds which are available for educational communications technology projects as well as three bills pending before the U.S. Congress relating to the regulation of the telecommunications industry. Pub Type—Guides - Classroom - Teacher (052) — Books (010)

Document Not Available from EDRS.

Descriptors—*Class Activities, *Computer Uses in Education, *Educational Benefits, Educational Equipment, Elementary Secondary Education, Equal Education, Information Networks, Information Services, Instructional Innovation, *Lesson Plans, Online Vendors, *Program Implementation, *Telecommunications

This document discusses the benefits of telecommunications in education and provides information on how to implement an educational telecommunications program. The book is organized into six sections. The first gives an overview of telecommunications and notes reasons for going online. The second section examines factors such as how the classroom is affected by telecommunications, benefits to educators, opportunities for connecting schools with the community, and the ethical and equity issues telecommunications raises. The third section provides details about what equipment is required to use telecommunications, how to assemble it, steps to follow for going online, and what to do once there. The fourth section highlights selected educators and projects that are using telecommunications in varied and innovative ways. The fifth section provides a future view of telecommunications and education as seen by David Thornburg. The sixth section provides numerous telecommunications lesson plans developed by teachers across the country; a matrix of the lesson plans is included at the end of the section, referencing by grade level and curriculum area. The seventh section describes some of the online services and networks valuable to educators, including information on the activities and features they offer, how to access them, and costs. A glossary, bibliography and additional resources are also provided. (AEF)

Descriptors—Access to Information, Community Relations, Cooperation, Financial Support, Leadership, Library Administration, Library Collections, Library Facilities, Library Funding, Library Personnel, *Library Services, *Library Standards, *Public Libraries, Shared Library Resources

Identifiers—*Florida

The need for new standards has arisen in Florida public libraries as a result of the library profession's shift from quantitative, input-based standards to qualitative, output-based standards to measure library performance and excellence. The standards in this document were developed after over 100 participants identified subjects to be addressed and developed recommendations and submitted them to the Standards Working Committee. The final standards are organized in the following broad categories: (1) governance, leadership and funding; (2) personnel; (3) access; (4) materials and collections; (5) services; (6) facilities; (7) cooperation and resource sharing; and (8) community relations. In each section there is an objective defined, addressing the purpose of the standards for the topic area. The standard appears in bold type, followed by a checklist that contains a number of indicators a library can use for self-assessment. Each section includes a list of critical resources. Four appendices provide supplemental information about the working committee, recommended salaries, a glossary, and an annotated bibliography of 65 sources. (SLD)

Identifiers—*Alaska

This guide is a general introduction to school libraries with specific information for libraries in Alaska. More than 60% of the nearly 500 public schools in Alaska have fewer than 200 students, and it is not unusual to find school libraries staffed by people with little or no preparation. This guide answers many frequently asked questions. The overview provides an introduction to school librarianship, in general, and Alaska, in particular. The "Nitty Gritty" section, the real body of the work, takes specific topics and provides a brief explanation of the subject with practical how-to suggestions for implementing ideas or following up with further study. The Nitty Gritty contains 73 topics, designed so that they can be copied for the library. Topics range from accreditation standards for Alaska libraries, through bibliographies for age groups and special interests, to discussions of technology, vendors, and special resources such as story tellers. The 73 topics are arranged alphabetically. (SLD)

Identifiers—Media History, Purchasing Agents

This book serves as a manual for librarians and library students on the wide range of decisions and tasks related to bringing video material into the library collection. It outlines not only many of the milestones in the video industry from 1970 to 1994 but also many of the practices and trends in video marketing, pricing, and distribution. Advice is offered on obtaining information about titles for purchase, deciding what to buy and from which vendor, seeking out discounts, initiating and keeping track of orders, and returning damaged or incorrectly shipped videos. Issues of copyright and legal restrictions on video use and duplication are examined, in particular when and how a library should investigate purchasing public performance rights for its own protection. There is a discussion of potential dilemmas unique to cataloging items in video format. In an attempt to focus on practical use rather than theory, the text provides samples of procedures and forms in use in actual libraries. (Contains 3 charts, 25 figures, 13 tables, and 31 references.) (BEW)

Descriptors—Interpersonal Competence, Job Satisfaction, Job Training, *Library Administration, *Library Personnel, Library Planning, *Management Development, Personnel Selection, Staff Development, Supervision, Tables (Data), Technological Advancement, Training Objectives, Work Environment

Technological, social, legal, economic, educational and political advances have greatly affected the management of staff who have had to adapt to such developments as networking, the independence of educational institutions, income generation, compulsory competitive tendering, quality management and user consultation. This book is a guide to staff management in library and information work. Topics of discussion include the working environment, motivation and job satisfaction, workforce planning, job description and personnel specification, recruitment and selection of staff, staff appraisal, staff training and development, and staff supervision and interpersonal skills training. Six tables and 42 figures provide information on such issues as job satisfaction, training and development needs, managerial styles, job descriptions, and interviews. (Contains 344 references.) Identifiers—*Colorado

Four issues of a newsletter on recent library statistics provide information on Colorado school library media centers, as well as census data on state and local government library spending. A 1994 survey of school library media centers reveals a lack of adequate library media staffing in half of the public elementary and secondary schools. According to another 1994 library survey, Colorado school library media centers are taking a leading role in providing electronic access to information and teaching information literacy. The 1990/91 and 1991/92

preliminary census data on government finances indicates that state and local expenditures for education and libraries are not "keeping pace" with total expenditures by those levels of government. A 1995 survey that compared information from the previous year found that technology of all types is more widely available in library media centers and library media staff participation in standards-based education continues to increase at modest rates; the practice of having classes of students visit library media centers on a fixed schedule appears to be falling sharply. Identifiers—*National Library Services for the Blind

The first part of this directory of National Library Service (NLS) resources for the blind and physically handicapped lists NLS network libraries and machine-lending agencies, arranged alphabetically by state. The information for each library includes its address, telephone and fax numbers, librarian, hours of operation, book and special collections, assistive devices, special services, and publications; Internet addresses are also included for some of the libraries. Other library resources at the national level are listed in the second part of the directory, arranged alphabetically by the name of the organization. Each entry indicates address, telephone and numbers, contact person, hours of operation, eligibility requirements, book collection, subject coverage, reading levels, distribution policy, and catalog availability. Two appendices give NLS network library statistics for FY 1994 on readership and circulation according to medium (recorded disc, braille, and recorded cassette) and on budget, staff, and collections. Identifiers—*Nebraska

This guidebook has been developed to provide Nebraska communities with a practical process to reach a shared vision of library and information service and to put that vision into action in practical steps. The manual is part of the state's Continuous Library Improvement Program (CLIP), a planning process that includes goals and an action agenda. Chapters cover setting the stage for the CLIP and an overview of its planning process, with special attention to getting citizens involved. Creating a library and community profile is an essential first step. Other steps in the CLIP process, from needs assessment through evaluation, are detailed, along with a discussion of trouble shooting. Resources are presented in seven sections devoted to resources for successful meetings, for gathering information, and for the six CLIP steps. An eighth section contains examples of a vision statement, a CLIP plan, and a planning flow chart. (SLD)

Wall, Kay L.
Creating Policies for Assignable Study Space in Academic Libraries.

Pub Date—95

Note—19p.

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Academic Libraries, *Carrels, Higher Education, *Library Facilities, Library Policy, Library Services, Library Surveys, *Policy Formation, *Study Centers, *User Needs (Information), Use Studies

Identifiers—Mississippi, *University of Southern Mississippi

The State of Mississippi authorized the construction of additions to three of the state's academic libraries. At the University of Southern Mississippi, planning for an addition raised the question of assignable study space. Lockable individual study rooms (carrels) and group study rooms were planned, and questions of how to assign them and rules for their use arose. A survey of 52 public academic libraries examined their assignable study space policies to aid in writing a policy for the University's Cook Memorial Library. Nearly every response indicated that the number of carrels available was not sufficient to meet the requests for assignment. Although demand was great, many libraries indicated that actual use was low, with carrels frequently unoccupied. A majority of carrels were assigned to faculty, and most policies provided an academic year or calendar year assignment. Carrels were usually assigned on a first-come, first-served basis, with library personnel making the assignment. Policies for group study rooms were most often based on the staffing available to enforce the policies established. It will be necessary to post regulations for use of carrels and group study rooms and to make all policies clear to potential users. (SLD)

Identifiers—*Alabama Public Library Service
This annual report summarizes activities of the Alabama Public Library Service (APLS) for the fiscal year 1994. It begins with a letter from the director who gives an overview of the report. Technology activities included installation of a new phone system, purchase of a digitized fax microform reader-printer, new booking/cataloging system for the Audio-Visual department, and the formation of an automation committee. APLS began a major building renovation, rearranged the Blind and Physically Handicapped Division for better access, and completed the second phase in installing compact shelving in the warehouse. In the area of training, workshops were conducted on reference, interlibrary loan, copyright, censorship, and the Internet. Circulation and reference statistics are provided. "Al's Wacky Summer Vacation," the 1994 summer reading program, attracted 45,290 children. APLS funding was distributed as follows: 49% state aid to libraries; 30% state-agency operations; 14% federal grants; and 7% federal-agency operations. The names of libraries receiving state aid in 1994 are listed, including amount of aid. (MAS)

Identifiers—*Alabama, Library Services and Construction Act

This document contains the long range plan of the Alabama public libraries. The purpose of presenting this long range program is to meet the requirements of the Library Services and Construction Act (LSCA) and to assess, prioritize, and communicate library needs to librarians, officials, and the public to provide adequate library service to the citizens of Alabama. The introduction to the report gives an overview of the duties and services of the State Library Agency. The needs assessment component is then presented, which covers the following areas: Alabama Public Library; changes in selected population characteristics, 1980-1990; persons with disabilities; disadvantaged, minorities; institutionalized; elderly; limited English-speaking; and interlibrary cooperation and resource sharing. The roles of the Alabama Public Library Service are outlined, and the mission statement is presented. Finally, the following long range goals are outlined, each with correlating objectives and tasks: (1) provide information resources; (2) provide for new construction or renovation; and (3) support resource sharing. Appended materials include maps showing the public library systems and independent libraries in Alabama, statistics on state and county populations by selected characteristics, and a glossary of acronyms used in the report. Identifiers—*Alabama, *Library Services and Construction Act

The Library Service and Construction Act (LSCA) assists the state of Alabama in the extension and improvement of public library services to areas and populations of the state which are without such service or to which such services are inadequate. Federal LSCA monies are administered by the Alabama Public Library Service and are spent on local and statewide projects. This report describes the use of LSCA funds for library programs and services in Alabama's seven congressional districts. For each district, a table of library names, project names, title number, and grant amount is provided. A short paragraph summarizes the major 1994 grants for each of the congressional districts. Member lists are provided for the 1995 LSCA Advisory Council, the Alabama Public Library Service Executive Board, and the Alabama Public Library Service. (MAS)

Developing an Information Infrastructure To Support Information Retrieval: Towards a Theory of Clustering Based in Classification.

Spons Agency—Council on Library Resources, Inc., Washington, D.C.; Department of Education, Washington, DC.

Pub Date—94

Note—22p.; For a related journal article, see EJ 478 034.

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Automatic Indexing, *Classification, College Libraries, Databases, Expert Systems, Higher Education, Hypermedia, *Information Retrieval, *Online Catalogs, *Search Strategies, *Subject Index Terms, Users (Information)

Identifiers—*Cluster Based Retrieval, *Dewey Decimal Classification, Indiana University of Pennsylvania, Information Infrastructure, Library of Congress Subject Headings, MARC, Natural Language, Prototypes

Techniques for building a world-wide information infrastructure by reverse engineering existing databases to link them in a hierarchical system of subject clusters to create an integrated database are explored. The controlled vocabulary of the Library of Congress Subject Headings is used to ensure consistency and group similar items. Each database becomes a system object, and each package within the database is assigned a subject cluster based on its content. An expert system matches the user profile to the information package best suited to need and locates the appropriate database. This is supplemented by a machine-generated natural language mapping scheme to lead the user into the clusters of interest. For the prototype, an object-oriented hypermedia user interface was developed, using MARC records. Packages are grouped into subject clusters consisting of the classification number and the first subject heading/keyword assigned. Use of a hierarchical classification number (Dewey number) makes it possible to broaden or narrow a search at will. It is anticipated that the system will be useful to searchers and will also provide a basis for automated indexing. Fifteen computer prototype screens are presented as illustrations. (SLD)

Pub Type—Books (010) — Guides - Non-Classroom (055)

Document Not Available from EDRS.

Descriptors—*Academic Libraries, *Budgeting, College Libraries, Higher Education, Library Acquisition, Library Administration, Library Expenditures, *Mathematical Formulas, *Resource Allocation

Libraries have always had to determine how to allocate resources for the purpose of purchasing materials. As budgets shrink and as information becomes more open, objective methods of allocating funds become more attractive. This Clip Note examines the use of formulas in the smaller institution academic environment. It identifies elements used in allocation formulas and provides guidelines for college and small university libraries that want to implement formulas in their budget allocation process. A variety of sample documents are presented representing many different types and methods of applying formulas, including weighted, unweighted, percentage-based, and narrative description. (Author)

This book, composed of nine chapters, provides a guide for creating an interdisciplinary literacy program for middle schools. The first part of the book, which incorporates chapters 2-4, describes the role of the media specialist when literature is the content to be taught. The second part, incorporating chapters 5-7 describes the role of the media specialist using integrated language arts as a tool for assessing information, reading and integrating the information, and communicating the results of this process. The last two chapters extend the collaborative efforts to elementary and high schools and describes collaborative planning by teachers and library media specialists. The chapters are: (1) Creating an Integrated Language Arts Program through Collaboration with the LMS; (2) Inquiry Teaching in a Literature-Based Program; (3) Teaching a Framework of Literature: The Four Plots; (4) Extending the Literature Program; (5) Resource-Based Learning with the Information Problem-Solving Process; (6) Resource-Based Units for Grades 6, 7, and 8; (7) Uses of Technology in an Integrated Language Arts Program; (8) Adapting Collaborative Integrated Language Arts Programs to Other Levels: Examples in Elementary and High Schools; and (9) Factors that Foster Collaboration and Examples of Collaborative Planning by Teams. Descriptors—American Indians, Asian Americans, Audiotape Cassettes, Blacks, *Class Activities, *Cultural Education, Elementary Secondary Education, *Ethnic Groups, Hispanic Americans, Latin Americans, *Music

Identifiers—African Americans, Latinos, Native Americans

The purpose of this book, with an accompanying audiocassette, is twofold: (1) to enhance teachers' and librarians' understanding and appreciation for the variety of cultures in the United States; and (2) to show how folklore and music can be used to help children learn about their own and other cultures. The first two chapters present an overview and activities. Chapters three through six focus on one of the four major ethnic groups in the United States: Asians, African Americans, Hispanics/Latinos, and Native Americans. Each chapter includes a specific folklore theme and provides information on the cultural group. A detailed activity is proposed to use with the song on the cassette that corresponds to the chapter's theme. A second, shorter, activity is also included for use when time is limited. The songs are intended to be teaching tools, not sing along or entertainment ones. Information on the instrumentation and musical tradition of the songs are included in each chapter. A select list of collective works of folklore is provided in Appendix A. Appendix B offers enlarged versions of the graphics contained in chapters one through seven. An index concludes the book. Descriptors—*Academic Libraries, *Access to Information, Communication (Thought Transfer), *Computer Mediated Communication, Copyrights, Costs, Electronic Publishing, Faculty Promotion, Foreign Countries, Higher Education, Information Systems, Library Role, Publishing Industry, Research Tools, Scholarly Journals, Tenure

Identifiers—*Canada, Paradigm Shifts, *Scholarly Communication

The challenges and opportunities presented by fiscal constraint, new technologies and an information "explosion" require that universities and their libraries develop a system by which scholars and students can access information when it is needed. This discussion paper in English and French, is the first of a series of papers intended to raise awareness of important issues in academic libraries' support of scholarship in Canadian universities, to describe initiatives which address these issues, and to propose strategies for dealing with them. The ability of Canadian academic libraries to provide access to scholarly information is increasingly constrained by the worldwide proliferation and high cost of scholarly publications and the limitations of Canadian copyright legislation and copyright practices. This has a significant impact on the role of research within the academic community and on university promotion and tenure practices. Any new system that seeks to replace the current paper-based scholarly communication system will be expected to: restore scholar centrality; be network-based; be able to support all formats; protect the copyright interests of both scholars and institutions; be responsive to the values of peer review; base prices on actual costs; be timely; and provide the tools to create, convert, and organize the available information. A number of projects are underway among the academic community and by the federal government that address these needs. Appendices provide a list of task force representatives, descriptions of the roles of the National Library of Canada and the Canada Institute for Scientific and Technical Information of the National Research Council of Canada, and a discussion of academic library studies in the United States and the United Kingdom. Suggested readings, Internet and UseNet newsgroups and a listserve are also provided. (AEF)

Descriptors—Class Activities, *Computer Uses in Education, *Educational Resources, *Elementary Secondary Education, Instructional Materials, Teaching Guides

Identifiers—*Internet

This guide is written for the K-12 teacher or librarian who cannot afford the time or expenses to

attend workshops or does not have the patience to read through densely worded treatises about the Internet. Organized into three modules, "Learning the Internet," "Teaching the Internet," and "Acquiring the Internet," this book makes a complex subject understandable. The guide shows how to use the Internet tools (world wide web, email, gopher, and more) to find K-12 projects, reference sources, school assignments, strictly-for-fun stuff, current information, pen-pals worldwide, team projects with other students around the world, special education resources, story-hour sites, and more; explains the Internet vocabulary in understandable terms; offers a variety of strategies for teaching students, their parents, and colleagues about the Internet; tells where to find the Internet resources to keep up professionally; and helps with administrative and policy issues. Sample acceptable use policies are provided for administrators. (MAS)

 Descriptors—Classification, Foreign Countries, Information Sources, *Library Collections, Library Personnel, Library Policy, *Library Services, Nonprint Media, *Photographs, *Slides, *Visual Aids

Identifiers—Canada, United States
 Focusing on slide and photograph collections that document art, architecture, design, and related fields, this book provides a comprehensive guide to more than 500 visual collections in libraries and institutions throughout the United States and Canada. Listings provide complete information about the collections, including the name and title of an individual in charge, phone and fax numbers and electronic mail addresses, extent of research and borrowing privileges, hours, site of collection and staff, holdings, subject concentrations, special collections, circulation, classification, and cataloging. Collections are organized by state or province, city, and institution. Appendices present a brief history of Canadian Visual Resources Collections and a listing of visual resources organizations and journals. Indexes provide information according to institution, personnel, type of collection, and subject. (AEF)

 Descriptors—Books, Childrens Libraries, *Childrens Literature, Early Childhood Education, Guidelines, *Infants, *Learning Activities, *Library Planning, *Library Services, Picture Books, Program Development, Program Evaluation, *Toddlers

Identifiers—Fingerplays
 While librarians have traditionally provided story times for 3- to 5-year olds and more recently for toddlers, it is important to introduce children to books and libraries at an even earlier age. Young children's intellectual development is faster than that of any other age group. This book is a guide to developing library programs for babies and toddlers. The first part of the book discusses planning, presenting, and evaluating programs, as well as tips for success; selecting and presenting picture books, oral rhymes, literature and activities; and using alternate media, such as live music, audiotape recordings, videos and film. Fifty-two activity sheets (one for each week of the year) are provided; they incorporate songs, rhymes, fingerplays, and recommended picture books. The book also addresses such practical issues as first-program jitters, handling unruly toddlers, and coping with burnout. A subject guide to the activities, a bibliography of picture books, further reading and resources, and multilingual multicultural resources are provided. (AEF)

Identifiers—*Internet, World Wide Web

This book examines real-life projects involving Internet access, use, and financing in libraries. It focuses on how becoming an Internet provider has improved many libraries' public visibility, level of service, and communication with other educational or community institutions. Chapters include: (1) "Setting Up an Internet Users Group in the Public Library" (Carolyn Caywood); (2) "Wendy's Connects Billings, Montana" (Bill Cochran); (3) "Internet and the Corporate Library: Creating New Opportunity at the Apple Library" (Monica Ertel); (4) "A Small Special Library in the University Makes Itself Bigger with the Internet" (Mary C. Pettengill); (5) "Mushing the Net in Alaska" (Susan Elliot & Steve Smith); (6) "The Texas State Electronic Library: Giving Texans 'All They Need to Know' Through a Single Source" (Mike Clark & M. Lisa deGruyter); (7) "Maryland's Sailor Project: A Library Gateway for Statewide Access to the Internet" (Rivkah K. Sass); (8) "Metro Net Library Consortium: A Model of Public Libraries as Internet Providers in Michigan" (Gerald M. Furi and others); (9) "Internet Use by Rural Public Libraries: An Examination of Two Programs in the Hudson Valley of New York State" (Denise A. Garofalo); (10) "The Internet in Depository Libraries: Better Service, Higher Stress" (Doreen L. Hansen); (11) "Student Employees Enhance Internet Expertise for a Liberal Arts College Library" (Terry Metz); (12) "Implementing the Internet at Syntex: Collaboration between the Library and Information Systems" (Pamela Jakko and others); (13) "Finding a Place in an Advanced Networking Environment: The Library of the Stanford University Graduate School of Business" (Robert E. Mayer & Suzanne Sweeney); (14) "Pikes Peak Library District's MAGNET" (David R. Clark); (15) "Wish Lists Come True at the Hewlett-Packard Laboratories Research Library" (Eugene Prime and others); (16) "UtahLINK: A Model for Statewide Educational Use of the Internet" (Sharyl G. Smith); (17) "Literacy on the Internet: The National Institute for Literacy and State Literacy Resource Centers World Wide Web Information Network" (Thomas Eland); and (18) "A Regional Free-Net and Internet Access" (Judy Hallman). A list of Internet addresses mentioned in the text and a glossary are appended. (Contains 109 references.) (BEW)

Achieving a Curriculum-Based Library Media Center Program: The Middle School Model for Change.

American Library Association, Chicago, Ill.
 Report No.—ISBN-0-8389-0660-5

Pub Date—95
 Note—146p.

Available from—American Library Association, 155 North Wacker Dr., Chicago, IL 60606-1719 (members: \$22.50; nonmembers: \$25).

Pub Type—Guides - Non-Classroom (055)

Document Not Available from EDRS.

Descriptors—Change Strategies, *Course Integrated Library Instruction, Instructional Design, Intermediate Grades, Junior High Schools, *Learning Activities, Learning Resources Centers, *Library Planning, Library Services, *Library Skills, Middle Schools, Models, *Program Development, Program Evaluation, *School Libraries, Student Characteristics, Student Needs

This book is a guide to the planning, implementation, and evaluation of a curriculum-based library media center program; although based on a middle school model, the tools are adaptable to any school setting. The first section defines a curriculum-based library media program and discusses the concept of change, including how to enlist support for change. The second section concerns understanding student needs and characteristics of students that shape the curriculum. The third section covers how to gather information about the school program, facility, and

surrounding community. The fourth and fifth sections deal with planning a curriculum-based program and planning curriculum-based activities; the planning model, program priorities and library media committee involvement as well as the benefits of collaboration, instructional design, activities and concerns, and scheduling library media activities are discussed. The sixth section concerns teaching information skills and the seventh section, supporting personal development. The eighth section discusses evaluating a curriculum-based program. Appendices provide planning aids and examples, instructional planning aids and examples and record-keeping forms. (AEF)

Document Not Available from EDRS.

Descriptors—Desktop Publishing, Exhibits, Information Sources, *Library Development, *Library Planning, Library Policy, *Library Services, Mass Media Use, Program Evaluation, Publications, *Publicity, *Public Relations

The purpose of library public relations is to develop ongoing programs of contact between the librarians and the population groups that they serve. This book is a guide to creating a library public relations program or for improving an existing program. The information is divided into six sections, and sources of additional information are included at the end of the chapters. Chapter 1 discusses news releases, photo releases, and public service announcements. Chapter 2 covers how to create an exhibits program, which includes designating authority, developing a policy, identifying space, equipment and budgetary needs, preparing a schedule and publicity, and evaluating the program. Chapter 3 explains the creation of a library publication; the purpose, editorial policy, budget, distribution mechanisms, general layout, and evaluation are covered. Chapter 4 describes how to create a special event and includes developing strategies and a checklist, creating the budget, considering logistics, planning the publicity, and evaluating the event. Chapter 5 discusses desktop publishing and the importance of diversity and image and chapter 6 provides an annotated bibliography of significant resources for librarians to use when planning a public relations campaign. (Contains 15 figures.) (AEF)

Identifiers—*Commission on Preservation and Access, *Digital Technology

The Commission on Preservation and Access was established to foster and support collaboration among libraries and allied organizations in order to ensure the preservation of the published and documentary records in all formats and to provide enhanced access to scholarly information. The Commission's newsletter keeps preservation and access personnel updated on current developments, issues, and technologies in the field. This document consists of 10 issues of the newsletter published in 1995 (July-August and November-December were

combined issues). Highlights include a study on archiving digital information (January); a project for digitally encoding finding aids and an introduction to a new report series on international preservation (February); the affiliation of the Commission on Preservation and Access with the Council on Library Resources and the second issue of the international preservation report series (March); the creation of the European Register of Microform Masters as a central database for microfilm materials sharing (April); a definition of preservation and a statement on fiscal year 1996 appropriations for the National Endowment for the Humanities (May); the establishment of a National Digital Library Federation (June); a report on magnetic media (July-August); an international program series report on preservation and access activities in Latin America (September); a report proposing options for scholarly involvement in preservation (October); and the establishment of principles for the National Digital Library Foundation (November-December). Descriptors—*Archives, *Environmental Influences, *Information Storage, *Library Collections, Library Technical Processes, Magnetic Disks, Photographs, *Preservation, Printed Materials, *Records Management

A new method was developed by the Image Permanence Institute for monitoring the effects of dynamic environmental conditions on organic materials in order to make it easier to manage the preservation of library and archives collections. This new approach to preservation management applies to the many types of scholarly resources for which research and academic institutions are responsible. The Time-Weighted Preservation Index (TWPI) provides a new way to measure and quantify how temperature and humidity changes affect the preservation quality of storage environments for paper, photographic, and magnetic tape collections, and any other type of organic material. The concept is illustrated with examples and explanations are given on how relatively small changes in storage conditions can result in significant improvements in the useful life of library and archives collections. Plans for the Preservation Environment Monitor are also described. Appendices provide information on the following: forms of deterioration in organic collection materials, deterioration mechanisms and test methods; specific origins of the preservation index (PI) model and how the PI model compares with other published models; and temperature and RH equilibration in TWPI analysis. (Contains 39 references.) (AEF)

Identifiers—*Caribbean

This report is based on the Organization of Eastern Caribbean States (OECS) Educational Reform Strategy Project No. 5 which found that a Teachers Resource Center (TRC) can be a vehicle to provide essential equipment and materials to schools organized in clusters and to serve as meeting places for officials, principles, and teachers. Approximately 80 educators at various levels from classroom to senior administration were interviewed. Visitation to suggested sites were made and documents were collected and analyzed as provided by the respondents. To develop the educational framework, four basic service areas for a TRC were identified as: professional development, instructional and curriculum development, teachers' resources, and technical support services. Based on the collective information from respondents, site observation, review of the literature, and personal experience, the following are provided: suggested strategies for organizing TRCs; ways that the vision can be translated into action; and implications for each of the following Territories: Antigua and Barbuda, British Virgin Islands, Dominica, Grenada, Montserrat, St. Kitts and Nevis, St. Lucia, and St. Vincent and the Grenadines. The 14 recommendations presented are designed to assist decision makers in moving to the next stage according to their local educational needs and priorities, funding availability, access to facilities, and trained staffing. Appendices provide a list of interviewees by Territory, the OECS Teacher Resource Centers study questionnaire, comparative demographic data, comparative data on schools without equipment or facilities, journals recommended by interviewees, and a sample BVI TRC floor plan. Identifiers—Conceptual Frameworks, Historical Background

Fifty-five information science educators, administrators, and specialists from 22 countries assembled to discuss and debate the following themes: identification of characteristics of work done in the information sector; analysis of the educational needs of the information professional; the role of information professionals in national development; standards and measurements of supply and demand; qualitative, quantitative, and a mixture of methods; research of the "ideal profile" of information, library, and archives professionals; planning for future demands in the information sector. The objectives of the seminar were: (1) to define a conceptual and historical framework; (2) to analyze the advantages and disadvantages of different methods; (3) to report on experiences using different methodologies; and (4) to define the background questions posed to elicit observations and suggestions to make the process work. There were seven sessions: (1) "Approches conceptuelles" ("Conceptual Approaches"); (2) "Le marche de l'emploi du secteur de l'information dans les pays en developpement" ("The Information Sector Employment Market in Developing Countries"); (3) "Exemples concrets de planification de la main-d'oeuvre du secteur de l'information et de la communication" ("Concrete Examples of Labor Planning in the Information and Communications Sector"); (4) "Methodes quantitatives: Problemes et applications" ("Quantitative Methods: Problems and Applications"); (5) "Enquetes sur la main-d'oeuvre et l'emploi dans le secteur bibliotiques" ("Investigations on Labor and Employment in the Library Sector"); (6) "Aspects methodologiques de l'evaluation de la main-d'oeuvre dans le secteur des sciences de l'information et de la bibliotheconomie" ("Methodological Aspects of Evaluation of the Work of the Information Science and Library Science Sector"); and (7) "Quelles consequences pour la formation" ("What Consequences for Education?") Identifiers—Electronic Journals, Electronic Newspapers, *Internet, Listservs, World Wide Web

This directory is the second in an annual series of Internet guides for educators and librarians, and provides tips on access to, as well as addresses for, online resources that support the K-12 curriculum and supplement school library core collections. The listings in the catalog are limited to free and frequently updated resources; over 300 new annotated listings have been added to encompass electronic journals and newspapers, e-mail discussion groups, free-nets, and world wide web sites. Resources are grouped topically, with chapters on art, music and drama; foreign languages; language arts; math and computer science; science; social studies and geography; reference; and school library media applications. Other features include information about national, state, and regional networks, resources for the educator's professional development, and a discussion of the benefits of Internet access for disabled or culturally diverse students. A bibliography and index are also provided. (BEW)

A Study To Determine the Feasibility of Converting the Audio Magazine Program of NLS/BPH from Flexible Disk to Cassette Format. Draft Report.

ManTech Advanced Technology Systems, Fairfax, VA.

Spons Agency—Library of Congress, Washington, D.C. National Library Service for the Blind and Physically Handicapped.
Pub Date—14 Nov 95
Contract—95CLCCT4936
Note—152p.

Available from—National Library Service for the Blind and Physically Handicapped, 1291 Taylor Street, N.W., Washington, DC 20542.

Pub Type—Reports - Evaluative (142) - Numerical/Quantitative Data (110)

EDRS Price - MF01/PC07 Plus Postage.

Descriptors—Assistive Devices (for Disabled), Audio Equipment, Audiotape Cassettes, *Audiotape Recordings, Cost Estimates, *Data Conversion, *Feasibility Studies, Library Services, Nonprint Media, Periodicals, Talking Books, User Needs (Information)

Identifiers—Environmental Risk Assessment, *National Library Service for the Blind

This report contains the results of a study sponsored by the National Library Service for the Blind and Physically Handicapped to investigate the implications of converting its audio magazine program from flexible disk to audiocassette. Specific issues to be considered included whether or not such a conversion would represent: (1) a financial savings in any or all phases of production or delivery; (2) interruption in service to NLS/BPH talking book machine patrons during equipment transition; or (3) any kind of environmental hazard upon disposal of used cassettes. The groundwork of the study involved visits to four potential commercial producers of audiocassette magazines and preparation of numerous pro forma estimates of postage and landfill costs. The eventual recommendation was in favor of the conversion. The report provides suggestions for specifications in the cassettes' production and packaging and for the timespan over which the conversion should be incrementally implemented. It also allays many of the concerns of the NLS/BPH regarding cost (cassettes will likely save the program money if it uses disposable ones rather than ones that are returned to the NLS/BPH for degaussing and rerecording), patron inconvenience (the library reportedly has enough preexisting unassigned cassette machines for any users needing them), and the environment (the cassette are deemed non-hazardous waste). Numerous tables and figures delineate the study results. (BEW)

Technology's Impact on Library Operations.

Pub Date—10 Dec 93

Note—11p.

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Bibliographic Databases, Cataloging, Change, *Information Technology, Library Acquisition, *Library Automation, Library Circulation, *Library Development, Library Networks, *Library Technical Processes, Serials, *Technological Advancement

For the last 58 years, automation has helped to enhance the library system; library operations such as circulation, cataloging, acquisitions, and serials have changed significantly due to technology. Circulation control is often the first activity a library considers automating. In addition to loan transactions, an automated circulation system can perform the following tasks: tracking of circulation materials, checking for excessive number of books checked out, detecting delinquent borrowers, printing out overdue notices, printing out fine statements, enabling rapid access to location or status of items, preparing statistical data of circulation activities, and providing a multiple branch libraries network support. Computer technology has also made a tremendous impact on cataloging. With a bibliographic utility, catalogers are able to recall and transfer a bibliographic record into their computer system where it can be edited through a maintenance feature that automatically creates a MARC record screen for librarians, and a bibliographic screen for patrons. Today, automated acquisition systems provide a close control over purchase orders and funds for printed and non-printed materials. Improvements in hardware and software design have enabled the automation of serials. Functions include ordering, receiving, renewal, and inventory control. Due to technology, libraries now have the opportunity to meet the special needs of patrons in the form of services for the handicapped, information literacy programs, and community outreach activities. Descriptors—*Access to Information, *Child Welfare, Computer Software, Freedom of Information, *Government Role, *Information Dissemination, Law Enforcement, Obscenity, *Parent Attitudes, Parent Responsibility, Parent Role, *Pornography, Sexual Abuse, Telecommunications

Identifiers—Congress 104th, Cyberspace, *Internet, Offensive Speech

This document presents witness testimony and supplemental materials from a Congressional hearing called to address concerns about the Internet becoming a forum through which minors can be exposed to pornographic or otherwise offensive material. It features opening statements by Congressman Steven H. Schiff, chairman of the House Subcommittee on Basic Research, Congresswoman Constance A. Morella, chairman of the House Subcommittee on Technology, as well as Congressmen Pete Geren and Curt Weldon. Testimony is included from two panels of witnesses. The first includes: (1) Anthony M. Rutkowski, Executive Director of the Internet Society; (2) Ann Duval, President of Surf-Watch Software, Inc.; and (3) Steven Heaton, General Counsel and Secretary of Compuserve; all of whom offer background information on the nature and structure of the Internet and an introduction to screening software and other technologies that can assist parents in restricting access to obscene material on the Internet. The second panel includes: (1) Mike Geraghty; (2) Kevin Manson; and (3) Lee Hollander, who discuss the law enforcement perspective—the extent to which police and courts can restrict the activities of the purveyors of cyberporn, problematic issues in attempting legal regulation of the dissemination of information, and outlets for cyberporn-related grievances. Identifiers—Library Services and Construction Act, State Local Relationship, *Wisconsin Division for Libraries Comm Learn

The purpose of this long-range plan is to describe the status of library development in Wisconsin, the needs and problems of libraries, and the possible ways of meeting these needs over the next 5 years. This plan was developed by the Division for Libraries and Community Learning staff, with advice from the Library Services and Construction Act (LSCA) Advisory Committee and the Council on Library and Network Development. The plan reflects reports submitted to the division, surveys, consultations with librarians, trustees, and various statewide planning efforts and studies involving librarians from around the state. The primary focus of the plan is on statewide and state-level library activities, divi-

sion statutory requirements and services, and federal LSCA priorities. The long-range plan is intended to provide a broad framework for division and statewide planning activities, as well as provide Wisconsin librarians and others with a framework for local library and system planning efforts. The contents include: (1) characteristics of Wisconsin affecting library services; (2) the Division's organization and mission; (3) the Division's publications; (4) the Division's 1994-95 highlights; (5) goals for Wisconsin library service; (6) LSCA policies; and (7) 1995-96 LSCA activities. Identifiers—*Wisconsin

The data in this report is drawn from the 1994 public library annual report and represents a snapshot of certain conditions that existed in Wisconsin public libraries at the end of 1993. Trustees and staff can use this data to identify an appropriate peer group and select a service target based on activities reported by that group. This companion to the standards summarizes the source of the data analyzed, provides methods for estimating a library's service population, instructs readers on applying appropriate measures, and provides the data itself, in table form. Service data is tabulated according to 8 input measures: full time equivalent staff per 1,000 population; volumes held per capita; periodical titles, audio recordings, and video recordings held per 1,000 population; print acquisitions as a percentage of holdings; total materials expenditures per capita (print and non-print); and hours open per week (winter). The libraries are grouped into eight population ranges. Within each range, the data was analyzed to define three recommended service targets, representing three levels of effort—basic, moderate, and advanced. Instructions on estimating service population and per capita measures, and the application of the per capita standards are also provided. (Contains 16 tables.) (BEW)

Identifiers—Wisconsin

This manual was assembled to help Wisconsin librarians plan summer children's programming based on the theme "Sportacular Summer." Ideas in the manual were submitted by more than 45 Wisconsin librarians and gleaned from similar manuals

in 5 other states. All materials have been designed to reflect a spirit of fun and to encourage delight in recreational reading. Part 1, "Planning and Promoting Programs," examines generalized fundamentals of planning, promoting, and evaluating programs. Part 2, "Decorating the Library," offers tips for decorating and display ideas and for creating thematic bulletin boards and name tags. Part 3, "Programs and Activities," outlines suggestions for the actual "Summer Sportacular" programs, including guest speaker possibilities, games and activities, sample programs, booklists and audiovisual recommendations, craft ideas, and a sample skit. Part 4, "Giveaways and Games," contains theme-related clip art, puzzles, word games, mazes, coloring pages, and answer keys. Part 5, "Performing Artists," contains a directory of performers from around the state and a performer evaluation form. Part 6, "Sources and Resources," contains lists of professional reading and resources for the hearing and visually impaired, catalogs and other resources. (BEW)

brary Statistics, Needs Assessment, *Public
Libraries, User Needs (Information)

Identifiers—Wisconsin

This manual is provided to help Wisconsin
counties that participate in state-funded public li-
brary systems fulfill their statutory obligations to
provide library service to their residents. It suggests
a range of alternatives, provides a broad outline of
planning considerations, and describes service en-
vironments and possible responses to those settings.
Topics include: the benefits of planning and statu-
tory responsibilities; initiating the planning process;
assessing countywide library service needs; translat-
ing the data into a plan; and getting the plan
adopted. Four appendices offer instructions on sur-
veying for nonresident borrowing patterns, a list of
county planning organizations and resources, 1993
county level service data, and a library resource
inventory form. (DGM/BEW)

tudes, *Library Associations, Library Personnel,
*Library Surveys, Participant Satisfaction, *Pro-
fessional Associations, *State Surveys

Identifiers—American Library Association, Penn-
sylvania, *Pennsylvania Library Association

This report contains the results of a survey sent to
2,883 librarians throughout Pennsylvania, both
members and nonmembers of the Pennsylvania Li-
brary Association (PLA). The nonmembers of PLA
were members of the American Library Association
(ALA), however. The total response rate was 21%
(n=620). There were recurring themes in the re-
sponses from both groups: the PLA is too oriented
toward public libraries and the dues are too high.
The PLA members also reported dissatisfaction
with the local chapters, a need for continuing pro-
fessional education, Legislative Day could be im-
proved, the annual conference is the "crown jewel"
of the organization, a lack of activity in western
Pennsylvania, the Pennsylvania library associations
need to be united, appreciation for PLA's avoidance
of special interest politics, and the PLA should work
for higher member salaries. The survey accom-
plished three things: (1) the association better un-
derstands what the membership thinks; (2) there is
a better definition of who makes up the member-

ship; and (3) it defines a target market to expand
membership base. Three appendices contain salary
charts and membership charts, comments of PLA
members, and comments of ALA-not-PLA respon-
dents. (DGM/BEW)

nology, Interlibrary Loans, *Leadership, *Library
Administration, Library Services, *Research
Projects, Technological Advancement

Identifiers—*Council on Library Resources, Elec-
tronic Libraries, Financial Reports, Information
Infrastructure, Technological Infrastructure

This report emphasizes the plan of the new Presi-
dent of the Council on Library Resources (CLR)
plan to concentrate on the development of leader-
ship in libraries to better manage technologically
advanced services, the transition to the electronic
library, and the economics of information and in-
formation technology. The Council engaged in a
project to foster development of leadership within
the library and information science community, and
has undertaken a study of the costs of interlibrary
lending and borrowing. The "Program Review" sec-
tion highlights activities in human resources, eco-
nomics, infrastructure, access and processing, and
CLR committees; contains a bibliography of 36 pu-
blications and reports resulting from CLR programs
in 1994/95; and describes program guidelines and
grant application procedures. The report concludes
with financial statements of active projects.

Accuracy of References in Five Entomology Jour-
nals.

Pub Date—94

Note—36p.; Master's Research Paper, Kent State
University.

Pub Type—Dissertations/Theses - Undetermined
(040)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Bibliographies, Case Studies, *Cita-
tion Analysis, Citations (References), Compara-
tive Analysis, *Entomology, *Error Patterns,
Periodicals, Publications, *Scholarly Journals,
Scientific and Technical Information

Identifiers—*Error Detection

In this paper, the bibliographical references in five
core entomology journals are examined for citation
accuracy in order to determine if the error rates are
similar. Every reference printed in each journal's
first issue of 1992 was examined, and these were
compared to the original (cited) publications, if pos-
sible, in order to determine the accuracy of the re-
ference. Percentage of total errors was calculated for
each journal, and the errors were sorted by type,
such as an error in an author's name or in pagina-
tion. The study focused on the following research
questions: (1) "What percentage of citation errors
typically occur in the most cited entomology peri-
odical literature? Overall, are the references in these
entomology journals more or less accurate than
those in medical and library science journals?"; (2)
"What types of errors typically occur, and how do
they compare with results of other studies?"; and (3)
"What types of publications do authors make the
most mistakes in citing?" It was found that, on aver-
age, 30 percent of citations in the journals contained
one or more errors. Most of the errors appeared in
journal article titles, with article author names and
pagination errors being the second and third most
frequent. Some types of errors occurred very infre-
quently; these included: journal title, volume, page
and year omissions, and book publication year omis-
sions. Out of the 49 articles in the 5 journal issues
examined, only 3 articles had completely error-free
reference lists. (Contains 24 references.) (AEF)

Funding, Library Personnel, Library Planning,
*Library Services, *Library Surveys, Public Li-
braries, Questionnaires, *Toddlers, User Needs
(Information)

Identifiers—Ohio

This study focuses on library programs and ser-
vices geared towards infants and toddlers, ages birth
to three years old. The population chosen for this
descriptive survey was Ohio's public libraries. Sam-
pling from among the institutions was accomplished
using a stratified disproportionate technique, with
the libraries grouped into strata by size: small, me-
dium and large. The data collection instrument was
a questionnaire mailed to the libraries' directors or
children's librarians. The resulting data was then
examined to determine the number of libraries pro-
viding programs or services and the level and
sources of funding for these programs and/or ser-
vices. These categories of data were also compared
between the different sized libraries to determine if
a potential relationship exists between the size of
the institution and its extent and types of programs
and services being provided to its infant and toddler
patrons and their parents. The majority of Ohio's
libraries were found to have some kind of program-
ing for infants and toddlers. The toddler group
dominates in the area of programming, as do the
larger main libraries. In the area of staffing, the
larger libraries tend to provide more children's li-
brarians than their smaller counterparts. Staff hours
spent on planning for programming for infants and
toddler varied greatly; the small and medium-sized
libraries appeared to have the largest ranges in hours
spent per year in planning. In terms of funding, the
majority of Ohio's public libraries rely mainly on
state provisions. The questionnaire is included at
the end of the document. (Contains 23 references.)

Darrow, Sheila Lorraine

Women's Studies and Library of Congress Subject
Headings: An Examination of Library of Con-
gress's Responsiveness to New, Emerging Fields
of Research.

Pub Date—Nov 94

Note—44p.; Master's Research Paper, Kent State
University.

Pub Type—Dissertations/Theses - Undetermined
(040)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Access to Information, Case Studies,
Change, *Classification, *Information Seeking,
*Library Catalogs, Problems, Scholarly Journals,
*Subject Index Terms, User Needs (Information),
*Womens Studies

Identifiers—*Library of Congress Subject Headings

This research project examined the Library of
Congress's responsiveness to new emerging fields of
research, using a case study on women's studies in
the mid 1960s and early 1970s. Specifically consid-
ered was the Library of Congress Subject Heading
Division's timeliness in relation to scholarly litera-
ture published between 1963 and 1975. Samples
consisted of 84 monographs and anthologies consid-
ered to be significant to the field of women's studies
and published between 1963 and 1975. Terms and
phrases from the works' title pages and tables of
contents were matched with assigned Library of
Congress subject headings. The results address the
following questions: (1) Which subject headings
have frequently been assigned to such works and
what entry word do they possess?; (2) If the Library
of Congress picked up the terminology of women's
studies scholars, which terms were used and when?;
and (3) What are the implications in terms of ac-
cess? In terms of access, problems occurred with the
use of broad headings with subheadings and the pa-
trons' use of the words "woman" and "women"; the
card cataloger as a result would have to search all
entries under the broad headings to find the desired
items. The number of new terms that became valid
during the time period covered indicates the Library
of Congress's efforts to keep current with the ter-
minology of this emerging area of research. (Contains
31 references.) (Author/AEF)

Descriptors—Accessibility (for Disabled), *Children, *Disabilities, Library Funding, *Library Services, Library Surveys, Mission Statements, Outreach Programs, Professional Development, *Public Libraries, User Needs (Information) Identifiers—Americans with Disabilities Act 1990, Missouri

Since the Americans with Disabilities Act of 1990 has gone into effect, many libraries are evaluating and improving their library services for people with disabilities. There are nearly 110,000 children in Missouri who receive some type of special education assistance because of physical, mental or emotional impairments. Through an anonymous exploratory survey, this study presents an overall description of library programs for children with disabilities in Missouri. A self-administered questionnaire was mailed to the youth services librarians at 97 of 130 Missouri public libraries. A simple random sample was drawn to select the subject libraries; 53 questionnaires were returned. The librarians and libraries in Missouri are beginning to take steps to provide library programs for children with disabilities. Many libraries address the special needs of people with disabilities in their mission statements. Three-fourths of the subject libraries are completely physically accessible to disabled children. A majority of the responding librarians have attended a seminar or workshop related to library service for people with disabilities. To improve library programming for children with disabilities there is a need for: increased special funding, increased efforts to identify and contact children with special needs, and more specific and practical education and training for youth services librarians. Eleven tables present information on programs, accessibility of facilities and library types and size. The library survey is included in the appendix. (Contains 31 references.) (Author)

Highline Community College Outcomes: Student Abilities across the Curriculum and within Departments.

Highline Community Coll., Des Moines, WA.

Pub Date—May 94

Note—34p.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—College Planning, Community Colleges, *Departments, Interpersonal Competence, *Library Skills, *Minimum Competencies, *Outcomes of Education, School Effectiveness, *Student Development, Student Improvement, *Student Personnel Services, Student Responsibility, Two Year Colleges

Identifiers—*Highline Community College WA Compiled in 1994 by participating departments and the Student Outcomes Assessment Committee at Washington's Highline Community College, this booklet lists and explains expected student outcomes and abilities across the curriculum and within departments. The first section describes college-wide student outcomes in the following nine areas: thinking actively, taking responsibility, learning independently, working and learning cooperatively, communicating effectively, appreciating diversity, applying specific knowledge and skills, using technology, and solving problems. This section also lists student outcomes related to library instruction, indicating that students will be able to identify information needs, construct information search strategies, identify appropriate information sources, carry out the information search strategy, analyze information critically, and apply information to the original situation. The section then lists expected outcomes from participation in college student services, including human relations skills; knowledge of systems, diversity, and interdependence; critical thinking; and self-appraisal and self-esteem. The second section describes specific student outcomes

for the following departments: accounting; air transportation; developmental studies and reading; economics and political science; engineering; foreign languages; general business; humanities and literature; journalism; life, earth, and general science; mathematics; medical assistance; nursing; office occupations; parent education; philosophy; printing; psychology; speech; and writing. Descriptors—Communication Skills, Community Colleges, Critical Thinking, Cultural Pluralism, *Educational Strategies, Ethical Instruction, *Evaluation Methods, *General Education, Humanistic Education, Interpersonal Competence, Lifelong Learning, *Minimum Competencies, Moral Values, *Outcomes of Education, Problem Solving, Two Year Colleges

Prepared in an effort to more clearly define and measure general education outcomes at Columbus State Community College, in Ohio, this handbook describes outcomes and associated student behaviors and provides suggestions for assessing the outcomes. Following introductory materials, a list is provided of the college's six general education outcomes, with subtopics provided for each. Next, student behaviors and sample assessment techniques are provided for each outcome subtopic. The following outcomes are presented: (1) think critically, including identifying personal assumptions, examining issues by challenging assumptions, obtaining information from a variety of sources, analyzing information, evaluating issues from a variety of perspectives, drawing inferences, comparing and contrasting information, synthesizing and integrating information, and drawing conclusions; (2) solve problems, which includes recognizing, defining, and analyzing problems; considering alternative solutions; utilizing appropriate methodology; using resources effectively; formulating implementation plans; establishing success criteria; (3) communicate effectively, including writing and speaking clearly and effectively, listening actively, and reading at the two-year college level; (4) demonstrate interpersonal skills, including working collaboratively, engaging in group decision-making, recognizing individual rights and responsibilities, and utilizing conflict resolution strategies; (5) recognize the value of human diversity, including recognizing the contributions of different cultures, clarifying one's own value system, recognizing the value of diverse creative/aesthetic expression and experience, and recognizing an interdisciplinary approach to knowledge; and (6) demonstrate life management skills through valuing lifelong learning, recognizing the responsibility to balance individual and societal needs, recognizing human dependence on the environment, evaluating career paths, and understanding the role of ethics in life and work. Sample evaluation forms are appended. (KP)

Descriptors—Administrative Principles, Business Administration, *Business Skills, *Curriculum Development, Economic Development, *Educational Demand, Educational Improvement, *Educational Needs, *Education Work Relationship, Employment Potential, *Entrepreneurship, Free Enterprise System, Models, Postsecondary Education, Role of Education, Secondary Education Entrepreneurship education derives its importance from three factors: a demand among students for information about entrepreneurship; a need to provide students with skills related to making jobs, rather than training to take existing jobs; and a related need for economic growth through job creation. According to a 1994 national Gallup poll, 7

out of 10 high school students wanted to start their own business, but most showed remarkably little understanding of entrepreneurship. To provide students with entrepreneurial skills, educational efforts must focus on the following three attributes of entrepreneurship: (1) the identification of market opportunity and the generation of a business idea to address the opportunity; (2) the commitment of resources to pursue the opportunity in the face of risk; and (3) the creation of an operating business organization to implement the idea. A useful model for implementing and supporting an entrepreneurship program identifies three elements: an "initiator" able to identify market opportunities and lead others; a development team recruited by the initiator to assist with human resources, finance, marketing, selling, development, manufacturing, and quality management; and a constituent group of community members with a stake in the growth of the venture. Unfortunately, current curricula fail to even address the initiator element of entrepreneurship. To facilitate the needs of today's youth, educators must provide true entrepreneurship education by focusing the curriculum on the role of the initiator. Contains 14 references. (MAB)

Factors Contributing to Professional Growth at Assiniboine Community College.

Pub Date—95

Note—121p; Master's Degree project, Brandon University.

Pub Type—Dissertations/Theses - Masters Theses (042) — Reports - Research (143) — Tests/Questionnaires (160)

EDRS Price - MF01/PC05 Plus Postage.

Descriptors—*College Faculty, Community Colleges, Educational Environment, *Faculty College Relationship, *Faculty Development, Foreign Countries, Job Satisfaction, *Performance Factors, Professional Development, *Teacher Attitudes, Two Year Colleges, *Work Environment

Identifiers—*Assiniboine Community College MB

A study was conducted to determine what the faculty at Assiniboine Community College (ACC), in Manitoba, Canada, perceived were major factors affecting their professional growth. A survey was developed and distributed to all 81 full-time instructional staff at ACC to obtain the data for the study. The data, based on responses from 55 faculty members, were subjected to t-tests for paired samples, factor analysis, and a stepwise multiple linear regression. The factors were grouped into five clusters: professional growth, logistical support, working environment, student issues, and external forces. The statistical analyses identified the following four factors found to significantly affect the faculty's professional growth: opportunities for advancement, policies and procedures, professional feedback, and staff development. In addition, statistical and content analyses of the data identified many factors where the faculty perceived significant differences between the existing situation at ACC and what they felt would be "ideal." Study conclusions included the following: (1) working conditions at the ACC were significantly different, usually worse, than conditions expected in the ideal situation; (2) faculty did show the negative attitude hypothesized in the study problem; and (3) a significant and negative relationship was found between several factors and the professional growth of faculty. Recommendations for addressing faculty concerns and data tables are included. Contains 42 references. The survey instrument is appended. (Author/TGI)

Descriptors—Academic Achievement, Community Colleges, Course Evaluation, *Curriculum Evaluation, *Instructional Effectiveness, *Outcomes of Education, *Prerequisites, *Required Courses, Student Attitudes, Success, Teacher Attitudes,

Two Year Colleges

Identifiers—*California Community Colleges

In 1994, the Chancellor's Office of the California Community Colleges funded a study to determine the effect of pre-, co-, and advisory requisites on target course outcomes at nine community colleges. Quantitative data were gathered on student success in target courses and retention, while qualitative data were collected through spring 1994 surveys of student perceptions of requisites and faculty perceptions of student preparedness in target courses. The study also considered the degree of curriculum alignment between required course exit and target course entrance requirements, as well as the degree of instructional alignment between target course outcomes and actual curriculum and strategies used in the classroom. Outcomes were gathered for 7,512 students grouped by those who completed requisite courses and those who did not. Students who completed prerequisite or advisory courses in computational and communication skills were found to be more successful in target courses than students who did not. In addition, results from faculty and student surveys were very similar to those of the quantitative data. Instructional alignment of target courses ranged from moderately to highly aligned, with requisites having a positive effect on student outcomes. Age was the only additional measure beyond requisite preparation that had any effect on student outcome, with older students more likely to succeed than younger students. The student survey instrument is included. (TGI)

Descriptors—*Academic Advising, Community Colleges, Content Analysis, Core Curriculum, Course Content, *Course Evaluation, *Educational Legislation, Educational Practices, Introductory Courses, *Prerequisites, *Required Courses, *School Policy, Two Year Colleges

Identifiers—Grossmont Cuyamaca Community College District CA

Focusing on prerequisites, corequisites, and advisories on recommended preparation for existing courses in California's Grossmont-Cuyamaca Community College District (GCCCD), this document explains new Title 5 regulations adopted by the district Board in October 1994 and provide guidelines for implementation. The following sections are provided: (1) an overview of the new regulations; (2) definitions of prerequisites, corequisites, and advisories on recommended preparation, including a chart of seven types of requisite courses (i.e., standard, sequential, cross-discipline, basic skills, performance, health and safety, and recency) and methods of justification for each; (3) a discussion of content reviews, or course-by-course determinations of what is appropriate in establishing requisites, and data collection in the GCCCD, used to validate the relationship between requisites and improved performance in target courses; (4) a description of five suggested steps in performing a content review, including assembling a faculty panel, identifying fundamental entrance skills, matching exit skills of required courses to the entrance skills, obtaining the appropriate forms, and keeping copies of forms and worksheets; (5) a review of procedures available to students to challenge prerequisites, including grounds for challenges; and (6) additional rules related to the identification of requisites in official college publications and methods for determining student satisfaction of requisites. Appendixes provide sample content review forms related to entrance, corequisite, and exit skills. (TGI)

An Analysis of Success Indicators for Latino Students at Long Beach City College.

Long Beach City Coll., Calif.

Pub Date—94

Note—103p.

Pub Type—Reports - Research (143) — Tests/Questionnaires (160)

EDRS Price - MF01/PC05 Plus Postage.

Descriptors—*Academic Persistence, Community Colleges, Educational Policy, Family Influence, Financial Support, *Hispanic Americans, School Holding Power, *Student Attitudes, *Student Characteristics, *Student Educational Objectives, Student Motivation, Student Needs, Two Year Colleges, *Two Year College Students

Identifiers—Hispanic American Students, *Latinos, Long Beach City College CA

This project was undertaken to gather data on the experiences and success of Latino students at Long Beach City College (LBCC), in California. Reviews were conducted of demographic trends and the educational status of Latinos nationally and at LBCC to determine barriers to success and strategies for improving educational equality and success. Surveys were then administered to 152 Latino students at the college, requesting information on demographics, educational goals, and levels of support and participation in school activities. Study results included the following: (1) internal institutional factors contributing to student success both nationally and at LBCC were counseling, financial aid, computer and independent study labs, special workshops and presentations for students, and study groups, while external factors included support from family and friends, financial support, and having focused educational goals; (2) as for respondents to the student survey, 69.1% were female, 21% were between 18 and 19 years old, and 36.2% were Mexican-American; (3) only 18.4% of the students indicated that they had not declared a major; (4) 48.7% were not receiving any financial aid; (5) 35% indicated that they participated in extracurricular activities; and (6) 88.2% indicated that they had someone in their family who supported their educational endeavor. Appendixes provide an executive summary, the survey instrument, a summary of results, and student comments. Contains 67 references. (TGI)

Identifiers—*Arizona

Designed to answer the most frequently asked questions about the Arizona community colleges, this factbook offers organizational, financial, and enrollment data for the state system as a whole as well as individual colleges. First, the State Board's philosophy, mission, and value statements are provided along with a map of Arizona college districts. Next, 1994-95 progress reports are presented for the Board and 19 colleges in 10 districts, including statistical data on enrollments, staffing, and funds and descriptions of major accomplishments for the period. Data on student enrollment and enrollment trends for all the colleges are then presented for 1990-91 to 1994-95, and financial information is detailed for the same period, including the State Board budget for 1994-95. Information on programs of study is provided next, including a curriculum matrix and brief discussions of skills centers, tech prep initiatives, and federal vocational education funding. Finally, a directory of Board staff and lists of districts and colleges are provided. A statistical supplement provides tables of data for 1994-95 for the state's community colleges, covering student enrollment, income sources, expenditures, and numbers and types of certificates issued and staff employed. Descriptors—*Attitude Change, Community Colleges, *Cross Cultural Studies, Cultural Activities, *Cultural Awareness, Cultural Pluralism, *Curriculum Enrichment, Intercollegiate Cooperation, Minority Groups, *Multicultural Education, Pretests Posttests, *Program Effectiveness, Psychology, Student Attitudes, Two Year Colleges, Two Year College Students

Identifiers—Metropolitan Community College NE, Nebraska Indian Community College

In an effort to present multicultural content in a non-threatening and effective way, an intercollegiate, team-taught General Psychology course was sponsored by Nebraska Indian Community College (NICC), a rural college on a Native American reservation in Northeast Nebraska, and Metropolitan Community College (MCC), an urban college in Omaha. The course provided urban students and faculty with the opportunity to participate in Native American cultural events and classes at the reservation college campus. It also offered an opportunity to determine whether cross-cultural contact facilitated by in-class discussions would result in measurable change in awareness and knowledge of multicultural factors. Student awareness and knowledge regarding multicultural issues in psychology were measured through pre- and post-tests using an established instrument, which was also administered to a control group of students in a traditional General Psychology class at MCC. An analysis of responses indicated that the experimental group had higher mean scores than the control group on 13 of 20 questions, while the control group had higher scores on 5, indicating that the traditional course effectively increased students' knowledge and awareness, but that the experimental course may add significantly to that. The study also noted that the small number of participants and the inability to randomly select participants did not allow researchers to draw definitive conclusions. The survey instrument and tabulated responses are appended. (TGI)

Descriptors—*College Mathematics, Educational History, *Mathematics Education, Mathematics Instruction, Mathematics Teachers, *Organizational Development, *Organizational Objectives, Scholarships, *Teacher Associations, Two Year Colleges

Identifiers—*American Mathematical Association of Two Year Coll

This monograph describes the establishment, activities, and accomplishments of the American Mathematical Association of Two Year Colleges (AMATYC), from its foundation in 1974 to 1994. Section I reviews the history of AMATYC, describing the organization's foundation to provide a voice for two-year college mathematics educators and its first annual conference in 1975; the founding of the group's journal, "The AMATYC Review"; AMATYC's affiliation with the Conference Board of the Mathematical Sciences; its growth to 951 individual members and 78 institutional members by 1983; the initiation of pre-conference workshops in 1983; the establishment of an annual \$3,000 scholarship for the winner of the Student Mathematics League Contest in the same year; the formation of AMATYC committees and affiliates on academic computing, developmental mathematics, education, equal opportunity in mathematics, placement/assessment, the Student Mathematics League, technical mathematics, and grants; the shift in the 1990s to national involvement in policy issues; the opening of the AMATYC national office; and the AMATYC mission statement in its original and current forms. Section II lists Mathematics Excellence award recipients for 1984-86, 1988, 1990, and 1992. Section III provides a list of AMATYC presidents and their institutions, conference location and attendance figures, and conference chairs for 1974-94. Section IV highlights AMATYC state level affiliate organizations, listing affiliates' state/region, name, and founding year. Finally, sections V and VI provide an appendix discussing professionalization trends and two-year college

mathematics and a glossary of abbreviations. Contains 11 references. (MAB)

A Study of the Term and Semester Calendars in a Two Year Community College.

Reading Area Community Coll., Pa.

Pub Date—Dec 95

Note—31p.

Pub Type—Reports - Research (143) — Tests/Questionnaires (160)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Community Colleges, Educational Change, *Educational Planning, Educational Strategies, *Employee Attitudes, *Organizational Change, *Quarter System, *School Schedules, School Surveys, *Semester System, Student Attitudes, Student Personnel Services, Teacher Attitudes, Two Year Colleges

Identifiers—*Reading Area Community College PA

In an effort to determine the most effective school calendar system, a task force was formed at Pennsylvania's Reading Area Community College to examine the advantages and disadvantages of converting from the college's current term calendar to a semester system. The task force examined the experiences of 11 other institutions that had undergone similar calendar changes. Three subcommittees were also formed to examine possible effects on campus services. The first subcommittee reviewed issues related to student services, conducting surveys of Student Services staff, transfer students, and 234 current students. These surveys revealed that staff responses to 86% of the survey questions indicated a preference for a semester calendar, while student preferences were split. The second committee examined academic issues, reviewing effects on such student-centered issues as curricula, basic skills development, course transfer, and student course load; such faculty-centered issues as teaching load and the use of adjunct faculty; and such college-wide issues as library use, scheduling, pre-registration, and educational quality. The results of this analysis indicated that a semester system would prove beneficial. The final committee considered financial issues pertaining to enrollment; staffing and non-employee expenses; state, federal, and local funding; continuing education; and conversion costs, finding that conversion would be financially feasible. Appendixes provide the student, employee, and faculty surveys; a term versus semester system student credits estimate; and faculty survey responses. (TGI)

Identifiers—*Mount San Jacinto College CA

Intended to assure equal access of historically underrepresented and ethnic minority students while maintaining excellence in academic standards, Mount San Jacinto College (MSJC), in California, developed this student equity plan. An executive summary reviews state legislation mandating the development of student equity plans, the goals and initiatives of MSJC's plan, and student equity indicators used at the college. The second section provides background information to the development of the plan, while the third provides tables of results from surveys of faculty, staff, and students regarding the campus environment. The fourth section discusses student access at MSJC, providing data on the percentages of ethnic groups in the college service area and student body and suggesting that the college funding base be increased so that all students have access to college. Sections 5 through 8 then provide data by ethnic group and gender on basic skills completion, successful course completion, degree and certificate completion, and transfer. The final section describes MSJC's annual review

model. Appendixes include the texts of California Assembly Bill 4071, related to campus climate, and Division 6 of Title 5 of the California Code of Regulations, related to student equity; survey instruments; MSJC's guarantee of nondiscrimination; an affirmative action plan; data on annual hires; MSJC's sexual harassment policy; campus goals related to affirmative action and the Transfer Center; and a list of members of the Student Equity Committee. Descriptors—*College Role, *Community Colleges, *Community Education, Delivery Systems, *Educational Change, Educational Cooperation, *Educational Development, Educational Facilities Design, Educational Innovation, Educational Planning, Partnerships in Education, Role of Education, School Community Programs, *School Community Relationship, Sociocultural Patterns, Two Year Colleges

As social problems continue to threaten the fabric of American society, the community has emerged as the single entity capable of meeting these challenges. It is increasingly important, then, that community colleges position themselves for the role of rebuilding communities. The loss of traditional support systems, changes in family structure, loss of educational potential, crime, a declining economy, poverty, and an aging population are critical concerns for rebuilding the community. Strategies which can help position community colleges to effectively rebuild communities include the following: (1) redefine the courses, forms of instruction, and delivery methods that make up the education process, focusing new definitions on workforce training and lifelong learning; (2) reconsider the notion of "customer," placing more attention on groups and entire communities; (3) redefine the institution's role in the community as a focal point in a community network designed to foster cooperation and offer guidance for continuing development; and (4) develop the learning community by bridging the gap between traditional and non-traditional education. Although issues related to funding, the loss of college mission, and lines of authority will have to be solved, the community college campus of the future should be a centralized educational, social, and community institution providing an array of services from the public and private sectors. Contains 36 references. (TGI)

Descriptors—*Adult Education, Community Colleges, *Educational Finance, *Enrollment, *Expenditure per Student, Expenditures, Full Time Equivalency, Income, Operating Expenses, *School District Spending, State Aid, Tables (Data), Technical Education, Two Year Colleges, Vocational Education

Identifiers—*Wisconsin Technical College System

Drawn from college data submitted on 1994-95 actual cost allocation schedules, this report provides information on district and statewide program costs for the Wisconsin Technical College System. A brief introduction reviews actual unit costs and ratios for headcount enrollments and full-time equivalent (FTE) students, indicating that the total unduplicated headcount for the system was 434,780 students, at a cost per headcount student of \$1,160, and that FTE enrollment was 59,156 students, at a cost of \$8,525 per student. This section also indicates that total operational cost for the system was \$504,272,000. The bulk of the report contains cost schedules illustrating the following: (1) systemwide operational costs and total budget; (2) systemwide total expenditures and revenues; (3) systemwide staff costs; (4) systemwide materials fees and FTE

student enrollments; (5) statewide costs and FTE enrollment by college; (6) statewide costs per FTE by aid category; (7) costs per FTE by college for college parallel programs, associate degree programs, vocational programs, vocational/adult programs, and community services; (8) FTE students and cost by college for agriculture, business, graphics, home economics, industrial, service and health, technical, television, and general education; (9) FTE enrollment and operational cost percentages; (10) cost ratios per FTE student; and (11) FTE student enrollment percentages. Descriptors—College Faculty, College Programs, *Community Colleges, Degrees (Academic), Educational Finance, *Enrollment Trends, Full Time Equivalency, Governance, Intellectual Disciplines, Program Costs, Salaries, *School Personnel, *School Statistics, State Surveys, Student Characteristics, Tables (Data), Teacher Salaries, Two Year Colleges, *Two Year College Students, Vocational Education

Identifiers—*Florida

Designed to convey timely, accurate, and comparative information about Florida's 28 community colleges, this fact book provides descriptive and statistical data on enrollment trends, college personnel, educational finances, and governance for 1994-95. The report opens with a brief historical overview of the state system from its beginnings in 1933 to the present, including a list of the 28 colleges and their years of establishment. Next, the report presents statistical tables on the state's community college students, including: (1) fall 1994 headcount enrollment by ethnicity and gender; (2) annual headcount enrollment by vocational program; (3) annual full-time equivalent (FTE) enrollment by college and discipline; and (4) degrees and other formal awards by college, ethnicity, and gender for 1993-94 and 1994-95. The next series of tables provide information on gender and ethnic breakdowns of full- and part-time employees and data on salaries of full-time faculty and full-time instructional personnel. Finally, financial information is presented on the system's revenues, expenditures, fees per college, operating budgets, and costs of instruction and support programs. A glossary of terms and a list of members of the state Division of Community Colleges are included. (KP)

Descriptors—*College Freshmen, *College Preparation, Community Colleges, Course Selection (Students), Educationally Disadvantaged, Foreign Countries, *High Risk Students, Nonmajors, Remedial Instruction, *Remedial Programs, School Orientation, School Readiness, *Student Adjustment, Student Placement, *Transitional Programs, Two Year Colleges

Identifiers—*Heritage College PQ

In the fall of 1993, Quebec's Heritage College implemented a reception and integration (i.e., "d'accueil") session to help first term incoming students identified as "at-risk" and "undecided" succeed in their collegiate studies. This report describes the development and implementation of the project, focusing on program courses, guidance- and orientation-related activities, and make-up courses designed to better prepare at-risk students to enter regular programs upon completion of the integration program. The first section describes eight objectives and resulting actions for the reception and integration session. The second section reviews the project methodology, while the third provides definitions of important terms. The fourth section pro-

vides the profile of at-risk and undecided students developed for the project, while the fifth section profiles program components designed to address the needs of at-risk students, highlighting program objectives, recommendations, an introductory course on the principles and techniques of learning, and time and career plan management. This section also profiles components designed for undecided students and those lacking prerequisites, describing objectives, recommendations, and time and career plan management. The final section lists recommendations from the project for the college as a whole, as well as for student services, academic services and faculty, and community-related issues. Appendixes include the questionnaire developed to identify at-risk students, preliminary student survey results, fall 1993 session data, and motions adopted at the academic council. Contains 168 references. (TGI)

Descriptors—Community Attitudes, Community Colleges, Community Surveys, Comparative Analysis, *Crime, Drug Use, Family Problems, Public Education, *Public Health, Social Attitudes, *Social Problems, Sociology, Two Year Colleges, *Violence

Identifiers—Texas (Harris County)

A project was undertaken by a sociology class at Houston Community College, in Texas, to identify which social problems were perceived to be most important by residents of Northwest Harris County. Questionnaires were distributed to a random sample of county residents, requesting demographic information and asking respondents to rate six social problems (i.e., violence, crime, public education, drug problems, public health, and family problems) on a 5-point scale, with 5 indicating the highest level of importance. Space was also provided for respondents to write in other social problems not listed. Study findings, based on responses from 150 residents, included the following: (1) all six issues were considered important by respondents, receiving scores above the 3 midpoint; (2) violence was ranked as the most important issue at 4.56, followed by crime at 4.47, drugs at 4.16, family at 3.94, education at 3.9, and health at 3.78; (3) women rated crime, violence, and public health as more serious problems than men, while men tended to give higher ratings to public education; and (4) racial problems was the most commonly cited other issue, cited by 24 respondents. Appendixes include the survey instrument, a demographic profile of the study sample, a county map, and 10 student papers discussing the study findings. (TGI)

Identifiers—Cowley County Community College

KS
As part of a Total Quality Leadership initiative, Cowley County Community College (CCCC), in Kansas, formed the Leadership for Empowering Academic Development (LEAD) team to develop a process for addressing student needs at CCCC's main campus and outreach centers. This report describes issues covered by the LEAD team and provides recommendations developed by the team. Following a brief introduction which includes the

team's vision statement, issues explored by the team are reviewed in the areas of student assessment, developmental curriculum, advising system, recruitment, and student services. Then, team recommendations for dealing with these issues are presented, specifically focusing on the following: (1) academic placement, focusing on the facilitation of student success rates in English, math and, ultimately, all other courses; (2) student evaluation through comprehensive academic skills assessment, computerized pre-enrollment assessment, and an improved advising process; (3) facilitating communication to improve the advising system; (4) improving the enrollment process through specific enrollment periods, publicity strategies, and increased advisor participation; (5) the development of enrichment courses, programs to prepare re-entering or deficient students, a grading system that facilitates student self-esteem, and referral services for students exhibiting a potential for academic problems; and (6) student services, focusing on child care, job placement assistance, internship coordination, personal counseling/referral system, and handicap services. Appendixes provide a questionnaire and responses from a survey conducted of CCCC developmental educators, information on fall 1991-93 student characteristics, and a LEAD team process flow chart. Identifiers—Wisconsin Technical College System

This report provides longitudinal data on enrollments, finances, programs, and staff for the 16 campuses of the Wisconsin Technical College System, covering the period from 1985 to 1995. The following tables are provided: (1) systemwide headcount enrollment by the aid categories of college parallel, postsecondary (i.e., associate degrees and vocational certificates), continuing education, and community services, 1985-95, and by college, 1994-95; (2) systemwide full-time equivalent (FTE) student enrollment by aid category, 1985-95, and by college, 1994-95; (3) systemwide target population enrollments for females, American Indians, Asians, African Americans, Hispanics, Whites, disabled students, academically and economically disadvantaged students, 1985-95, and by college, 1994-95; (4) systemwide graduate enrollments by aid category, 1985-95, and by college, 1994-95; (5) systemwide graduate employment status, 1984-94, and by college, 1993-94; (6) 1985-95 operational costs by aid category and by college, 1994-95; (7) systemwide revenue sources, 1985-95, and by college, 1994-95; (8) systemwide general state aid, 1985-95, and by college, 1994-95; (9) mill rates, tax levies, and property values, 1986-96, and by college, 1995-96; (10) 1986-96 program fees and out-of-state tuition; (11) 1990-95 customized instruction and technical assistance contracts, and by college, 1994-1995; (12) approved programs offered by instructional division, 1985-95, and by college as of December 31, 1995; (13) FTE's and budget for college parallel programs, 1985-95, and by college, 1994-95; (14) systemwide headcounts, FTE's, and costs for basic skills courses, 1985-95, and by college, 1994-95; and (15) systemwide staff equivalent numbers, 1985-95, and by college, 1994-95. Addresses of district offices and campuses and a list of data sources are included. (TGI)

In introductory psychology courses, the desire to cover content can conflict with the desire to acquaint students with psychological thinking processes. The IDEAL method is a group problem solving quiz technique which addresses both of these goals. In the process, instructors choose key concepts from a given reading and divide the class into groups of four to six students. Each member of each group then chooses a concept to specialize in, completing concept sheets which compare and contrast their concept to other assigned concepts. Groups then determine how to apply their understandings of their concepts to common situations, such as when an individual decides to accompany a group to an event that they do not believe will be enjoyable. Testing is conducted in essentially the same format, with quizzes evaluated on the basis of how aspects of the scenario exemplify the concept in action or how the students apply the concept to the scenario in order to address the question. The advantages of this method for psychology classes are that it makes use of student learning and gives them practice with problem solving, critical thinking, and group interaction skills while teaching the content of the subject area. A disadvantage is that

the amount of material covered must be reduced to allow for time spent on problem solving techniques and teamwork skills. A sample concept sheet is appended. (TGI)

Identifiers—*Messiah College PA

"Active Learning" refers to activities that help students connect new academic subjects with previous knowledge and experiences. This paper is an outline of a senior seminar on making connections between psychology and the broader lives of students. It is assumed that, for many undergraduate students, basic understandings of human nature are linked to the religion, faith, and spirituality fostered in their homes. The senior "capstone" course at Messiah College (Pennsylvania), for example, begins with a fairly objective and analytical comparison of data drawn from psychology and religion. A range of logical options for connecting theological and scientific theories is discussed to help students identify their own religious or theological convictions and epistemological presuppositions. The second part of the course deals with the effect of faith on human behavior or the study of human behavior to provide practical rather than theoretical examples of the interaction between religious faith and behavioral science. The final section of the course focuses on more individualistic and personal connections between psychology and spirituality. Students are exposed to stories of others who have connected the spiritual dimension of human life and the world around them. The purpose of this segment is to engage students in personal meaning-making. Student evaluation data for the course are consistently positive. Fifteen suggested texts are included. (TGI)

Using feature films to teach undergraduate psychology courses can promote active learning for several reasons. Films can reach students with a variety of learning styles, including those with a visual approach to learning. Also, students seem to enjoy commercial films and their use can help decrease levels of monotony from daily lectures. Feature films also provide a context that relates psychological concepts and theories to students' real life experience and illustrate different viewpoints in a situation which may expose students to diverse perspectives and experiences. Feature films can be incorporated into the classroom by designing a course solely around the use of film, showing clips or segments of movies to supplement lectures and discussion, or showing one or two films during the term. Activities that can be used with films include having students write a diary of experiences similar to those seen in personally or socially relevant films, or teaching research methodology by asking students to identify and operationalize constructs evi-

dent in the films. Films may be selected from film guide books; computerized services; and/or suggestions from peers, students, and colleagues. Instructors should view films before using them for violent language and content and be aware of copyright laws. A list of 177 films related to mental health, child development, adolescent development, adult development, aging, disability issues, substance abuse, social psychology, racial/ethnic issues, education, gay/lesbian issues, and Acquired Immune Deficiency Syndrome (AIDS) is appended. Identifiers—*Marist College NY, *School Culture

Despite institutional reluctance to move away from a traditional lecture format for content presentation and written exams and term papers for evaluation, a team-taught course entitled "Integration of Learning Theory and Teaching Methodology" has been taught at Marist College, a small liberal arts college in New York. Rather than dividing the course into two discrete sections taught autonomously by each instructor, both instructors attend and remain actively involved in all class sessions. The course content, objectives, materials, and methodologies are jointly planned and the coursework provides for student collaboration during each of the 12 class sessions and in such creative learning activities as body/kinesthetic projects and presentations, drawing activities, visualizations, and listening to music. In addition, the final examination requires students to work together to demonstrate the application of learning theories. Students are also required to write case-study papers individually or in pairs, while the papers are reviewed by both instructors. Formal student course evaluations have generally been positive, with many students stating that they had never worked so hard for a course, but that they had learned a great deal and felt better prepared to work in groups and engage in complex problem-solving experiences. Despite the program's successes, many administrators and faculty members at Marist have continued to question the course's group work and nontraditional learning activities. (MAB)

Identifiers—Freud (Sigmund)

A truly interactive approach in the classroom involves giving students the freedom to add their own "twist" to course materials and allowing them to decide to some degree how the information will be used. Two learning activities employed in a psychology course serve to illustrate how interactive techniques can encourage students to relate their own experience to course material. The first activity helps students understand the biased impressions individuals hold about one another. Students are

asked to make a collage of images that represent their perceptions of who they are. Next, students ask someone who knows them well to make a similar collage. The assignment concludes with an essay, based on at least eight questions provided by the instructor, analyzing the differences between the two collages. The second activity is designed to understand the somewhat confusing concept of defense mechanisms as outlined by Freud and other psychologists. A group of student volunteers work out skits to demonstrate various defense mechanisms, while the remaining students write brief papers on the same topic. The volunteers then present the skits, and the class must decide which defense mechanism is being demonstrated. Interactive approaches to classroom activities present a means for instructors to move students beyond simple factual and content-based information, engaging them in ways that standard lectures do not. Sample collage questions are included. (MAB)

Although experiential activities require minimal effort and time commitment on the part of instructors to implement, such activities capture students' interest, assist them in understanding course concepts, and generate excellent class discussions. As a test of experiential teaching techniques, several personality scales were used in a social psychology class to engage students in learning about a variety of topics. Thirty-nine women and 14 men enrolled in a social psychology class volunteered to participate in the study. Early in the semester, students completed an instrument measuring demographics, self-esteem, interpersonal reactivity, self-monitoring, and locus of control. At the end of the semester, students completed a questionnaire evaluating the experiential personality scales component of the course. Results of the study indicated that the students: (1) held very positive attitudes about completing the personality scales and using them as a springboard for lecture and discussion; (2) felt that the activity was very interesting and valuable; (3) reported that the activity helped them to grasp the role of dispositional and situational factors in social behavior and understand related concepts and research presented in class; (4) indicated that the activity enabled them to relate material to their own lives; and (5) thought that the component should be included in future classes. Contains 21 references. (MAB)

In an Adolescent Development course at the University of Wisconsin, La Crosse, activities are employed to encourage students to become active learners, to become critical consumers of information regarding adolescents, and to develop an empathetic understanding of adolescents and their experiences. One activity that promotes critical

thinking skills involves an analysis of adolescent experience over three generations, with students interviewing individuals in different age groups and compiling reports of findings in small groups. In another activity, students critique professionally produced videos on adolescent experiences and adolescent sexuality, while other activities involve essays on adolescent sexuality and an end-of-term synthesis paper demonstrating overall knowledge and understanding of adolescents. The course also stresses the development of connected knowing, or the ability to understand and empathize with another point of view. Activities employed to promote connected knowing include asking students to reflect on personal experiences that relate to class materials, eliciting personal affective responses to test taking and to works of literature, and providing opportunities for personal interaction with individuals whose experiences reflect course content. A list of 10 teaching references including 2 films is attached. (MAB)

An innovative approach to teaching undergraduate psychology in a self-directed group discussion format was implemented at Raymond Walters College, in Ohio, based on premises from the active learning and employee involvement movements holding that adults achieve more when they are actively involved in their own learning and that students are capable of taking responsibility for their own learning. In the course, class meetings consist of group discussions and activities, with students required to participate in the discussions and activities, write chapter discussion worksheets for each chapter of text covered in the course, lead one group discussion and one experiential activity per term, and participate in a final group discussion exam. Based on 2 years worth of oral and written comments, learners have consistently described the course as excellent and reported high achievement in communication skills and self-confidence. Faculty comments have pointed to the strong level of participation and enthusiasm among students. Limitations of the format include initial attrition due to introverted or passive students, the need for small classes with longer meeting times, the tendency for grades to be inflated, and discomfort over the "non-teaching" role of faculty. Appendixes provide the course syllabus, a guide to group discussion, sample discussion worksheets, and a sample evaluation form. (BCY)

Identifiers—College of Notre Dame of Maryland. Cooperative learning is defined by an emphasis on positive interdependence among students to learn course materials, face-to-face interaction, individual accountability, the development of interpersonal and small group skills, and group processing of

group functioning. In the last 10 years, lower-, upper-, and graduate-level psychology courses at the College of Notre Dame, in Maryland, have been reorganized to function as collaborative courses. Typical class activities in the courses include small group discussions of assigned reading and exercises, summaries of research articles presented to and discussed in small groups, and integrative group analyses of videos or other presentations. The use of student groups in the courses is guided through several stages, including their formation at the beginning of the term, development, the assessment of groups and individuals, and the resolution of conflicts. Collaborative learning activities employed fall into two categories: long-term projects, involving the completion of a research project and/or presentation by two or more people working together outside of class, and in-class exercises, using spontaneous or instructor-formed groups for a particular exercise only. In reorganizing courses, collaborative learning experiences can be introduced in small stages into existing class formats until faculty are ready to undertake the total redesign of courses. (BCY)

The Research on Trial technique is designed to enable students to think critically about psychological research, to help them apply what they have learned in class in an in-depth way to this research, and to create a classroom environment in which research issues are debated. The technique employs a courtroom trial role-play, with students assigned to either defend or "prosecute" a published research article. In the trial, four students serve as defense lawyers for the article and another four as the prosecution, while the teacher acts as judge, ensuring fair proceedings. The teacher also provides the jury with guidelines on deciding the outcome of the trial, encouraging them to focus on the internal validity of the study's methodology and conclusions and the external validity or the study's applicability to other populations. A fall 1994 evaluation of student participants' perceptions of the technique indicated that students were generally positive about the experience, although there were reports of some group members contributing more than others and of confusion on the part of the jury. Areas that need to be addressed with the technique include dealing with interpersonal tensions that may arise between the role-playing students and providing clear instructions to the jury. Graphs of responses from the student evaluation of the technique are appended. (BCY)

To demonstrate a technique used in introductory psychology courses to introduce students to the phenomenon of illusions, workshop attendees at the Conference on Undergraduate Teaching of Psychology were asked to estimate the dimensions of a standard classroom garbage can placed on a table in the front of the room. Participants were asked to estimate the height and diameter of the base of the can in inches and write their estimates on index cards. In a group activity, the median of participants' estimate of the garbage can's height was determined to be 20 inches, while the median estimate of the diameter of the base was 14.5 inches tall and 10 inches in diameter at the base. Participants were then informed that in previous groups similar overestimates of height were also obtained, while estimates of base diameter usually came within an inch of the actual diameter. Groups were then formed among participants to identify at least three explanations for the overestimation. The demonstration offers a useful means of showing students the practical reality of the materials they study in psychology and presents students with a simple line of research that they can pursue without a laboratory or budget. (BCY)

Identifiers—State University of New York Coll at Plattsburgh.

In 1987, a computerized laboratory component was incorporated into a traditional lower division, lecture-oriented, cognitive psychology course at State University of New York College at Plattsburgh. At first, eight computerized experiments were available for students to participate in as subjects, while students were simply assigned the activities to complete individually. Currently, however, one class period per week is dedicated to a laboratory/recitation session, with groups of six students discussing their experiences with the assigned experiments. Part of the next class session is then devoted to discussing the aggregated results of the experiment and critiquing its design. Because of the addition of the laboratory component, the course is now focused on understanding the process of doing cognitive psychology rather than simply learning about the products of previous research. The laboratory sessions provide increased active learning, increased peer interaction, more informal student and instructor roles, and additional methods of student evaluation. A description of 10 computerized laboratory activities used in the course is appended. (BCY)

Based on the assumption that a hands-on approach would enable students to better grasp the usefulness of concepts presented, a course and laboratory component in non-experimental research methodology, statistics, and computer applications for beginning students was implemented at Ursinus College, in Pennsylvania. The course meets 3 hours a week for lecture and 1 hour for the laboratory, and students are primarily freshmen and sophomore psychology majors. The course, and specifically the

laboratory experiences, place an emphasis on the principle of "shaping," as students progress in discrete and detailed modules from very elemental instruction in and practice with basic computer commands to analyses of their own psychometric scales using correlation and regression routines. The course also emphasizes the principles of "fading" and "concept formation" in that exact commands for accessing data are provided in lab instructions early in the term, with students merely typing in what they are given, but are gradually eliminated from instructions so that students must use acquired concepts. Lab sessions also offer students an opportunity for collaborative learning, as they cooperate and share insights to help each other. Sample student instructions from laboratory sessions related to frequency and correlation exercises are appended. (BCY)

In fall 1994, students in an interdisciplinary Gender Issues course undertook a project to examine gender and communication patterns through analyses of their own videotaped conversations and to relate their conclusions to findings in the literature. Students read two articles on the distribution of home responsibilities between professionally employed men and women and a comparison of the privileges of being white and of being male. Gender-balanced groups of four to six students were then videotaped while they discussed the articles. Students then read materials on gender differences in verbal and nonverbal communication patterns and analyzed the videotapes of their discussions to assess whether the communication patterns described in the literature applied to the groups. The groups then prepared a 2-5 minute version of their tape, an oral presentation of their findings, and a 1-page written summary. Overall, the communication patterns displayed by students closely matched those of the gender-typical patterns described in the literature, with male students tending to take control of conversations by initiating discussions, talking for longer periods, and using more verbal pauses and hand motions. While students were generally not happy with what they saw on the videotapes, they enjoyed the project and the opportunity to analyze their own and others' communication patterns. (BCY)

Based on news accounts, correspondence, conference presentations, and interviews, this collection of quarterly reports provides regular updates on actions taken by California's colleges to cope with difficult economic times. These four reports were produced in January, March, May, and September of 1995 and review the effects of and responses to budgetary shortfalls in the California Community

Colleges (CCC), the California State University (CSU), the University of California (UC), private colleges in California, and selected institutions in other states. Each report contains general comments on trends in the CCC, CSU, and UC systems; discussions of actions taken at specific campuses; and a review of notable occurrences at the state and national levels. Highlights of the 1995 reports include the following: (1) In 1995, the CCC had a maintenance fund of only \$8.6 million to cover \$95 million worth of facilities requests; (2) 15 CCC districts joined a statewide cash management program to meet cash flow needs through pooled borrowing; (3) the 20 CSU campuses raised \$150.4 million from alumni, parents, corporations, and foundations in 1993-94, a 70% increase from 1989-90; and (4) the UC Board of Regents approved a \$145 million dollar budget increase to avert further student fee increases, hire 120 new faculty, and increase faculty salaries by 5%. Kintner, Frederick C.
An Historical and Futuristic Perspective of Articulation and Transfer in the United States.

Pub Date—[96]
Note—43p.

Pub Type—Information Analyses (070) — Opinion Papers (120)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Access to Education, *Admission Criteria, *Articulation (Education), *College Admission, *College Credits, *College School Cooperation, *Community Colleges, *Educational History, *Educational Trends, *Transfer Policy, *Transfer Programs, *Transfer Students, *Two Year Colleges

This essay provides a historical review of articulation and transfer in the United States, and suggests trends for the future. First, the terms articulation and transfer are defined as the totality of services for students transferring throughout higher education and the formulas developed to exchange credits, courses, and curricula, respectively. Next, a historical review of developments in articulation is presented, focusing on the following five time periods: (1) the early decades from the turn of the century to the 1940s, reviewing the first junior colleges' relationship to senior institutions and high schools; (2) the 1950s and 1960s, highlighting the formation of national projects to improve articulation and increasing attention by state governments to transfer; (3) the 1970s, describing key works on trends and policies published in the decade; (4) the 1980s, reviewing issues related to access for disadvantaged populations, remediation, vocational-technical education, proprietary schools, and computerized information systems; and (5) the beginning of the 1990s, reviewing efforts to define a standard model for determining transfer rates. Finally, a summary is provided of the major changes evident in the historical analyses and trends for the future. Contains 105 references. (TGI)

Identifiers—*Hudson County Community College NJ

In an effort to increase enrollment and move from a limited-mission institution emphasizing career-oriented programs to a comprehensive urban community college, Hudson County Community College (HCCC), in New Jersey, implemented a mission renewal process in 1993. The process included a review of mission statements from other comprehensive community colleges, surveys of college and external communities, an all-day mission forum, and the development of the new mission. The effort also involved the following measures to ensure quality: (1) the formation of a Task Force to develop a student retention plan, focusing on the institutional climate, student support, curriculum and instruction, and facilities; (2) staff development activities; (3) the implementation of such marketing enrollment strategies as newspaper advertisements, flyers, cable advertisements, and newsletters; and (4) strengthening general education, student information, and academic programs. The most dramatic evidence of success of the mission renewal process has been the significant increases in enrollment over the last few years, with an increase of 12% for fall 1993 and 15% for fall of 1994. Appendices include an article from "Counsel: National Council for Marketing and Public Relations" (1995), describing HCCC's mission renewal process, reports generated in the mission renewal process related to retention and staff development, and a description of improvements related to budgeting and finances, accounting, management information systems, human resources management, plant operations, and facilities management. This book provides a comprehensive overview of community college education in the United States, emphasizing trends affecting two-year colleges in the past decade. Chapter 1 identifies social forces contributing to the development and expansion of community colleges and the continuing changes in institutional purpose. Chapter 2 examines shifting patterns in student characteristics and goals, rea-

sons for the predominance of part-time attendance, participation and achievement among minority students, attrition issues, and the most recent data on student transfer rates. Chapter 3 utilizes national data to illustrate differences between full- and part-time faculty and discusses issues related to tenure, salary, workload, faculty evaluation and preparation, moonlighting, and burnout. Chapter 4 reviews modifications in college management stemming from changes in institutional size, the advent of collective bargaining, reductions in available funds, and changes in governance and control. Chapter 5 describes funding patterns and their relationship to organizational shifts. Chapter 6 discusses the stability of the colleges' instructional forms and the use of instructional technology. Chapter 7 considers student personnel functions, including counseling, guidance, recruitment, retention, orientation, and extracurricular activities. Chapter 8 traces the rise of occupational education toward a central position in the curriculum. Chapter 9 focuses on remedial and developmental programs and addresses controversies surrounding student mainstreaming and restrictive programming. Chapter 10 examines adult and continuing education, lifelong learning, and community services. Chapters 11 and 12 examine curricular trends and controversies in the liberal arts and general education. Chapter 13 describes research efforts in and about community colleges, while chapter 14 addresses philosophical and practical questions regarding the transfer function and the colleges' role in enhancing progress toward higher degrees. Finally, chapter 15 offers projections for college demographics, organization, curriculum, instruction, and student services. Contains 45 pages of references. (MAB)

Learning Goals and Self-Evaluation: Effects on Children's Cognitive Skill Acquisition.

Pub Date—Apr 95

Note—14p.; Paper presented at the Annual Meeting and Exhibit of the American Educational Research Association (San Francisco, CA, April 18-22, 1995).

Pub Type—Reports - Research (143) - Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Grade 4, Intermediate Grades, *Learning Processes, Mathematics Skills, *Performance Factors, Self Efficacy, Self Evaluation (Individuals), *Student Educational Objectives, Student Motivation

This study explored the conditions under which learning goals might be more effective than performance goals in raising achievement outcomes. Following a pretest, 40 fourth-grade students received instruction and practice on fractions operations. Half of the students were provided with the goal of learning how to solve problems (learning goal); the half were given a goal of solving problems (performance goal). All students in each goal condition evaluated their progress in skill acquisition. Results of the posttest indicated that, compared to the performance goal, the learning goal led to higher self-regulated performance, self-efficacy, skill, task orientation, self-evaluations, and self-satisfaction, as well as lower ego orientation. Self-evaluation and self-satisfaction scores correlated positively with self-efficacy, skill, and task orientation. Contains 21 references. (HTH)

Adolescents' Family Situation and Their Self-Disclosure in Interpersonal Relationships.

Pub Date—Mar 95

Note—14p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (61st, Indianapolis, IN, March 30-April 2, 1995).

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Adolescents, Family Relationship, Foreign Countries, Interpersonal Relationship, *Parents, *Peer Relationship, *Self Disclosure (Individuals)

Identifiers—Poland

This study explored the links between adolescents' family situations and their self-disclosure in

peer relationships. Participants were 378 pupils between 16 and 18 years of age and the same number of parents of both sexes. The parents were of different professions: 80 percent belonged to intellectual families and 20 percent to the working class. The study used Jourard's Self-Disclosure Questionnaire (1964), LaGaipa's (1981) Friendship Scale to assess measures of adolescents' and parents' degrees of self-disclosure and to determine and differentiate interpersonal relationships, and the Family Relationship Test by Anthony and Bene to assess family situation. Results suggest that: (1) family situation affects adolescents' self-disclosure in their contacts with friends; (2) parental influence is particularly significant when the disclosure of information of personal and intimate character is concerned; and (3) the main factors determining adolescents' self-disclosure in their contacts with friends are the atmosphere of mutual friendliness and frank and direct communication among family members. Contains 10 references. (DR)

Descriptors—Autism, Biological Influences, Blindness, *Child Language, Deafness, Developmental Stages, Epistemology, Evolution, *Infants, *Language Acquisition, *Language Processing, Linguistic Theory, *Neurolinguistics, Neurological Impairments, Prenatal Influences, *Psycholinguistics, *Young Children

A major synthesis of the latest research on early language acquisition, this book explores what gives infants the remarkable capacity to progress from babbling to meaningful sentences, and what inclines a child to speak. The book examines the neurological, perceptual, social, and linguistic aspects of language acquisition in young children, from prenatal life to full linguistic capacity. To distinguish what comes naturally from what must be taught, the book also considers language in a larger biological context. It examines comparative data on nonhuman primates and songbirds and looks at special human populations, including deaf, blind, autistic, brain damaged, and tracheotomized infants. This biolinguistic approach raises questions about the evolution of linguistic capacity in the species. The 11 chapters of the book are: (1) "A Biolinguistic Approach to Language Development"; (2) "Faces and Voices: A Perceptual Path to Spoken Communication"; (3) "The Social Capacity for Spoken Language"; (4) "Vocal Communication and Vocal

Learning"; (5) "The Infant Becomes Articulate"; (6) "The Neural Specialization for Linguistic Communication"; (7) "Development of the Neural Capacity for Linguistic Communication"; (8) "The Urge To Convey and the Capacity for Reference"; (9) "Development of Spoken Language"; (10) "Other Paths: The Neurobiology of Linguistic Variation"; and (11) "Reflections on the Path to Language." Contains over 1,200 references. (ET)

 Serving the Needs of At-Risk Students: The Community Approach and Teacher Perceptions of Its Effectiveness.

Pub Date—May 95

Note—52p.

Pub Type—Reports - Evaluative (142) - Tests/Questionnaires (160)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Academic Achievement, *Community Support, Cooperation, Educational Environment, Elementary Education, *High Risk Students, Outcomes of Education, Parent Participation, *Program Effectiveness, Program Evaluation, Program Improvement, Self Control, Self Esteem, Student Attitudes

This study evaluated a program for meeting the needs of at-risk students in a Virginia elementary school. The program, known as the "community approach," was designed to foster the success of at-risk students by increasing parent involvement, allowing more time for student development, improving students' self-esteem and self-control, and encouraging cross-grade communication and collaboration among teachers. For the evaluation study, the teachers, the principal, and the instructional coordinator were interviewed to determine the effectiveness of the designed program. The results indicated that, overall, the community approach was regarded by interviewees as a successful program. Responses indicated that allowing time for student development is pertinent to the situation at the school, parents are more comfortable and more likely to communicate with teachers, the approach has had an impact on the self-esteem and self-control of students, and teacher collaboration was increased across grade levels. Responses also indicated that cooperation was one of the most powerful tools in constructing better programs for children. (Three appendices include interview questions and a summary of recommendations. Contains 23 references.) (AP)

Elementary Teachers' Perceptions of and Reported Strategies for Coping with Twelve Types of Problem Students.

Spons Agency—Department of Education, Washington, DC; Michigan State Univ., East Lansing, Inst. for Research on Teaching; Spencer Foundation, Chicago, Ill.

Pub Date—Jun 95

Contract—400-81-0014; G-1074

Note—735p.

Pub Type—Guides - Non-Classroom (055)

EDRS Price - MF04/PC30 Plus Postage.

Descriptors—Academic Achievement, Aggression, *Behavior Problems, Classroom Environment, *Classroom Techniques, Elementary Education, Extraversion Introversiveness, Individual Development, Interpersonal Competence, Peer Relationship, Personality, Shyness, Social Development, Social Isolation, *Socialization, Student Adjustment, *Student Problems, Teacher Role, *Teacher Student Relationship

Written primarily for teachers who are expected or willing to invest significantly in the socialization role along with their other teaching roles, this report describes results of a classroom strategy study of how elementary school teachers cope with problem students. The report is divided into six parts. Part 1 discusses general principles and techniques for managing classrooms and coping with problem students. Its three chapters include: choosing to work with problem students and creating a context for doing so successfully; general principles and techniques for socializing students and resolving conflicts; and teacher's ideas about coping with problem students. Part 2, which contains four chapters, presents theory and research on coping with low achieving students, failure syndrome students, overly perfectionistic students, and underachieving students. Part 3, which contains three chapters, discusses three types of students with hostility

problems: hostile-aggressive students; passive-aggressive students; and defiant students. Part 4 discusses student role adjustment problems and contains the following three chapters on types of students whose behavioral characteristics make it difficult for them to act as students are expected to act in most classrooms: hyperactive students; distractible students; and immature students. Part 5 discusses problems in students' social relationships and contains two chapters on students whose problems lie primarily in their social interaction with peers: students rejected by their peers, and shy/withdrawn students. Part 6, which contains the concluding chapter, looks at some of the main findings of the Classroom Strategy Study, at events that have developed since data collection that might affect their relevance, and at teacher role issues introduced in the first chapter. Contains approximately 317 references. (HTH)

Descriptors—Adolescents, *Child Development, *Child Rearing, Children, Cognitive Development, Elementary Secondary Education, Emotional Development, Infants, Language Acquisition, Moral Development, Nutrition, Physical Development, Pregnancy, Preschool Education, Sex Role, Toddlers, Videotape Recordings, Workbooks

An integral part of The Developing Child video modules from the same producer, this workbook provides a very useful clearly formatted modular presentation, 30 modules in all, of information on all areas of child development. The workbook can be used with the videos, without them as a stand alone tutorial or review source, or as the outline for a more encompassing course in the area of child development. The 30 modules constitute a survey of current child development, covering theory, history and trends, methods, bioscience background, fetal through adolescent development, and a variety of related topics. Each module includes five sections: overview, key questions to consider, vocabulary, instructional objectives, and self test. The 30 modules are: (1) Observation; (2) Study of the Child: History and Trends; (3) Theories of Development; (4) Context of Development; (5) Conception and Heredity; (6) Prenatal Development; (7) Understanding Pregnancy; (8) The Neonate; (9) Infancy: Landmarks of Development; (10) Infancy: Beginnings in Cognition and Language; (11) Infancy: Early Relationships; (12) Infancy: Self and Social World; (13) Early Child Care and Education; (14) The Child in the Family; (15) Nutrition; (16) Exceptional Children; (17) Toddlerhood: Physical and Cognitive Development; (18) Toddlerhood: Emotional Development; (19) Preschoolers: Physical and Cognitive Development; (20) Preschoolers: Social and Emotional Development; (21) Play; (22) Language Development; (23) Self-Identity and Sex Role Development; (24) Moral Development; (25) Middle Childhood Growth and Development; (26) Middle Childhood: Society of Children; (27) Middle Childhood: Sense of Industry; (28) Adolescence: Physical Growth and Development; (29) Adolescence: Cognitive and Moral Development; and (30) Adolescence: Social and Emotional Development. Within selected modules are 10 one-page digest-style papers by various authors on pertinent topics including cultural differences, eating disorders, and alternatives to spanking. (ETB)

This document contains a series of learning materials for 3rd and 4th graders and their families. The materials are designed to augment classroom learning. Included are worksheets, games, and other skill building activities for writing, reading, math, citizenship, and science. These activities are meant to help children prepare for proficiency exams. As such, the document also includes goals for each subject area, methods to develop study skills, and test taking tips. Examples of activities in each subject area include the following: (1) writing-story writing, letter writing, and creating writing webs; (2) reading-power reading, phonics, and story grammar wheels; (3) math-baseball math, money math, and home polygons; (4) citizenship-understanding separation of powers and branches of government, opinion polling, following elections, and family geography bingo; and (5) science-recycling, weather, and being a plant detective. Test taking tips, study skill suggestions and a bibliography of books, videos, magazines, and games to support learning are included. (JW)

Descriptors—Battered Women, *Change Strategies, *Child Abuse, Family Problems, *Family Violence, Mass Media Role, *Prevention, Sex Discrimination, Social Influences, Social Problems

Identifiers—Social Impact

Noting that family violence is a global and pernicious problem, this report summarizes a symposium-sponsored by the Baha'i International Community's office for the Advancement of Women, in collaboration with the United Nations Children's Fund (UNICEF) and the United Nations Development Fund for Women-on meeting the challenge of and raising public awareness about the scope and seriousness of family violence. Building on a diversity of cultures, professions, experiences, and perspectives, participants proposed that effective efforts to create violence-free families must be designed on the basis of including the whole family and active participation of all social sectors. The report elaborates the following conclusions, which emerged in consensus from the symposium: (1) family violence must be publicly acknowledged as a problem; (2) the social and economic costs of family violence are incalculable; (3) family violence is a human development issue; (4) family violence is a human rights issue; (5) a violent society produces violent families; (6) family violence must be addressed by the world community; (7) NGOs have a major role to play—and they are already playing it; (8) the media must eliminate stereotyped images of girls and women and portray them in egalitarian relationships with men; and (9) educational systems need to redesign curricula, texts, sports programmes and other activities to promote gender equality. Several selected recommendations are listed which were proposed at the workshop discussions from the perspectives of research, education/training, services, and international and national legislation. Descriptors—After School Programs, Child Care, Child Care Occupations, *Cross Cultural Studies, Day Care, Early Childhood Education, Foreign Countries, Infant Care, *Nonformal Education, *Professional Training, Teacher Education, Training Methods, Training Objectives

Identifiers—*European Community
This is the preliminary report of a project collating information from 15 European Union countries on professionals serving infants through 14-year-olds in nonformal educational settings. Findings include: (1) There is a great range of variation in the training of individuals working in non-traditional education and child care; this ranges from university trained practitioners to workers who may or may not have completed a 200 hour optional training program; (2) similarly, in some countries, there is a rigid training division, which suggests that those working with very young children have access to less training than those working with children 4 or older; (3) in several countries, there is a move towards unifying the training system for those working with all age groups; but the inclusion of training for those working with preschool students lags behind these efforts; and (4) work tasks and professional roles differ widely for those working with various age groups. Three areas requiring further cross-national research are: (1) the goals and aims of training for child care professionals; (2) ways to widen the range of employment opportunities for educators; and (3) ways to redefine the relationship between parents and educators and child care professionals. (JW)

Assessment of Parental and Adolescent Verbal

Interactions.

Pub Date—Nov 94

Note—11p.; Paper presented at the Annual Meeting of the Mid-South Educational Research Association (Nashville, TN, November 9-11, 1994).

Pub Type— Reports - Research (143) — Speeches/Meeting Papers (150) — Tests/Questionnaires (160)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Adolescents, Anger, Conflict, Depression (Psychology), Parent Attitudes, *Parent Child Relationship, Parents, *Self Concept, Self Concept Measures, *Self Esteem, *Verbal Communication

Identifiers—*Parenting Styles

Verbal interactions between adolescents and their parents may affect adolescents' self-esteem and self-concept. The current development of an instrument, the Verbal Interaction Questionnaire (VIQ), was designed to measure adolescents' perceptions of their parents' verbal interactions with them. Noting that the relationship between adolescents' perceptions and their parents' perceptions of verbal interactions remains unavailable in the VIQ, the VIQ was modified to assess more thoroughly the familial dynamics of the verbal interaction process. Directions and items on the VIQ were reworded to assess parents' perceptions of their verbal interactions with their adolescent children and to assess parents' perceptions of how they believed their adolescent children perceived their interactions with them. Questions dealing with conflict, anger, depression, and parenting style were added. The modifications of the VIQ should provide counselors with a tool to assist them in better dealing with adolescents experiencing family conflicts. Six references and the questionnaires are included. Lewis, Angela G.

Decreasing Aggressive Behavior and Increasing Alertness in Preschoolers through a Family Education Program and Video Lending Library.

Pub Date—95

Note—90p.; Master's Practicum Report, Nova Southeastern University.

Pub Type— Dissertations/Theses - Practicum Papers (043) — Tests/Questionnaires (160)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—*Aggression, Child Behavior, *Family School Relationship, Film Libraries, *Mass Media Role, *Parent Education, Parent Workshops, Preschool Children, Preschool Education, Program Descriptions, Television, *Television Viewing, Violence

Identifiers—Alertness, *Media Literacy

This paper reports on an educational program de-

signed to teach parents about the role of television in their children's lives and to increase use of a family video lending library intended to enhance alertness in students, decrease aggressive behavior, and educate parents. Interviews with professionals and a parent survey indicated that there was a need for parent education about television viewing that might cause aggression and inattention problems in children. The results of the program show that parents increased their knowledge about appropriate television viewing for preschoolers. Behavioral records indicated that aggressive behavior among the children decreased while alertness increased. The lending library was continued through the end of the school year and was accessed by all participating families. In addition, the parent education program is scheduled to become part of the preschool programming for the next school year. Contains 31 references and a bibliography of 21 items. Twelve appendices contain survey forms, parent handouts, and other materials used in the program. (AP)

The Combined Family: A Guide to Creating Successful Step-Relationships.

Report No.—ISBN-0-306-44500-X

Pub Date—93

Note—316p.

Available from—Insight Books/Plenum Publishing, 233 Spring Street, New York, NY 10013-1578 (\$25.95).

Pub Type— Books (010) — Guides - Non-Classroom (055)

Document Not Available from EDRS.

Descriptors—Childhood Needs, Discipline, Divorce, Family Characteristics, *Family Life, Family Problems, Interpersonal Relationship, Marital Satisfaction, *Parent Child Relationship, Parent Role, *Remarriage, *Stepfamily

Because of the significant rates of divorce and remarriage in the United States, the stepfamily is becoming an increasingly mainstream way of life alongside the traditional nuclear family structure. This book is an essential guide for understanding an individual's multiple family roles as well as the emotional and psychological nuances within step-relationships. Chapters in the book discuss the following: (1) the structure of nuclear and combined families; (2) myths and realities of stepfamilies; (3) the evolution of nuclear, one-parent, and combined families; (4) the dynamics of new couples; (5) informing children of a pending remarriage; (6) logistics of a wedding ceremony for combined families; (7) making a home for a combined family; (8) who is and who is not a member of the family; (9) role of the remarried parent; (10) role of the stepparent; (11) conflicts in the role of stepparents as parents; (12) the place of children in combined families; (13) the different levels on which combined-family members must interact with each other; (14) the role of former spouses; (15) discipline in combined families; (16) managing a household of different lifestyles; (17) expanding the family framework; (18) stages of development for combined families; (19) establishing a new identity in the stepfamily; (20) what to do when help is needed; and (21) a new vocabulary for combined families. Minnesota's Child Support System Fails To Meet Children's Needs.

Kids Count Minnesota, Minneapolis.

Spons. Agency—Annie E. Casey Foundation, Greenwich, CT.

Pub Date—93

Note—9p.

Journal Cit.—Minnesota Kids Count; Spr 1993

Pub Type— Collected Works - Serials (022) — Numerical/Quantitative Data (110)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Child Support, Child Welfare, County Programs, *Family Financial Resources, Financial Needs, Legal Responsibility, *One Parent Family, Program Effectiveness, *Program Improvement, State Aid, Unwed Mothers

Identifiers—*Child Support Enforcement Services, *Minnesota

This newsletter issue provides an evaluation of child support systems and services of the 87 counties in Minnesota. No county in the state collects enough to support children; child support is often late or not paid in full, children whose parents never married are especially dependent on the child support systems, and child support services vary according to each county. In reality, costs of raising

a child far exceed the collected amount of support. Given these circumstances, getting adequate support involves five critical steps: (1) locating the absent parent; (2) establishing paternity; (3) establishing an adequate amount of child support; (4) enforcing the child support order; and (5) reviewing and modifying outdated orders. The newsletter presents six suggestions for improving the child support system, including centralizing functions and simplifying guidelines. Five measures of child support enforcement for evaluating the effectiveness of county enforcement are provided: support ordered, monthly amount ordered, monthly amount collected, timely payments, and unmarried fathers determined. A table of child support in September 1992, by county, lists each county's cases and rank by the five measures, and includes related information. (AP)

The Primary Program: Report from the Task Force on Improving Kentucky Schools.

Prichard Committee for Academic Excellence, Lexington, KY.

Pub Date—Sep 95

Note—21p.

Pub Type— Reports - Evaluative (142) — Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Basic Skills, Boards of Education, Educational Improvement, *Educational Legislation, *Educational Policy, Flexible Scheduling, Grouping (Instructional Purposes), Kindergarten, Mathematics Instruction, Measures (Individuals), Mixed Age Grouping, Portfolio Assessment, *Primary Education, School Administration, School Policy, Scoring, Student Evaluation, Student Improvement, Teacher Education

Identifiers—*Kentucky

Because the primary years are the point where specific changes are required in teaching practice and school organization, a task force examined Kentucky's primary program through school visits, interviews, expert testimony, and research. The last three years have shown marked improvement in student performance in the basics (reading, writing, and mathematics). There is a challenge to teach both these basic skills and higher subject matter content. The task force's recommendation is that the General Assembly retain the primary program, with the flexibility for school implementation adopted in 1994, and encourage schools, districts, local boards, and school councils to focus on implementing the program fully and well. To improve Kentucky's primary schools, it is more important to confront implementation problems than to change Kentucky statute. Recommendations for implementation include: (1) increasing efforts to improve leadership skills of principals and administrators; (2) concentrating on actual classroom practice, including training in the use of Kentucky Early Learning Profile (KELP); (3) distributing good, usable materials to teachers; (4) disseminating primary configuration maps to school councils, teachers, and administrators; (5) stressing professional development in the use of technology; (6) facilitating communication between parents and schools; (7) clarifying requirements for multi-age grouping; (8) increasing training of elementary school teachers in score writing and mathematics portfolios; (9) disseminating information to teachers about flexibility for grouping kindergarten students; and (10) insuring that basics, as well as subject matter and skills beyond the basics, are taught well. nizations, Parent Role, Program Evaluation, Programming (Broadcast), Public Policy, *School Business Relationship, School Role, Television Identifiers—Channel One, CNN Newsum, *Sponsored Materials

This report identifies some of the different forms that in-school commercialism takes, from outright advertising in school hallways to sponsored educational materials that often contain brand-name plugs and biased messages. It examines the reasons why corporations and other commercial organizations are interested in marketing to kids in the classroom, and how they do so. The report also explores the problems that in-school commercialism can create, the arguments for and against allowing such commercialism into schools, and the efforts to control it. The report evaluates and rates a wide selection of sponsored educational materials, in-school contests, sponsored television, and incentive programs that have achieved access to children at school, including the in-school television news programs Channel One and Cable News Network (CNN) Newsum. Finally, the report concludes by offering recommendations on how the corporate sector, parents, and government can and should work together to make schools ad-free zones where young people can learn without commercial influences and pressures. Ratings charts provide the positions of 21 family and education organizations on in-school commercialism, as well as descriptions and evaluations of 111 sponsored educational materials, in-school contests, sponsored television, and incentive programs. Sardilli, Lynn E.

A Workshop for Staff and Families on Stressors and Anxious Behaviors in Preschool Children.

Pub Date—95

Note—98p; Master's Practicum Report, Nova Southeastern University.

Pub Type—Dissertations/Theses - Practicum Papers (043) - Tests/Questionnaires (160)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—Anxiety, *Child Behavior, *Coping, Counseling Techniques, Inservice Teacher Education, Parent Child Relationship, *Parent Workshops, Play, Preschool Children, Preschool Education, *Staff Development, *Stress Management, Stress Variables

This practicum developed a workshop to educate staff and parents on identifying preschool stress, behavioral indicators of stress in children, and exploring effective stress coping techniques for use in the classroom and at home. A 3-phase solution strategy was implemented over 10 weeks. Phase I, the implementation process, included a staff meeting where the practicum was introduced and the process was discussed. Phase II, the workshop, gave general information including the definition of stress, causes of stress in preschoolers, behavior changes, and practical applications for coping techniques including the value of play, and prevention. Phase III, continued staff training, introduced coping techniques for the classroom. The results of the workshop showed that preschool staff and family members need and want information on stress and anxiety behaviors in preschool children. Parents responded positively to all presentations and showed interest and enthusiasm over resources available in the parent library. Training heightened teachers' sensitivity toward stressful situations not only with the children and their families, but also among the staff members themselves. (Nine appendices include parental and staff pre- and post tests, parent attendance and staff activity logs, staff evaluations of coping techniques, and the workshop outline. Contains 27 references.) The Custody Evaluation Handbook: Research-Based Solutions and Applications.

Report No.—ISBN-0-87630-775-6

Pub Date—95

Note—300p.

Available from—Brunner/Mazel, Inc., 19 Union Square West, New York, NY 10003 (\$45.95).

Pub Type—Books (010) — Guides - Non-Classroom (055)

Document Not Available from EDRS.

Descriptors—*Child Custody, Childhood Attitudes, Children, Child Support, Child Welfare, Conflict Resolution, *Court Litigation, Divorce, *Evaluation Criteria, Parent Attitudes, *Parent Child Relationship, *Parenting Skills, Parents, So-

cial Workers, Test Reliability

Three of the most challenging problems in the custody evaluation field follow from: (1) the difficulties involved in adapting data derived from group studies or traditional tests into a form for individual cases; (2) the absence of clear and compelling guidelines to aggregate the information collected in a comprehensive evaluation; and (3) the adversarial attitudes among custody disputants which make them disinclined to cooperate in making and maintaining any custody plan. This book addresses these challenges, describing some concepts found to be helpful in understanding parent-child interactions, essential targets of a truly comprehensive evaluation, and the dynamics of custody court proceedings. The book advocates a test-based approach to custody evaluation that measures how successful each parent actually is at the job of parenting. The book's chapters are: (1) "Loving the Courtroom"; (2) "Postdivorce Issues: Relevant Research"; (3) "Congruent Communications: The Vital Roles of Symbol Systems and Information-Processing Strategies"; (4) Bricklin Perceptual Scales (BPS): Child-Perception-of-Parents Series"; (5) "The Perception-of-Relationships Test (PORT)"; (6) "The Parent Awareness Skills Survey (PASS)"; (7) "The Parent Perception of Child Profile (PPCP)"; (8) "Getting Accurate Information"; (9) Areas of Assessment"; (10) "Creating a Custody Plan: Aggregating and Weighting the Variables (with Michael H. Halbert)"; (11) "Communicating the Results of a Custody Evaluation"; (12) "Validity and Reliability Issues"; and (13) "Dilemmas in Child Custody Evaluations" including the importance of grandparents, allegations of sexual abuse, splitting up siblings, and hostile judges. Contains approximately 220 references. (HTH)

Identifiers—*Access to Health Care, Maternal and Child Health Services, Medicaid, School Based Services

This report presents findings of a George Washington University Center for Health Policy Research (CHPR) multi-year project to conduct analytical studies on the financing, delivery, and cost effectiveness of child health supervision services. Against a backdrop of decline in private sector coverage for children, a growing number of children living in poverty, and major health care reform efforts, the goal of the CHPR project was to identify and examine health systems problems in three major areas: access and financing, organization and delivery, and cost and effectiveness. The resulting studies are presented as follows: (1) "An Overview of Health Insurance Coverage and Access to Child Health Supervision Services" (Michele R. Solloway); (2) "Private Health Insurance Coverage of Preventive Benefits for Children" (Margaret A. McManus and Karen Hertz); (3) "A 20-Year Retrospective of Child Health Supervision" (Jerome A. Paulson and Michelle R. Solloway); (4) "Ensuring Adequate Health Care Benefits for Children and Adolescents" (Peter P. Budetti and Claire Feinson); (5) "Informing State Medicaid Providers about

EPSDT [Early and Periodic Screening, Diagnostic and Treatment Program] (Michele R. Solloway and Others); (6) "Barriers to Full Participation in EPSDT and Possible Strategies for the Maternal and Child Health Bureau" (Michele R. Solloway); (7) "Medical Managed Care: A Briefing Book on Issues for Children and Adolescents" Harriette B. Fox and Margaret A. McManus); (8) "State Implementation of OBRA '89 EPSDT Amendments within Medicaid Managed Care Arrangements" (Harriette B. Fox and Lori Wicks); (9) "Population and Selective (High Risk) Approaches to Prevention in Well-Child Care" (Barbara Starfield and Patrick Vivier); (10) "Estimating Costs and Savings from Preventive Child Health Proposals" (Donald N. Muse); (11) "The Role of Outcomes, Effectiveness, and Cost-Effectiveness Research in Child Health Supervision" (Peter P. Budetti and others); (12) "Cross-National Comparisons of Well-Child Supervision" (Barbara Starfield and Jennifer Harlow); (13) "Environmental Health and Child Health Supervision: A Case Study of Childhood Lead Poisoning" (Bradley R. Pine and others); (14) "Pediatric Oral Health" (Arthur Nowak and others); (15) "Adolescent Preventive Mental Health Services" (Anne L. Ducey and Michelle R. Solloway); and (16) "Health Supervision and School Health Services for Children" (Michelle R. Solloway and others). Many of the studies include tables and appendices. (HTH)

Intervention for Children: The Role of Programme Developers.

Pub Date—June 94

Note—14p; Paper presented at the Conference of the International Society for the Study of Behavioural Development (Amsterdam, Netherlands, June 1994).

Pub Type—Speeches/Meeting Papers (150) — Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Agencies, Early Childhood Education, Educational Development, Foreign Countries, *Intervention, Linking Agents, Models, Networks, Organizations (Groups), Professional Personnel, *Program Development, Research and Development, *Researchers, Theory Practice Relationship, Triangulation

Identifiers—*Intermediaries, Netherlands (Amsterdam), Networking, *Practitioners, Program Specialists

When researchers and practitioners in early childhood care and education interact, outcomes are often disappointing to both. It is likely that a new brand of professionals, capable of living in the cultures of both the researcher and the practitioner, will bridge the gap. These professionals will be found mostly in intermediary organizations, establishing themselves between governmental structures, research institutions, and people working directly with children. Intermediaries, particularly those in non-governmental organizations, can provide a testing ground for any intervention model or theory. This paper discusses those people who form the interface between theory and practice, and contains the following sections: (1) "Programme Developers as Development Specialists"; (2) "Programme Making by Programme Developers"; (3) "Programme Developers as Development Specialists"; (4) "Networking," pointing out the lack of connection between the research communities of the poor and rich worlds; (5) "A Programme Development Approach"; (6) "An Operational Mandate"; and (7) "Conclusion: The Benefits and Risks of Guidelines," discussing the key principles gathered from accumulated early childhood care and education experience. (Contains 28 references.) (BGC)

Descriptors—Access to Education, Child Advocacy, *Child Labor, Children's Rights, *Child Welfare, *Compulsory Education, Economic Fac-

tors, *Educationally Disadvantaged, Elementary Secondary Education, Employment Practices, Foreign Countries, Government School Relationship, *Labor Legislation, Laws, Low Income, Poverty, School Involvement, Sex Discrimination, Socioeconomic Influences

Child labor, which is children's work that is exploitative and dangerous, poses a major human rights and socioeconomic challenge. Universal primary education may be the most effective instrument for meeting this challenge. The expansion of compulsory primary schooling could reduce hours of work by children and help them protect themselves against exploitation. This report on the relationship between education and child work contains the following chapters: (1) "Introduction," discussing how welfare activists see education as the best means of eliminating child labor; (2) "Schooling as a Deterrent to Child Labour"; (3) "Combining School and Work"; (4) "Economic Constraints against School Participation"; (5) "Social Causes in Child Work and Low School Participation"; (6) "Family Causes of Child Work and Low School Participation"; (7) "Discrepancies in Education between Rural and Urban Areas"; (8) "Gender Differences in Education and Work," including levels of education participation, economic impact, and discrimination; (9) "The Responsibilities of Growing Up"; (10) "School as a Cause of Work," focusing on the shortage of funds for education, a critique of orthodox approaches, systemic problems, and teacher attitudes; (11) "The Educational Function of Work"; (12) "The Impact of Work on Education," including physical and mental health impacts; and (13) "Conclusion: Some Policy Implications Suggested by Research of Education and Work," asserting that genuine reform will be facilitated only by governmental commitment to increase resources to primary education and to support school reform measures—flexibility of scheduling and making curricula and teaching methods more suited for low-income children and families. (Contains 172 references.) (BGC)

Descriptors—Child Advocacy, Childhood Needs, *Children's Rights, Child Responsibility, Child Welfare, Educational Resources, Elementary Education, Elementary School Students, Foreign Countries, *Learning Activities, Teaching Guides, Teaching Methods

Identifiers—Canada, *United Nations Convention on Rights of the Child

This guide presents children's rights as an issue directly affecting all children and one in which children's meaningful participation affects the responsibilities that accompany those rights. The handbook is organized around teaching ideas about the Convention on the Rights of the Child adopted by the United Nations in 1989 and later ratified by several member nations. Part 1, "Know Your Rights," suggests nine teaching tools and resources for a broad overview of children's rights and is followed by activity suggestions. This section provides information on monitoring students' learning, identifying students' location on the continuous process of inquiry, and selecting the appropriate tool for an entry point, an application, a summarizing activity, an action taking project, and so on. Part 2 provides activity ideas related to particular rights under five theme categories: mental and physical well-being, identity and expression, family and community, knowledge and culture, and law and protection. Part 3 provides additional resource suggestions and teaching aids, including informational material, a rights of the child poster, case study cards, and rights cards. (AP)

Document Not Available from EDRS.

Descriptors—Access to Education, Early Childhood Education, Family School Relationship, Federal Programs, Integrated Services, Parent Education, Parent Participation, Preschool Children, *Preschool Education, Public Education, School Readiness, School Support, State Action, *State Programs, Transitional Programs

Identifiers—Georgia Prekindergarten Program, School Based Services

Responding to increased interest in the development and education of children, many states have invested in initiatives to facilitate school success of prekindergarten-age children. Although national progress is encouraging, individual state initiatives are uneven, ranging from bold innovations with major funding to inaction and reliance on narrow, traditional program models. This report focuses mainly on 23 of the states that had prekindergarten initiatives where the state developed a separate state model. The following sections are included: (1) Overview of the Scope and Approaches of State Prekindergarten Initiatives; (2) Overview of Policies that Promote Quality in State Prekindergarten Initiatives, focusing on ensuring quality early childhood education, supporting comprehensive services, and encouraging parental involvement and education; (3) Overview of Policies that Promote Access to State Prekindergarten Initiatives; and (4) Building a Comprehensive System for Early Childhood Care and Education. Some key findings of the report include the following: (1) most states with prekindergarten initiatives chose to launch their own programs; (2) most separate state initiatives sought to target funds to children at risk of school failure; and (3) nearly half of the separate state initiatives did not clearly address the comprehensive service needs of children in their programs. Three appendices to the report include a description of Georgia's voluntary prekindergarten program, additional information on prekindergarten policies listed by state, and state Medicaid eligibility guidelines. The report also lists contacts for separate state prekindergarten initiatives and for state supplements for federal prekindergarten programs. (BGC)

We Are the Neocolonialists of Micronesia.

Pub Date—Aug 95

Note—20p.; Revised version of a paper presented at the Annual Pacific Education Conference (Koror, Palau, August 1-4, 1995).

Pub Type—Speeches/Meeting Papers (150) — Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Change Strategies, Colonialism, *Cultural Awareness, *Culture Conflict, Developing Nations, *Educational Development, Educational Improvement, Educational Strategies, Foreign Countries, Heritage Education, *North American Culture, *Politics of Education

Identifiers—*Americanization, Micronesia

Examining the fragmentation and Americanization that pervades education in Micronesia, this paper explores the causes of the fragmentation, which represent a local attempt to modernize education, and the local belief in the superiority of American culture. The consequences of a fragmented world view have been confusion between educational aims and means, and goals and methods. The confusion about the concepts of education, culture, modernization, colonialism, autonomy and reform that exists in Micronesia is exacerbated by eight problems, including the following: (1) educators' confusion of modernization with Americanization when it comes to curricular and methodological reform; (2) reform has taken on an "us vs them" mentality that is intellectually debilitating and counterproductive; and (3) a lack of self-confidence among many of Micronesia's school systems has been combined with failure among administrators to trust the professionalism of teaching faculty. An important first step to resolving this confusion is establishing a philosophy of education that is truly Micronesian. Four suggestions are recommended for developing a distinctly Micronesian pedagogy: (1) give teachers decision-making authority; (2) develop local materi-

als; (3) establish a robust research agenda; and (4) reflect, decide, and help teachers become education's leaders. (AP)

Identifiers—Blocks, Circle Time, Developmentally Appropriate Programs

This book is a resource guide that provides examples of cooperative activities and techniques that teachers can incorporate in and adapt to their own classrooms. The premise upon which the book is based is that a cooperative environment stimulates children to explore the aspect of school life that appeals to them—the chance to play with others—and teachers are stimulated to focus on social growth, to respond when children need to build social skills, and to share with children and parents a commitment to cooperation. The guide supports theme-based curriculum with cooperative ideas and values, as well as an interest-centered classroom. It is organized in chapters according to types of activity. Chapters 1 through 10 of the book are each focused on a major curriculum area. The first section of each chapter describes concepts and skills within the curriculum area that foster cooperation. The second section presents examples inspired by classroom teachers of the cooperative ideas in action. Chapter 11 provides guidelines and suggestions for fostering social skills, in three sections: reducing and resolving conflict situations, helping individual children who have problems with social skills, and enhancing prosocial behavior. Join Together, Get Involved, and Team Up for the Kids! How Parents, Schools, and Communities Can Support Family Involvement in Education.
Family Involvement Partnership for Learning, Washington, DC

Spons Agency—Department of Education, Washington, DC
Pub Date—95

Note—16p; Three 8-panel brochures.

Available from—Family Involvement Partnership for Learning, 600 Independence Avenue, S.W., Washington, DC 20202-8173.

Pub Type—Guides - Non-Classroom (055)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Change Strategies, Community Cooperation, Community Involvement, *Cooperative Education, *Cooperative Programs, Educational Improvement, *Family Involvement, *Family School Relationship, Parent Student Relationship, *School Community Relationship
Identifiers—Family Support

These three brochures are short guides to show how parents, schools, and communities can support family involvement in education and help build a better educational environment. Noting that communities that support schools and families are better places to live, work, and learn, The "Join Together for Kids" brochure provides information on how to build a community partnership for learning, and on what the community can do to support schools and family involvement in education. The "Get Involved!" brochure shows how parents and families can help their children do better in school, by reading together, using TV wisely, establishing a daily family routine with scheduled homework time, talking to your children and teenagers, expressing high expectations for children by enrolling them in challenging courses, keeping in touch with the school, and using community resources. The "Team Up For Kids!" brochure points out that when schools and families team up to help children learn, everyone wins. This brochure also provides information on how schools can support family involvement in education. (AP)

Descriptors—*Academic Achievement, Caregiver Child Relationship, Child Behavior, Child Caregivers, Early Childhood Education, *Family Environment, Family Life, *Lower Class Students, Low Income, Middle Class Students, Parent Child Relationship, Poverty, Preschool Children, Skill Analysis, *Skill Development, Stimulation, Verbal Communication
Identifiers—*Project Head Start

Most research on the long-term outcomes of early

enrichment programs for low-income children suggests that the effects of Head Start participation and similar experiences are to help narrow the gap between academic achievement of low-income and higher-income children. The failure of children from low-income families to excel in public schools has been attributed to their tendency to develop skills more appropriate to a different cultural setting than what fits within an academic setting. Poor children experience different kinds of verbal interactions with adults and generally less academic, intellectual stimulation in their homes. Thus, when entering school, low-income children bring with them different backgrounds from middle-class children, resulting in differing ways of relating to adult authority figures in school settings. This research was conducted under the premise that the degree to which children are either adult- or peer-oriented is a critical factor for school success. Preschool children who spend more time with adult caregivers develop expectations of adults as valuable resources and also cultivate greater skill in using adults as resources. The research suggests that Head Start programs can show children that adult, extra-family caregivers can also be valuable resources. The approach suggested includes an emphasis on the role of adults, especially teachers, as useful resources, facilitators of interesting activities, and as a means of comfort and assistance for children. Derscheid, Linda E.

The Relation among Moral Behavior, Peer-Directed Internal State Language, and Perspective-Taking Ability for Preschoolers in Mixed-Age Settings.

Pub Date—Apr 95

Note—15p; Paper presented at the Annual Meeting of the American Educational Research Association (San Francisco, CA, April 18-22, 1995).
Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143) — Numerical/Quantitative Data (110)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Child Behavior, Child Development, *Day Care Centers, Grouping (Instructional Purposes), Helping Relationship, *Mixed Age Grouping, *Moral Development, Perspective Taking, Piagetian Theory, Play, *Preschool Children, Preschool Education, Sibling Relationship, Social Development

Prior research concerning young children's moral development has been conducted primarily in same-age environments. This study investigated whether preschool children's moral (helping) behaviors are related to younger peer-directed internal state language (talking about younger peer's feelings, wants, and abilities), perspective-taking skills, and attendance at a child development-oriented, mixed-age child care center. Twenty-one pairs of children (older peer: 4-6 years old; younger peer: 2-3 years old) were videotaped while playing with a toy and then with a puzzle. Results indicated that moral behaviors were positively and significantly related to frequency of vocal turns to younger peer, to perspective-taking ability, and to length of attendance at a mixed-age center. Also, data supported the developmental notion that perspective-taking ability is related to age. Results indicated that mixed-age group care settings may facilitate young children's demonstration and understanding of some aspects of moral development, helping behaviors and perspective-taking ability. Contains 12 references. (Author/BGC)

Patrick, Helen Townsend, Michael A. R.
The Influence of Perceived Social Competence on School Beginners' Emergent Academic Intrinsic Motivation.

Pub Date—Apr 95

Note—22p; Paper presented at the Annual Meeting of the American Educational Research Association (San Francisco, CA, April 18-22, 1995).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Academic Achievement, Foreign Countries, *Interpersonal Competence, Performance, *Preschool Children, Preschool Education, *Self Motivation, Social Development, Success
Identifiers—*New Zealand (Auckland)

Children's intrinsic motivation for school work has been recognized as an important contributor

and predictor of school achievement. It is characterized by enjoyment and valuing of learning for the inherent pleasure its accomplishment brings. Important features include curiosity, persistence, autonomy, a mastery orientation, and a preference for challenging tasks. Most intrinsic motivation research has focused on college students, adolescents, and children in middle childhood. This study targeted school beginners. Young children vary in the extent to which they are intrinsically motivated toward academic work, but the development of this motivation is not fully understood. The study's participants were 48 boys and 35 girls from 8 first-year classes in 5 Auckland (New Zealand) elementary schools. Measures included: (1) academic competence; (2) social competence; (3) perceived social competence; (4) perceived academic competence; (5) academic intrinsic motivation; and (6) teacher questionnaire. The study showed children's perceptions of their social competence as the largest contributor to their intrinsic motivation for school work. Children's social behavior, as perceived by their teachers, was also strongly related to academic performance. Contains 31 references. (BGC)

Descriptors—Age Differences, Children, Economic Status, Ethnic Groups, Family Characteristics, Family Health, Family Income, Government Role, Heads of Households, Health Care Costs, Health Insurance, Housing, Labor Market, Low Income, One Parent Family, Poverty, Public Policy, Racial Factors, Young Adults

This report describes the current status of families headed by persons under age 30, and compares the economic well-being of the current generation of young families in 1990 with that of young families in the 1970s and 1980s. The report documents falling incomes and growing poverty among young families, factors underlying young families' economic plight, and the consequences of falling incomes and rising poverty. The report found that the inflation-adjusted median incomes of young families with children fell by 32 percent between 1973 and 1990, and that the poverty rate for children in young families doubled in the same time period, from 20 to 40 percent. For the heads of young families with children, inflation-adjusted annual earnings fell by 44 percent between 1973 and 1990. The report recommends: (1) the enactment of a refundable children's tax credit; (2) the creation of a child support assurance system; (3) the creation of a national health plan; and (4) full funding for Project Head Start. An appendix provides information on the data used in the preparation of the report. (MDM)

Identifiers—Asian American Students

This 3-year study examined how 10 Chinese-American families from various socioeconomic and educational backgrounds fostered their children's success in school through personal, family, ethnic community, and mainstream community resources, focusing on the experiences of two particular families. The study grouped the families into three types: (1) those in which at least one parent had been born in the United States and had gone through the American educational system; (2) those in which both parents were immigrants who did not attend school in the United States; and (3) those in which both parents were immigrants who had received some schooling in the United States. The study compares a Type 1 and Type 2 family through case studies of what two such families did to enhance their children's school achievement. It found that Type 1 families did not exhibit the intensive preschool academic preparation, close monitoring behavior, and protective stance associated with Type 2 immigrant families, since the Type 1 families were more secure in the sense that their children will be successful. Identifiers—Children's Defense Fund

Geared primarily toward the black community and published by the Children's Defense Fund, this report provides background materials and statistical data which communicate the status of black children in America and what can be done to improve it. There are 3 sections in the report. Part 1 describes the conditions of black children and the continuing inequality between white and black children despite the extraordinary progress made in dismantling legal segregation and discrimination. Part 2 provides a beginning action checklist for various black networks, including parents, organizations, members of the black community, coaches, health and social service professionals, school board members, principals, business leaders, record and entertainment companies, churches, and college students. Part 3 contains an overview and detailed tables of black and white child status in a range of areas, including health, education, employment, crime, and childbearing and sexuality. The report concludes with an appendix containing additional tables of data on areas including: (1) the chances of a black child in America living in poverty relative to a white peer; (2) poverty rates in various U.S. states and cities; and (3) an immunization schedule. Schools cannot succeed without collaboration with parents and the community. Defining community education as active community involvement in the education of children, this booklet describes aspects of community education. Community education, the booklet points out, can take place at physical locations such as formal school buildings, which lie dormant much of the year, and recreation centers. The booklet argues that community members must be involved in designing a community education program that meets a large variety of needs, by providing diverse educational services, by promoting interagency cooperation and public-private partnerships, and by providing community improvement and citizen involvement. Possible components of a community education program are suggested: (1) remedial and enrichment activities; (2) noncredit enrichment classes for adults; (3) sports, craft, and other recreation activities for adults and children; (4) preschool and after-school child care; (5) programs serving senior citizens and other special populations; (6) career education; (7) volunteer programs; (8) literacy programs; (9) family education programs; and (10) community newsletters. Sources of possible funding for community education are also listed, including: (1) school or city budgets; (2) municipal or county agencies; (3) fees paid by program participants; (4) federal and state programs; and (5) grants from corporations and foundations. Two important aspects of programs, ongoing assessment and public relations, are noted. Descriptions of various existing community education programs conclude the booklet. (JW)

Albright, Lucille. And Others. Motivating Students to Appropriate Behavior.

Pub Date—Apr 95

Note—129p.; Master's Action Research Project, Saint Xavier University.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC06 Plus Postage.

Descriptors—Action Research, Active Learning, Adolescent Development, *Behavior Problems, Change Strategies, *Classroom Environment, *Classroom Techniques, Discipline, Family Structure, Intervention, Junior High Schools, Junior High School Students, Problem Solving, Student Adjustment, *Student Behavior, Student Improvement, *Student Motivation, Teaching Methods, Teaching Styles, *Time on Task

This Master's degree project developed a program for decreasing disruptive student behavior in order to increase the amount of on-task time in the classroom. Types and occurrences of disruptive behavior were documented over a 6-week period in two classrooms at each of two junior high schools (grades 6-8) in Illinois. Analysis of the data revealed that students' inability to act appropriately in a classroom may be due to a decline of the family structure, to the adolescent development process, and to a lack of motivating lessons. Instructional response to these possible causes had not improved student motivation. Reviews of curricula and instruction revealed an overemphasis on teacher-directed instruction and a lack of student interaction during lessons. An analysis of the classroom setting, combined with strategies suggested by a literature review resulted in an action plan for intervention: (1) teaching of group skills for use in cooperative problem-solving activities; (2) development of activity-based lessons; and (3) organization of base groups to foster a sense of community within the classroom. Post-intervention data indicated a decreased number of disruptive behaviors in one school, and a minimal effect on behavior in the other school. (Contains 26 references. Thirty-one appendices include record forms, letters, assignments, and worksheets.) (TM)

Descriptors—*Contracts, Elementary Secondary Education, Federal Aid, Federal Legislation, Parent Participation, Parent Role, *Parent School Relationship, *Parent Teacher Cooperation, *Parent Workshops, School Role, Student Improvement

Identifiers—Elementary Secondary Education Act Title I, National Education Goals 1990, *School Parent Compacts

This guide contains materials for the presentation of a half-day introductory workshop to parents on school-parent compacts, which are now required of all schools receiving federal Title I funds. Parent-School Compacts offer a means of redefining the community vision of school and parent support roles in promoting student learning. By creating a Parent-School Compact document, parents and teachers think through their beliefs and differences to reach consensus on the compact's contents. The document includes a presenter's guide, handouts, and transparency masters for a workshop on creating a Parent-School Compact. Included in the handouts are warm-up exercises to facilitate group interaction, background information on school-parent compacts, an overview of compact elements, models of school-parent compacts, and information on the National Education Goals. National Education Goal eight calls for the establishment of school-parent partnerships. An appendix contains sample school-parent compacts from several school districts. (MDM)

Identifiers—Congress 104th, Contract with America, False Allegations, Republican Party

These hearing transcripts present testimony on the effects of the agenda of past Congresses on child welfare and childcare, focusing on the need for welfare and social services reform, subsidized child care, and abuses of the 1974 Child Abuse Prevention and Treatment Act (CAPTA). Testimony was heard from: (1) Representatives Randy "Duke" Cunningham, Dale E. Kildee, and Tim Hutchinson; (2) a Virginia parent who asserts that she was charged unfairly with child neglect; (3) a teacher and grand jury deputy foreman who advocates reform of CAPTA; (4) the legal policy director of the Family Research Council of Washington, District of Columbia; (5) the executive director of the National Committee to Prevent Child Abuse; (6) a mother speaking in support of subsidized child care programs; (7) the director of income security issues for the General Accounting Office; (8) the executive director of the California Child Care and Resources and Referral Network; and (9) the associate director of a day care association in York, Pennsylvania. Additional prepared statements, supplemental materials, and position statements from national and regional organizations are included. (MDM)

The Comprehension of Symbolic Play in the Nursery School.

Pub Date—Sep 95

Note—15p.; Paper presented at the European Conference on the Quality of Early Childhood Education (5th, Paris, France, September 7-9, 1995).

Pub Type—Reports - Research (143) - Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Age Differences, Child Behavior, Childhood Needs, Dramatic Play, Foreign Countries, Interpersonal Competence, Play, Preschool Education, Pretend Play, Social Development, Toddlers

This paper describes two projects analyzing forms of appearance and the characteristics of symbolic play, that is, spontaneous play free from adult intervention. The paper highlights some characteristics and theoretical orientations and discusses preliminary findings. The theoretical framework includes using evolutive cognitive and psychoanalytical theories as theories which consider play an environment in which to construct identity and experiment with the social world. Evidence from the first project shows that: (1) free play, mostly symbolic, occupies most of a child's time at nursery school; (2) children often play alone, or with their mothers, without the participation of an educator; (3) symbolic play increases with a child's age; and (4) classroom play centers encourage activity in children over the age of 3. Results from the second project include: (1) the strong presence of themes such as death and bodily functions indicate a strong relation between play and the child's needs; (2) play takes up most of children's nursery school time, and most play is "make believe"; (3) knowledge, feelings, and relationship modalities meet in play; and (4) children start school at varying degrees of development and with varying capacities for symbolization. Contains 12 references. (JW)

Descriptors—Cooperation, Day Care Centers, Educational Improvement, Educational Objectives, Educational Policy, Foreign Countries, Nursery Schools, Parent School Relationship, Parent Teacher Cooperation, Preschool Education, Student Evaluation

Identifiers—Scotland (Strathclyde Region), United Kingdom

This paper discusses the effects of nursery school assessment policy on collaboration among staff from different professional backgrounds and between staff and parents. The paper highlights this point by reporting the results of a survey of assessment practices in 30 nursery schools in the Strathclyde Region of Scotland. The issue of assessment has become salient because the United Kingdom has been the site of recent debates on what constitutes a good quality program, and questions about assessment are related to concerns about program quality. In this context, a small scale survey was developed to assess practice in 30 nursery schools. Results of this survey include the following: (1) all schools had staff with teaching qualifications and nursery school qualifications working together, creating certain workplace tensions; (2) despite these tensions, there was implicit agreement among teachers that they must collaborate for the good of the students and their parents; (3) the majority of staff had some influence on policy decisions regarding assessment; (4) collaboration existed in some, but by no means all, assessment areas—different teaching staff assessed different aspects of learning and development; and (4) collaboration with parents is a key part of assessment. Contains 40 references. (JW)

Descriptors—Child Development, Day Care, Foreign Countries, Parent Attitudes, Parent Influence, Parent Participation, Parent Responsibility, Parent Role, Parent School Relationship, Parent Student Relationship, Partnerships in Education, Preschool Education, Research Methodology, Young Children

Identifiers—Sweden

This paper discusses parents' perspectives on child care as they affect research approaches. Consideration of the parents' perspectives and socioeconomic positions allows a better assessment of parents' interest in their children's preschool education. Parents fulfill many roles within their families and society at large. These demands lead to organization and prioritization of concerns. Parents differ socially, economically, and culturally. Based on the varying conditions faced by parents, research questions discussed in this report are: (1) what position the parent's interactions with child care take in their life situation; (2) what attitudes and conceptions of child care parents hold, and what information, in what form, they want about child care; (3) what expectations parents have regarding child care; and (4) how active parents wish to be, and what influence they want to have over their children's preschool situation. The area of influence represents an intriguing question, particularly because parents frequently enter into this role when there is some conflict to be resolved, but then recede from it when the conflict has subsided. Four levels of parent cooperation or influence in child care include: (1) participating in decisionmaking; (2) discussing decisions; (3) making proposals; and (4) accepting information. (JW)

Descriptors—Academic Achievement, Classroom Techniques, Elementary School Students, Foreign Countries, Learning Strategies, Mathematics Achievement, Parent Attitudes, Parent School Relationship, Primary Education, Reading Achievement, Student Evaluation, Student Motivation, Teacher Attitudes, Writing Achievement

Identifiers—New Zealand

This study organized in 2 sections examined the progress of 32 New Zealand children during their first 3 years at school. Their achievement levels in reading, mathematics, and writing were examined based on interviews with the children, their teachers, and their parents; school records; notes; and video recordings. Section 1 deals with perceptions of progress, in light of the child's actual progress; and section 2 discusses assessment and reporting practices that conveyed the child's progress to parents. The study found tension between the worlds of school and home and between perceived differences in approaches to children's learning. Teachers' understanding of how children make progress was in accord with their approach to curriculum and assessment. Their approach was oriented to developing an internal motivation for learning based on the perception that ability is changeable through effort ("learning goal" motivation). The study found that such teachers are more likely to use helpful learning strategies than persons with a "performance goal" orientation, which relies on external feedback and sees ability as fixed. Some classroom practices, however, did not fit the "learning goal" model, and the study considered the ambiguous nature of tangible feedback (such as stickers and stamps) and use of ability groups. Teachers' concern that parents may focus on these forms of feedback to gauge their child's progress was also explored. The study highlights the importance of clear communication with parents and crossing gaps between home and school that affect child's learning. (Contains two sets of references, approximately 80 and 50 items, respectively. Five appendices contain school descriptions and interview schedules.) (TM)

Descriptors—Child Development, Cognitive Development, Disadvantaged Youth, Early Childhood Education, Lower Class Students, Parent Participation, Program Effectiveness, Transitional Programs, Young Children

Identifiers—Project Follow Through, Project Head Start

This paper discusses the impact of Follow Through, a comprehensive program for low-income children in grades 1-3 and their parents previously enrolled in Head Start programs. The program was designed to help families make the transition from preschool to early elementary school. The paper notes that the longevity of Follow Through (over 25 years) is a unique aspect of the program and that working with Head Start children and parents provides a continuity and firm base which facilitates Follow Through's success. The paper also highlights some of the evaluative comments on projects representing varying Follow Through models. Parents in the Cognitive Enrichment Program (COGNET) reported that the program helped them better understand their children. Evaluation also showed that there were differences between parents involved in COGNET and those not involved. Differences were noted in how parents helped children with problems and what kinds of learning situations children experienced. The Cultural Linguistic Approach published a handbook on parent involvement. Evaluation of the Direct Instruction Model showed that parents felt that their children were receiving better academic instruction than students in any other approach. Contains 10 references. (JW)

Identifiers—Family Resource and Support Programs, Family Support, *Illinois (Chicago)

This paper reports on the progress of eight Chicago-based community initiatives designed to redefine social services and broaden social responsibility for the development of children and families. The paper has three sections describing: (1) general background on the children, youth, and families initiative; (2) early lessons from an initiative in progress; and (3) across communities: the roles of the sponsor, the evaluator, and learning. Specific topics covered in these sections include: (1) the purposes and possibilities of an infrastructure and creating a governance entity and process; (2) specific aspects of governance, developing and linking services, and access to services; and (3) the relationships and roles of sponsors within foundations, defining outcomes, balancing objectivity and engagement, process versus outcome evaluation, and the value of the learning process. The paper also includes information on related research from the University of Chicago's Chapin Hall Center for Children and on Chapin Hall's Comprehensive Strategies Forum on Handsnet. (JW)

Pragmatic Language in Early Childhood Education: Behavior and Thought in Teaching.

Pub Date—Apr 93

Note—30p.; For earlier version of this paper, see ED 354 063. Paper presented at the Annual Meeting of the American Educational Research Association (Atlanta, GA, April 12-16, 1993).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Class Organization, Classroom Environment, Classroom Techniques, Elementary Education, *Elementary School Students, Student Behavior, Teacher Behavior, Teacher Role, *Teacher Student Relationship, *Verbal Communication

Through observation of teacher language responses, this study examined interaction practices that inhibited, ended, or sustained children's classroom participation. Thirty early childhood educators were observed during 105 30-minute language art classes; 998 female and 1,188 male K-4th grade students were observed. Interactions were coded into one of two modes, instruct or manage, and further categorized as sustain, extend, change, or stop. Results showed a significant relationship between the instruct mode and extend and sustain interactions; this correlation was strongest in fourth grade and weakest in first grade. Language that stopped interactions was only significant in fourth grade; fourth grade also showed the most language interaction overall. In early grades, teachers' language interactions stimulate active student language participation. (Contains 25 references.) (JW)

Identifiers—Barriers to Participation, *Child Care Needs, *Job Opportunities and Basic Skills Program, Welfare Reform, Welfare to Work Programs

In response to congressional approaches to welfare reform, this report describes a study of the extent to which child care needs of welfare recipients in the Job Opportunities and Basic Skills (JOBS) program are currently being met, whether any barriers exist to meeting the child care needs of JOBS participants, the effects of child care subsidies on former welfare recipients' move toward self-sufficiency, and the potential implications of welfare reform for child care availability and continuity. The study is based on a nationally representative telephone survey of 411 local JOBS programs, as well as in-depth site visits at 12 programs. The study found that while most JOBS programs report providing child care assistance, participation was limited by lack of available funds and Family Support Act regulations. It also found that child care-related barriers could delay welfare-to-work transitions, and that inadequate postwelfare child care subsidies challenged JOBS participants' self-sufficiency. Six appendices include survey results, child care expenditures for 1994 in seven states, and child care-related barriers encountered by some JOBS participants. (MDM)

Identifiers—Welfare Reform

In response to proposed reforms designed to replace many federal child welfare programs with block grants to states, this report describes a study of recent trends foster care, resources for foster care and child welfare services, and state responses to current foster care and child welfare service needs. The study reviewed research on foster care and child welfare services and interviewed experts, researchers, and advocates in these fields. The study found that sharp increases in the number of foster children combined with unprecedented service needs between 1983 and 1993 led to a crisis in foster care. Reports of child abuse and neglect nearly doubled, and foster care loads grew by two-thirds during the period. However, resources for child welfare services failed to keep pace with the needs of troubled children and their families. The findings indicate that faced with increasing demands and limited resources, states have sought to preserve families and minimize the need for foster care. Six appendices include information on federal funding to states; proposed child welfare program consolidations; current and proposed foster care standards; and testimonies on child protection, foster care, adoption, and related topics. Identifiers—Alberta (Calgary)

This report examines issues related to whether child care services are operated on a non-profit or for-profit basis, focusing on the use of public funds and child care quality in Canada. The report also presents the results of a study of child care quality at 14 non-profit and 36 for-profit child care centers in Calgary, Alberta, Canada. The study found that non-profit centers consistently offered child care that was superior to that offered by for-profit centers. However, the results also indicated that some non-profit centers exhibited poor quality care and some for-profit centers exhibited good care. The study also found that independent for-profit child care centers displayed a wider range of quality, had a higher proportion of staff between age 15 and 20, and were less likely to have clearly articulated procedures than chain for-profit child care centers. Seven appendices provide a copy of the center survey and tables of analysis of variables (ANOVA) related to auspice, organizational structure, directors, and staff age, tenure, training, and remuneration. (Contains 36 references.) (MDM)

Identifiers—Access to Services, *Canada, Child Care Costs, *Child Care Needs

This report examines the status, funding, and accessibility of child care in Canada and presents recommendations for the federal government to improve access to quality child care for all Canadians. The report describes the purposes that can be served by child care and illustrates how it can advance social and economic objectives of national importance. Major concerns with current funding methods and affordability are identified, and the lack of child care spaces for low-income families is documented. The report also discusses the low salaries and inadequate working conditions of child care staff. The paper concludes by advancing 12 specific recommendations to improve child care access and quality, chief of which is that the federal government promote the long-term goal of a publicly-funded, universally-accessible, comprehensive and high quality child care system for all Canadians. Six appendices include a list of child care grants in Canada, a description of the Canadian Assistance Plan (CAP) child care subsidy, data on child care costs by income level, an evaluation of various funding options, and a description of a comprehensive child-care service system in Grey County, Ontario, Canada. Contains 119 references. (MDM)

Descriptors—*Classroom Techniques, Foreign Countries, Group Dynamics, *Kindergarten, *Learning Modalities, Preschool Education, Teacher Attitudes, *Teacher Effectiveness, Teacher Role, *Teacher Student Relationship, Teaching Styles

Identifiers—England (Birmingham)

This paper provides a critical analysis and evaluation of the relationship between 4-year-old children

and teachers in 10 reception (kindergarten) classes at schools in Birmingham, England. It is based on in-class observations and collaborative, action research that focused on the interactions between the children and their teachers, including 300 2-minute observations of children and 250 2-minute observations of teachers. The study found that the greater part of the interactions between teachers and children were brief and informal, and that the children were intuitively active and curious learners. It also found that the highest levels of child involvement were recorded during paired and independent activities, with the lowest levels during directed, whole-class activities. The paper argues that young children's development will be hindered unless teachers adopt an open learning stance, and that teachers must be open to constructive criticism and genuinely prepared to change. An appendix comprising half the paper contains four sets of graphs depicting the statistical results. (MDM)

Identifiers—Colorado, National School Lunch Act 1946, Nutrition Education and Training Program, Special Milk Program, Summer Food Service Program

This report provides descriptive and statistical data on the status of child nutrition programs in Colorado. The report contains descriptions of the National School Lunch Program, school breakfast programs, the Special Milk Program, the Summer Food Service Program, the Nutrition Education and Training Program, state dietary guidelines, Colorado NETPRO (Network for Professionals) food service training program, eligibility requirements for free and reduced price meals, food program revenue sources, and a summary of new meals initiatives. The bulk of the report consists of tables that present data on school nutrition program participation by school district, both alphabetically and by district size. These tables provide information on free and reduced price lunch program participation, the number of participating schools in each district, and the costs and prices of school lunches and breakfasts. Fink, Dale Borman

Discipline in School-Age Care: Control the Climate, Not the Children.

Report No.—ISBN-0-917505-07-7

Pub Date—95

Note—51p.

Available from—School-Age NOTES, P.O. Box 40205, Nashville, TN 37204 (\$5.95).

Pub Type—Books (010)—Guides—Classroom—Teacher (052)

EDRS Price—MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—*Behavior Problems, Childhood Needs, Children, *Classroom Environment, *Discipline, Discipline Policy, Elementary Education, Parent Participation, *Program Design, Reinforcement, *School Age Day Care, Special Needs Students

Identifiers—*Behavior Management

This book is addressed to school-age care staff and suggests they rethink their attitudes about the behavior of the children under their care. Ideas were generated by workshop participants about ways to promote misbehavior, as a way of gaining insights into encouraging positive behaviors. The following six key elements of a school-age care program emerged from this exercise: (1) children's basic needs; (2) physical environment; (3) activities and schedules; (4) social groupings; (5) rules; and (6) consequences. Addressing these six key elements is viewed as a preventive approach, and the importance of initially considering the first four elements is emphasized. Examples are provided to illustrate

how this approach works in practice. Beginning with the first four elements sets a very positive tone for a program. It stresses that it is the climate which is being controlled, not the children. Following an understanding of controlling the climate, guidelines are presented concerning communicating expectations about appropriate behavior, and rewarding and reinforcing desired behavior. Also discussed in the book are: ideas to consider when working with children with disabilities and special needs; making parents and families allies; communicating with school personnel; and putting discipline and termination policies in writing. Descriptors—Elementary Education, Elementary School Students, *Ethical Instruction, Family School Relationship, Foreign Countries, Hidden Curriculum, *Ideology, *Moral Values, Parent Role, School Role, Values, *Values Education

Identifiers—*Moral Education, *Scotland

This study of values education was conducted in primary schools in Scotland between April 1993 and April 1995. The study: (1) explored the kinds of values implicitly and explicitly taught; (2) investigated teachers', pupils', and parents' perceptions of values education; (3) explored the ways value education occurs; and (4) sought to raise awareness of these ways. Data collection consisted of initial in-depth studies of values education in five primary schools and a postal survey with teachers and headteachers in a sample of Scottish primary schools. The in-depth studies included interviews and discussions with teachers and administrators, classroom observations, and analysis of student writings. The postal survey was designed to explore issues emerging from the in-depth studies. Results include the following: (1) there was considerable consensus among school staff over the values they wished to impart upon their students; (2) most staff and parents saw values education as being the primary responsibility of the parents, not the school; (3) headteachers generally saw it as their role to establish a policy and tone for values education; and (4) values were defined in broad terms, including caring, self-esteem, cooperation, respect, and consideration. (Contains 84 references and a technical appendix describing methodology.) (JW)

Huge Increase in Day-Care Workers: A Result of Multiple Societal Changes.

Bureau of Labor Statistics (DOL), Washington, D.C.

Pub Date—95

Note—30p.

Pub Type—Reports—Research (143)

EDRS Price—MF01/PC02 Plus Postage.

Descriptors—Access to Education, Child Caregivers, *Day Care, Early Childhood Education, Economic Factors, *Educational Change, Educational Development, Educational Economics, Educational Supply, Educational Trends, Employed Parents, *Enrollment Influences, Family Work Relationship, Financial Support, Mothers, Preschool Teachers, Teacher Salaries, *Teacher Supply and Demand

Identifiers—Affordability, Project Head Start

Using Bureau of Labor Statistics estimates of employment in day-care establishments, this study analyzes changes in day care over the past 20 years. Growth in day-care employment has been much stronger than that of other industries. Since 1972, employment has increased by nearly 250 per cent. Causes of growth include changing trends in enrollment and staffing ratios. Increased enrollment can be inferred from a variety of measures, including an

increase in the child population; changes in family composition which have resulted in more single-parent families; and an increase in the number of working women. There are also factors which enable more children to attend day care programs. In particular, day care has become more affordable. This has been the result of increased government funding of day care; the growth of Head Start and other programs for children from low-income families; an increase in state and local initiatives for the further establishment of day care; tax breaks related to day-care expenses; and private initiatives stemming from both corporate and non-profit efforts to increase accessibility to day care. Another mitigating factor is the low cost of labor in the day care industry. (JW)

This newsletter provides a periodic update on the activities of the Early Childhood Research Working Group (ECRWG), organized in early 1995 by the U.S. Department of Education and other federal government departments and agencies to promote interagency cooperation and public-private partnerships in early childhood research. This edition contains five short articles: (1) "Education Reform: Let's Begin at the Beginning" (Sharon P. Robinson) which discusses research on the efficacy of school readiness and early intervention programs; (2) "Early Childhood Research Working Group: The Beginnings" (Naomi Karp) which documents the origins and early evolution of the ECRWG; (3) "Universal Newborn Hearing Screening: A Successful Federal Initiative" (Karl White) which explains the significance of auditory research on hearing screening; (4) "ED Grant for Ready-To-Learn Television" (Joe Caliguro) which discusses grants for school readiness programming; and (5) "Project Begin" (Edward Brann) which describes research on an early intervention program for preschool children and their families. A list of the members of the ECRWG is included. (MDM)

Descriptors—Academic Ability, *Academic Achievement, Academic Aptitude, Academic Failure, Black Achievement, Economic Factors, Grade Repetition, *Mothers, *Nature Nurture Controversy, Parent Role, Racial Differences, Socioeconomic Influences, Student Characteristics, Testing Problems, *Test Validity

Identifiers—*Armed Forces Qualification Test, Bell Curve (Herrstein and Murray), *Peabody Picture Vocabulary Test

Using data from the same source as that employed in Herrnstein and Murray's book, "The Bell Curve," this study reexamined links between the test scores of mothers and children, paying close attention to what the scores measure and whether these measurements mean the same things for blacks and whites. The study replicated Herrnstein and Murray's finding that a mother's score on the Armed Forces Qualification Test (AFQT) is a powerful predictor of her child's score on the Peabody Picture

Vocabulary Test (PPVT). After controlling for AFQT, however, results showed racial gaps in PPVT scores. This suggests that AFQT is not the only factor influencing PPVT scores. Child's test scores differed dramatically in correlation with maternal education and income. In addition, scores differed with the test, the child's age, and the child's race. The child's background also significantly affected grade repetition after controlling for child test scores and maternal AFQT scores. Maternal scores of different achievement tests have different effects on the PPVT scores of black and white children. The conclusion is that nature and nurture both matter. (Includes 9 statistical tables and 23 references.) (JW)

Frost, Joe L.
Analysis of Playground Injuries and Litigation.

Pub Date—95

Note—17p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Accidents, Child Health, *Court Litigation, *Head Injuries, *Injuries, Legal Responsibility, Outdoor Activities, Play, Playground Activities, *Playgrounds, Safety, *Young Children

Identifiers—*Child Safety, Playground Design

A study analyzed 82 cases of playground injuries and litigation (including 7 fatalities) in 28 states. In order of frequency, injuries happened in public schools, public parks, child care centers, apartment complexes, fast food restaurants, backyards, recreation camps, state parks, and state schools. Sixty-five percent of all injuries resulted from falls, either onto hard surfaces or from equipment, supporting the need for shock absorbing surfaces and "fall free" equipment. Other causes of injury, in order of frequency, include: (1) shearing action; (2) impact by swings; (3) head entrapment; (4) rowdy behavior; (5) choking on cords; (6) open S-hooks; (7) burns from bare metal; (8) cuts from glass; (9) equipment collapse; and (10) cuts from metal. Pieces of equipment involved in injuries include, in order of frequency: (1) swings; (2) slides; (3) merry-go-rounds; (4) horizontal ladders; (5) fire poles; (6) climbers; (7) superstructure components; (8) jungle gyms; and (9) ropes, geodesic domes, chiming bars, spring rides, concrete culverts, and bare metal. Of the children injured, 79 percent were between the ages of 3 and 7; 57 percent were boys, and 43 percent were girls. Results indicate that conforming to minimum safety criteria would prevent most fatalities and serious injuries. (Contains 10 references and 7 diagrams.) (JW)

Descriptors—Cognitive Ability, *Cognitive Development, Cognitive Processes, Curriculum Design, *Curriculum Development, Curriculum Enrichment, Foreign Countries, Instructional Development, *Preschool Children, Preschool Education

Identifiers—Developmentally Appropriate Programs, *Russia, Vygotaky (Lev S)

The educational objective of the Russian "Development" curriculum for children ages 3-7 is the development of creative and intellectual abilities. Theoretical foundations for the curriculum include the works of Vygotaky, Venger, Leontev, and Zaporozhets, which offer ideas such as: (1) child development is the unity of affective and cognitive structures; (2) cognitive development occurs through child-motivated activities; and (3) developing child abilities in preschool-age children requires the amplification of preschool characteristics of development. The "Development" curriculum allows children to master specific cultural tools and actions by engaging in learning activities. These activities are organized around lessons in areas such as: speech development, art, play, and construction. Lessons give children the opportunity to use visual tools such as models, schemas, and symbols. Measurements of level of cognitive ability showed that children exposed to the "Development" curriculum had certain greater cognitive gains than those learn-

ing from the standard state curriculum. (JW)

Identifiers—Conversation, United Kingdom

Using the tools of systematic grammar, this case study examined 3- and 4-year-old children's experiences with storytelling and the potential effects of those experiences on the children's future success in learning to read. Subjects were students attending one of two nursery school classes held at a large primary school on the south coast of England. These children came from families experiencing financial, social, and physical problems. Results indicated that: (1) storytelling helped to gain the students' attention; (2) throughout the school year, the children began to move toward more explicit, individual self-expression and away from dependence on shared observations; (3) some children had substantial gains in learning language styles very different from those found in their prior conversational experience; (4) in October, only 21 percent of teacher-child dialogic interactions were initiated by students, but by May, this number had increased to 54 percent; and (5) children experienced many positive gains, in various areas, from learning how to actively construct narratives. Descriptors—*Communication Skills, Foreign Countries, Intergroup Relations, Interpersonal Competence, Personality Development, Preschool Children, Self Concept, *Social Development, Social Environment, Social Experience, Social Life

Using pattern observation, this study examined the relationship between communication in a small group of children and basic parameters of social support (quantity, content, structure, and function of the communication). Researchers observed two separate groups. Subjects were 77 children (54 girls and 23 boys), ages 5-7. Data showed that: (1) when children were engaged in activities, a child's specific position in an activity created conditions for communication skill development; (2) exchange of opinions arose spontaneously out of practical necessity during activities; (3) level of communication effectiveness influenced the emotional satisfaction of the child; (4) status level, number of children, connections between children, and the emotional responsiveness and satisfaction of children within the group all affected a child's self-perception; and (5) social support afforded children opportunities to expand the adaptive nature of their own behavior. Contains 12 references. (JW)

Identifiers—France

Using observation and analysis of children's interactions with their environments, this study evaluated the quality of parent-run day care centers. Observation reduces the degree of subjectivism, respects the integrity of the child-care situation, and allows one to witness the actual effects of the environment and to observe the combined effect of multiple factors. The study focused on proximal environment defined in terms of interactions with the environment that facilitated children's discovery and understanding of their world. Environment was defined as the entire situational context in which children develop. Observations took place at four parent-run schools between January and June 1994. Observations were made from videotapes; over 44 hours of data were analyzed. Results of analyses included the following: (1) the degree of parental participation affected the degree of complexity of children's interactions with their environment; (2) children benefited more or less from complicated interactions depending on whether they came from socioeconomically advantaged or disadvantaged backgrounds; and (3) adults' levels of interactions varied with children's age. (Contains 27 references.) (JW)

Identifiers—African Americans

Using 400 autobiographical accounts offered by third graders, this study examined children's inner lives. Subjects were a stratified (by gender and by ethnicity at each school) random sample from eight elementary schools in a large urban Midwestern school district. The autobiographical sample analyzed consisted of information from 144 African American students (86 female and 58 male), 46 Caucasian students (32 female and 14 male), and 11 Hispanic students (7 female and 4 male). Findings include the following: (1) children want to do well in school—girls especially associate a sense of accomplishment with academics; (2) Hispanic and Caucasian students associated more negative thoughts with school more so than did African American students; (3) self-esteem seemed not to be an issue since most students would not change themselves or their family and self-esteem is tied to academic, physical, and social competence; (4) when asked about how they might change the world, regardless of race, students hoped to decrease violence; (5) students expressed a need for their own personal space at home; (6) family concerns were greatest among Hispanic students; (7) students were most afraid of death; and (8) students regarded math and language arts as being most important to their future; and finally, (9) students' goals were fairly well-defined with sports being in the future for all except the girls who envisioned themselves in the arts. Descriptors—*Classroom Communication, Classroom Environment, Classroom Techniques, Discipline, Foreign Countries, *Instructional Leadership, Teacher Expectations of Students, *Teacher Influence, Teacher Response, *Teacher Student Relationship, *Teaching Styles, Verbal Communication

Identifiers—Australia

Australia's process for quality child care improvement has 20 core principles, 4 of which relate to interactions between children and staff: (1) staff interactions with children should be warm and friendly; (2) all children should be treated equally, and their individual needs and backgrounds should be respected; (3) both sexes should be treated equally; and (4) staff should use a positive approach in guidance and discipline. With regard to this last principle, teacher style is a key determinant of quality interactions. Teacher style can be mapped out using leadership style characteristics developed by Lewin, Lippitt, and White. Semantic features differentiating teacher styles include: (1) type of questions asked; (2) timing and manner of evaluation; (3) type of commands issued; and (4) the offering of global or local information. Teacher praise might be of the student's product, of the student, or of either, combined with supporting information. Democratic and predominant leadership, which provides support and structure, engages children in activities which orient them to specific goals, shows the students how an activity's steps reflect those goals, and assists the students in learning and practicing their own role in the activity. Understanding the role of language in learning facilitates understanding how the manner of teachers' speech influences students and can help improve the quality of interaction between teachers and children. EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Elementary School Teachers, Intermediate Grades, Junior High Schools, *Middle Schools, *Sex Bias, Social Attitudes, *Socialization, Student Attitudes, *Student Surveys, Teacher Attitudes, Teacher Behavior, Teacher Expectations of Students, *Teacher Response, Teacher Student Relationship

Identifiers—*Gender Issues, Middle School Students, Student Expectations, Teacher Awareness, *Teacher Surveys, Teacher Talk

This study examined the issue of gender equity among middle school students. Literature of the past 20 years was reviewed, showing that bias in schools still exists. The purposes of the study were to determine if changes in attitudes and behaviors have occurred as a result of gender equitable treatment and to ascertain if exposure to inequitable treatment and the socialization process have established a paradigm for attitudes and behavior. The sample consisted of 1,005 middle school children in grades 5 to 8, 69 teachers, and 10 counselors from 2 suburban middle class school districts in New York and New Jersey. Students, teachers, and counselors were asked to respond to a questionnaire on a variety of gender equity issues and to state their personal views in their own words. The results of the 12 student survey questions are discussed in detail. The responses of the teachers reflect their knowledge of the issues surrounding gender equity and equitable behaviors in the classroom. However, according to the students, the teachers are not treating them equitably. Areas suggested for further study are sensitizing teachers to their "teacher talk," and determining how the community, along with schools, can counsel youngsters towards careers in mathematics and technology when appropriate, regardless of gender. The three survey instruments and results of the student survey are appended. (Contains 31 references.) (BAC)

Identifiers—*School Team Approach, *Toronto Board of Education ON

This follow-up study examined the goals, roles, and functions of the Toronto Board of Education's local school teams (LSTs), which are designed to support teachers in providing appropriate interventions for students in need of assistance in regular and special education settings. The 1990 and 1995 study used similar questionnaires and methodologies, with the addition of a section on LST recommendations on the 1995 questionnaire. The follow-up study surveyed 341 individuals who were members of LSTs at 44 elementary and 11 secondary schools. The study found that the number of individual students referred to LSTs increased from a mean of 66 per school year in 1990 to a mean of 72 per school year in 1995. Consultation with parents was viewed as a highly important recommendation by both elementary and secondary LST members. (Three appendices provide discussion guidelines for planning an effective model, discussion guidelines for evaluating team effectiveness, and a copy of the questionnaire. Contains 21 references.) This report presents the results of a nationwide survey of state agencies charged with regulating or licensing family child care. An introduction contains information on survey methodology, a summary of regulatory requirements for family child care homes and group (large) child care homes, and a survey question and answer summary. The body of the report includes individual 3- to 4-page entries for all 50 states and the District of Columbia. Each entry contains the name of the individual and agency providing the data and information on the number of family child care homes in the state, provider regulations and licensing, inspection procedures, tracking of license denials, complaint procedures, provider qualifications, provider training and orientation, discipline policy, emergency medical consent policies, immunization policies, fire code policies, nutrition policies, smoking policies, before and after school program policies, infant care policies, programs for children with disabilities, sick child care programs, zoning regulations, available resources, local agency contacts, and new or pending legislation. A list of state regulatory offices is included. (MDM)

Descriptors—*Budgeting, *Day Care, *Day Care Centers, Early Childhood Education, *Educational Planning, *Needs Assessment, Resource Allocation, Specifications

Identifiers—Americans with Disabilities Act 1990, *Business Plans, *Community Needs, Regulatory Agencies

This paper is addressed to those who want to start their own child care center, and provides guidelines for doing so. It identifies the first things to be considered—planning and conducting a community needs assessment to analyze the competition in the area and make the decision of opening a day care center, and gathering information from a variety of sources and agencies regarding rules and regulations. Representatives from each of these agencies should be requested to visit the proposed site and review the plans, which should include playground plans. The business management skills required to get started are outlined and discussed briefly. These pertain to developing a business plan that will project the growth of the business for at least 3 to 5 years, a start-up budget that is based on the amount of funding required to open the center, and an operating budget that establishes a month-to-month income and expenditure. Following this, the paper highlights the following tasks that need attention and will impact the budget: (1) interior and exterior design and arrangement; (2) selecting and purchasing equipment; (3) developing the educational program and/or the curriculum; (4) finding, selecting and hiring staff; and (5) building enrollment. Included in the paper are lists of additional resources, organizations, and companies related to child care. (BAC)

Descriptors—Court Litigation, Early Childhood Education, *Family Day Care, *Insurance, Insurance Companies, Legal Responsibility, Purchasing

Identifiers—*Liability Insurance

This pamphlet provides information to family day care providers on the need to have adequate liability insurance to cover the unique risks faced by care providers. It discusses the reasons for carrying liability insurance, including protection from lawsuits and medical claims by the parents of injured children. The pamphlet then explains what to look for when considering a specific policy or insurer, such as who is covered, what is covered, exceptions, and deductibles. It also explains the difference between occurrence policies, which cover incidents that occur during the term of the policy, and claims made policies, which only cover claims reported during the term of the policy. The pamphlet presents alternatives to stand-alone liability policies, including self-insurance and riders to homeowner policies. It concludes by offering tips on finding affordable family child care liability insurance, providing the names, addresses, and telephone numbers of four insurers. (MDM)

Identifiers—Child Care Needs, *Wisconsin

A 1994 state-wide survey examined the status of child care profession in Wisconsin. Surveyed were 326 family child care providers, 104 child care center directors, and 254 center teaching staff. Responses indicated that child care teaching staff have experienced a wage increase of just over 1 percent per year since 1988, and continue to earn low wages compared to other members of the work force, despite their relatively high level of education. Most centers offer limited health insurance or none at all and have high staff turnover, according to the survey. The survey also found that although family child care providers have experienced a 23 percent increase in earnings since 1988, they still earn low wages compared to other members of the work force. Finally, the survey found that most center directors do not receive fully-paid health insurance, and that their salaries are lower than administrators in other human services occupations. Most directors ranked improving teaching staff compensation as their top priority. Based on the survey, recommendations to improve the quality and availability of child care in Wisconsin include block grants, tax credits, and parental leave. (MDM)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—Early Childhood Education, Educational Policy, *Federal Programs, Financial Support, Guidelines, *Preschool Education, *Program Implementation, Teacher Attitudes, *Teacher Salaries

Identifiers—Head Start Improvement Act 1992, *Project Head Start, *Salary Enhancement

This report examines how Head Start programs have implemented teacher salary increases mandated and funded by the 1990 Head Start Expansion and Quality Improvement Act. It is based on quantitative data found in local grantees' and delegate agencies' reports to the Head Start Bureau on salaries and related questions, as well as qualitative data gathered from meetings with Head Start personnel. The report found that programs paying the lowest wages for each job category in 1992 reported the largest increases between 1992 and 1994, and that significant salary differences for each job category exist among programs. It also found that the educational level of Head Start teachers increased between 1992 and 1994, and that turnover rates remained relatively constant over the same period. The report recommends increased funding for the salary improvement project, improved salary data collection and dissemination, management training for program administrators to help them better implement the program, and improved program guidelines. Three appendices provide information on data sources, salary tables, and a list of the national Head Start regions. Contains 17 references. (MDM)

Conway, Dana

Improving Prosocial Skills through Developmentally Appropriate Strategies and Activities in a Kindergarten Classroom.

Pub Date—95

Note—57p.

Ed.D. Practicum Report, Nova Southeastern University.

Pub Type—Dissertations/Theses - Practicum Papers (043)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Adjustment (to Environment), Aggression, Altruism, Change Strategies, Cognitive Development, Cooperation, *Curriculum Development, Educational Strategies, Instructional Improvement, Instructional Innovation, *Interpersonal Competence, Learning Activities, *Preschool Children, Preschool Education, *Prosocial Behavior, Social Influences

Identifiers—*Developmentally Appropriate Programs

By means of a series of educational activities over 8 months, this practicum study sought to institute a prosocial curriculum for preschool children. The curriculum was meant to teach trust, autonomy, and skills for handling aggressive feelings. Subjects were 18 four- and five-year-old children. Activities exposed children to areas such as: (1) physical differences and abilities; (2) body awareness, especially in relation to space and motion; (3) concepts of smoothness, touch, gentleness, and roughness; (4) awareness of sounds and of the emotions potentially connected to them; (5) development of a sense of trust and self-control; (6) the value of partnerships; (7) conflict resolution skills; and (8) kindness. Activities promoting these concepts were conducted for approximately one half hour each school day. Results showed that, although some children have trouble adapting to group environments, increasing their sense of autonomy and trust assists in their adaptation. Exposure to violence is a difficult force to counteract; however, activities which communicate the consequences of violent behavior can decrease this behavior. Children developed prosocial skills, gained in emotional development, and increased their abilities to cooperate and to resolve conflicts peacefully. (Three appendices include pre- and posttest results of the Personal/Social Skills Rating Scale. Contains 35 references.) (JW)

Descriptors—*Caregiver Child Relationship, Classroom Design, *Classroom Environment, Day Care Centers, Early Childhood Education, Educational Strategies, Inservice Teacher Education, *Instructional Improvement, Instructional Innovation, Outdoor Education, *Preschool Teachers, Professional Development, *Staff Development, Student Needs, Teacher Attitudes, Theory Practice Relationship

Identifiers—*Developmentally Appropriate Programs

This practicum study sought to increase child care staff's ability to transfer what they learned from training to the classroom and thereby to increase developmentally appropriate educational practice. Specifically, the project sought to increase positive interactions in the child care setting, increase the use of the outdoors as a learning environment, and help educators adapt better to student needs. Parents, staff, and classroom volunteers participated in a 15-hour course on child development; the course took place over 6 weeks. A support group for teachers was also formed. Seven additional weeks of instruction on advanced topics was offered. Following this instruction, staff engaged in developmentally appropriate educational practices. However, some staff found it difficult to transfer into practice what they had learned about the potential of outdoor education. Overall, staff were better able to adapt their management of child behavior to changing situations. (Five appendices include a checklist of developmentally appropriate practices and an outdoor learning survey. Contains 22 references.) (JW)

Descriptors—Early Childhood Education, Essays, Foreign Countries, Parent Child Relationship, *Preschool Teachers, Sex Differences, *Sex Role, *Sex Stereotypes, *Teacher Attitudes, *Work Attitudes

Identifiers—Finland

This study examined the conceptions of Finnish child care personnel about girls' and boys' work, as well as fathers' and mothers' work education, based on a mail survey of 317 female preschool teachers chosen from the register of the Kindergarten Teacher Association. The subjects were asked to write an essay about the subject "a girl doing work, a boy doing work, a mother as a work educator, and a father as a work educator." The survey found that the teachers attached so-called "women's work" to girls more often than they attached such work to boys, and that they attached "men's work" to boys more often than they attached such work to girls. There were more mentions relating to positive attitudes to work by girls than by boys, according to the essays, and more mentions of mothers doing children's work education than fathers doing such activities. More than half of all work education units represented traditional, gender-segregated work education, according to the essays. (Contains 99 references.) (MDM)

Cognitive Abilities of Children between 4-5 Years of Age Coming from Immigrant Families.

Pub Date—Sep 95

Note—14p.; Paper presented at the European Conference on the Quality of Early Childhood Education (5th, Paris, France, September 7-9, 1995).

Pub Type—Reports—Research (143)—Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Academic Achievement, *Cognitive Ability, *Cognitive Processes, Cultural Influences, Early Childhood Education, Foreign Countries, *Immigrants, *Interpersonal Competence, *Preschool Children, Test Bias

Identifiers—France, Maghreb Countries

This study examined the social and cognitive competence of immigrant preschool children in France. A total of 25 immigrant (Maghreb) children and 25 nonimmigrant French children age 4 and 5 years participated in the study, which compared their cognitive abilities, adaptive behaviors, play abilities, and success in the first year of elementary school. It found that the immigrant children received lower scores than the nonimmigrant children in all four areas. The results suggest that children from an immigrant background seemed to "cognitively" more than nonimmigrant children the adaptations that define the social intelligence. For nonimmigrant children, these cognitive processes were heavily mobilized in learning situations and were much more in action in applications of practical intelligence. Possible cultural and linguistic biases of the instruments used to measure cognitive abilities and adaptive behaviors are also discussed. (Contains 50 references.) (MDM)

Descriptors—Case Studies, Child Custody, Child Psychology, *Court Litigation, Divorce, Emotional Problems, *Fathers, *Parent Child Relationship, Parent Materials, Personality Traits, *Sexual Abuse, Social Workers, Young Children

Identifiers—*False Allegations, *SAID Syndrome

Noting the increase in false accusations of child sexual abuse where divorce and custody litigation is in progress, this book examines the consequences of such accusations for everyone involved and provides defensive strategies for those falsely accused. The book draws on four case studies, including a personal one, to illustrate the chronology and effects of false allegations brought by the mother against the father, noting commonalities among the

cases, and personality traits of the accuser and of the accused. The effects of false allegations and subsequent proceedings on the child are also detailed. The book then explores this phenomenon as "Sexual Allegations in Divorce" or SAID Syndrome, and identifies "red flags" during proceedings that suggest this syndrome may be occurring. The book also examines how social service agencies and courts appear to work in concert to substantiate false allegations rather than investigating to determine the truth, and how therapeutic interventions, when no abuse occurred, can affect children. The dubious use of anatomically correct dolls as evidence of sexual abuse in such cases is also examined. Finally, the book summarizes the legal and social service problems inherent to such cases, offering solutions, and then presents legal and emotional strategies for fighting false allegations. Three appendices include a questionnaire for identifying SAID syndrome, guidelines for determining presence of abuse, and a court monitor checklist. A list of support organizations is included, along with state listings of the Vocal National Network and a 29-item bibliography. (HTH)

Identifiers—Caregiver Qualifications, Caregiver Training, Child Care Costs, *Child Care Needs, Parent Caregiver Relationship

This document is primarily a bibliography containing approximately 156 references on family day care. Most of the items listed are in English, but several titles are in Spanish. The document also provides a brief background on family day care, which includes an enumeration and explication of the advantages of family day care. Advantages include: (1) family day care providers accept children as young as 3 weeks of age; (2) providers are usually located in the child's neighborhood and have flexible hours; (3) children in family day care have a better chance to form close relationships with each other; (4) because family care is typically provided by one individual, the frequency and quality of parent-caregiver communication improves; and (5) family day care is better able to adapt to the individual needs. Disadvantages of family day care are also discussed. These include: (1) finding high quality family day care can be difficult; (2) family day care providers typically have less training in child development than child care center staff; and (3) zoning and deed restrictions are often problems for family day care providers. Descriptors—*Educational Administration, Educational Policy, Educational Resources, *Federal Programs, *Food Service, *Nutrition, Student Needs

Identifiers—Program Characteristics, *School Breakfast Program, *School Lunch Program

Summarizing the first year report of a multi-year study of the Food and Nutrition Service's (Department of Agriculture) Child Nutrition Programs, this report describes the programs and methods of the study. Data were collected through telephone inter-

views with states and School Food Authorities (SFAs) between 1987 and 1992. Findings from 1987-1988 data include the following: (1) approximately 39.7 percent of all school lunches were served free to low income children; (2) 6.6 percent were served at a reduced rate; (3) 53.7 percent were served at full price; (4) National School Lunch Program participation was higher in SFAs offering the School Breakfast Program, in smaller SFAs, and in high-poverty areas; (5) average SFA cost of producing a lunch was \$1.43; (6) Food and labor costs accounted for most of production costs; (7) 90 percent of SFAs received donated commodities such as cheese, flour, oil, chicken, and turkey from the federal Food Donation Program; (8) 43 percent of the SFAs that participated in the School Breakfast program cited student nutritional needs as a major concern; and (9) 28 percent of the SFAs felt breakfast was important to children's intellectual functioning. (Includes eight charts.) (JW)

Descriptors—*Access to Education, Comparative Analysis, Cross Cultural Studies, Enrollment, *Federal Aid, *Financial Support, Foreign Countries, *Preschool Education, Private Sector, *Public Education

Identifiers—ERIC Digests, France, Italy, *Organization for Economic Cooperation Development, United States

This digest compares the efforts of the United States and of other member countries of the Organization for Economic Co-operation and Development (OECD) to finance center- and facility-based preschool. In many OECD countries, public preschool is more widely available than in the United States. For example, in France, 100%, and in Italy, approximately 92%, of children age 3 through 5 attend preschool. In the United Kingdom and the Netherlands, all 5- and almost all 4-year-olds, and in Belgium, 95% of 3- to 5-year-olds, attend a public preschool program. Many public preschool programs in OECD countries and some programs in the United States are financed through multiple sources. There are two major differences in the ways this funding is provided. First, most U.S. publicly funded programs are targeted for poor and disabled children, while in other countries all children are included in public preschool. Second, in OECD countries, different funding sources finance different parts of a comprehensive program or target different ages entirely, whereas in U.S. publicly financed programs, most of which target individuals in the same population of poor children, there is greater fragmentation of services and conflicting eligibility requirements. In the United States, the private sector has traditionally been the major supplier of early childhood education and care. Recent research, however, has found that sites operated by public agencies, receiving public funding, or sponsored by employers provided higher quality programs than sites that were financed only by parent fees. This study evaluated a project for integrating preschool- and school-age children in a joint educational program. The integration project (SKOBO) has been implemented in all education units in the investigated municipality. Each school has, however, had a considerable degree of freedom in carrying out the program with the potential to find its "own path." The classes in SKOBO consist of children 6-9 years old. The teacher and preschool staff cooperate in the school work, which is mainly individualized. Each child works with tasks that are appropriate according to the child's degree of maturity and his or her needs and interests. The staff cooperation during the school day makes possible the synthesis of both school work and play. Care and education are combined, and the personnel can make use of their different qualifications in a cooperative fashion with the child in focus. The aim of the present study is to investigate, using interviews, how the staff (on three studied units) and the parents of the children comprehend the integration program. In addition, the interaction of staff with staff, children with children, and staff with children was observed. The study found that the units (two classes with staff) work out their own models for integration. Among the things that differ are: (1) the nature and extent of cooperation between teachers and preschool staff; (2) the extent of integration of children of different ages in the classroom (quite often the six-year-olds were not taught in the main classroom, but separately.) Both the staff and the parents believe that this kind of program favors the social development of children. They are, however, unsure whether it also favors the intellectual development of the child. Identifiers—*Advertisements, *Channel One, Consumers, ERIC Digests, Media Literacy

This digest reviews the recent history of advertising to children, spotlights controversial marketing efforts, and examines the nature of commercial messages directed toward children in public schools. Because of the increase in children's spending power in recent decades, advertisers have closely targeted children as consumers. Advertising strategies aimed at children include toy-related programs or program-length commercials, kids' clubs, store displays directed at children, direct mailing to children, and marketer-sponsored school activities. Advertising in schools takes many forms, one of the most controversial of which has been "Channel One," a 12-minute daily news show for students in grades 6 through 12 that includes 2 minutes of age-appropriate ads. Some educators defend the use of commercially produced materials as a way of providing useful supplements to the curriculum or of raising funds and building bridges to businesses. Other educators oppose it, fearing that market values may replace democratic values in schools, pointing to increased pressure on teachers' and administrators' time, and believing that students comprise a captive audience. One report that stresses students as a captive audience divides in-school commercialism into four categories: (1) in-school ads; (2) ads in classroom materials and programs; (3) corporate-sponsored educational materials and programs; and (4) corporate-sponsored

contests and incentives programs. Professional organizations in education have supported the development of guidelines for using commercial messages in schools. Several consumer groups have formulated such guidelines, based on an approach that includes reviewing all sponsored materials, pursuing noncommercial partnerships with businesses, and teaching media literacy to elementary school students. However, in light of the controversial nature of the issue, public discussion and workable policies are needed. (BC)

Descriptors—Art Materials, Class Activities, Classroom Environment, Classroom Techniques, Creative Activities, *Creative Development, *Creative Expression, *Creativity, Early Childhood Education, Teacher Student Relationship, *Young Children

Identifiers—ERIC Digests, Project Approach (Katz and Chard), Reggio Emilia Approach
This digest considers teacher- and child-initiated strategies for enhancing young children's self-expression and creativity. When teachers think about art and creative activities for children, it is important for them to consider that young children: (1) are developmentally capable of classroom experiences which call for (and practice) higher level thinking skills, including analysis, synthesis, and evaluation; (2) need to express ideas through different expressive avenues and symbolic media; (3) learn through meaningful activities in which different subject areas are integrated; and (4) benefit from in-depth exploration and long-term projects. Given what is known about young children's learning and their competence to express their visions of themselves, classrooms and classroom activities can be modified in several ways to support children's emerging creativity. First, class schedules should provide children with unhurried time to explore. Children should not be artificially rotated from one activity to another. Second, children's work spaces should inspire them. Children's work is fostered by a space that has natural light, harmonious colors, and comfortable work areas. Third, teachers can provide children with wonderful collections of resource materials that might be bought, found, or recycled. Fourth, the classroom atmosphere should reflect the adults' encouragement and acceptance of mistakes, risk-taking, innovation, and uniqueness, along with a certain amount of mess, noise, and freedom. In order to create such a climate, teachers must give themselves permission to try artistic activity. Finally, teachers can provide occasions for intense encounters between children and their inner or outer world. Children's best work involves such encounters. (BC)

Identifiers—*Emergent Literacy, ERIC Digests

In order to provide data to help schools respond to the diversity in the backgrounds and educational needs of children entering school, a U.S. Department of Education study asked parents of 3- to 5-year-old children who had not yet started kindergarten about their children's accomplishments that indicated emerging literacy and numeracy skills and their children's difficulties in physical activity or attention. Results indicated that the percentage of children displaying signs of emerging literacy and small-motor skills increased with age. Developmental difficulties showed small changes across ages. More girls than boys demonstrated literacy and small-motor skills. This gender difference was small, however. Hispanic preschoolers showed fewer signs of emerging literacy, exhibited more difficulties with physical activity or attention, and were in less good general health than white or black children. The study identified five family risk factors: (1) mother has less than a high school education; (2) family is below the poverty line; (3) mother speaks a language other than English as her primary language; (4) mother was unmarried at the time of the child's birth; and (5) only one parent is present in the home. These risk factors, especially low maternal education and minority language status, were found to be associated with fewer accomplishments and more difficulties in children. Attending Head Start, prekindergarten, or other center-based preschool programs have beneficial effects on emerging literacy and numeracy in four-year-olds from both high- and low-risk family backgrounds. However, preschool attendance does not appear to ameliorate behavioral, speech, or health difficulties of preschoolers. (BC)

Identifiers—*Alaska
Alaska's public schools cost \$1.2 billion in the 1992-93 school year. That included both operating and capital spending and amounted to about \$10,000 for each of the state's 119,000 elementary and secondary students. Roughly one-quarter of the state government's general fund budget went to the

schools, covering 64 percent of costs. About 30 percent of all taxes raised by cities and boroughs covered 18 percent of school costs; residents of rural school districts known as Regional Education Attendance Areas (REAs) paid no local taxes. School districts covered 4 percent of costs from fees and other local sources. The federal government paid 14 percent of school costs. The School Foundation Program (a program intended to equalize money available to all school districts) paid for half of all the costs of Alaska's schools; of the \$614 million distributed by the foundation, \$572 million was state money, \$42 million was federal. Per student costs varied from \$1,600 for correspondence students to approximately \$15,000 in REAs and at Mt. Edgecumbe, a boarding high school for rural students. Operating expenses made up about 82 percent of school costs, and capital expenses 18 percent. The biggest expense was classroom instruction. Two-thirds of the \$214 million in school capital spending was for debt service on existing bonds, and one-third was for new bonds and construction projects. Growth in spending matched growth in the number of students in the early 1990s, but real spending adjusted for inflation dropped about 7 percent between 1990 and 1993. Includes six charts. (JAT)

Identifiers—Community Renewal, *Ontario, *Rural Culture

This paper overviews the evolution of rural society in Ontario (Canada) from the author's personal experience and research. The paper defines "rural" and "culture" and discusses how these concepts are relevant to social change and the resulting effects on technology, demographics, social organization, and community beliefs and meanings. Modern technology has resulted in the closure of rural schools, churches, businesses, and post offices. Additionally, daily travel between large and small communities has closed the gap between rural and urban life and changed rural demography. For example, rural teachers are now less likely to live in the community; to know much of the child's home life; or to meet socially with the children, their parents, or other individuals active in the community. Another impact of rural change is the centralization of local institutions and loss of local control. In rural Ontario, schools are managed by a cluster of highly trained and highly paid officials with whom parents, teachers, and principals have limited influence. In essence, urbanization has resulted in the adoption of urban values and beliefs at the expense of traditional rural values that emphasize the importance of community life. A form of social action is proposed that uses "community sounding" as a way to stimulate rural community rejuvenation. This effort solicits community participation and stresses local history to reestablish an awareness of rural values. Rural people must strive to develop a new definition of rural by freeing themselves from labels and stereotypes that are imposed on them by urban opinion makers. (LP)

Acclimatization: A Sensory and Conceptual Approach to Ecological Involvement.

Report No.—ISBN-0-87603-007-X

Pub Date—89

Note—127p.; Reprint.

Available from—American Camping Association Bookstore, 5000 State Rd. 67 North, Martinsville, IN 46151 (\$9.95; quantity discounts).

Pub Type—Books (010) — Guides - Classroom - Teacher (052)

Document Not Available from EDRS.

Descriptors—Camping, Ecology, *Environmental Education, Experiential Learning, *Learning Activities, Learning Strategies, Lesson Plans, *Outdoor Education, Program Implementation, *Resident Camp Programs, Science Education, *Sensory Experience

Identifiers—Environmental Awareness, *Environmental Ethic, *Nature Study

This book describes acclimatization, an approach to nature education that actively involves participants in the environment during a 1-week summer camping experience. The goal is to stimulate awareness of nature, increase appreciation of nature, and motivate further involvement with nature. An outcome of this process is that participants acknowledge the impact that man has had on the environment and realize their role in caring for nature. A brief introduction discusses trends in nature education and the development of acclimatization. Most of the book covers lesson plans for 6 days. Each day is devoted to a different ecological community, including a freshwater marsh, a forest, a lakeshore, a bog, a trail, and one cubic foot of soil. In addition, specific concepts are emphasized each day, such as soil and land formation, plant succession, habitat, elements of life, adaptation, territory, and food chains. Following each lesson plan is a narrative of the author's experience using this approach with participants at Towering Pines, a boys' camp in Wisconsin. Other sections discuss: (1) additional programs that can be integrated with the camping experience (a camp zoo, the use of trail systems, a sample geology mini-unit, environmental study stations, quadrant task-force groups, and expeditions to discover different habitats); (2) specific techniques for using the senses when exploring nature, maximizing attention-getting factors, and maintaining group control; and (3) participant comments on the acclimatization experience. The last chapter provides information on program development and describes additional learning activities. An annotated bibliography contains 10 resources for acclimatization programs. (LP)

Increasing Parental Involvement in Grades One, Four, and Five in a Rural Elementary School.

Pub Date—94

Note—74p.; Ed.D. Practicum, Nova Southeastern University.

Pub Type—Dissertations/Theses - Practicum Papers (043) — Tests/Questionnaires (160)

EDRS Price — MF01/PC03 Plus Postage.

Descriptors—Blacks, Elementary Education, Elementary School Students, Homework, *Parent Education, Parenting Skills, *Parent Participation, *Parents as Teachers, Parent Student Relationship, Parent Teacher Conferences, Parent Workshops, Practicums, Program Implementation, Rural Education, *Rural Schools

Identifiers—Parent Surveys

A program implemented in a rural elementary school in Florida had the goal of increasing parental involvement of students in grades 1, 4, and 5. The majority of students in the school were black, came from single-parent homes, and were considered low-income. Prior to program implementation, a parent survey revealed that of 53 parents, 21 read to their children, 29 assisted with homework, and 17 discussed school activities with their children. The program centered on workshops held over a 3-month period to teach parents techniques for helping their children with homework assignments. Homework activities requiring parental participation were sent home to bridge the gap for parents unable to attend workshops. In addition, parents were encouraged to volunteer in classroom activities, attend field trips, and schedule parent-teacher conferences. Additionally, workshops were held over a 5-month period to teach parents techniques for improving students' antisocial behaviors. A handbook was distributed to parents that provided an overview of capitalization, punctuation, definitions of parts of speech, sentences and non-sentences, parts of a friendly letter, and key mathematics terms. Program evaluation revealed that the program was somewhat successful in increasing parental involvement, and parents rated the program as beneficial. However, parent participation was not consistent, and it was noted that workshops should be held consecutively over a 1- or 2-week period to maintain parental motivation and

involvement. Appendices include parent survey, program evaluation forms, and other forms used in program implementation. (LP)

Descriptors—Anglo Americans, *Cultural Exchange, Cultural Interrelationships, Educational Development, Elementary Secondary Education, *Ethnic Relations, Foreign Countries, Government Role, *Hispanic American Culture, *Local Government, *Mexican American History, Mexicans, State History

Identifiers—*Mexico, *Texas

This book details the history of Texas between 1821 and 1836 and describes the two-way exchange of land, power, culture, and social institutions between the Anglo-American frontier and the Hispanic frontier. In 1821, when Anglos first began to settle in the Mexican state of Coahuila y Texas, Tejanos had had permanent settlements in place for nearly a century. The basic institutions of Tejano life and culture common to these settlements were a long-lasting influence on the evolution of local government and institutions in the republic and state of Texas. For example, the foundations of the Texas educational system can be traced back to Tejano influence. Tejanos struggled for a system that would allow state aid without sacrificing local control of education. In the decree of 1826, the municipal government of Bexar proposed that the state of Coahuila y Texas grant tracts of land to the municipalities, with the proceeds of that land to be used to fund schools. However, the most beneficial law of the Mexican period was Decree No. 299, which established the permanent school fund in 1833. Although many Anglos were slow to accept the Tejano philosophy of locally managed and funded education, the Republic of Texas president Mirabeau B. Lamar later signed into law an educational system patterned directly after the Tejano system. Additionally, Texas laws concerning public domain, mineral rights, water rights, homesteading, and community property, as well as Texas ranching traditions that tightly control methods of range and livestock management can be traced back to Hispanic traditions established in the pre-Anglo era. Although important aspects of Tejano society survived the Mexican period, Tejanos themselves suffered under both Mexican and Anglo domination during the Revolution and Republic years. By 1845, Tejanos had fled their land, and 40 of the 49 old Tejano ranchos passed into Anglo hands for a tiny fraction of their value. Contains 148 references and an index. (LP)

Organization of Educational Services in Sparsely Populated Regions of Canada.

Department of Indian Affairs and Northern Development, Ottawa (Ontario).

Pub Date—Jun 95

Note—190p.

Pub Type—Information Analyses (070) — Reports - Research (143) — Tests/Questionnaires (160)

EDRS Price — MF01/PC08 Plus Postage.

Descriptors—Administrative Organization, *American Indian Education, Canada Natives, Case Studies, Consortia, Educational Administration, Educational Change, Educational Cooperation, Educational Research, Education Service Centers, Elementary Secondary Education, Foreign Countries, *Intermediate Administrative Units, Rural Areas, *Rural Education, School Districts, Self Determination, *Shared Resources and Services, *Small Schools, *Technical Assistance

Identifiers—*Canada, Cooperative Educational Service Agencies

This report identifies and examines current approaches to the provision of second- and third-level

services in provincial school systems serving remote areas of Canada, and assesses the applicability of these approaches for First Nations schools. Second-level services are typically provided at the school board or system level and include curriculum adaptation, consultants, legal advice, and program implementation. Third-level services are offered by the provincial ministry and include curriculum development, research, evaluation, policy development, and general goals or standards for education. A literature review examines advantages and disadvantages of small school-community contexts, the central question of equity regarding rural student access to a variety of programs and educational benefits, and trends in administrative organization toward cooperation and sharing. Eleven case studies describe and analyze educational innovations in sparsely populated areas of Canada and the United States. Each case describes clients served; types of educational support services; financing and scope of services; control, decision making, and accountability; adaptations; and outcomes. Five developments were initiated by governments primarily in response to political and economic factors, three came about because of school board action to solve problems and improve services, and three were the result of communities driven by minority cultural aspirations. Organizational arrangements include cooperative services agencies, consortia, multidistrict school boards, interdistrict cooperative agreements, a distance learning center, and (U.S.) regional educational laboratories. In all cases, the emphasis was on decentralization, collaboration, and local control. However, collaborative processes are slower than hierarchical ones; implementation of cooperative arrangements was usually slow and sometimes painful. The last section of the report addresses implications for Aboriginal use of provincial educational services. The goal of self-determination must guide decisions about how services, practices, and policies from non-Native education institutions are screened and adapted to First Nations schools. Appendices contain 86 references, student and parent survey results, and other data collected in the study. (LP)

Mulkey, David.
Education in the Rural South: Policy Issues & Research Needs.

Southern Rural Development Center, Mississippi State, Miss.

Spons Agency—Cooperative State Research Service (DOA), Washington, D.C.
Report No.—SRDC-Pub-167

Pub Date—Mar 93
Note—43p.

Pub Type—Information Analyses (070)
EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Economic Development, Educational Change, Educational Finance, *Educational Policy, *Educational Research, Elementary Secondary Education, Equal Education, Family School Relationship, Human Capital, Research Needs, *Rural Development, *Rural Education, *School Community Relationship, School Districts, *State Departments of Education

Identifiers—Education Economy Relationship, *United States (South)

This report overviews policy issues and research needs related to rural education in the South, focusing on educational systems in Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, and Virginia. It is generally accepted that the South compare unfavorably with the rest of the nation with regard to education and workforce quality. Thus, educational improvement is seen as crucial to the continued development of the region. A review of educational research literature and of state-level education data for southern states examines student performance (the role of schools, families, and communities), educational finance, and education and economic development. The report concludes that the education process is strongly influenced by factors beyond the control of schools. From the perspective of research, more definitive answers are needed as to the exact nature of school, family, and community relationships in order to design appropriate educational improvement policies. With regard to educational finance, evidence suggests that little improvement will be achieved by marginal changes in school funding, and that existing variations between and within states may represent more than marginal differences. Finally, when considering education as a rural development strategy,

it is important to note that issues such as school and student performance, family and community problems, and economic development are interrelated. Research and policy debates must recognize and focus on the nature of these interactions. Data tables include information on number of school districts, enrollment, school district size, revenues for public schools, current expenditures per student and as a percentage of personal income, average salaries for instructional staff and per capita income by state, and expenditures per pupil by state. Contains 76 references. (LP)

Warner, Linda Sue Brown, Dennis.
Cognitive and Cultural Constructions: The First Year Experience.

Pub Date—Jul 95
Note—15p.; Paper presented at the International Conference "The First Year Experience" (8th, York, England, United Kingdom, July 11-15, 1995).

Pub Type—Reports - Descriptive (141) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*American Indian Education, American Indians, *Cognitive Processes, *College Freshmen, Colleges, Culturally Relevant Education, Culture Conflict, Educational Strategies, Higher Education, Models, Schemata (Cognition), *Student Adjustment, Student Alienation, Student College Relationship, Tribally Controlled Education

Identifiers—*Haskell Indian Nations University KS

The first-year experiences of minority-group college students are often highly stressful and may influence decisions about remaining in college. M. R. Louis' model of meaning and sense-making provides a framework for examining the experiences of American Indian college freshmen and for evaluating interventions aimed at lowering student attrition at tribally controlled colleges. The model describes the process by which individuals in new situations encounter, respond to, and reinterpret "surprises," experiences that differ from what was anticipated or assumed. Five types of surprises are outlined: conscious expectations, self-expectations, unanticipated features, internal reactions, and cultural assumptions. Until recently, all federal Indian education policies aimed at assimilation of Indian children into White culture. Begun in 1968, tribally controlled community colleges have greatly increased Indian postsecondary participation and graduation rates by permitting students to maintain a cultural base in their home communities. At Haskell Indian Nations University, a federally operated college with 100 percent American Indian and Alaska Native enrollment, faculty and staff have instituted a variety of structural and curricular changes aimed at highlighting the relevancy of students' cultures and values. Such strategies narrow the gap between students' expectations and the realities of the freshman year and increase the likelihood that students will assign appropriate meanings to surprises. (SV)

Descriptors—Attitude Measures, Citizen Participation, Community Characteristics, *Community Development, Community Planning, *Community Surveys, *Data Collection, Economic Development, *Local Issues, *Needs Assessment, *Public Opinion, Questionnaires, Rural Areas

This document identifies steps in organizing and conducting a community survey and provides materials for assembling a well-focused survey form. Planning and conducting a successful survey involves the organization of a planning group, selection of relevant topics and information to be collected on each topic, preparation of a survey form, identification of local organizations willing to conduct the survey, tabulation of survey responses, report preparation, and communication of survey

results to the community. Appendix A provides a case study example of a community needs and priorities assessment developed and carried out by citizens in a fictional community in Nebraska. It includes a brief synopsis of the situation in this community and describes community leaders who decided to take action when the future of the community was threatened. Appendix B includes examples of cover letter and cover pages and information on customizing a community needs assessment. Appendix C (Customizing A Needs Assessment) includes survey topics and statements related to community appearance; public buildings; public parks and green areas; streets, sidewalks, signs, and lighting; community utilities and services; health care personnel, programs, and services; housing; expanding the local economic base; community outdoor and indoor recreation; self-development opportunities; tourism development; and small-scale entrepreneurship. This section also includes blank forms for constructing a community survey. (LP)

Descriptors—Alaska Natives, American Indian Education, American Indians, *Change Strategies, Community Development, Individual Development, *Objectives, *Social Action, Social Responsibility, *Youth

Identifiers—*Native Americans

Based on the ideas of participants at a Native American youth conference, this document sets out an agenda to bring about a new future for Native American youth by the year 2000. The agenda presents 12 interrelated goals concerned with the development of a stronger, more self-reliant Native American society. Several strategies for action are suggested for each goal. The goals are to: (1) reaffirm spirituality as the guiding force for healing in Native America; (2) instill within Native American youth the knowledge and desire to live in unity with themselves and the world; (3) teach youth to understand, respect, and be responsible for the environment; (4) instill in Native American youth a greater understanding and respect for their rich and unique heritage; (5) teach youth about sovereignty and its importance in achieving Native American goals; (6) strengthen and support the family; (7) recognize the worth of each individual in the community; (8) provide each individual with the opportunity to attain a quality education; (9) promote the mental and physical health of each individual; (10) build a sound economy to support individuals, tribes, and communities; (11) promote lifestyles of sobriety; and (12) promote community service as a necessary part of an individual's life. Ahlborn, Ernest S.
Increasing Enrollment in Religious Education Classes by Applying a Variety of Marketing Techniques.

Pub Date—95
Note—98p.; Ed.D. Practicum, Nova Southeastern University. Some pages of the appendices contain light, broken type.

Pub Type—Dissertations/Theses - Practicum Papers (043) — Tests/Questionnaires (160)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—Enrollment Influences, Higher Education, High School Students, *Marketing, Parent Participation, *Peer Influence, Program Implementation, *Religious Education, *Rural Areas, Secondary Education, Strategic Planning, Student Attitudes, *Student Recruitment, Student Surveys

Identifiers—*Church of Jesus Christ of Latter Day Saints, *Market Analysis

A marketing program implemented in 18 small, rural agricultural communities aimed at increasing enrollment in the daily religious classes held by the Church of Jesus Christ of Latter-day Saints (LDS). Approximately 23 percent of the population in the 18 communities belong to this Church. Daily religious instruction is provided in released-time from school, early morning classes, and home study settings. Seminars (classes for high school students)

meet in separate, church-owned or rented buildings near public schools. Prior to program implementation, it was estimated that only 1,233 students were enrolled in religious classes out of 1,600 eligible students in grades 9-12. Specific marketing strategies included organizing a planning task force; developing an enrollment instruction booklet to be used by church leaders; instructing faculty and student leaders on how to enroll students; introducing improved record keeping procedures; implementing methods for identifying potential students; and administering a student questionnaire to help understand student motivation for seminary enrollment. Although subsequent enrollment increased by 7.3 percent, the percentage of eligible students participating in seminary classes remained the same. This report concludes that more potential students were identified, and that without the use of marketing practices, enrollment would have decreased. Peer-group contacting was the most successful marketing technique. Appendices include sample curriculum, student record forms, student questionnaire, enrollment booklet, statements from church leaders, parent and student handout, stake and ward enrollment totals, 3-year enrollment comparison, and questionnaire tally sheet. The Rural Community College Mission: One Faculty's Report.

Pub Date—[95]

Note—14p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Community Colleges, Faculty, *Institutional Mission, Institutional Role, *Rural Areas, Rural Schools, School Community Relationship, Small Colleges, Teacher Attitudes, Two Year Colleges

Identifiers—*Alabama (Central), *Faculty Attitudes

This paper examines the perceptions and attitudes of the faculty of a rural community college about their institution's mission. The college serves a 19-county area in central Alabama, characterized by high rates of illiteracy, unemployment, and poverty. Surveys were completed by 74 of the 100 faculty members. Faculty generally supported their college's efforts but believed that additional efforts should be made to meet the various needs of external constituencies. They perceived a consistent lack of understanding of the college's purpose among those they were attempting to serve. Faculty reported that the college's priorities are, and should be, career and technical education, adult and continuing education, and GED education programs. Similarly, faculty agreed that transfer education, health education, and recreational education programs should be, and are, the lower priorities for the college. In the economically depressed and rural area of this study, priorities did not differ significantly from national ideals for the community college: preparing individuals for work and providing them with basic skills. Descriptors—Educational Change, Educational Equity (Finance), Educational Legislation, Educational Strategies, Elementary Secondary Education, Finance Reform, Integrated Services, *Nongraded Instructional Grouping, Qualitative Research, *Rural Schools, *School Based Management, *School Districts, State Aid, State Legislation, Supplementary Education

Identifiers—Developmentally Appropriate Programs, *Funding Formulas, *Kentucky Education Reform Act 1990, School Councils

A 5-year qualitative study of implementation of the Kentucky Education Reform Act (KERA) analyzes the effects on four rural school districts of large-scale changes in state policy. This annual report of the project focuses on five key KERA "strands." First, KERA mandates that grades K-3

be replaced with an ungraded primary program characterized by seven "critical attributes." Developmentally appropriate practices was the most successfully implemented attribute, but dual-age grouping (the preferred multiage pattern of most schools) appeared to be acting as a barrier to continuous progress, a third attribute. With regard to the second strand—instruction, assessment, and accountability—major findings were that the state assessment program was the driving force behind most instructional changes, emphasis on writing had been increased, teachers had mixed reactions to this increased emphasis, and there was little school-wide planning and implementation of instructional changes. The third strand—extended school services (ESS)—involves instruction or tutoring provided at times other than during the regular school day. Reports about the effectiveness of ESS were mixed, possibly because of a wide range in class size and lack of integration with regular classroom programs. Fourth, although school-based decision making as mandated by KERA gives school councils significant authority, the power structure and decision-making processes of particular councils varied considerably and were related to cultural factors unique to each district. Fifth, only the neediest district had applied for and received grants for family resource and youth services centers, sites of integrated services for high-risk youth and families. This report also includes an overview of the KERA funding formula and other state educational funding, research questions for the 5-year project, and Kentucky's academic expectations. Contains 52 references. (SV)

Descriptors—Collegiality, *Educational Innovation, *Educational Policy, Elementary Secondary Education, Faculty Development, Foreign Countries, *Geographic Isolation, Incentives, Institutional Administration, *Personnel Management, Personnel Selection, Professional Continuing Education, Professional Isolation, Rural Areas, *Small Schools, *Teacher Education, Teacher Placement

Identifiers—*Islands, Teacher Isolation

A 1987 meeting in Fiji that examined the supply, training, and professional support of educational personnel in multi-island situations led to development of a directory of innovative practices relevant to any situation of isolation. Questionnaires were sent to a sample of countries in the Caribbean, Indian Ocean, and South Pacific. Findings are presented in the following areas: (1) policies that make staff feel part of the national network by providing equal opportunities for training and promotion; (2) selection criteria and procedures for teachers, administrators, and other personnel; (3) incentives such as free housing, transportation and hardship allowances for those in remote areas, and living conditions equal to those on the main island; (4) preservice programs providing orientation for those going to outer islands, practice teaching in the outer islands, and tailor-made courses for administrators; (5) inservice programs that support professional development of isolated administrators and provide courses designed for those unable to study full-time; (6) professional support that encourages cooperation, not confrontation (prompt courteous replies to letters and calls, sending supplies on time, visits by central office people to outer islands, equal professional support for all staff wherever they are); and (7) institutional initiatives that provide cooperative services and resource coordination through extension services and distance education programs. Two case studies and a list of questions provide a basis for thinking about the problems of isolation and for developing team effectiveness. Contains 27 refer-

ences. (TD)

Descriptors—Case Studies, *College Role, *Consultants, *Educational Development, Educational Policy, Foreign Countries, *Government School Relationship, Higher Education, International Programs, Policy Formation, Privatization, *Technical Assistance, Universities

Identifiers—Consultant Role, *Small Countries

A problem for small states is how to access specialist knowledge when the national pool of human resources is small. This is a difficulty for ministries of education and educational institutions. The usual response is to draw on technical assistance, often as part of a wider aid package, from industrialized countries or international agencies. But there is scope for developing the capacity of universities within small states to provide consultancy services. This offers a way for institutions of higher education to play a stronger role in national education development. The result of a training workshop on educational consultancy in small states, this manual has three parts. Part One examines demographics of small states; factors influencing their choice of consultants; and the nature of consulting (including a definition), why consultants are used, consultancy as an agent of change, and the ethics of consultancy. Part Two presents a five-phase model of the consulting process and the skills required for successful consulting. Part Three examines key considerations in developing a consulting business, including planning, structure and administration, marketing, and management of assignments. Case studies illustrate the consultancy dilemmas of small states and describe existing university-based consultancies in four small states. Contains an 80-item bibliography for further reading with the following sections: managing consulting organizations; selecting and using consultants; consulting skills; communication and report writing skills; consulting in education; education in small states; and general topics. Contains 15 references. (TD)

Bilingual (English and Spanish) text and illustrations describe the author-artist's experiences growing up in a traditional Hispanic community in south Texas, near the border with Mexico. The brightly colored paintings of her family and community show, in great detail, the everyday activities that remain vivid in her memory: picking oranges for her grandmother, making tamales with the entire family, swimming in the gulf of Mexico, attending a cakewalk to raise money to send a Mexican American to the university. These glimpses into Lomas Garza's childhood show the vitality of her loving extended family and conclude with a tribute to her mother, who encouraged her to become an artist by "laying out the bed for our dreams of the future." The paper cut-out (papel picado) images on the text pages were cut from black paper with exacto knives. Papel picado is a traditional Mexican folk-art tech-

nique which Lomas Garza often uses to portray intricate images. (TD)

Identifiers—*Delaware, Networking, *Rural Assistance Councils

This report summarizes efforts of the Rural Assistance Council during the past 3 years to support the process of integrating education, health, and social services in Delaware. The Delaware RAC is a group of concerned educators and representatives of community organizations committed to improving rural schools. The RAC held two forums with 47 representatives from rural schools, communities, and community organizations. The purpose was to explore ways to build consensus and support for quality education and to promote partnerships among families, communities, and schools. The primary concerns of rural communities, as reflected by participants, focused on the broadened roles of schools and their relationship to other social service agencies. The RAC also conducted a seminar on "Designing Rural Schools as Community Learning and Service Centers" for district administrators, teachers, counselors, school board members, and representatives of community health and social service agencies. The RAC conducted a follow-up workshop for 24 people representing 7 school districts and 4 state or community agencies. The workshop resulted in recommendations and guidelines on advocacy; networking; planning comprehensive services; assessing community strengths, resources, and needs; and financing comprehensive service systems. These guidelines represent specific actions necessary to begin the process of integrating services in Delaware. (LP)

Descriptors—Alcohol Education, Annotated Bibliographies, Community Programs, *Drinking, Drug Education, *Drug Use, Elementary Secondary Education, Government Publications, Health Education, *Organizations (Groups), Parent Education, *Prevention, Research, *Resource Materials, *Rural Areas, Rural Education, Smoking, Substance Abuse

This guide lists resources and other materials for implementing drug and alcohol prevention programs in rural communities. Materials and resources focus on community, school, and parent education programs. The first section lists 24 prevention materials, including videos, booklets, curricula, books, posters, and newsletters. Each listing includes the name of the organization that developed the material, the year it was developed, a brief description, target audience, setting, and availability information. The second section includes 33 studies, articles, and reports on rural communities, including government publications. Each listing includes title, author, availability information, and an abstract. The last section lists the names and

addresses of 37 organizations and programs related to rural communities in general or to drug and alcohol prevention in rural areas. (LP)

Descriptors—*Bilingual Education, *Bilingualism, Class Activities, Cross Age Teaching, *Educational Strategies, Elementary Secondary Education, *English (Second Language), *Language Acquisition, Literacy, Native Language Instruction, Parent Participation, *Second Language Learning, Student Experience, Tutors, Writing Assignments

Identifiers—*Biliteracy

This theme issue focuses on strategies to enhance learning of English as a second language and on the importance of bilingual education. In "Bilingual Education Makes the Difference in Learning," Roberto Feliz, who was born in the Dominican Republic and is now a doctor, describes how bilingual education saved him from academic failure and enabled him to become an honors student. "Conversational Insights: On Combining Literature, the Arts, and Technology for Language and Literacy Development" (Juanita Garcia, Laura Chris Green) discusses strategies for using children's literature, dramatics, art activities, word processing, and CD-ROM programs to promote second language development, bilingualism, and biliteracy. "Valued Tutors Write" (Aurelio M. Montemayor) describes the many writing activities of student tutors in a nationally recognized cross-age tutoring program, as well as the specific literacy skills developed by those activities. "Blessed with Bilingual Brains: Is It a Fact or a False Belief?" (Frank Gonzalez) discusses language acquisition by children in bilingual environments, implications for bilingual education, and the advantages of bilingualism. "Commentary: The State of Bilingual Education and the Need to Speak Out" (Maria "Cucu" Robledo Montecel) calls for bilingual teachers to be advocates of bilingual education and the rights of children to excellent education. "Why Bilingual Education Is Important to Me" features three essays by bilingual elementary school children. "The Parent Connection in Language Acquisition" (Ninta Adame-Reyna) explains how parent involvement in native-language literacy development at home can help students develop second-language (English) literacy in school, and provides tips to enhance such parental involvement. This issue also contains a book review by Pam McCollum of "Instructional Assessment: An Integrative Approach to Evaluating Student Performance" (Sandra H. Fradd, Patricia L. McGee, Diane K. Wilen) and a list of additional readings on language acquisition and development. (SV)

Descriptors—Adult Basic Education, *Adult Literacy, Critical Thinking, Democracy, Family Programs, *Functional Literacy, Illiteracy, Lifelong Learning, *Literacy Education, Outreach Programs, Parent Student Relationship, Student Evaluation, Telecommunications

Identifiers—Critical Literacy, *Family Literacy

This theme issue focuses on the need for adult literacy programs, as well as recent innovations in literacy education. "Adult Literacy and Leadership: Current Innovations" (Aurelio M. Montemayor) describes an adult literacy outreach program in Texas, and discusses the importance of family literacy for parents' involvement in their children's edu-

cation and for advocacy efforts. "Literacy Is Vital to Democracy" (Mikki Symonds) argues that a functional democracy depends upon the participation of all citizens, which in turn requires education that fosters critical literacy, as well as bilingual education for language-minority students. "Exploring New Directions in Adult Literacy Assessment" (Pam McCollum) recommends a reconceptualization of adult literacy assessment to make it more responsive to student needs and goals. "Implementing Family Literacy" (Ninta Adame-Reyna) describes four types of family literacy programs and offers suggestions for program design and implementation. "Project SALNET: Helping Adult Learners and Their Instructors into the Twenty-first Century" (Laura Chris Green) describes the San Antonio Adult Literacy Network, which incorporates a local electronic bulletin board system into a three-phase program focusing on the writing process, word processing, and reaching an audience through telecommunications. "What IDRA's Project SALNET Has Meant for Our Students" features comments from project instructors. This issue also contains a statement of immigrant students' rights to attend public schools and a list of additional readings on lifelong learning. (SV)

Descriptors—Cross Age Teaching, Dropout Prevention, Dropout Rate, High Risk Students, Intermediate Grades, *Leadership Training, Secondary Education, Self Esteem, Student Attrition, *Student Development, *Student Participation, Student School Relationship, *Tutors, *Youth Programs

Identifiers—*Coca Cola Valued Youth Program, *Texas

This theme issue focuses on motivating young people to learn by providing leadership opportunities in school. "Coca-Cola Valued Youth Program: Assessing Progress" (Josie Danini Supik) examines the program's success. This program, which trains high-risk middle and high school students as tutors of younger children, has dramatically lowered dropout rates and discipline problems among participants while increasing their achievement and self-esteem. "Youth Leadership: Great Works in Progress" (Aurelio M. Montemayor, Josie Danini Supik) proposes a new leadership training program to create local teams of students who would participate in community service learning projects and in school decision making and reform efforts. "How Do I Value You? Let Me Count the Ways" (Aurelio M. Montemayor) describes traditional and nontraditional ways of valuing students and offers examples of student-centered activities that enhance student self-worth and provide incentives for staying in school. "Valued Youths: Six Years Later" (Conchi Salas) profiles two student success stories from the Coca-Cola Valued Youth Program. This issue also contains two articles unrelated to the theme. "IDRA's Latest Attrition Analyses Show Worsening Dropout Problem" (Roy Johnson) reports that the percentage of students lost from Texas public high school enrollment between their 9th-grade and 12-grade years was 40 percent for the period ending 1994-95, compared to 33 percent for the period 1985-86. This finding contradicts the Texas Education Agency's recent report of steadily declining dropout rates. Tables detail high school completion and dropout rates for the states; attrition rates for Blacks, Whites, and Hispanics in Texas counties; and Texas attrition and enrollment data for racial/ethnic groups. "Silent Partners in Education" (Conchi Salas) discusses the importance of schools recognizing and valuing the educational contributions of parents and families. Nine additional readings on youth leadership are listed. (SV)

Descriptors—*Child Rearing, Cultural Awareness, Cultural Background, Culture Conflict, Educational Attitudes, Elementary Secondary Education, Extended Family, *Family Life, Family School Relationship, *Hispanic American Culture, *Immigrants, Interviews, Marriage, Mexican Americans, *Mexicans, Parent Education, *Rural Family, School Attitudes, Sex Role, Values
Identifiers—*Latinos

Mexicans are the largest group of immigrants to the United States, and approximately 60-70 percent of this group comes from rural areas. This book challenges Anglo professionals in health care, education, and child care to learn more about families from rural Mexico and to incorporate this knowledge into their work. The book's content is based upon in-depth interviews with 27 Latino professionals; their direct quotes are combined into detailed descriptions of family beliefs and practices. Part I covers life in Mexico, attitudes about the United States, the frightening and sometimes dangerous experience of immigration, initial adjustments, housing, encountering prejudice and stereotypes, Latino values, the role of the Catholic church, and family structure. Part II focuses on the beginning years as a family, including attitudes toward marriage, having children, family planning, pregnancy, childbirth, postpartum care, early infant care, baptism, machismo and sex roles, and parent roles. Part III is concerned with child-rearing practices up to the teen years and covers play, television viewing, sleep, eating, toilet training, children's temperament and personality, limit setting with babies and older children, girls' and boys' roles, and family time. Part IV discusses school experiences of immigrant Mexican children and their parents; compares schooling in the United States and Mexico; and examines issues related to special education, adolescent development, gang involvement, and dropping out. Part V discusses health care concerns, folk healing, and communication with patients. Appendices contain the interview questions; background of Latino professionals interviewed; a map of Mexico; and lists of suggested readings, parenting education curricula, and Latino organizations. Descriptors—*Athletics, Budgeting, *Extracurricular Activities, High Schools, Institutional Cooperation, *Retrenchment, *Rural Schools, School Districts, *School Size, School Surveys, Small Schools, State Surveys, Tables (Data)

Identifiers—*Montana

Extracurricular activities are an important part of students' lives in small-town Montana. In 1994, the Montana state legislature cut its share of funding to public schools by 4 percent, raising concerns about what would be cut and whether extracurricular activities would be affected. A survey of 228 Montana school districts (47 percent of total) found that 88 had made no cuts, 89 had cut supplies and equipment, but only 17 had cut extracurricular activities. Activities most likely to be cut were basketball at the lower grades, cross-country, and track. Participation fees, fund raisers, booster clubs, and ticket sales provided extra revenue for some districts. The extent of school activities during the 5 years ended 1994-95 was examined for the 180 high schools that

participated in competitions sanctioned by the Montana High School Association (MHSA). MHSA oversees 16 categories of competitive activities, including various sports for boys and girls and speech and drama. The availability of activities was somewhat a function of size and resources. The largest ("AA") schools all offered 13 of 16 categories of activities, while 78 percent of "A" schools offered at least 10 activities. Of the 99 smallest ("C") schools, 71 percent had consistently offered only 4 of the 16 MHSA possibilities. Class-B and Class-C schools frequently formed activity cooperatives to save on coaching and facility costs. Includes 15 data tables and 6 graphs. (SV)

Selected School District Factors and Grade Eight Pupil Achievement in Maine.

Pub Date—Oct 95

Note—10p.; Paper presented at the Annual Meeting of the National Rural Education Association (Salt Lake City, UT, October 1995).

Pub Type—Speeches/Meeting Papers (150)—Reports—Research (143)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—*Academic Achievement, Expenditure per Student, *Grade 8, Junior High Schools, Rural Schools, *School Districts, *School District Wealth, Socioeconomic Status, Teacher Qualifications, Teacher Student Ratio

Identifiers—*Maine

The relationship between educational expenditures and pupil achievement has been a topic of increasing interest to legislators, school boards, and more recently, the courts. This paper examines the relationships among various measures of school district wealth and spending, other school district characteristics, and student achievement within the context of a state with a majority of small and rural school systems. Data were collected from all Maine elementary school districts that provided instruction to five or more students in grade 8 in 1991-92. For each of the 193 districts studied, pupil achievement was measured as mean grade-8 scores on the Maine Educational Assessment Tests for the 3 years ended 1991-92. Four school district characteristics differentiated between the 30 highest-achieving and the 24 lowest-achieving districts. High-achieving districts spent more per pupil, had a larger property tax base per pupil, had higher median family income, and employed a higher percentage of elementary teachers with a graduate degree. Achievement was not significantly related to pupil-teacher ratio or district tax levies. Higher percentages of elementary teachers with graduate degrees were found in school systems with higher levels of per pupil expenditures and higher median family incomes. The expected correlation between achievement and socioeconomic status was somewhat smaller than has been found nationally, perhaps because of Maine's generally low income levels. (SV)

Albaugh, John W.

A Comparison of Four Enrollment Groups of K-8 and K-12 Missouri Rural School Districts.

Pub Date—Oct 95

Note—8p.; Paper presented at the Annual Conference of the National Rural Education Association (Salt Lake City, UT, October 1995).

Pub Type—Reports—Research (143)—Speeches/Meeting Papers (150)—Numerical/Quantitative Data (110)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—*Academic Achievement, *Dropout Rate, Elementary Secondary Education, *Expenditure per Student, *Rural Schools, *School Districts, *School District Size, School District Wealth, School Size, Teacher Salaries, Teacher Student Ratio

Identifiers—Grade Span Configuration, *Missouri
This paper compares school district characteristics for rural Missouri K-8 and K-12 districts in four categories of enrollment size. A random sample of 56 K-8 and 56 K-12 districts yielded 4 equal categories of K-8 enrollment: 51-100, 101-150, 151-200, and more than 200 students. Data are presented in graphic form for assessed valuation per pupil; operating tax levy; expenditure per pupil; administrative cost per pupil; teacher salaries; student-teacher ratio; and achievement scores on the Missouri Mastery and Achievement Test (MMAT) for grades 3, 6, and 8. The assessed valuation per pupil—the basis for local taxation—was considerably lower than the state average in all rural districts studied. Expendi-

tures and administrative cost per pupil were lower than the state average in all but the smallest K-12 districts. Teacher salaries were also considerably lower than average in all districts studied. Student-teacher ratio was higher than average in K-8 districts and lower than average in K-12 districts. Despite limited financial resources, all districts studied consistently achieved higher MMAT scores than state averages. The mean K-12 attendance rate was significantly higher than the K-8 rate, but both were higher than the state average. Two final graphs present data from 428 Missouri districts showing that the high school dropout rate was positively related to school size and negatively related to the high school grade span. (SV)

Descriptors—Acculturation, *Boards of Education, Community Leaders, Community Relations, *Cultural Differences, Educational Change, Elementary Secondary Education, *Indigenous Populations, Local History, Local Issues, Role Theory, *Rural Areas, Rural Education, *Urban to Rural Migration, Values

Identifiers—*Maine (Mount Desert Island), *Newcomers, Rural Culture

This paper examines the imbalance in representation of native-born Mainers on the school board in Mount Desert Island, Maine. Mount Desert Island is the location of Acadia, the second most visited national park in the United States. In this community, native-born Mainers represent 68 percent of the year-round population, but 80 percent of people serving on the school board are residents as a result of in-migration. The paper identifies cultural themes that have evolved from Maine's history, its position as the eastern "frontier," and exigencies of its climate and economy. An analysis based on acculturation theory and role theory found that cultural differences between native-born Mainers and in-migrants deter local people from competing for leadership roles in their communities. The poor representation of native-born people on local school boards negatively affects the education of their children, and, in effect, those who most need a voice do not have one. The reasons many Maine students do not seek postsecondary education are complex, involving deeply rooted cultural patterns and the perception that opportunities are limited in a rural economy. This paper identifies strengths of rural culture including a strong work ethic, individuality, a strong sense of family and community, and the importance placed on quality of life as opposed to status and materialism. Recommendations are offered for increasing leadership opportunities for native-born Mainers. Appendices include graphs illustrating percentages of native-born Mainers in the population and on the school board, percentage of town budget spent on education, and percentage of households with children. *School District Size, School Effectiveness, School Size, *Small Schools, *Socioeconomic Status

Identifiers—*West Virginia

In 1988, a California study by Friedkin and Necochea confirmed an interaction between size and socioeconomic status such that large schools benefited affluent students, whereas small schools benefited impoverished students. This report describes a replication applying the model to West Virginia schools and school districts. In order to control for widely varying grade-span configurations, school size was defined as the fall 1990 enrollment in the grade-level cohort under analysis. Separate analyses were carried out on grades 3, 6, 9, and 11. Achievement was defined as composite basic skills scores on the Comprehensive Test of Basic Skills. Socioeconomic status was defined as (1) the proportion of students receiving free or reduced-price meals and (2) the proportion of the adult population with educational attainment less than grade 12. The results of bivariate correlational and multivariate regression analyses are similar to those of the California study, except that the pattern of effects derives in part from the fact that impoverished West Virginia students tended to be served by smaller schools. Small schools disrupted the usual negative relationship between socioeconomic status and student achievement. The size effect was absent in grade 3, was modest and indirect in grade 6, strengthened in grade 9, and was strongest and both direct and indirect in grade 11. The combined and indirect effects of size were strong, as well, across all grades in analyses at the school district level. That is, impoverished students appear to derive achievement benefits from attending small school districts. Since 1988 a consolidation scheme facilitated by the state has closed nearly 20 percent of West Virginia's schools, most of them small schools serving rural communities. The findings are interpreted with respect to this context. Contains 36 references, 9 statistical tables, and an appendix explaining regression equations used. (Author/SV)

Identifiers—Native Americans

Appropriate for the middle grades through junior high school, this book and accompanying teacher's guide provide a curriculum for teaching American Indian history. Following an overview of the European encounter and the early years of White penetration into North America, the book focuses on five distinct periods of U.S. government policy toward American Indians: (1) separation—removing Indians from the land that Whites desired and drawing boundaries between the two peoples; (2) coercive assimilation—replacing Indian ways with White ways and pushing Indians to become self-sufficient farmers under conditions dictated by Whites; (3) tribal restoration, phase one, during which Whites made an about-face and encouraged Indians to maintain their corporate tribal existence; (4) termination—breaking off all relationships of protection and assistance by the federal government; and (5) tribal restoration, phase two, during which tribal corporate adaptation to American society was again encouraged and cultural choice was reaffirmed. The last chapter of the book addresses contemporary issues affecting Native Americans, including development of political influence and economic self-sufficiency; restoration of tribal lands and artifacts; recognition and reclamation of U.S. treaty rights

and trust responsibilities; and other issues pertaining to culture, language, health, and education. Each chapter includes lesson plans, supplementary readings, and a summary. The book also includes additional references and resources for each chapter, a bibliography, and an index. The teacher's guide provides maps, graphs, and documents that may be duplicated for classroom use; sections on the interpretation of history; lesson plans on Native American culture and spirituality; biographies of contemporary Indian people; guidelines for selecting books on Native Americans; suggestions and guidelines for arts, crafts, and activities; and an annotated bibliography of resources on Native Americans. Identifiers—Canada, *Environmental Protection, *Land Rights, United Nations, United States, Water Rights

This annual publication examines political, legal, social, and educational issues concerning indigenous peoples in various countries around the world during 1994-95. Part I highlights news events and ongoing situations in specific countries. In the United States and Canada, these include: (1) the arrest of three Canadian Inuit hunters for the killing of a bowhead whale (highlighting subsistence hunting and fishing rights); (2) the appalling picture of poverty and dependency among Alaska Natives provided by the final report of the Alaska Native Commission; (3) implications for Canada natives of an independent Quebec; (4) planning for the new territorial government of Nunavut, to be established in 1999; (5) status of aboriginal peoples in the remaining part of Canada's Northwest Territories; (6) territorial rights, natural resources rights, and water rights of Native Americans; (7) unlicensed medical testing of vaccines on Indian children; (8) success of tribally controlled schools; (9) Indian gaming; (10) court litigation involving environmental protection of Native lands and sacred sites, tribal jurisdiction, and cigarette taxes; and (11) the Leonard Peltier case. Sections on Mexico and Guatemala profile the Zapatista uprising in Chiapas and discuss efforts of Mayan organizations to replace assimilationist educational models with practices based on Mayan cultural ideas of time and space, and to promote recognition of Mayan languages as official languages of Guatemala. Additional sections cover other countries of Central and South America, Greenland, Saami regions of Norway and Sweden, Russia, countries of Melanesia, Australia, New Zealand, China, India, and other countries of Asia and Africa. Part II describes work on behalf of indigenous rights in the United Nations and at the World Summit for Social Development (Copenhagen, Denmark, March 6-12, 1995). This work includes concerns for access to education and for the provision of culturally relevant education. Contains maps, photographs, and a list of IWGIA publications. (SV)

This illustrated bilingual children's book (English and Spanish), relates the story of Pepita, a young Hispanic girl who is fluent in both Spanish and English. Pepita always helps when asked to talk for others in Spanish and English. But one day Pepita decides she doesn't want to help anymore. She wants to hurry and get home from school before her brother Juan so she can teach their dog Lobo a new trick. On her way home Mr. Hobbs the grocer, Pepita's Aunt Rosa, and a neighbor ask for Pepita's help in translating English and Spanish. Although she doesn't want to, Pepita obliges. When she finally arrives home, she finds Juan teaching Lobo to return a ball. Pepita is upset and decides she will never speak Spanish again. She tells her mother she is tired of "talking twice." The following day, Lobo follows Pepita to school. She scolds him in English, but Lobo just wags his tail and continues to follow her. At school, the teacher asks Pepita to help a new student who doesn't speak English. Pepita explains that she can't because she no longer speaks Spanish. The teacher tells Pepita that that is unfortunate as it is wonderful to be able to speak two languages. One day as Pepita is leaving for school, her neighbor throws a ball into the street and Lobo runs after it. "Wolf!" Pepita yells. But Lobo doesn't listen. "Lobo! Ven acá!" Pepita screams. Lobo turns back just before a loud screech of the car's brakes. Pepita vows she will never call Lobo Wolf again and realizes the value of speaking two languages. (LP)

This document consists of papers that received recognition in a competition sponsored by the Center for Substance Abuse Treatment and the National Rural Institute on Alcohol and Drug Abuse. The competition sought to focus attention on problems in providing treatment and prevention services for drug and alcohol problems in rural areas. The papers address a wide array of issues and populations, from schoolchildren to alcohol-dependent adults to criminal offenders. The introductory paper entitled, "Bringing Excellence to Rural and Frontier America: Advocacy for Substance Abuse Services in the 1990s" (Susan L. Becker) suggests what local and state programs can do to help overcome the barriers that interfere with gaining support from policymakers. The first- and second-place award papers are respectively entitled "Adult and Adolescent Community Correctional Services Program" (William S. Tanner) and "The Upper Peninsula Teen Leadership Program: Marquette-Alger Intermediate School District" (Dee Lindenberger). Third-place award papers include: (1) "You Can't Get There from Here: The Choice/Skyward Experience" (Rachel Cyr Henderson, Susan F. Long); (2) "School Teacher's Role in a School-Community Alcohol Intervention Program" (Ian M. Newman and others); (3) "Challenges in Rurally Based Alcohol and Drug Abuse Treatment Services" (James A. Armstrong); (4) "Issues in Providing Alcohol and Drug Abuse Services in Rural/Frontier Counties of California" (Kenneth R. Fleming); (5) "Building Community-Based Abuse Prevention Coalitions" (Jim Meek); (6) "Cultural Diversity As a Positive Force in the Treatment of Native American Alcohol and Other Drug Abuse" (Anne Muldoon); (7) "Transitional Recovery" (Larry R. Seybold); and (8) "Project TEA: Iowa State Penitentiary Sub-

The Geography of Childhood: Why Children Need

Wild Places. The Concord Library.

Report No.—ISBN-0-8070-8524-3

Pub Date—94

Note—209p.; Introduction by Robert Coles.

Available from—Beacon Press, 25 Beacon St., Boston, MA 02108-2892 (\$22).

Pub Type—Books (010) — Opinion Papers (120)

— Creative Works (030)

Document Not Available from EDRS.

Descriptors—American Indian Culture, Child Development, Childhood Interests, *Childhood Needs, *Child Rearing, *Children, Early Childhood Education, *Early Experience, Elementary Secondary Education, *Environmental Education, Essays, Outdoor Education, Parents as Teachers, Play, Rural Environment, Wildlife Identifiers—Environmental Awareness, *Nature Study, *Sense of Place

This book considers how children form connections with the natural world, and questions what may happen to children denied exposure to wild places—a reality for many children today. Two men draw on memories of their own childhoods and on their experiences as naturalists and as fathers to tell stories of children learning about wild places and wildlife in settings that include empty city lots, suburban backyards, the Indiana Dunes, isolated Nevada sheep ranches, Native American communities in the Southwest, and rural Mexico. Eight essays discuss the ways that young children investigate and play in an outdoor place and thereby, make the place their own; children's development of competence and self-esteem through experiences in the natural world; rites of passage and how one young naturalist found his calling; differences in the ways that men and women relate to the land, and cultural restraints on women's outdoor behaviors and careers; environmental education through traditional family story telling versus television viewing; growing up on isolated Western ranches and the environmental attitudes of Westerners; fear of reptiles and developing an appreciation for all wildlife; and camping and hiking with dogs and children. Contains references in end notes. (SV)

Secrets of Science. Videos 1-13. [Videotape.]

Walt Disney Publishing Group, Burbank, CA. Discover Magazine.

Pub Date—94

Note—"Secrets of Science is a comprehensive 13 part video series presented by Discover Magazine, America's leading monthly science publication...for ages 15 and up." Each tape contains two programs (24 minutes each program, 48 minutes per tape).

Available from—Video Project, 5332 College Ave., Oakland, CA 94618.

Pub Type—Non-Print Media (100)

Document Not Available from EDRS.

Descriptors—Animals, Astronomy, Audiovisual Aids, Aviation Education, *Climate, *Earth Science, Electricity, Engines, Entomology, Evolution, Oil, Photography, *Physics, Plants (Botany), Science Education, *Scientific Concepts, Secondary Education, Space Exploration, Space Sciences, Stars, *Technology, Transportation, Vision, Volcanoes, Weather, Written Language, Zoology

Discoveries in science and technology are being made at such a rapid pace that it is often difficult for many teachers to stay abreast of new and relevant information. To assist teachers in keeping their students well informed of new discoveries in science, Discover Magazine developed a 13-part video series entitled "Secrets of Science." In each of these videos, new discoveries have been gradually integrated with existing knowledge of a variety of scientific concepts: VIDEO 1: "From the Beginning" (Program 1: "How Life Began" and "The Evolution of Man"); Program 2: "The Origin of Species" and "A Human Being is Born"; VIDEO 2: "Life's Building Blocks" (Program 1: "Blood and Our Bodies" and "DNA and Diversity"; Program 2: "The Complex Cell" and "Understanding Viruses"); VIDEO 3:

"Brain Power" (Program 1: "The Sense of Sight" and "The Human Brain"; Program 2: "Civilization's Progress" and "The Written Word"); VIDEO 4: "The Life Around Us" (Program 1: "The Animal Kingdom" and "The World of Insects"; Program 2: "The Busy Bees" and "A Planet of Plants"); VIDEO 5: "Planet Earth, Our Home" (Program 1: "There's No Place Like Home" and "Polluting Our Atmosphere"; Program 2: "Wasting Our Planet" and "When the Ground Quakes"); VIDEO 6: "Earth's Extremes" (Program 1: "When Lava Flows" and "Glaciers: The Cold Facts"; Program 2: "The Antarctic: A Frozen World" and "The Torrid Tropics"); VIDEO 7: "Our Sea and Sky" (Program 1: "An Ocean Overview" and "Life Beneath the Waves"; Program 2: "Creating our Climate" and "Comets: Spectacles in the Sky"); VIDEO 8: "Into Outer Space" (Program 1: "Space Travel" and "Landing on the Moon"; Program 2: "Exploratory Space Probes" and "Star Bright"); VIDEO 9: "Our Sun and Solar System" (Program 1: "The Four Fundamental Forces" and "Our Solar System"; Program 2: "The Sun: Source of Life" and "What is Light?"); VIDEO 10: "The Mysteries of Motion and Power" (Program 1: "Considering Kinematics" and "Newton's Laws"; Program 2: "Electricity: A Current Affair" and "The Physics of Force"); VIDEO 11: "Exploring Energy" (Program 1: "Elementary Energy" and "Nuclear Energy"; Program 2: "The Combustion Engine" and "Power From Petroleum"); VIDEO 12: "Of Wheels and Wings" (Program 1: "Rolling on Land" and "Sailing on Water"; Program 2: "Flying Through the Air" and "The Magic of Flight"); VIDEO 13: "Through the Looking Glass" (Program 1: "About Telescopes" and "Focus on Photography" and "Looking Into Deep Space"; Program 2: "On Television" and "Surrounded by Satellites"). Tools for Interactive Mathematical Activity.

TIMA: BARS—A Tool Designed To Help Teachers

Help Children Construct Their Own Knowledge of Whole Numbers and Fractions.

[Diskette.]

Pub Date—94

Note—Requires Macintosh System 7.1 or higher, color monitor, 2MB free RAM.

Available from—William K. Bradford Publishing Company, Inc., 16 Craig Road, Acton, MA 01720

(3.5 inch diskette plus printed manual: \$81).

Pub Type—Computer Programs (101)

Document Not Available from EDRS.

Descriptors—*Arithmetic, Constructivism (Learning), *Courseware, Elementary Education, *Fractions, Junior High Schools, *Learning Activities, Mathematical Concepts, Mathematics Education, *Mathematics Instruction

Identifiers—*Mathematics Activities

This computer software is a tool designed to help teachers help children in grades 1 through 7 construct their own knowledge of whole numbers and fractions. This software is the first in a series of new, dynamic computer microworlds that allow teachers to interact with students and students to interact with each other as they engage in mathematical activities of reasoning, communicating, and problem solving. Through simple mouse actions, students can make rectangular bars and perform operations using these bars to investigate numerical relationships based on area and measurement concepts. Students can develop strategies for finding sums and differences of fraction quantities, for building equivalent fractions, and for finding fractions of fractions. (MKR)

Science Curriculum Assistance Program (Science

CAP(TM)) is a multimedia package developed to create a model for preserving classroom science activities that can be shared and customized by teachers. This program is designed to assist teachers in preparing classroom science activities for grades five through eight, and to foster an environment of educational growth within the classroom by giving teachers and students the tool to benefit from the experience and knowledge of science teachers across the country. The topics covered include: animals, astronomy, brain and the mind, cells, chemistry, energy, environment, flight, general activities, geology, lab skills, math/science, plants, protists, science and the scientist, simple machines, summer science, and weather. The package includes printed materials, a videotape, and a CD-ROM containing software, text files, and clip art files. (JRH)

Descriptors—Electric Circuits, *Electricity, *Electronics, Elementary Education, Elementary School Students, Elementary School Teachers, *Hands on Science, *Science Activities, Science Education, Science Projects

Today and in the future, critical toolmaking advances will need to be made in the area of circuit design, construction, and implementation. Traditional school curriculum has sidestepped the area of tool design, especially at the elementary level. This publication addresses a calling for a new curriculum direction, based not only on the study of word constructions, but also on the construction of tangible objects and manipulatives for students as low as kindergarten level. Many ideas, activities, and suggestions are provided to help students, teachers, and schools to perform inexpensive, real, hands-on electrical and electronic experiments. The topics covered include: (1) electrons; (2) light-emitting diodes; (3) switches; (4) AND, OR, NOT, NAND, and NOR gate circuits; (5) photoresistors; and (6) mechanical switching. (MVL)

Simple Machines Made Simple.

Report No.—ISBN-1-56308-104-0

Pub Date—93

Note—150p.

Available from—Teacher Ideas Press, Libraries Unlimited, Inc., P.O. Box 6633, Englewood, CO 80155-6633.

Pub Type—Guides - Classroom - Teacher (052) — Books (010)

Document Not Available from EDRS.

Descriptors—*Cooperative Learning, Elementary Education, *Hands on Science, *Mechanics (Physics), Physics, *Science Activities, Science Education, Science Process Skills

Identifiers—*Simple Machines

Simple machines have become a lost point of study in elementary schools as teachers continue to have more material to cover. This manual provides hands-on, cooperative learning activities for grades three through eight concerning the six simple machines: wheel and axle, inclined plane, screw, pulley, wedge, and lever. Most activities can be performed using low cost, everyday classroom supplies such as masking tape, rulers, rubber bands, and paper clips. Chapter topics include: (1) making equipment at little or no cost, (2) levers, (3) pulleys and wheels and axles, (4) inclined planes, screws, and wedges, (5) friction, (6) mechanical advantage, (7) bulletin board and learning center ideas, (8) a hands-on final test, and (9) a glossary. Cooperative Learning in the Untracked Middle School Science Classroom: A Study of Student Achievement.

Pub Date—19 Apr 95

Note—28p.; Paper presented at the Annual Meeting of the American Educational Research Association (San Francisco, CA, April 17-21, 1995).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Achievement, Biology, *Cooperative Learning, Intermediate Grades, Junior High Schools, Middle Schools, Science Education
Identifiers—*Middle School Students

In recent years, science educators have struggled with the dual challenge of equity and excellence, of providing all students access to a quality science education, and ensuring each student achieves an understanding of scientific concepts and processes. The Program for Complex Instruction, a model of group work, addresses this dual challenge by teaching various subject matter at a high intellectual level to students with diverse academic skills. By examining science learning in Complex Instruction classrooms, insight into the following three questions was sought: (1) What scientific facts, concepts, and applications do students learn during group work? (2) Are all students provided equal access to science learning? and (3) What are the strengths and limitations of using open-ended paper-and-pencil tests to measure student learning of science? The study was conducted in 13 middle school science classrooms over the course of 2 years. The results are organized into four areas of interest: conditions for learning, excellence, equity, and issues of test construction. Findings include: all observed classrooms met the standard for the percentage of students talking and

working together; significant gains were found on all five pre-, post-tests concerning the topics of systems, respiration, digestion, circulation; reading scores were significantly correlated with the pre- and post-test scores on each of the five unit tests; gender effects were found on the various tests but they varied by grade level; and on some tests (respiration and circulation 2) students scored higher when tests lacked large percentages of drawings or diagrams while other tests (digestion and circulation 1) showed gains when large amounts of diagrams were included. Multiculturalism and Science Education: A Test Case for Social Epistemology.

Pub Date—19 Apr 95

Note—9p.; Paper presented at the Annual Meeting of the American Educational Research Association (San Francisco, CA, April 17-21, 1995).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Cultural Interrelationships, *Educational Philosophy, *Epistemology, Foreign Countries, Higher Education, Learning Theories, *Multicultural Education, *Rhetorical Theory, Science Education, *Science Education History
Social epistemology is an effort to combine the philosophical theories of science that have stressed normative approaches to knowledge with sociological theories which are weak on offering guidance on how knowledge policy should be conducted. The practice of multiculturalism provides a useful application of social epistemological intervention, mainly because the phenomenon of "multiculturalism" escapes the usual philosophical and sociological ways of understanding knowledge. Multiculturalism is not to be confused with the mere recognizing of others' culture, but rather the infusing of the minor culture into the major culture. Problems arise when the major and minor cultures are fearful of any changes to the current modes of thinking and knowledge acquisition. It is noted that many cultures have quickly adapted and infused the Western views of science, bringing to light the importance of studying and practicing multiculturalism. Contains 14 references. The Role of Negotiation in a Constructivist-Oriented Hands-On and Minds-On Science Laboratory Classroom.

Pub Date—Apr 95

Note—28p.; Paper presented at the Annual Meeting of the American Educational Research Association (San Francisco, CA, April 17-21, 1995).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Classroom Environment, *Constructivism (Learning), Foreign Countries, *Hands on Science, Process Education, Science Education, Science Experiments, Secondary Education, *Teacher Student Relationship

Constructivist classroom environments are characterized by student engagement in science processes and manipulating experimental materials with experiential teaching of specific science concepts. Constructivist classrooms are where teachers build models of students' science knowledge, students participate actively in determining the viability of their own constructions, learning is interactive, cooperative and collaborative. The philosophical, psychological and pedagogical models for science teaching within the paradigm of constructivism are congruent with encouraging both "hands-on" and "minds-on" approaches in science laboratories with respect to a number of issues which include: preparation, pacing, need for attention, negotiation of social norms and negotiation of meanings. Arising out of the constructivist epistemology, therefore, is the need to use negotiated learning pedagogy in a constructivist-oriented science classroom. Given the socially active nature of science laboratory classes characterized by the need to exchange information, the use of negotiated learning pedagogy is even more compelling. If negotiation is to become an integral part of science teaching, teachers need to know what it means and how to identify and classify types of negotiation which go on in their classes. At the moment, the literature indicates a void in this area which needs to be filled as science educators aspire to appropriate

use of constructivist pedagogy for meaningful teaching and learning of science. This study therefore investigated the sorts of teacher/student negotiation which can occur in a school science laboratory and attempted to find out if the types of negotiation identified could be grouped meaningfully. Using a case study approach which utilized a participant observation technique, seven groupings of negotiation were identified from several learning events within science practical classes of a selected teacher. The implications of the results together with the difficulties associated with structuring a constructivist science class to accommodate negotiation as a significant part of science teaching strategies are discussed. Thinking about Science through Memory Work.

Pub Date—Apr 95

Note—16p.; Paper presented at the Annual Meeting of the American Educational Research Association (San Francisco, CA, April 17-21, 1995).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Constructivism (Learning), Higher Education, *Learning Processes, Learning Strategies, Long Term Memory, *Metacognition, *Science Education

Memory work has potential usefulness as a method of helping students explore their relationship to science. Students have multiple early experiences with the natural world, but often these experiences are divorced from their school-based learning. It is known, however, that students use their informal experiences of the natural world in their construction of scientific concepts. A potentially significant consequence of the use of memory work as a curriculum strategy for students is their recognition that they weave their own understanding into their knowledge construction. This recognition can be empowering for self-directed, motivated scientific exploration and learning. Five women social and life scientists came together with the intent of exploring memory work as theory and method. Since January of 1994 they met twice a month and each session was audio-recorded and transcribed. They focused on how they constructed their relationship to math and science beginning with science as a content area. Findings of their memory work are organized by content, process, and potential applications. (MLV)

Identifiers—Australia

This paper examines the classroom-based research carried out by a full-time mathematics teacher who monitored what was happening to his class of 13-year-old students as they were engaged in a collaborative, peer interactive classroom environment and examined how this environment influenced, and was influenced by, the students' attitude toward mathematics. An attempt was made throughout the school year to take into account the students' background knowledge and to frequently survey the students for their assessment of the classroom environment. By the end of the implementation, the students were more active participants in their own mathematics learning and culture than they had been at the beginning of the year. Observations from this study illustrate the social outcomes that developed in the students, such as listening, caring for the progress of others, providing help and guidance, negotiating explanations and solutions into a group consensus and peer teaching. Findings also demonstrate that the teacher had progressed towards a more socio-cultural constructivist approach in his teaching. Contains 115 references. (Author/MKR)

Several science education researchers are embracing postmodern relativist notions of both evaluation methodology and of the structure of all scientific knowledge. They blame bad educational evaluation and research on several causes, the worst being the following of the fundamental tenets of mainstream science. These researchers feel science educators trying to act like scientists have caused their own demise. However, several facets of this discussion have been ignored. Problems appear in the stated beliefs and views of these science education researchers. These problems are discussed through the current and former theories of educational philosophy. The need for balanced perspectives when discussing problems in science education is also probed. The views of science education should not be tied to two extreme theories rather they should relate to the many philosophies of science and science education. Contains 69 references. (MVL)

Scientists need to measure and communicate, to handle information, and model ideas. In essence, they need to process information. Young scientists have the same needs. Computers have become a tremendously important addition to the processing of information through database use, graphing and modeling and also in the collection of information through the use of sensors directly connected to the computer. This sourcebook for teachers is a major catalogue of ideas for teaching science with information technology (IT) and provides numerous examples and activities for teachers and students using computers to explore. The topics covered include biology, chemistry, and physics applications of databases, spreadsheets, sensors, word processing, graphics, and modeling. Also included are sources for curriculum materials, software, data logging and control, advice, national organizations, and suppliers. (MVL)

Continuing progress in science and engineering is essential to meeting the Nation's goals of improved

international competitiveness and enhanced economic and social well-being for all citizens. The full utilization of human resources is a vital factor in the realization of this objective. Participation in science and engineering in the United States has not reflected the diversity of the Nation's population. This report documents the different rates at which groups in the population are represented in science and engineering. The traditionally underrepresented groups of racial and ethnic minorities, persons with disabilities, and women, have made progress but in different degrees. It also documents factors important to choice of study and to success in pursuing science and engineering. Chapter titles include: "Representation in Science and Engineering: Issues and Perspectives"; "Elementary/Secondary Mathematics and Science Education"; "Transition to Higher Education"; "Undergraduate Education: The Role of 2-Year Institutions"; "Undergraduate Education: The Role of 4-Year Institutions"; "Graduate Education: Enrollment"; "Graduate Education: Outcomes"; and "Employment Levels and Trends." This volume, the seventh in a series of biennial reports to the Congress, the administration, and others who direct public policy, describes the status of groups traditionally underrepresented in science engineering. Appendices contain technical notes and statistical tables. (MVL)

Identifiers—*Illinois

The Illinois State Board of Education's Scientific Literacy Project provided extra funds to certain schools with the intent of creating demonstration schools useful as models for other schools to improve their science education programs. The study described in this document examined the impact of these funds on the target schools and attempted to determine how these schools differed from schools in general within the state. The sample population consisted of elementary teachers in the target schools. The data collection methods included questionnaires, teacher comments, and observations. Findings include the following: (1) despite Scientific Literacy monies, many teachers feel financial support to be inadequate; (2) science is taught more frequently and for longer periods of time; (3) teachers use activity-based science, make use of supplemental curricula, and integrate science with other subjects; and (4) facilities are old and inadequate. The document presents detailed findings in the following areas: demographics; curriculum; instructional process; assessment; leadership; staff effectiveness; school environment; parental involvement; and school-community relations. It also contains implications and recommendations, statistical tables, figures, and graphs. Four appendices include: written survey instrument and cover letter; site survey instrument; list of site survey personnel; and raw data. (JRH)

An increasing number of schools and businesses are entering into more collaborative partnerships focusing on frequent classroom interactions centered around active learning. The "Authentic Assessment Project" was developed by the Science and Mathematics Network of Central Ohio to assist teachers and business partners in designing innovative student assessment to accompany these partner-assisted classroom activities. This document is a compilation of plans to assess student learning in science and mathematics that represent the type of authentic, performance-based assessment that is currently being advocated at the national level. The tasks presented in this document relate directly to instructional goals identified as desired student outcomes, require students to apply what they have learned, have more than one correct answer or possible outcome; and involve more than one step to complete. Each assessment plan contains the following information: summary of the activity; learning outcomes; assessment information; scoring; issues and implications; impact; and references. (JRH)

Resources for Gender Equity in Mathematics and

Technology: Selected Bibliography.

Women and Mathematics: The Association for the Promotion of the Mathematics Education of Girls and Women, South Hadley, MA.

Pub Date—91

Note—75p.

Available from—WME, c/o Summer Math, Mt. Holyoke College, 302 Shattuck Hall, South Hadley, MA 01075 (34).

Pub Type—Reference Materials - Bibliographies (131)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—*Educational Resources, *Females, *Mathematics Achievement, *Mathematics Education, *Mathematics Materials, *Sex Differences

The majority of the publications listed in this bibliography regarding selected resources on gender equity in mathematics cover the years 1980-1990, but some earlier listings are also included. The resources are categorized into the following sections: journal articles; ERIC documents and papers presented;

books; chapters in books; reports, monographs, and bibliographies; historical perspectives; resources, videotapes, kits, and brochures; and newsletters and organizations. Contains about 600 references. (MKR)

Fun with The Plant Nutrient Team. Teacher's Guide.

Potash and Phosphate Inst., Atlanta, GA.
Report No.—30-3085
Pub Date—Jun 94
Note—26p.
Available from—Potash and Phosphate Institute, Suite 110, 655 Engineering Drive, Norcross, GA 30092 (S1).

Pub Type—Guides - Classroom - Teacher (052)
Document Not Available from EDRS.
Descriptors—Biology, *Food, *Nutrition, *Plants (Botany), Primary Education, Science Activities, Science Instruction, Teaching Guides

This guide is a work in progress; to be continually updated with further information (more stimulating experiments and unusual facts), consequently not every page will have a corresponding page in the activity book. It was created to provide teachers with a useful, informative resource regardless of their educational emphasis. It aims at helping children (kindergarten through grade 3) understand the importance of plant nutrients and modern technology in producing food and fiber. The guide pages have four sections: information for teacher's; activity/curriculum; materials needed; and definitions, information, reasons, tidbits, and suggestions. (JRH)

Learning Difficulty in Applying Notion of Vector in Physics among "A" Level Students in Singapore.

Pub Date—27 Jun 95
Note—22p.
Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Demonstrations (Science), Foreign Countries, Higher Education, *Mechanics (Physics), Physics, Pretesting, Science Instruction, Scientific Concepts, Secondary Education, *Vectors (Mathematics)

Identifiers—Singapore
Many high school and college students experience serious difficulties in understanding as well as applying fundamental concepts in physics. The study reported in this paper focused on the difficulties in learning about vectors in physics and strategies for making the teaching of vectors more interesting and meaningful for students. Specifically, the study aimed at: developing instructional materials for linking the notion of vectors, especially composition of vectors and resolution of a vector, with the real Physics world; planning appropriate demonstrations in conjunction with the Prediction-Demonstration-Explanation (PDE) teaching method to highlight the meaningful applications of the notion of vectors in daily phenomena as well as to make the learning of vector concepts and rules more interesting for students; and exploring the effectiveness of the use of the PDE method in helping students grasp the notion of vectors. The sample consisted of 94 junior college students divided into an experimental and a control group who took pre- and post-tests. The results indicate that students in the experimental group, who were taught by the Prediction-Demonstration-Explanation method, showed a better improvement in performance on the tests than students in the control group. Schrier, Marsha L. And Others
A Case Study of a Science and Mathematics Day Camp as Experienced by Seven Girls from Rural Georgia.

Pub Date—Apr 95
Note—14p.; Paper presented at the Annual Meeting of the National Association for Research in Science Teaching (San Francisco, CA, April 1995).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Elementary Secondary Education, *Females, *Mathematics Education, Questionnaires, Role Models, Rural Youth, Science Activities, *Science Education, Scientists, *Sex Differences, *Student Attitudes, *Summer Sci-

ence Programs

The focus of this study was a science and mathematics day camp for Girl Scouts in a rural Georgia county, the goal of which was to help girls "discover" themselves as competent participants in science and mathematics. During the camp, Brownie Junior and Cadet Girl Scouts from Bulloch County interacted with women faculty on the campus of Georgia Southern University to learn about science. Seven girls from one Brownie troop participated in the study. Data collection instruments included Draw a Scientist test, questionnaires, and journals. This study provided some insight into the types of experiences the girls had at the science and math day camp. For the short term, the camp made a positive impression on the attitudes of the girls toward science, their feelings of competency, and their images of what a scientist is and does. (JRH)

Descriptors—Educational Environment, Grade 8, Junior High Schools, Mathematics Instruction, Science Instruction, *Secondary School Teachers, *Student Characteristics, *Teacher Characteristics, *Teacher Education, Teacher Effectiveness
The purpose of this study was to investigate the importance of teachers' professional preparation in mathematics and science, particularly with respect to student outcomes as measured through student test scores. The study uses the base-line data collected in 1988 for the National Education Longitudinal Study, a national study of 24,599 students in the eighth grade. The following factors affecting science and mathematics learning are discussed in detail: student characteristics including attitudes, students' plans for the future, student behavioral characteristics, gender equity, and minorities; school environment characteristics including attention given to science and mathematics, assessment, and resources; teacher characteristics and practices including teacher preparation, cooperative learning, texts, and homework; and family environment. Other topics discussed include: teacher characteristics as measured through transcripts including types of courses taken and grade point averages; teachers' backgrounds and the classroom environment including content covered by teachers, approach to homework, teachers' use of time, teachers' attitudes, patterns in teacher and student assignments, and influence of teachers on student attitudes; and teacher's background and student outcomes including inequalities in teachers assignments and student outcomes and multiple regressions. Ten appendices include: a description of NELS:88; the reliability of survey estimates, a comparison of transcript-based measures against teachers' self reports, academic degrees, and teacher certification. Contains 73 references. (JRH)

Identifiers—National Science Foundation, *Re-

form Efforts, *Statewide Systemic Initiative

Since 1991, the National Science Foundation (NSF) has signed cooperative agreements with 26 states to undertake ambitious and comprehensive initiatives to reform science, mathematics, and technology education. This effort to improve public education is known as the Statewide Systemic Initiatives (SSI). This brief presents some initial observations about the SSIs based on the first two years of a national evaluation study, and discusses some of the issues state and local leaders are facing as they attempt to transform science, mathematics, and technology education. Also discussed are state strategies for implementing ambitious goals, teacher professional development, building capacity to extend and sustain reforms, supporting local initiatives and model sites, state policy alignment, reforming higher education and the preparation of teachers, mobilization of public and professional opinion, issues and challenges facing the SSIs, and the agenda for state policymakers. Descriptors—*Course Selection (Students), High Schools, High School Students, Longitudinal Studies, *Mathematics Achievement, *Science Curriculum, *Social Influences, Standardized Tests

Identifiers—*National Education Longitudinal Study 1988, *Science Achievement

Since the publication of "A Nation at Risk," (U.S. National Commission on Excellence in Education, 1983), several state and local educational authorities have increased the number of mathematics and science courses required for high school graduation. This report examines the relationships between the numbers of courses in mathematics and science that high school students complete and their achievement on standardized tests. Data are from the second follow-up survey of the National Education Longitudinal Study of 1988. Findings include: males and females did not differ significantly in the numbers of science and mathematics courses they complete; students from higher socioeconomic-status families completed more courses in these subjects than students from lower socioeconomic-status families; Asians completed more courses in math and science than Whites, and Whites completed more courses than Blacks and Hispanics; among students with comparable socioeconomic status, the differences in the number of

courses completed between Whites, Blacks, and Hispanics are insignificant; test score increases from the end of the 8th grade to the end of the 12th grade are strongly related to the number of math and science courses students completed in high school; and students who completed more math and science courses show greater achievement score gains during high school, regardless of gender, race-ethnicity, and socioeconomic status. Descriptors—Algebra, Constructivism (Learning), Cultural Differences, Educational Change, Elementary Secondary Education, Epistemology, Functions (Mathematics), Geometry, Higher Education, Language Role, Learning Modalities, Mathematics Education, Problem Solving, Rational Numbers, Research Methodology, Student Evaluation, Teacher Education, Technology, Visualization, Whole Numbers.

In this conference proceedings the overarching theme of research on teaching and learning mathematics in diverse settings and the subthemes of diversity, constructivism and algebra are achieved in the plenary papers. The plenary papers and authors include "Constructivism, Emergent, and Sociocultural Perspectives in the Context of Developmental Research" (Paul Cobb & Erna Yackel); "Fairness in Dealing: Diversity, Psychology, and Mathematics Education" (Suzanne K. Damarin); and "A Research Base Supporting Long Term Algebra Reform" (James J. Kaput). Included in these Proceedings are 84 research reports, two discussion groups, 40 oral reports and 43 poster presentation entries. The one-page synopses of discussion groups, oral reports and poster presentations are organized by topic along with the research reports. Papers are grouped under the following subject headings: advanced mathematical thinking, algebraic thinking, assessment, cognitive modalities, curriculum reform, epistemology, functions and graphs, geometric thinking, language and mathematics, probability and statistics, problem solving, rational number concepts, research methods, social and cultural factors, student beliefs and attitudes, teacher beliefs and attitudes, teacher change, teacher conceptions of mathematics, teacher education, teacher understanding of student understanding, technology, visualization, and whole numbers. An alphabetical list of addresses of authors is included in the appendix in Volume 2 with page numbers of their report or synopsis. For the first time the electronic mail address is included in this address list. (MKR)

The overall intent is to clarify relationships between psychological constructivist, sociocultural, and emergent perspectives by grounding them in attempts to understand what might be happening in a variety of teaching and learning situations. The first part of the paper outlines an interpretive framework developed in the course of a classroom-based research project. At the level of classroom processes, the framework involves an emergent approach in which psychological constructivist analyses of individual activity are coordinated with interactionist analyses of classroom interactions and discourse. At the level of school and societal processes, the perspective taken is broadly sociocultural and focuses on the influence of individuals' participation in culturally-organized practices. In the second part of the paper, the framework is taken as background against which to compare and contrast the three theoretical perspectives. The emergent approach augments the psychological constructivist perspective by making it possible to locate analyses of individual students' constructive activities in social context. In addition, the purposes for which emergent and sociocultural perspectives might be appropriate are considered and observed to span the individual students' activities, the classroom community, and broader communities of practice. EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Cultural Differences, Educational Research, Elementary Secondary Education, Equal Education, Ethnicity, Feminism, Learning Theories, Mathematics Education, Racial Differences, Sex Differences.

This paper lies at the interpretive intersection of several lines of research, some of them quite familiar to mathematics educators, and some of them probably less so. Among familiar discourses are cognitive constructivism, social construction, situated learning, and the psychological study of differences between groups defined by gender, race, ethnicity, and other variables used to categorize persons. Less familiar literatures and discourses include cultural studies, feminist research and theorizing, and postmodern social sciences, among others. Within the space inscribed by these theories, discourses, and research traditions and findings, this paper excavates issues surrounding the basic questions of what knowledge and approaches can be applied in order to increase the "fairness in dealing" with all students in and through mathematics curriculum, instruction, assessment, and related activities. And what are the implications for research in mathematics education, particularly research that invokes and pursues knowledge categorized as psychological? Contains 112 references. (Author/MKR)

Identifiers—QUASAR Project (Mathematics Education)

This paper is a reaction to a plenary address, "Fairness in Dealing: Diversity, Psychology, and Mathematics Education" by Suzanne Damarin (SE 057 179). The issues of intentionality, institutional and instructional practices, identity development, and assessment are addressed in regard to the Quasative Understanding: Amplifying Student Achievement and Reasoning (QUASAR) Project, a mathematics education reform project that has been supporting and studying the design and implementation of innovative instructional programs in middle schools serving economically disadvantaged communities. The QUASAR program was designed to address the persistent historical association of poverty and low achievement in mathematics by providing students in schools in low income communities with access to mathematics instruction that heavily emphasizes understanding, reasoning, and problem solving rather than memorization and imitation. One conclusion reached is that, just as it is important for students to develop an identity as knowers and doers of mathematics, it is equally important for mathematics educators to develop an identity as knowers and doers of equity. Contains 21 references. (MKR)

Pub Type—Opinion Papers (120) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Algebra, Educational Change, Elementary Secondary Education, Integrated Curriculum, Mathematics Instruction, Teaching Methods.

Identifiers—Reform Efforts

This paper discusses three dimensions of algebra reform: breadth, integration, and pedagogy. Breadth of algebra includes algebra as: generalizing and formalizing patterns and constraints; syntactically-guided manipulation of formalisms; study of structures abstracted from computations and relations; study of functions, relations, and joint variation; and cluster of modeling languages and phenomena-controlling languages. Also discussed are research supporting algebra reform and how research can lead the practice of teaching algebra in new directions. Three phases of reform (short, intermediate, and

long term) are discussed using examples of current research projects. Short term reform is seen as first attempts that leave course structures in place, but which contain significant enrichments, such as technology. The second or intermediate phase of reform centers on the integration of algebra into the middle school and offered to all students. The third, long term phase of algebra reform involves full integration of the development of the many forms of algebraic reasoning across all grades with the learning of important mathematics. Contains 108 references. (MKR)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Educational Technology, Elementary Secondary Education, Higher Education, Inservice Teacher Education, *Manipulative Materials, *Mathematical Concepts, *Mathematics Instruction, Mathematics Teachers, Play, Preservice Teacher Education

Identifiers—Manipulative Play

The paper shows that the study of mathematics can be organized as a complex learning enterprise integrating manipulative-exploratory play into a newer software tool environment—a dynamic geometry, a spreadsheet, and a relation grapher. The discussion reflects work done in a lab setting with preservice and inservice teachers enrolled in contemporary general mathematics and problem-solving courses. The psychological aspects of learning mathematical concepts through integrating computer activities and some possible implications of the approach for mathematics teacher education are highlighted from a Vygotskian perspective. Descriptors—*Geometry, High Schools, High School Students, Mathematics Instruction, *Proof (Mathematics), Science Instruction, *Scientific Methodology, *Secondary School Mathematics, Small Group Instruction

Identifiers—*Representations (Mathematics)

This paper addresses a central issue in secondary school geometry, namely the role of proof. In an integrated mathematics and science curriculum, the role of proof as a process of conjecturing, explaining, and justifying within a small-group setting is analyzed. Particular attention is given to the students' use of empirical evidence and algebraic representations. Each class session of this unit was videotaped, and during small group work, the focus group was videotaped. Written work and computer work done by the group were made available to the researcher for analysis. Extensive field notes were taken by the researcher during class sessions and videotapes of class sessions were reviewed and transcribed for more detailed analysis. (Author/MKR)

Descriptors—*Cognitive Development, College Students, Foreign Countries, Higher Education, Interviews, Mathematics Instruction, *Number Concepts, Teaching Methods, *Thinking Skills

Identifiers—*Fibonacci Sequences

In dynamical theory, mathematical understanding is considered to be that of a person (or group) of a topic (or problem) in a situation or setting. This paper compares the interactions between the situations and the mathematical understandings of two students by comparing the growth in understanding within a Fibonacci sequence setting in which specific tasks were suggested and interventions made, with that of the same students in a Fibonacci setting in which only a general prompt was offered. In the former setting, the growth of understanding was characterized by jumps, indicating a collection of specific images or patterns. In the second setting, these students exhibited a continuous, non-linear pathway of understanding more governed by epistemological interest and featuring more formulated reasoning. Descriptors—*Diagrams, *Elementary School Students, Elementary Secondary Education, *Geometry, Interviews, Mathematics Education, *Proof (Mathematics), *Secondary School Students

The main focus of the study was to describe how students of various ages established the truth of their ideas in school geometry. Thirty-two students in grades 2, 5, 7, and in a high school geometry class were interviewed. Formal proof was used in less than 1% of the student arguments. Second and 5th graders were most likely to convince themselves or others by using a basic image process or by drawing pictures. High school students and 7th graders were more likely to convince themselves and others using an Intuitive Affirmation. In addition, their arguments were more elaborate and propositional in nature than arguments given by 2nd and 5th graders. (Author/MKR)

Descriptors—*Algorithms, *Calculus, *Cognitive Style, *College Students, Computer Uses in Education, Engineering Education, Higher Education, Interviews, Mathematics Education, Problem Solving

Identifiers—*Mathematica (Computer Algebra System)

This study investigated students' conceptual and procedural understanding of calculus within the context of an engineering mechanics course. Four traditional calculus students were compared with three students from one of the calculus reform projects, Calculus & Mathematics. Task-based interviews were conducted with each participant throughout the course of the 10-week quarter. Results from interviews show a distinct difference in approaches to solving engineering mechanics problems that involve calculus. Calculus & Mathematics students, who learned calculus with a conceptual emphasis, were found to be more likely to solve problems from a conceptual viewpoint than were the traditional students, who were more likely to focus on procedures. Descriptors—*Algebra, *Cognitive Style, Mathematics Instruction, Secondary Education, *Symbols (Mathematics)

This paper presents an analysis of the different types of meanings that an individual may assign to a collection of algebraic symbols depending on the mathematical context in which the symbols are presented and the mathematical knowledge possessed by that individual. Four contexts for the Quadratic Theorem are used to illustrate the ways in which generalization and abstraction develop the meaning of algebraic entities by changing the focus from process to structure. Descriptors—*Concept Formation, *Diagrams, *Elementary School Students, Grade 4, Intermediate Grades, Mathematics Education, *Number Concepts

In this classroom a child introduced the word "split" when he was asked to describe his mental activity in performing the addition of two numbers; the teacher initiated a spatial representation using a broken line. Subsequently, the children used their own pictorial representations. The paper presents an analysis of the numerical diagrams used by these fourth graders to represent their "splitting notion." Splitting evolved into a metaphor that fostered the emergence of these children's numerical meanings. Contains 10 references. (Author)

Descriptors—*Algebra, *Arithmetic, Foreign Countries, Mathematics Education, Questionnaires, Secondary Education, *Secondary School Mathematics, *Subtraction, *Whole Numbers

This article reports the results of a questionnaire applied to secondary school students ($n=35$) to explore efficiency in the resolution of equations in the domain of whole numbers and the spontaneous responses to problems leading to negative solutions. The most significant results obtained with the questionnaire are the lack of knowledge of the double use of brackets in arithmetic expressions, the partial comprehension of the operation of subtraction, and the difficulty in the operativity of expressions with double signs. The conclusions of this research suggest recommendations for the teaching of whole numbers. Contains 13 references. (Author/MKR)

Descriptors—Case Studies, *Cognitive Ability, Elementary Education, *Elementary School Students, Mathematics Education, Models, Primary Education, *Probability, *Thinking Skills, Young Children

Based on a synthesis of the literature and observations of young children over 2 years, a framework for assessing probabilistic thinking was formulated, refined, and validated. For each of four major constructs incorporated into this framework—sample space, probability of an event, probability comparisons, and conditional probability—four different levels of thinking were established that reflect a continuum from subjective to numerical reasoning. The framework was validated through data obtained from 24 children in grades 1 through 3 who served

as case studies. Results suggest that, while the framework produces a unified picture of children's thinking in probability, there is "static" in the system which generates inconsistencies among construct levels. The framework has implications for curriculum development and assessment. Contains 18 references. (Author)

Descriptors—*Constructed Response, Elementary School Students, Grade 4, Intermediate Grades, *Mathematics Tests, Models, Qualitative Research, *Test Theory

Identifiers—*National Assessment of Educational Progress

The purpose of this investigation was to develop a general framework for qualitatively analyzing the 1992 National Assessment of Educational Progress (NAEP) extended constructed-response questions. The framework dimensions were based on information about the NAEP extended questions and linked to important ideas in mathematics education and cognitive psychology. A set of student responses ($n=25$) to an extended constructed-response question from the grade-4 assessment was analyzed qualitatively according to appropriate framework dimensions. The findings suggest that the student responses could be analyzed qualitatively, but further investigation is needed to verify the adequacy of the framework. Contains 12 references. (Author/MKR)

Descriptors—*Algebra, Authoring Aids (Programming), *Concept Formation, *Educational Technology, Grade 7, Junior High Schools, Junior High School Students, *Mathematics Instruction, *Problem Solving

Identifiers—*Pre Algebra, *Variables (Mathematics)

This paper presents two examples in which technology, in this case a fairly sophisticated authoring system—ToolBook, was used as a tool to construct student understandings in mathematics. In doing so, students were able: (1) to successfully identify the variables (unknowns) and the information given (data) in the problem; and (2) to create meaningful links between the data and givens which enable successful problem solution. Examples are from work in a seventh grade pre-algebra class of below-average-ability students in a middle class urban setting and are from a single classroom. (Author/MKR)

Descriptors—*Cognitive Structures, *Concept For-

mation, Elementary Education, Elementary School Students, *Geometry, Mathematics Education, *Visualization

This investigation is part of a combined research/curriculum development project in which children's learning is being examined in the context of developing and testing instructional units on 3-D geometry in grades 3, 4, and 5. There are two components to the article. First, the strategies and cognitive constructions that students utilize to conceptualize and enumerate the cubes in 3-D arrays are described. Second, the change in thinking of students as they are involved in instructional tasks that help them develop more sophisticated thinking about enumerating cubes in 3-D arrays are examined. Descriptors—Case Studies, *Cognitive Processes, *Concept Formation, *Elementary School Students, Grade 4, Intermediate Grades, Interviews, Mathematics Education, *Problem Solving

Identifiers—*Representations (Mathematics)

This study is part of a longitudinal study of 22 elementary school children observed over a 3-year time span in the classroom and in individual task-based interviews. Through the examination of videotaped structured clinical interviews of Marcia, the first in 1992 when she was 9 years old (4th-grade), this study seeks to draw inferences about her internal strategic problem representations while engaged in problem-solving activity, and to analyze how these representations developed over a 2-year time span. An analysis of Marcia's task-based interviews shows that strategies are accessible to her, and even more importantly, that they do not necessarily need to be "taught." The research reported here shows that Marcia, when left to her own devices, not only invented strategies and representations to aid her in finding a solution to the problem, but she often did so in noncanonical ways. Descriptors—*Algorithms, *Cognitive Processes, *Cognitive Style, Grade 7, Junior High Schools, Mathematics Instruction, *Statistics, *Visualization

Identifiers—*Arithmetic Mean

Although the average, or arithmetic mean, has a rich conceptual meaning, it is often defined simply as the outcome of a procedure. The purpose of this study was to compare the nature and extent of the procedural and conceptual understandings developed by two groups of students who received different forms of instruction, one based on the traditional numerical algorithm, the other on a visual algorithm. When confronted with tasks varying along several dimensions, students adjusted or extended their basic approach to finding the arithmetic mean in ways that give insight into their understanding of the concept. While both groups of students showed a degree of understanding and flexibility with the procedure they had been taught, students who had learned the visual procedure showed a deeper conceptual understanding of the arithmetic

mean. An appendix contains selected tasks presented to subjects. (Author/MKR)

Descriptors—Affective Behavior, *Calculus, *Cognitive Structures, College Students, *Concept Formation, Higher Education, *Mathematics Instruction, *Multiplication

Identifiers—Reform Efforts

In an effort to examine the impact of the changes being made at San Jose State University (California) in the calculus curriculum, multiple measures were collected and analyzed. This study focuses on the relationship between performance on a pretest and the class grade. Through written responses on the pretest, a belief and knowledge profile for each student was constructed. Students were grouped according to their answers on an item which asked them to graph $2, x, x^2$, and 2 to the x power. Profiles of student perceptions and knowledge were consistent within groups and varied across groups. Results showed that the concept of multiplication was not well understood and was closely related to success in first semester calculus. Multiplication was itself still a process, and in some cases, this process produced multiple concept images within cognitive neighborhoods. (Author)

Descriptors—Classroom Communication, *Concept Formation, Grade 7, Grade 8, Junior High Schools, Junior High School Students, *Mathematics Instruction, Middle Schools, *Probability, Teaching Methods

Identifiers—*Combinatorics, *Permutations (Mathematics), Scaffolding

This paper is concerned with understanding how a scaffolding process is utilized in the natural setting of a middle-school mathematics class. Wood, Bruner, & Ross (1976) characterize scaffolding as a learning process of a novice which is assisted and dominated by the adult. Rogoff and Gardner (1984) also point out that "to make messages sufficiently redundant" is one way to provide scaffolding. This study examined classroom discourse when a new topic was introduced to the class. The teacher connected a new topic (combinations) to old content (permutations). He used abundant, similar, but slightly changed examples as referents to help the students attach meaning to symbols for permutations and then began to turn over the discourse to the students to support their development of that new content. EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Concept Formation, *Elementary School Mathematics, Elementary School Students, Grade 4, Intermediate Grades, Mathematics Education, *Measurement

Identifiers—*Rulers (Instruments)

This study involved 3 days of teaching in two fourth-grade classes. A pretest and a posttest were given consisting of (1) a NAEP item asking for the length of a line drawn next to a ruler, (2) a Piagetian unit-iteration task, and (3) the measurement of an object with a ruler that had the "0" mark away from its edge. It was found in the pretest that 86% of the children had constructed the logic of unit iteration but that most of them could not use a ruler correctly. The posttest revealed that, although there was progress, the problems found in the pretest persisted among a third to a fourth of the children. These problems were all related to the initial unit of measurement. (Author)

Descriptors—*Calculus, *College Faculty, *Educational Change, Higher Education, *Mathematics Instruction, *Mathematics Teachers, Textbooks

Identifiers—Harvard Consortium Calculus, *Reform Efforts, *Teacher Change

This report describes the changes in a freshman-level calculus course that occurred as a consequence of adopting the Harvard Consortium Calculus text. The perspective is that of the lecturer. The course is intended as an introduction to calculus for liberal arts students, that is, students who will not be expected to use calculus as a mathematical tool in their area of major study. The perceptions of the instructor about global changes that occurred in the course include that learning was different, the material was appropriate to students' needs and level of sophistication, students came away with different attitudes about mathematics, the use of the graphing calculator opened up new ways of understanding and representing mathematics, the use of cooperative groups is an important technique in promoting student involvement in learning, and the increased use of writing was critical to students' learning conceptually rather than mechanically. Descriptors—Case Studies, *Educational Change, *Educational History, Elementary Secondary Education, Foreign Countries, *Mathematics Education

Identifiers—*NCTM Curriculum and Evaluation Standards, *Reform Efforts

The NCTM Standards have multiple origins. In part they developed out of concerns from NCTM committee members about textbook adoption policies that favored traditional texts. They also constituted a response to the public furor caused by "A Nation at Risk" and instantiated the 1980 recommendations on curriculum in "An Agenda for Action." International curriculum and research projects also influenced the NCTM Standards. The initial NCTM emphasis on standards as accountability criteria shared certain similarities with the National Curriculum effort in England and Australia, where reform is reportedly stalled. The more recent view of the "Standards" as aspiration may help extend the duration of their influence. (Author)

Descriptors—Affective Behavior, Cognitive Development, *College Mathematics, *Constructivism (Learning), *Geometry, Higher Education, *Mathematics Instruction, *Problem Solving

Identifiers—*Connections (Mathematics), *Reform Efforts

This paper describes the use of radical constructivism as a basis for curriculum reform in university mathematics courses and reports on research conducted on two of the courses developed, one in geometry and one in problem solving. The theoretical underpinnings of the project are described along with the implications for course design and instruction. Finally, results from qualitative research conducted on the courses are presented. The courses were found to foster intellectual autonomy, challenge students to rethink mathematics from a conceptual rather than procedural perspective, promote confidence in their mathematics knowledge, become more positive mathematics learners, and make connections among algebra, geometry, and calculus concepts. Identifiers—*Reform Efforts

What is the response of students to the reform efforts in mathematics education? A survey taken in September 1994 of 59 eighth grade mathematics students showed that their conceptions of what it means to do mathematics were predominantly traditional in nature. The survey was repeated in the spring, when these students had experienced 9 months of a reform-oriented class. The spring survey showed that students were in many respects more open in their acceptance of alternative activities. The majority of students, however, still felt strongly that "listening to the teacher explain" should be included in a conception of school mathematics. There were also strong negative opinions among a majority of students about writing journals in a mathematics class. (Author)

Descriptors—Classroom Communication, *Concept Formation, *Discussion (Teaching Technique), *Division, Grade 7, Junior High Schools, Junior High School Students, Mathematics Instruction

Identifiers—*Second Generation Constructions

When a student begins to appropriate an idea from classroom discourse, the idea is likely to be perceived incompletely because the speaker's understanding of the idea cannot be conveyed in its entirety through the discourse. Under the guidance of the teacher, the discourse serves to stimulate further development of the idea itself, the development of connections to existing knowledge, and its use in constructing new content. The way in which students appropriate ideas presented to them by another individual and make them their own are called "second-generation constructions." In this study, all students were creating second generation constructions, including the student who originally presented an idea to the class, because he acquired the divisibility by 8 rule from his father. Implications for instruction include the importance of revisiting ideas from time to time to increase students' perception of their value and encouraging discourse to facilitate the constructive process. Identifiers—*Graphing Utilities, *Precalculus

This paper documents how eight high school students in a precalculus class enhanced with graphing calculators think about functions. Three models of thinking about functions emerged from students' function images observed over a period of 9 months. In the graph model, students believed that functions are essentially graphs; in the equation model, they believed that functions are relationships between x and y expressed by equations; and in the unique correspondence model, they took "one output for every input" as the definition of a function. The vertical line test served as a link across all of the models. (SW)

Descriptors—*Cognitive Structures, *Functions (Mathematics), *Mathematical Models, Mathematics Education, Models, Secondary Education Identifiers—*Representations (Mathematics)

This paper presents an alternate perspective for utilizing the action/process/object framework when discussing student conceptions of function. This perspective extends previously used frameworks by incorporating student conceptions that deal with functional properties and situational contexts, but differs in the analysis of the nature of the functional properties that are considered. The hypothesis is that students not only use notions of set-based correspondences and transformations to think of functions as mathematical objects, but functions are also conceived as mathematical objects that possess (or fail to possess) growth properties of specific functions. These properties include symmetry, linearity, and continuity. It is argued that all students who develop a structural view utilize functional properties, but a focus on different kinds of properties produce different conceptions of function. (Author)

Graphs without a time axis, such as velocity-versus-position graphs, offer interesting possibilities for exploring graphing and motion. Relations depicted by these graphs are not limited to functions. Interviews with a high school student named Olivia, who uses a motion detector to create such graphs, indicate that she uses thought experiments as well as physical experiments to determine which graphs are logically impossible. Her encounter with the constraints of the velocity-versus-position graph leads her to imagine a group of several "Impossible" figures that she could never create using the motion detector, which becomes a crucial part of learning about this type of graph and about the relation of velocity to position. Identifiers—*Van Hiele Levels

This study investigated whether the van Hiele model accurately describes the geometric thinking of gifted students in the 6th through 8th grades prior to a formal course in geometry and made comparisons with what has been found with other populations. The results from 120 students who completed a 25-item multiple choice paper-and-pencil test, developed by the Cognitive Development and Achievement in Secondary School Geometry Project, and 64 students who participated in 30-45

minute individual interviews were analyzed. Although the responses of the students on the multiple-choice test did form a hierarchy overall, 35.8% of the gifted students tested skipped levels in the van Hiele model. Analysis of the clinical interviews confirmed that individuals do not demonstrate the same level of thinking in all areas of geometry. Many of the students lacked correct basic definitions of terms such as congruent and similar, but they attempted to deduce the definitions from contextual clues. Once they established a definition, correct or incorrect, most students reasoned consistently from it. Although reasoning was a strength of most of the subjects, they did not know how to construct an acceptable formal geometric proof. (Author)

Descriptors—Classroom Communication, *Concept Formation, *Discussion, *Division, Grade 7, Junior High Schools, *Junior High School Students, Mathematics Instruction

Identifiers—*Mathematical Communication

This study examines the role of discourse in the development of students' understandings of a rule for determining if a number is divisible by 8. The rule was suggested by a student in a seventh-grade mathematics class. Its validity was investigated in whole-class discussions that occurred on 3 consecutive days. In addition to making field notes and videotaping classroom interactions, what students learned was investigated through the use of whole class surveys and interviews with 9 out of 29 students. Discourse served to sustain the investigation, to assist students' development of the idea, and to confuse students. Confusion occurred as a result of "failures of context" when the discourse failed to deal with the complexity of the language structure involved in a rule and to discriminate between meanings of words such as even and evenly. EDRS Price—MF01/PC01 Plus Postage.

Descriptors—Calculus, *Cognitive Structures, College Mathematics, *College Students, *Concept Formation, *Error Patterns, Higher Education, Mathematics Instruction, *Writing Across the Curriculum

This study examined how engaging calculus students in Writing to Learn Mathematics affected the types of conceptual and procedural errors that the students made on their examinations. Students in two sections of an introductory college calculus course in Fall 1994 were the respondents in this study. A classification system was developed that categorized students' errors as procedural, conceptual, or indeterminate. Procedural errors involved either syntactical or algorithmic errors. Conceptual errors involved use of inappropriate procedures, acceptance of unreasonable answers, translation mistakes, misuse of symbols, incorrect interpretation of symbols, invalid inferences, statements without justification, or contradictions of nonprocedural principles, definitions, or theorems. Descriptors—*Algebra, *Cognitive Processes, Grade 8, Junior High Schools, *Junior High School Students, *Mathematics Instruction, *Problem Solving, Teaching Methods

The primary purpose of this study was to evaluate the application of a process approach for the teaching of algebra with a heterogeneous class of eighth-grade students. The assessment was conducted by identifying the processes used by above-average, average, and below-average algebra students in solving standard and nonstandard problems ranging across a content X process X form matrix (integers, fractions, polynomials) X (generalization, reversibility, flexibility) X (expression, equation). Transcripts of the experimental data were coded and contrasted with normed data from earlier studies involving more homogeneous groups. (Author)

Descriptors—*Algebra, *Cognitive Processes, *College Students, *Cooperative Learning, Higher Education, Mathematics Instruction, *Problem Solving

This study examined the problem-solving behaviors, strategies, and achievement of college students enrolled in a one-semester college algebra and statistics course, with respect to the content areas of quantitative literacy, connections between algebraic and graphical representations, and mathematical modeling. Four instructional units of this course were chosen, two in which the students were assigned to cooperative-learning groups and two in which the students worked independently. The findings suggest that students who work in cooperative learning groups clearly exhibit important problem-solving behaviors such as persistence and a willingness to explore alternative solutions; however, they still experience difficulty explicating the connections between mathematical actions and/or processes and the related mathematical concepts. Descriptors—*Cognitive Processes, *Elementary School Students, Grade 5, *Help Seeking, Intermediate Grades, Mathematics Instruction, *Parent Participation, *Problem Solving, Student Journals

Identifiers—*Zone of Proximal Development

This investigation is part of an ongoing, larger study which is looking at joint activity and appropriate

of new understandings in an inquiry mathematics classroom setting. Instances of help-seeking which occurred while children were endeavoring to solve non-routine problems at home were analyzed. Considered in this study were (1) the kind of help sought by the child, (2) the kind of help offered by the adult, (3) how extensive the help was, and (4) the sense the child made of the help. The data sources included the children's writing in their math logs, and their explanatory presentations subsequently given to peers in class. Findings suggest that (1) the children sought and received help predominantly with respect to problem-solving strategies and mathematical concepts, (2) interactions with adults were evenly distributed among all the students—the adept, moderately adept, and less adept—in that some did ask for help while others rarely or never did, and (3) the less adept children were less specific in describing the kind of help sought/received while the more adept children's requests were more specific and focused. Descriptors—*Cognitive Processes, *Concept Formation, Grade 6, Grade 7, Grade 8, Intermediate Grades, Junior High Schools, *Junior High School Students, *Mathematics Instruction, Middle Schools, *Statistics, Teaching Methods

Identifiers—*Arithmetic Mean, *Middle School Students

This study used an open-ended problem-solving approach to teaching and assessing middle school students' understanding of the concept of arithmetic average. Three main results of this study show evidence of positive instructional impact on students' understanding of the concept of average: (1) the number of students who gave correct answers increased from pretest to posttest; (2) on the posttest, more students used appropriate strategies to solve the average problems than on the pretest; and (3) more students used multiple representations on the posttest to explain their solutions than on the pretest. The findings of this study indicate that learning the concept of average is cognitively more complex than the computational algorithm suggests. However, with appropriate instruction, students can have an understanding of the concept beyond the computational algorithm. (Author)

Identifiers—*Representations (Mathematics)

Research in mathematical problem solving has produced significant results in trying to understand what people do to solve problems. An important part of the solution process is the presence of both cognitive and metacognitive strategies. This paper documents the extent to which 13 ninth grade students are able to recognize the basic structure of a problem given in three different contexts. In the analysis, it was important to identify a set of distinctions that the students coordinate during the process of solution. This set of distinctions involves the use of some kind of representation of the problem, the search for connections with other ideas, flexibility in approaching the solutions, and confidence in

the results. These ingredients become essential in evaluating the quality of students' work. (Author/MKR)

At issue in this study was the extent to which large numbers of classroom teachers were able to implement research-based materials with a minimum of inservice education. Also at issue was whether students of these teachers were able to develop the rich mental images for fractions similar to the ones students from previous Rational Number Project (RNP) studies developed in smaller experimental settings. An analysis of student interviews (n=20) in fourth grade in a suburban school district south of St. Paul and Minneapolis, Minnesota demonstrated that RNP students did in fact develop rich mental images for fractions similar to students in previous studies. As expected, the nature of RNP students' thinking about rational numbers was far richer and indicated a more conceptually oriented framework than that of students who used textbook curriculum. Identifiers—*Perimeter (Geometry)

Fifth grade children's (n=16) understandings of simple fractions such as 1/2, 1/3, and 1/4 were investigated. The study identified three alternative conceptions of fractions: (1) 1/"N" is one of "N equal" parts, (2) 1/N is one of "N equal" parts, and (3) parts must fit together to form the whole. In

addition, many participants believed that the perimeter measured the area. This conception of area measurement also influenced the participants' problem-solving activities significantly. (Author/MKR)

Descriptors—*Concept Formation, *Decimal Fractions, *Elementary School Students, Grade 5, Intermediate Grades, Mathematics Instruction, *Ratios (Mathematics)

This paper reports on a teaching experiment involving decimal instruction conducted with a class of elementary students ($n=20$) in a public school of a small city. After doing extensive work with multiplication, division, ratio, and fractions through an innovative mathematics curriculum, fifth grade students were introduced to decimal numbers. To develop their understanding of decimal notation, students worked through three open-ended, contextual problems that encouraged them to make connections between decimals and previously encountered mathematical constructs such as ratio and fraction. After instruction, students' performance on decimal tasks indicated that students developed a robust understanding of decimal concepts. Based on these positive results, the authors assert that building decimal instruction upon students' ratio reasoning and fraction sense is a key component to helping students develop meaningful strategies for understanding and working with decimal numbers. Contains nine references. (Author/MKR)

Descriptors—Adult Basic Education, *Adult Learning, *Cognitive Structures, *Computation, Interviews, Mathematics Education, *Percentage, *Prior Learning

This study examined adult students' informal knowledge of percent and its relationship to their computational skills. Sixty adults studying in urban and suburban adult education programs were interviewed to ascertain: (1) their ideas of the meanings of benchmark percents, 100%, 50%, and 25%, as they appear in advertising and media contexts; (2) their ability to use these percents in everyday mental math tasks; and (3) their visual representations of these percents. Students also completed written computational percent exercises. Students' responses were examined to determine the nature of their informal knowledge and skills, and a number of patterns were identified. The range and fragility of student responses and the diversity of knowledge gaps suggest the acquisition of isolated ideas but the absence of elaborated frameworks. (Author/MKR)

This case study was carried out with a student who was 9 years old and in the fourth grade when the study began. She was selected after the administration of an exploratory questionnaire to 66 pupils in primary school. The main features of the case were the absence of a common referent and a corresponding unit to the free generation of references related to the addition of fractions. The girl was interviewed twice with the same instrument. The interviews consisted of 10 tasks. The link generated by this student between different classes of objects (referents) through a sum affected only fraction references (not natural number references). Likewise, the child was unable to establish a unit when facing the requirement to construct the additive situation by her own means while she could assign sense, recognize and select an adequate unit in simple tasks, and reconstruct whole processes. Contains 15 references. (Author)

In this article, the meanings students construct and the conceptual advances they make as they deal with ratio and proportion problems are described. The study cites episodes with a second grader, two fifth graders, and three seventh graders. A critical factor in students' comprehension of and solution to ratio and proportion problems is their explicit recognition of the action that links composite units. Critical transitions in students' constructive itineraries are highlighted, showing that an essential component of these transitions is students' development of related concepts and their integration of that conceptual knowledge with ratio and proportion reasoning. This paper is a report on the results of a 3-year teaching experiment conducted in Ithaca, New York, introducing students to the concepts of multiplication, division, and ratio as a trio, and to ratio and proportion in a project-based curriculum with heterogeneous grouping. Fractions were introduced as a subset of ratio and proportion. The paper outlines curricular changes in grades 3-5 and focuses on the major representational forms used by the students including: Venn diagrams, daisy chains, contingency tables, tables of values, dot drawings, two-dimensional graphs, and ratio boxes. Also discussed is the role these tools play in the development of students' understandings of the multiplicative world. Results show that these 10- and 11-year-olds exceeded the comparative performance of 14- and 15-year-olds on ratio and proportion test items. Contains 14 references.

Little is known about teachers' reflections on current reform efforts in real classrooms (Cuban, 1993). This study describes methodology and data on teachers' efforts to implement a 4-year secondary mathematics reform curriculum at a statewide level. The methodology uses vignettes in an attempt to retain the best part of careful observational case-study techniques while bowing to practical pressures of dealing with hundreds of teachers in as many sites. As such, it allows the authors to triangulate observational data, to affirm working hypotheses based on that data, and to provide teachers with a rich opportunity for reflection on classroom practices. Open-ended tasks were used to examine gender differences in complex mathematical problem solving. The results of this study suggest that, overall, males perform better than females, but the gender differences vary from task to task. A qualitative analysis of student responses to those tasks with gender differences showed that male and female stu-

dents exhibited many similarities in their solution processes, such as making similar types of mathematical errors and using similar strategies and representations. This study suggests not only the complexity of the issue of gender differences, but also the feasibility and usefulness of using open-ended tasks to explore the issue. Contains 13 references. Identifiers—*African Americans

Consonant with the current concern for achievement of minority students, the two action research projects described in this paper use interviews and case studies of 10 African American high school students to address some issues related to motivation in the learning of mathematics, particularly as this motivation concerns aspects of the family structures of which these students are a part. The data support the suggestion found in the literature that high motivation to learn mathematics is more readily achieved in African American students from two-parent homes. However, motivating factors are complex; among other factors, a negative role model effect is described in contrast to the motivating effect of a relationship with a caring adult who values mathematics learning. Judged by its results, the current system for educating African American students in mathematics is a distinct failure. For years, educators either ignored this problem or simply blamed the failure of the system on its victims. In 1984 the Journal for Research in Mathematics Education drew national attention to the problem by devoting an entire issue to articles and reviews of available research on how America's ethnic minorities learn and perform in mathematics. For the present paper, 24 research studies reported since 1984 and involving African American students were reviewed, and several parent-, student-, and school-related factors that might influence performance and participation in mathematics were identified. Following up on that work, this paper reviews studies that have been done on this subject since 1984. Most were correlational studies. (Author/MKR)

Dispositions of eighth graders accelerated into first-year algebra were described in this study. Data were collected through surveys, observations, interviews, and cumulative academic files. The most frequently reported reasons for enrolling in algebra were for acceleration of course-taking and preparation for high school. Males demonstrated a higher level of self-efficacy to perform in algebra and secondary mathematics. Students showed a high level of perseverance in terms of sacrifices made to take the course, but classroom performances indicated negative dispositions toward mathematics. Students were driven by a desire to please the teacher and earn grades rather than out of natural curiosity and interest. Neither students nor their parents recognized the real-world applications of algebra. Certain teaching methodologies appeared to evoke positive dispositions. Contains 17 references. (Author)

A preliminary investigation of patterns of teacher thought about student reasoning and learning involved presenting 23 preservice teachers with a "dilemma of practice about equity." Resulting stages of teacher development concerning equity in reasoning were found to correlate significantly with Perry's scheme. However for those who hold the view that mathematics learning is mostly rule-based, no significant correlation was found with these stages of teacher thought about reasoning and equity. Yet, holding a rule-based viewpoint of mathematics learning was found to correlate significantly in the expected direction with Perry's scheme. Contains 17 references. (Author/MKR)

As mathematics teacher education promotes the mathematics and pedagogical practices of the National Council of Teachers of Mathematics (NCTM) Standards, most mathematics preservice teachers confront philosophies of mathematics significantly different from their personal mathematical philosophy. The constructivist/quasi-empiricist mathematical philosophy espoused by the NCTM "Standards," as opposed to the traditional absolutist philosophy of mathematics as a set of rules and facts, characterizes the conflict in philosophies of mathematics. This report shares the findings from an in-depth case study of a preservice secondary mathematics teacher, Ken, by following the subtle evolution of his philosophy of mathematics, as characterized by Ernest's "Mathematics-Related Belief Systems," and the experiences influential in his philosophical evolution over a year of preservice mathematics teacher education. What is the nature and role of reflection for teachers? How is teacher reflection influenced by environmental/situational factors? Examination of stated beliefs and observed practices of four 7th and 8th grade mathematics classroom teachers were used as evidential sources to help answer these questions in this interpretive investigation. Multiple data sources revealed classroom settings elicited mostly spontaneous, technically oriented reflections, while reflections in the interview setting were more personally focused. An analysis of the teachers' metaphorical language indicated that reflections could be increased through the influence of a conflicted educational context and inhibited by deep level belief structures that limited the scope of reflections. Identifiers—NCTM Curriculum and Evaluation Standards, Preservice Teachers, *Teacher Candidates

This study investigated the beliefs about mathematics held by two secondary preservice teachers as they participated in a teacher education program that promoted the National Council of Teachers of Mathematics (NCTM) Standards and the use of technology. Of particular interest was what the teachers believed and how those beliefs were structured. Theoretical perspectives developed by Green (1971), Perry (1970), and Belenky, Clinchy, Goldberger, and Tarule (1986) were particularly helpful in this analysis. Analyses of data taken over a 15-month period of time indicated that both the teachers' beliefs and the structures of their beliefs differed. Recognition of these various structures is of considerable importance when developing teacher education programs that promote reflection and adaptive teaching. (Author)

This study identifies some of the questions mathematics educators must address in designing methods courses for graduate students in preservice teacher education programs. The questions emerge from a pilot study of preservice early childhood graduate students' beliefs about the nature of mathematics and science. In a combined mathematics and science methods course, students used each discipline as a backdrop for considering the nature of the other discipline. Three important questions related to mathematics are the following: (a) How can mathematics be better contextualized? (b) How can mathematics be presented as a growing, changing field that, like science, invents new knowledge? (c) How can students learn to ask their own mathematical questions and pursue their own mathematical investigations? (Author/MKR)

Identifiers—*Preservice Teachers, Teacher Candidates

This study examined 65 preservice teachers' metaphors for describing roles of the mathematics teacher. Previous research suggested that metaphors for teaching typically ascribe three distinct roles of the teacher: teaching, assessing, and classroom management. The findings of this study reveal that student metaphors were not systematic across the three roles. Actualizing visions of mathematics

learning consistent with constructivist pedagogy will require teachers and pre-teachers to reconcile beliefs with personal interactions and roles in the classroom by engaging in critical reflection about teacher roles. Contains 10 references. (Author/MKR)

Five secondary school teachers participated in a 3-year project to support the rethinking of their assessment practices. The teachers met regularly to share ideas, submitted assessment tasks and their assessments of students, and received feedback. All of the teachers professed significant changes in their understanding of assessment and four changed their teaching significantly. The teachers' written contributions to the project, interviews with the teachers and their students, and observations of the teachers' teaching were analyzed. Key factors from the nature of the teachers' beliefs and their social situations were identified that facilitated and/or inhibited change. (Author)

 The goal of this longitudinal study was to conceptualize the belief structures of preservice teachers with regard to technology. Concerns included what beliefs were held, how those beliefs were held, and to what extent those beliefs influenced the teachers' use of technology. Two preservice teachers were followed through four quarters of a secondary mathematics education sequence. Analysis of their beliefs suggests that prerequisite mathematical knowledge and the role of the teacher played major part in the structure of their beliefs toward technology. (Author/MKR)

This study is one of a set designed to investigate how preservice teachers' understanding of mathematics and views of teaching are affected by working with children. In the study, two preservice secondary school teachers tutored an eleventh grade student over a period of two sessions. The student teachers were surprised that the student was not considering fractions as involving equal areas, and they spent 45 minutes unsuccessfully attempting to induce disequilibrium in the student. The author viewed the videotape with the student teachers, during which time it became clear that the student teachers were struggling with the notion that teaching means not telling students anything. Implications of this view are discussed. (Author)

This paper compares the beliefs and practices of six elementary education majors prior to and during their senior year clinical and student teaching experiences. Three of these preservice teachers had the minimum requirement of two mathematics content courses. The other three were mathematics specialists and had at least six additional courses in mathematics. Comparisons are made from data, pre-intervention baseline to post-student teaching, on their teaching practices and on their reported beliefs. Although results from this comparison suggest that the change profiles of these two groups are different, at the end of their student teaching experience these two groups were not significantly different in their teaching practices and in their reported beliefs. Identifiers—Reform Efforts, *Teacher Change

This paper traces the development of cooperative learning strategies in the practices of two middle school mathematics teachers who implemented an innovative mathematics curriculum with their 7th and 8th grade students. The evidence suggests that these teachers increased their use of cooperative learning strategies, and this increase was related to the nature of the curriculum materials, as well as to their views of the nature of mathematics and its teaching and learning. Moreover, both teachers appeared to share a similar view of the social context of the classroom. Contains 18 references. (Author)

This study followed one preservice teacher, Liz, as she progressed through her senior year of a secondary mathematics education program that illustrated and encouraged views congruous with the National Council of Teachers of Mathematics (NCTM) "Standards." At the start of the program Liz saw her role as one in which it was her responsibility to create a classroom environment defined to be non-intimidating, non-frustrating, interesting, and motivating for her students. Throughout the year, her beliefs defining her role of teacher were strengthened by the program. In addition, a belief in the use of problem-solving activities evolved from her beliefs of her role of teacher. This belief in problem-solving activities, combined with her student teaching experience caused Liz to re-examine some of her earlier beliefs. (Author/MKR)

Three mathematics teachers and 10 of their ninth grade students were observed and interviewed during a 6-week period. One teacher claimed that her main challenge—implementing a student-centered curriculum—was her doubt that students would make the right connections without her explanations. Another teacher struggled with the dynamics of operating both small-group and whole-class discussions and ultimately decided not to hold whole-class discussions. A third teacher achieved a more equal balance between teacher-directed and student-centered activities. All three teachers demonstrated more difficulty than students changing their expectations about appropriate mathematical activity. (Author)

Mathematics for all students is a goal of the current mathematics education reform movement. But is today's reform also workable for all teachers? This report profiles two teachers who dropped out of field testing an innovative middle grades mathematics curriculum, the Connected Mathematics Project. These teachers are of interest because (1) their mathematics backgrounds seemed strong, (2) their espoused philosophies seemed compatible with the innovation, and (3) their work environments provided considerable support. The difficulties they encountered are described and recommendations are offered for helping teachers succeed with curricular reform. (Author/MKR)

This is a case study of one teacher's beliefs, practice, and learning during his first year of participation in a problem-centered second-grade mathematics project. The teacher in this study attempted to implement an alternative approach to teaching mathematics that differed dramatically from his former practice. This study looks at his former beliefs and practice, his teaching of mathematics during his participation in the project, and the process by which he learned and consequently changed his beliefs and practice. The teacher in this study learned and consequently changed his beliefs and practice through his actual practice. Paradigm cases often consisted of alternative interpretations of classroom incidents. This study investigated a dilemma faced by an experienced teacher during the early stages of participating in a mathematics instructional reform project, Quantitative Understanding Amplifying Student Achievement and Reasoning (QUASAR). The dilemma arose as the teacher's past practices came into conflict with new forms of instruction. Factors that assisted the teacher in dealing with the dilemma and arriving at a satisfactory resolution included: (1) encouraging teacher reflection on practice, (2) providing a nonthreatening forum for discussing reflections, and (3) providing ongoing support during implementation. Identifiers—*Reflective Analysis

This paper examines the reactions of 10 elementary teachers to a teaching case used as part of a professional development project's curriculum. Their written reactions to both reading the case and participating in a 2-hour discussion of it suggest that cases may stimulate teachers to think about their own understanding of mathematics, the mathematical thinking of children, and their roles as teachers. In addition, patterns in the data suggest that teachers' reactions to cases are strongly colored by their prior experience with case materials, their abilities to articulate the subtleties of reformed mathematics teaching practice, and where they are in their thinking about mathematics education reform. Being open to new ideas is instrumental for the professional development of teachers. Using numerous case studies of prospective teachers' beliefs as a backdrop, this study investigated the tensions and struggles four prospective teachers encountered as they confronted the unfamiliar. Both the formation of their belief systems and the interactions of their beliefs with the unfamiliar were interpreted as participants engaged in a discussion, reflection, and activity-rich proactive teacher education environment. Through the tensions and struggles associated with multiple interpretations of mathematics and issues related to multiculturalism, insights were gained into the complexities of becoming a teacher during this time of mathematics education reform. Identifiers—Preservice Teachers

This study describes the emerging mathematical understanding of one student enrolled in an elementary mathematics content course. Through the medium of her journal entries, a portrait of Elena's

struggle to overcome her difficulty with mathematics and construct conceptual knowledge emerges. Though these struggles are not unique, Elena's story is both poignant and extraordinarily compelling. She gives voice to the child within struggling to make sense of this "mysterious information presented by adults which emphasized procedural skills over all," the adult attempting to negotiate this "return to meaningful learning," and the metacognitive monitor that reflects lucidly on the "mental paralysis" that she experiences even when "one has worked hard and made great effort to control one's reasons and thoughts." By examining Elena's emerging view of conceptual knowledge and her reflections on this process, information can be accessed about viable means of facilitating this process. (Author/MKR)

As teachers begin to implement mathematics curricula that capitalize fully on computing technology and that are focused on concepts and applications instead of on execution of by-hand symbolic manipulation routines, their well-established routines of thinking about mathematics and its teaching no longer apply in seamless fashion. This case study, a part of which is reported here, examines the ways that an experienced teacher who participated in Computer-Intensive Mathematics Education

(CIME), a 4-week program on the teaching and learning of mathematics in technology-intensive environments, confronted some of the mathematical issues inherent in technology-intensive mathematics. This report gives some insight into one teacher's understanding of functions, independent variables, and parameters, and the ways that this understanding interacts with her use of the new computing tools. Descriptors—*Cognitive Processes, *Cognitive Structures, College Students, Elementary Education, *Fractions, Higher Education, Mathematics Education, *Multiplication, Preservice Teacher Education

Identifiers—*Preservice Teachers, Teacher Candidates

This research focused on preservice elementary teachers' understanding and reconstruction of understanding about multiplication in the domain of fractions. At the start of the study, 44% of the 50 preservice teachers studied reported that they had a method for reasoning about multiplication with fractions, and 28% were able to describe a situation modeled by multiplication with a fraction operator. Although reasoning individually, the preservice teachers revealed common dimensions of understanding about taking fractional parts of non-unit wholes and about numerical effects, referents for results, and the invariance of multiplication as they reconceptualized multiplication with fractions. "Sense" of multiplication and "sense" of fraction relationships were forms of reasoning that supported the re-conceptualization process. (Author/MKR)

Identifiers—*Representations (Mathematics), *Teacher Change

This paper links the conceptions of an experienced high school mathematics teacher to aspects of his first implementation of a reform-oriented curriculum during a 6-week functions unit. The teacher exhibited comprehensive understandings of the function concept, dominated by graphical representations and a covariation description of function. These features contributed to classroom emphases on the use of multiple representations to understand dependence patterns in data and characteristics of different types of relationships. (Author)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—*Educational Change, Elementary Education, *Elementary School Teachers, *Improvisation, *Mathematics Instruction, *Mathematics Teachers, Models, Observation, Professional Development, Teaching Methods

Identifiers—*Reform Efforts

This paper proposes that post-reform mathematics teaching may be characterized as "improvisational." Observations of an extended mathematical investigation from a summer institute for elementary teachers are used to examine four aspects of improvisational practice: (1) the structuring of the activity; (2) planning and preparing that is both reflective and anticipatory; (3) an attentiveness and responsiveness in the moment; and (4) an improvisational understanding of the content itself. It is concluded that this conceptual framework may help both teacher educators and researchers understand better how to help teachers learn this way of teaching because it preserves rather than simplifies its complexity. Identifiers—*Teacher Change

This paper reports on a small scale evaluation study of a staff development project for high school mathematics teachers that focused on new curriculum, updating pedagogy, and examining issues of equity. After 2 years of the project, interviews were conducted with five previous participants who had varying amounts of staff development. Interview data were compared and supported by classroom coaching visits and teacher responses to an Instructional Practices Scale. Although all teachers could provide the rationale for "algebra for all," there were significant differences in the changes they had made in their classroom instruction that were related to the number of years of staff development in which they had been engaged. This study confirms that real change comes slowly with in-depth involvement in staff development over a long period of time. (Author)

Creating communities of discourse among teachers that tread the "delicate middle ground" of theory linked to actual classroom practice can serve the purpose of promoting teachers' ongoing professional development. Yet both teachers and teacher educators are navigating relatively uncharted territory in attempting to develop such communities. This paper examines some of the features of such a community of discourse, the dilemmas faced in creating and maintaining it, and poses some questions for further investigation. (Author)

Identifiers—Combinatorics, *Representations (Mathematics)

The mathematical behaviors of a group of seventh grade students were observed as part of a longitudinal study of how children build mathematical ideas. The children, having built representations of their solutions to a combinatorics task, were challenged by their teacher to explain and discuss their ideas, and to extend them to similar situations. This report focuses on how teacher questioning facilitated students as they: (1) justified their ideas; (2) extended ideas to problems with similar structure; (3) made connections to previous tasks; and (4) generalized their conjectures in the context of isomorphic problems. struction, *Mathematics Teachers, Primary Education, *Symbols (Mathematics), *Teacher Role

The analysis reported in this paper is part of a year-long first-grade teaching experiment and focuses on the teacher's proactive role in supporting students' mathematical growth in an inquiry mathematics classroom. Within the project classroom, the teacher often redescribed and notated students' responses so that what students had done mathematically might become an explicit topic of conversation. As part of this process, she frequently introduced either informal or conventional notation to record students' explanations of their mathematical activity. The introduction of these notational schemes led to students' development of ways of notating their own reasoning. In this way, the notation emerged from the students' activity while supporting shifts in their mathematical development. (Author)

Identifiers—*Representations (Mathematics)

Researchers and educators are calling for increased use of technology and attention to function concepts in school mathematics. Students often have considerable difficulty gleaming pointwise and global information from Cartesian (R squared) representations of functions, whether they are hand- or machine-produced. Described here is an interactive computer-based learning environment (the Function Explorer) which provides dynamic, linked representations of functions. Representations using tables, parallel number lines, and perpendicular number lines dynamically display ordered pairs of the function. A randomized comparative experiment is described which was performed to test the effectiveness of the number line representations for enhancing student understanding of basic function concepts. Identifiers—*Graphing Utilities

The relationship between college students' preferred mode of processing mathematical information—visual or nonvisual—and their performance in calculus classes with and without technology was investigated. Students elected one of three different versions of an introductory differential calculus course: using graphing calculators, using the computer algebra system "Mathematica," or using no technology. A total of 139 students participated in the research. Presmeg's Mathematical Processing Instrument (MPI) was used to determine students' visual processing preference. The interactions of students of different visual processing preferences with the software "Mathematica" were also investigated using task-based interviews. Results from the sections using graphing calculators suggest that appropriate uses of technology may equally benefit students of different cognitive styles. Contains 29 references. (Author)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Addition, Arithmetic, *Cognitive Structures, *Elementary School Students, Grade 1, *Mathematical Models, Mathematics Education, Models, Primary Education, *Problem Solving

This paper outlines a theoretical perspective for studying student understandings of the concept of addition. The notion of operational sense is defined as a way to describe the notion of addition as a mathematical object, paving the way for an application of the theory of reification at this level. Previous frameworks relative to problem solving are also incorporated. The report of a year-long investigation in a first-grade classroom is then provided. It was found that understandings of specific aspects of operational sense were beneficial to successful problem-solving strategies on part-unknown action tasks. These understandings were also beneficial to the ability to transfer knowledge of addition to a finite group setting (clock arithmetic). Hence, a connection was found between specific kinds of knowledge of arithmetic and the students' ability to model the actions of a problem. Limitations of the framework and study are also discussed. Descriptors—*Cognitive Structures, Content Area Writing, Elementary Education, Grade 3, Grade 4, Grade 5, Interviews, Mathematics Education, *Place Value, *Problem Solving, *Student Evaluation

The purpose of this study was to examine the effects of researcher-developed lessons on students' understanding of two- and three-digit numeration. Digit-correspondence tasks, often used for individual interview assessment of place value understanding, were adapted to be used as problem-solving tasks. The tasks were presented to three classes, grades 3-5. Students were given ample opportunities, in cooperative groups and as a whole class, to

discuss and exchange points of view. In the selected classrooms the social norms established by the teacher encouraged such exchanges. A scoring rubric was developed for a whole-class, digit-correspondence task requiring individual written responses. Only 18% of the students were successful on the preassessment. Of the 38 students who were initially unsuccessful, 71% were successful after the instructional intervention as measured by a delayed postassessment. (Author/MKR)

Descriptors—Arithmetic, *Cognitive Structures, *Cultural Influences, *Division, Elementary School Students, Elementary Secondary Education, Junior High School Students, *Mathematical Models, Mathematics Education, Rural Schools, *Rural Youth

Identifiers—*Representations (Mathematics)

This preliminary study examined the meanings, models, and strategies of rural students in grades 3-8 for solving simple, whole number division problems. Findings suggested that students have multiple meanings for division words such as "share" and "fair share." Cultural factors and diversity in the classroom may be associated with these multiple word meanings. Students in this study worked from three division models: partitive, quotative, and splitting. The majority of students selected the partitive model as their model of choice. Younger students selected the quotative model more than older students. Among four strategies, older students used division facts more often than younger students. Younger students depended on addition/subtraction strategies more than older students. A number of students at every grade level used multiple strategies. (Author)

Descriptors—*Affective Behavior, *Classroom Environment, Elementary Education, *Elementary School Students, Foreign Countries, *Mathemat-

ics Achievement, *Sex Differences, Student Attitudes

Identifiers—Singapore

This study examined the nature and impact of two aspects of classroom learning (interpersonal teacher behavior and classroom climate) on the affective and cognitive outcomes of elementary mathematics students in Singapore. A secondary purpose was to explore gender differences in students' achievement, attitudes, and perceptions of the classroom environment. A random sample of 1,512 boys and girls from government elementary schools was used. For the analysis of environment-outcome associations, simple, multiple, and canonical correlation analyses and multilevel (hierarchical linear model) analyses were conducted using two units of analysis, the individual student and the class mean. For the analysis of gender differences, multivariate analyses of variance (MANOVA) for repeated measures were performed for the two outcome measures and the classroom environment scales. Overall the different methods of analysis yielded consistent associations between classroom environment and student outcomes. Gender differences were detected in mathematics achievement in favor of boys, but girls generally viewed their classroom environment more favorably than the boys did. (Author)

This textbook is designed to increase political knowledge and sophistication about the U.S. political system. The volume consisting of five units tries to capture the vitality and drama of politics through the use of cases that describe the political activities of typical citizens and political leaders. Simulations, games, political attitude surveys, and data-processing activities are used to enliven the study effort. Unit 1, "Introduction to the Study of Political Behavior," includes chapters on: (1) "What is Political Behavior?"; (2) "Political Participants"; and (3) "Making Judgments about Political Behavior." Unit 2, "Similarities and Differences in Political Behavior," contains: (1) "Comparing Political Behavior"; (2) "Culture and Political Behavior"; (3) "Social Status and Political Behavior"; and (4) "Political Loyalties." Unit 3, "Elections and the Behavior of Voters," includes: (1) "Selecting Leaders of Government"; (2) "Participating in Electoral Politics"; and (3) "The Voting Decision." Unit 4, "Political Decision-Makers," contains: (1) "Introduction to the Study of Political Decision-Makers"; (2) "The Presidential Role"; (3) "The Congressional Role"; (4) "The Role of Supreme Court Justices"; and (5) "The Role of Federal Bureaucrats." Unit 5, "State and Local Decision-Makers," includes: (1) "The Nature of American State and Local Governments"; (2) "Chief Executives in State and Local Government"; (3) "Legislative Bodies in State and Local Government"; (4) "Courts in State and Local Government"; and (5) "State and Local Bureaucrats." A copy of the U.S. Constitution is included. (EH)

Descriptors—*Alternative Energy Sources, *Conservation Education, Consumer Education, Elementary Secondary Education, *Energy, Energy Conservation, *Energy Education, Energy Management, *Environmental Education, Science Education, Social Studies, Sustainable Development, Technology Education

This paper examines the impending crisis of depletion of natural resources and explores the development of alternative resources for use. The topic of energy education needs to be included in the social studies curriculum. The program must focus around the following three principles: (1) the coming transition from fossil fuels to some other energy source is not the first we have faced, and it will not be the last; (2) shifting to new energy sources will take time, involve key policy decisions, and will require massive capital reallocations; and (3) beware of the one, simple solution. By building on these three guiding principles, energy education will increase the awareness of students on this vital topic. (Contains 23 references.) (EH)

Descriptors—*Controversial Issues (Course Content), Current Events, Elementary Secondary Education, Futures (of Society), Moral Issues, *Science and Society, *Social Change, Social Problems, Social Studies, *Technological Advancement, Technology, *Values

This paper examines the rapid changes in technology that enables cloning of human embryos and explores the issues related to teaching students about the use of such technologies. STS adoption has made only minimal impact on mainline social studies curriculum, although the topic has been included in discussion for decades. The paper outlines five possible barriers to more rapid adoption of STS content in the social studies and offers suggestions to surmount those barriers. Identified barriers include: (1) the crowded curriculum; (2) curriculum resources; (3) STS and controversy; (4) discomfort with science; and (5) low status for high technology. (EH)

Descriptors—Educational Discrimination, Grade 6, Grade 7, Grade 8, Intermediate Grades, Junior High Schools, Middle Schools, Nondiscriminatory Education, Resource Allocation, *Sex, *Sex Bias, Sex Discrimination, *Sex Fairness, Sex Role, *Sex Stereotypes, Social Discrimination, *Staff Development, Vocational Adjustment

This paper addresses the problem that gender imbalance in curriculum and instruction contributes to sexism, stereotyping, and bias in schools. The study was conducted in a reading classroom in a grade 6-8 middle school of 970 students in a suburban area of the northeast United States. The program focused on inservice workshops and integration of women's history and gender equity materials to increase awareness of gender bias. The results indicate that when educators are able to identify personal biases in teaching practices and are exposed to gender-fair school programs, they become more conscious of daily teacher-student interactions, instructional strategies, and resources reflecting gender-fairness in the curriculum. Appendices include a resource guide for gender fairness, a sample equity grant pro-

posal, the teacher questionnaire, and suggested goals for implementing gender committees in a school. Contains 51 references. (EH)

Increasing Student Awareness of Global and Future Issues through a Secondary Level Mini-Course.

Pub Date—Apr 95

Note—66p.; Ed.D. Practicum, Nova University.

Pub Type—Dissertations/Theses - Practicum Papers (043)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Cultural Awareness, *Futures (of Society), *Global Approach, *Global Education, High Schools, High School Students, International Relations, Networks, Private Schools, Social Change, Student Attitudes, *Technological Advancement, Telecommunications, *World Affairs, *World Problems

This study examines the problem of high school students as future leaders entering the adult world unprepared in the areas of global and international issues. The study was conducted with 145 students, teachers, and administrators in a private high school with university affiliations in a large suburban area. Eventually two students became the central focus for the stated practicum outcomes. The goal was to increase student awareness of critical global and future issues that would lead to an appreciation for the interdependency among nations and raise tolerance levels for differences in others. A mini-course in global studies was designed based on global issues least addressed in the school. Telecommunications were established to link students to other students around the world to enable group discussions and project exchanges for students. Electronic mail, study kits, simulated role playing, and current topics of global consequence were used to instruct students on world trade, world hunger, international business, environmental protection, energy, and nuclear proliferation. The results showed an increase of student awareness of global issues and students were motivated by using telecommunications as a part of the mini-course requirement. Appendixes include the student questionnaires, student quiz, and computer ethics and security agreement. Contains 23 references. (EH)

This paper addresses the problem that children in the school were not participating in relevant inter-cultural studies that were contextual and interactive. The study was conducted in a private, tuition-based, enrichment program which included a kindergarten during school hours and an after-school program for kindergarteners through fifth graders. The school was located in a southwest U.S. metropolitan city and had an enrollment of 115 students. A curriculum model was designed and implemented to use intercultural studies in a multidisciplinary, integrated, and play-oriented approach. The 12-week implementation phase involved the assimilation and dissemination of information about selected cultures into "hands-on" activities that incorporated basic learning components and life skills. The model was transferable to other teachers, alternative units, holidays, and for verbal use by the children. Samples of the model are included. Contains 29 references. (EH)

Hausmann, Howard S.

Promoting Positive Socialization in Fourth Grade Students through Intergenerational Mentoring.

Pub Date—Aug 94

Note—99p.; Ed.D. Practicum, Nova University.

Pub Type—Dissertations/Theses - Practicum Papers (043) — Tests/Questionnaires (160)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—Cooperation, *Grade 4, Intercultural Programs, *Intergroup Education, *Intergroup Relations, Intermediate Grades, Interpersonal Relationship, *Mentors, Modeling (Psychology), Role Models, Significant Others, *Social Integration, *Socialization, Social Networks

This practicum was designed to bring together first and third generations in a caring, supportive, mentoring classroom atmosphere. The study was conducted in a co-educational K-5 public elementary school with 90 percent white enrollment. The subjects were from three fourth-grade classrooms, each with 28 heterogeneous students. Volunteer, retired citizens were recruited to guide, encourage, and socialize with fourth grade students during the school day. Data analysis showed that children responded favorably to intergenerational mentoring in the classroom. Student responses on pre- and post-practicum questionnaires affirmed their sense of increased pride and accomplishment. Students and adults responding to the pre- and post-practicum questionnaires showed an increased mutual appreciation and understanding. The survey instruments are appended. Contains 24 references. Identifiers—*California (San Francisco), Exploratorium CA, Museum Educators

Students who work at the Exploratorium in San Francisco, California learn about science by explaining to the visitors from all over the world how the museum's exhibits work. The students are teen-agers who also come from all over the world to be "Explainers" for the Exploratorium. They go through a training period to learn the basics of how the exhibits work and how to share their knowledge with the general public. The student "Explainers" not only learn about science, but they also learn how to be effective communicators. After completing a semester of working in the Museum, students take their experiences with them and build upon them for the rest of their lives. Many students use this valuable experience to further their science education and to pursue science related employment. The book concludes with information on how students can apply to work at the Exploratorium. (JAG)

Descriptors—College Students, Higher Education, *Public Policy, Social Science Research, Student Volunteers

Identifiers—*Community Service, *Service Learning

Students can learn the value of public service by participating in service learning projects. Through a service learning component, students gain a personal understanding of the public sector and experience with current public issues. In this study students and teachers were assisted by service coordinators who arranged for students to experience different fields of work. At first students were not eager to participate, but once involved, they became enthusiastic. This involvement achieved positive results as students gained a broad understanding about public issues and valuable experience. Many students offered more of their time than was required. Overall, students attained important per-

sional growth from their experiences. (JAG)

This conference proceedings are the result of a collaborative relationship between The University College of Swansea in Wales and the University of Wisconsin-La Crosse, which have been sister institutions for more than a decade. Education faculties from the two institutions shared knowledge about research and practices in education and established a faculty exchange. This proceedings document is the product of the first faculty exchange which took place in the fall of 1992. The table of contents lists seven sections. Section 1, "Assessing Teachers in a Results-Oriented Age," includes: (1) "Accelerating Cognitive and Metacognitive Development: Developing and Evaluating Mathematical Thinking Skills" (Howard Tanner); and (2) "What the Quality Schools Concept Can Mean to Children's Learning" (Bob Norton). Section 2, "Teacher Education: Comparing British and American Perspectives," contains: (1) "Initial Teacher Education in France, Germany and Great Britain: A Comparative Perspective" (Nigel Norman); and (2) "Ersatz Teachers for British and American Schools? 1979-1994" (David Witmer). Section 3, "Impacts of Prevailing Cultures Upon School Curriculum," includes: (1) "The School Curriculum and the Welsh Cultural Dimension" (Bryn Jones); and (2) "Academic Skills in the Bilingual Classroom" (Amy Young). Section 4, "Meeting the Challenge of New Demands Upon School Curriculum," contains: (1) "Models for Teaching and Learning Cross Curricular Themes and Competences" (Steve Kennell); and (2) "Connectivity in the Classroom: Buchenwald as Teaching Model" (Greg Wegner). Section 5, "Teacher Literacy: Learning, Language and Reading Instruction," includes: (1) "PGCE Students Developing Understanding of Teaching of Reading" (Gill Harper-Jones); and (2) "Teaching the Parts in a Whole Language Classroom" (Carol Kirk). Section 6, "The Liberal Arts in an Integrated Curriculum," contains: (1) "The Role of Arts in the Curriculum" (Hilary Ball); and (2) "Integrating the Fine Arts into Children's Early Formal Educations" (Sara Slayton). Section 7, "School-University Partnerships in Teacher Education," includes: (1) "Partnership in Secondary Science Teacher Training" (John Parkinson); and (2) "21st Century Middle Level Education" (Robert Richardson). This book of teaching activities is designed to address the issue of hunger and develop a sense of activism and hope among students. It encourages students to discover some of the causes and misconceptions about world hunger. The book contains

eight lessons with numerous activities to allow students to study hunger and develop a broader perspective on how to address the problem. The lessons focus on the following: (1) "Hunger Awareness"; (2) "Is Scarcity the Problem?"; (3) "Are There Too Many People?"; (4) "Is Technology the Answer?"; (5) "Rich World, Poor World?"; (6) "Will More Foreign Aid Help End Hunger?"; (7) "Can Change Happen?"; and (8) "Working Together for Change." A resource guide provides an extensive list of supplemental teaching materials and organizations involved in alleviating world hunger. (EH)

This document provides historical research from the earliest French experiences on the upper North American peninsula through today. Approximately 50 maps have been provided outlining the evolution of information that has been collected by those who sought to explore the region. Most of these explorers were trading company employees who were hired as scientists to map out the best trade routes across this massive land. Later mapping expeditions were carried out by the government. Over time inventions such as the printing machine and better transportation allowed more information to be collected which produced better quality maps. These higher quality maps played a significant role in the way Canada was settled. The maps are presented in five sections: (1) The West before Exploration and Settlement, Maps 1-6; (2) Exploration through the Arctic, Maps 7-14; (3) Exploration and Settlement by Sea, Maps 15-31; (4) Exploration Overland, Maps 32-44; and (5) The Settlement Period, Maps 45-50. This resource packet introduces students to the notion of community within a European context. Students examine the European Community as a community of independent countries and will become aware of some of the key characteristics of a community. The eight activities focus on developing multiple perspectives through the analysis of European integration and diversity. The eight activities include: (1) "Cooperation and Community"; (2) "The Concept of Community"; (3) "National Anthems and Music of European Countries"; (4) "Money Makes the World Go Around"; (5) "Caught between Two Cultures"; (6) "Newcomers at the Gate"; (7) "Fighting Problems Collectively"; and (8) "Decision Making and the European Community." Each lesson contains supplementary

handouts and support materials. Several primary documents are incorporated into the lessons to present students with a range of perspectives on the topic being studied. Activities address a variety of multiple abilities, including analytical, visual/spatial, musical, and dramatic abilities. (EH)

Identifiers—*Utah

This unit focuses on the Paleoindian migration into the American continent, with a special focus on those who became the Native Americans of Utah. The unit is divided into specific archaeological periods. The first period studied is the Paleoindian from 10,500 BC to 6500 BC. The Archaic Man Period extends from 6500 BC to 0. The Formative Period includes the early Anasazi 500 BC to 500 AD, the Anasazi Middle Pueblo 500 AD to 900 AD, and Anasazi Late Pueblo 900 AD to 1275 AD. The Fremont Culture developed from 500 AD to 1200-1300 AD. The Paiute, Gosiute, and Shoshone peoples arrived in Utah about 1100 BC, and the Navaho and Apache arrived around 1500 AD. The purpose of the unit is to present the chronology of the prehistoric Indian in Utah, develop an appreciation of the rich cultural background of the state, and encourage efforts to protect Indian sites. A listing of archaeological sites in the state is included, along with activities to supplement the text. (EH)

Descriptors—Content Analysis, *History Instruction, *Latin Americans, Media Research, *Multicultural Education, Secondary Education, *Secondary School Curriculum, Social Studies, *Textbook Bias, *Textbook Content, Textbook Evaluation, Textbook Research, Textbooks

This study reviewed six history textbooks widely used in grades 7-12 across the U.S. Using a story-line analysis, the findings of this study suggest: (1) textbooks reinforce negative stereotypes of Latin Americans as lazy, passive, irresponsible, and, somewhat paradoxically, lustful, animalistic and violent; (2) the method of description employed was the use of subtle or not-so-subtle adjectives, adverbs and parenthetical comments of derision; and (3) when Latin America and Latin Americans are included in the text, the usual role is through conflict, either the Mexican-American War or the Spanish-American War. The study contends that textbooks can be a useful resource but that a balance of presentation must be maintained. Contains 21 references and a list of 9 textbooks reviewed. (EH)

Fleeing from Democratic Ideals: The Content of U.S. History Textbooks.

Pub Date—Mar 94

Note—30p.; Paper presented at the Annual Meeting of the Association for Supervision and Curriculum Development (Chicago, IL, March 19-22, 1994).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Content Analysis, Higher Education, Media Research, *Textbook Bias, *Textbook Content, Textbook Evaluation, Textbook Research, Textbooks, *United States History

This paper examines how the discourse of textbooks leaves various impressions upon students regarding our democratic ideals of justice and equality. A qualitative content analysis of five widely sold secondary U.S. history textbooks was conducted. The content areas analyzed were the Japanese American internment during World War II and related issues dealing with the treatment of minorities. The paper argues that schools must develop critically thinking, socially conscientious students willing and capable of extending democratic ideals of equality and social justice to the economic, political, and social arenas. The study concludes that most secondary U.S. history textbooks not only fail to develop but also hinder the development of critical citizenship by presenting a mystified representation of American history and providing inadequate educational tools for the classroom. Developing strategies to encourage critical reflection by students must be the goal of schools. Contains 16 references. (EH)

Identifiers—*Florida, Folk Art, Folk Dance, Folk Music

Folklore and folk arts encompass the body of traditional knowledge learned and artifacts produced outside of formal institutions as a result of participation in folk groups. A great portion of daily life and culture is folk. Folklore and folk arts acquire distinctly local characteristics through the influences of geography, history, or talented individuals within the folk group. This manual invites an exploration of the unique aspects of south Florida folklore and folk arts. The guide is the text for a secondary level, semester length, elective course. Components of the course are units which address the major folk lore genres or categories, and may be used individually to supplement other teacher situations. They may also be adapted for elementary level use. An introduction to folk arts is given, which includes basic folk arts concepts and definitions. The categories considered are: (1) "Verbal Arts"; (2) "Folk Arts and Crafts"; (3) "Foodways"; (4) "Folk Architecture"; (5) "Folk Music"; (6) "Folk Dance"; and (7) "Occupational Folklore." Each unit includes a brief definition and discussion of the genre under consideration, teaching strategies, and a bibliography. The guide also supplies a vocabulary list, a list of printed and audio-visual resources for the classroom, and a sample informant data sheet. (MM)

This volume provides methods and resources for teachers to integrate global issues and sustainable development concepts into high school U.S. history classes. The focus of the lessons is problem solving by examining development issues in U.S. history. The resource book contains two sections. Section 1 provides overview lessons on the following: (1) "Problem Solving: A Generic Model" (Jeffrey Brown); (2) "What is Sustainable Development? The Chair" (Jeffrey Brown); and (3) "How is Sustainable Development Like a Seed?" (William Luderer). Section 2, "Historical Lessons," provides these examples: (1) "Early Encounters Inevitable Conflict between English Settlers and Native Americans" (Richard LoPinto; Nancy Wallace); (2) "Belief in Self-Sufficiency: Living off the Environment" (Thomas Crop; Jeffrey Brown); (3) "Choices for Development: Hamilton versus Jefferson" (Linda Murchio); (4) "The Hudson River and the Erie Canal" (Paula Gotsch); (5) "Slave Spirituals and the American Spirit" (Linda Murchio); (6) "How Does War Impact on the Environment?" (Jeffrey Brown); (7) "The Mining Frontier: Boom and Bust" (Paula Gotsch); (8) "Environmental Impacts of the Transcontinental Railroad" (Joseph Moore; Jeffrey Brown); (9) "Energy Transitions and U.S. History" (William Luderer); (10) "Save the Earth! But How?" (Linda Murchio); (11) "The Grapes of Wrath: A Study in Contrasts" (Peter Kraus); (12) "How Do the Preparations for War Impact on the Environment? The Case of Picatinny Arsenal" (Jeffrey Brown); (13) "The Contributions of Major Religions and Philosophies to a Universal Environmental Ethic" (William Luderer); (14) "Nuclear Threat at Home: The Cold War's Lethal Leftovers" (Jeffrey Brown); (15) "Business and the Environment" (Paula Gotsch); (16) "Save the Earth III—Organizations' Approaches" (Linda Murchio); and (17) "Model Senate Hearing on the Environment" (Linda Murchio; Terry Vaiti; Nancy Wallace). Suggestions are offered for student assessment on the activities. (EH)

The lessons for this middle school teacher resource book were adapted from the original "A Sustainable Development Curriculum Framework for World History and Cultures," which grew out of the Earth Summit in Rio de Janeiro, Brazil, in 1992. The resource book contains three chapters. Chapter 1 is "Sustainable Development and World History and Cultures." Chapter 2, "Lessons," contains: (1) "Fair is Fair," which focuses on introducing the concept of sustainable development through the notion of intergenerational equity; (2) "Sustainable Development: The Ecosystem Approach"; (3) "Development Comes of Age," which provides two historical overviews of attitudes toward the environment; (4) "Our Common Future," which features a cooperative learning group approach to analyzing and solving problems; (5) "What's in a Name?" which deals with nuances associated with "development" language; (6) "Values and Sustainable Development"; (7) "How is Sustainable Development Like a Seed?"; (8) "Cultural Assumptions and Sustainable Development"; (9) "Africa and the Industrial Revolution"; (10) "The Quality of Life and Sustainable Development," which introduces students to data analysis and social and economic indicators of the quality of life; and (11) "Decisions for a 'Developing' Nation," which engages students in a role play featuring allocation of limited financial resources within a "developing" nation. Chapter 3, "An Analytical Framework for Sustainable Development," includes: (1) "Introduction"; (2) "Frame-

work Sample Questions"; (3) "Framework Definitions and Examples"; and (4) "Framework Sources." Includes 21 handouts. (EH)

This resource book provides methods and resources for teachers to integrate global issues and sustainable development concepts into a high school curriculum focusing on world history, world cultures, world geography, or global studies. The resource book contains 12 chapters. Chapter 1 is "Sustainable Development and World History and Cultures." Chapter 2 is "Student Objectives." Chapter 3 is "Methods for Infusing Sustainable Development in World History and Cultures Courses." Chapter 4, "Sample Lessons," contains: (1) "Introduction"; (2) "What's in a Name?"; (3) "Values and Sustainable Development"; (4) "Introduction to Sustainable Development"; (5) "Cultural Assumptions and Sustainable Development"; (6) "Africa and the Industrial Revolution"; (7) "Worldviews of Development"; (8) "The Quality of Life and Sustainable Development"; and (9) "Decisions for a 'Developing' Nation." Chapter 5, "An Analytical Framework for Sustainable Development," includes: (1) "Introduction"; (2) "Sample Questions"; (3) "Definitions and Examples"; and (4) "Sources." Chapter 6, "Annotated List of Lessons for Teaching Sustainable Development," contains: (1) "Introduction"; (2) "Sample Placement of Lessons"; (3) "Annotated List of Lessons"; (4) "Sources"; and (5) "Index to the Annotated List of Lessons." Chapter 7 identifies courses for the inclusion of teaching sustainable development. Chapter 8, focusing on resources, is divided into three sections. The first section is a core selection of videos; the second section lists videos organized topically; the third section focuses on Africa. Also listed in this chapter are: sources of audiovisuals; bibliography; free publications; and resource organizations. Chapter 9 provides "A Guide to Action for Sustainable Development." Chapter 10 suggests "Test Questions." Chapter 11 provides further readings on sustainable development. Chapter 12 provides a glossary for the concepts presented. (EH)

This book defends the democratic ideal of education and elaborates its implications for educational practices in the United States today. The volume contends democracy is not merely a political process of rule by majorities or pluralities, but it is also a political ideal of a society whose adult members are, and continue to be, equipped by their education

and authorized by political structures to share in ruling. Chapters in the book include: (1) "Introduction: Back to Basics"; (2) "States and Education"; (3) "The Purposes of Primary Education"; (4) "Dimensions of Democratic Participation"; (5) "The Limits of Democratic Authority"; (6) "Distributing Primary Schooling"; (7) "The Purposes of Higher Education"; (8) "Distributing Higher Education"; (9) "Extramural Education"; (10) "Educating Adults"; and (11) "Conclusion: The Primacy of Political Education." This text serves as a guide covering basic aspects of television production leading to complete production of video yearbooks and news shows. Each lesson is divided into eight sections: (1) objectives; (2) vocabulary; (3) lesson text, which encourages production related ideas on practical application as well as theory; (4) review questions; (5) activities; (6) a project plan; (7) a project evaluation sheet; and (8) notes to the teacher. Early projects are described in precise detail, later projects leave room for student and teacher interpretation. The instructor edition, which includes the student editions, is organized into 5 sections that are subdivided into chapters. The introductory section includes: "Using This Book and Teaching Television Production" and "Television Production Facilities and Equipment." Part 1, student edition, book I, presents: "Chapter 1: Beginning Television Production" with 7 lessons on the topic; and "Chapter 2: Curriculum Integration: Videotaping School Events and Activities." Part 2, student edition, book II, offers: "Chapter 1: Intermediate Television Production" with 8 lessons; "Chapter 2: Advanced Television Production"; "Chapter 3: Movie Magic: Creating Entertaining Video Shorts"; and "Chapter 4: Your Future in Video." Part 3, supplementary activities, includes: "Chapter 1: Making Memories: School-Based Video Yearbook"; "Chapter 2: In-Service for Fellow Educators"; and "Chapter 3: Adult and Community School Instructional Opportunities." The last section, appendixes, include: "A: Questions from the Floor: Answers to the Most Commonly Asked Questions about Television Production"; "B: Organizing a Cable TV Show"; "C: Organizing a Live Broadcast"; and "D: Producing Segments on Teacher and Student Recognition." The work is indexed. (MM)

This work presents a collection of craft projects that can be created by children. Necessary for completion of each craft is an IBM-compatible computer running Windows, "Word for Windows 6.0," with a mouse, a printer, and plain white printer paper. Simple craft supplies, including glue and scissors, also are needed. In each activity the child is guided through the process of first creating the computer output, then using the output to assemble the final craft. The projects not only reveal many of the features of Word, but also stimulate children to explore the creative side of computers. Some projects are progressive, building on tools and commands used previously. However, the lesson directions are given clearly so the projects also can be done in any order desired. Some of the projects are: bumper stickers; party placemats; flags; wall calendars; and pocket folders. The book is illustrated throughout to support the step by step text, includes hints and tips for activity clarification and extension, and is indexed. (MM)

This document presents the principles behind modern computer graphics without straying into the arcane languages of mathematics and computer science. Illustrations accompany the clear, step-by-step explanations that describe how computers draw pictures. The 22 chapters of the book are organized into 5 sections. "Part 1: Computer Graphics in Today's World" includes chapters: (1) "Flight Simulators"; (2) "Computer-Aided Design"; (3) "Medical Imaging"; and (4) "Video Games." "Part 2: Computer Graphics Fundamentals" gives: (5) "Computers, Pixels, and Color"; (6) "Palettes and Palette Optimization"; (7) "Drawing, Filling, and Scan Converting"; (8) "Texts and Fonts"; and (9) "Antialiasing." Chapters in "Part 3: Images and Image Processing" are: (10) "Getting Images into the Computer"; (11) "Bitmapped File Storage"; (12) "Image Compression"; and (13) "Image Enhancement and Special Effects." "Part 4: Three-Dimensional Modeling and Rendering" presents: (14) "Representing Objects in Three-Dimensional Space"; (15) "Viewing Objects in Three-Dimensional Space: Projections"; (16) "Shading, Lighting, and Surface Removal"; (17) "Ray Tracing"; and (18) "Solid Modeling." "Part 5: Final Frontiers" contains: (19) "Computer Animation"; (20) "Fractals"; (21) "Morphing"; and (22) "Virtual Reality." An index concludes the work. (MM)

Filmmaking is a complex process involving many skills. This text attempts to demystify the process of filmmaking and make film technology accessible. Basic tools and techniques are explained for using either Super-8 or 16mm film formats; however, craftsmanship lessons are relevant and applicable to future technologies. The book is organized into an introduction, "The Moving Image," and eight chapters dealing with the basic language, processes, and techniques of filmmaking. These chapters are: (1) "Camera and Lens"; (2) "Film Stock"; (3) "Composition"; (4) "Continuity"; (5) "Film Editing"; (6) "Pre-Production"; (7) "Lighting"; and (8) "Sound." The work concludes with a glossary of terms and an index. (MM)

Descriptors—Advertising, *Agenda Setting, Critical Thinking, *Critical Viewing, Elementary Secondary Education, Film Criticism, Films, Information Industry, Instructional Materials, Interdisciplinary Approach, Mass Media, *Mass Media Effects, *Mass Media Role, News Media, *Persuasive Discourse, Popular Culture, Social Influences, Social Studies, Television Viewing, Visual Arts, *Visual Literacy

This book argues that people live simultaneously in two different cultures. Values of the first culture are imparted to children through curriculum in the nation's public school classrooms. The second culture is the world of mass communication that promotes consumption, instant gratification, and impulse. The clash between these cultures confronts children with mixed messages while providing little mechanism for resolving the conflict. To become critical thinkers, students must comprehend the form and content of information. This book offers ideas, strategies, and activities for promoting critical thinking and viewing skills in order to assimilate messages from news, advertising, television, and motion picture sources. The book is organized into seven chapters that are subdivided into specific topics with related activities for integration into the curriculum. Each activity is coded by grade level and by applicable curriculum area. The broad areas described by chapter headings are: (1) "Education, Media and Mindsets"; (2) "Media Literacy and Visual Literacy: Instructional Imperatives in a Wired World"; (3) "Getting Started: Ways of Seeing, Ways of Saying"; (4) "Making the Living Room a Learning Room by Using TV Effectively"; (5) "Advertising: Exploring the Consumer Culture in the Classroom"; (6) "Reading the News: Interpreting Form and Content"; and (7) "Movies as Mentors: Teaching with Motion Pictures." The book is indexed, contains a reference list, a recommended reading list, and concludes with brief author biographies. (MM)

Identifiers—*Adolescent Attitudes

This document looks for meanings in the U.S. adolescent's relationship with clothing and fashion. The material is designed to be used with senior high school students but may be adapted for older or younger students. The topic is particularly relevant to English, sociology, home economics, history, and current events classes. In four activities students move from general observations about clothing to consideration of their own personal wardrobes, then to focus on school/community styles, and finally to the global aspects of outside influences on individual choices. Each of 4 activities contains a brief teachers' background section, a step-by-step lesson plan, reproducible worksheets, and suggested assignments. The activities include: (1) "Clothes Talk: Themes Found in Apparel"; (2) "Clothes Count: Personal Wardrobes"; (3) "Clothes Perception: Identifying Styles"; and (4) "Clothes Appeal: Commercial Arbiters of Style." A follow up section of

fers suggestions for further exploration and study of the topic. (MM)

Identifiers—National Assessment of Educational Progress

This report is a first look at the results of the 1994 NAEP geography assessment. It presents national findings of 4th-, 8th-, and 12th-grade students' overall performance on the NAEP geography scale, and summary data for the major demographic subpopulations in the United States. Results are reported on a 500-point NAEP scale, used to show comparisons and trends over time, and according to the achievement levels, which are in a developmental stage, established by the National Assessment Governing Board. Sample questions for each grade level are provided. The preliminary results show: (1) the pattern of average scores by grade was typical of other subjects assessed by NAEP; (2) among the different regions of the United States, student performance varied by each grade level with high school seniors in the Southeast scoring a lower average than those in the other regions; (3) 22 percent of 4th graders, 28 percent of 8th graders, and 27 percent of 12th graders reached the proficient level which demonstrates competency in challenging subject matter; (4) across the three grades, about 70 percent of students attained at least the basic level which demonstrates partial mastery of challenging subject matter; (5) across the three grades, 2 to 4 percent reached the advanced level showing superior performance; (6) performance in geography at all grade levels was higher for students whose parents had more education; (7) at grades 4, 8, and 12, males tended to score higher than females; (8) at all three grades, White and Asian students had significantly higher scores than did Black and Hispanic students; and (9) 4th-, 8th-, and 12th-grade students attending non-public schools displayed higher performance in geography than their counterparts attending public schools. Twelve tables and six figures accompany the text.

Identifiers—National Assessment of Educational Progress

This report is a first look at the results of the 1994 NAEP U.S. History Assessment. It presents national findings of 4th-, 8th-, and 12th-grade students' overall performance and summary data for the major demographic subpopulations in the United States. Results are reported on a 500-point scale, used to show comparisons and trends over time, and according to the achievement levels, which are in a developmental stage, established by the National Assessment Governing Board. About 60 percent of the assessment was devoted to performance exercises with the remainder to multiple-choice questions. Sample questions for grade level are provided. The preliminary results show: (1) the pattern of average scores by grade was typical of other subjects assessed by NAEP; (2) among the different regions of the United States, student scores varied by each grade level with high school seniors in the Southeast scoring a lower average than those in the Northeast and Central regions; (3) 17 percent of 4th graders, 14 percent of 8th graders, and 11 percent of 12th graders reached the proficient level which demonstrates competency in challenging subject matter; (4) 64 percent of 4th graders, 61 percent of 8th graders and 43 percent of 12th graders attained at least the basic level which demonstrates partial mastery of challenging subject matter; (5) across the three grades, 1 to 2 percent reached the advanced level showing superior performance; (6) U.S. history scores at all grade levels were higher for students whose parents had more education; (7) at grade 12, males scored higher than females in U.S. history with no differences between males and females in average scores evident at grades 4 and 8; (8) at grades 4, 8, and 12, White and Asian students had significantly higher U.S. history scores than did Black and Hispanic students; and (9) 4th-, 8th-, and 12th-grade students attending non-public schools displayed higher U.S. history scores than their counterparts attending public schools. Tables, figures, and graphs accompany the text. (EH)

Identifiers—*Contests

According to the U.S. Departments of Health and Human Services and Education, the main elements of a drug-free education program should focus on valuing and maintaining sound personal health; respecting laws and rules prohibiting drugs; resisting pressures toward drug use; and promoting student activities that are drug-free and offer healthy avenues for student interest. This paper describes one such program which involves a planned month-long program of activities for students at the middle school level. Program elements are planned to complement daily school objectives and include curriculum related activities, drug/health related presentations and contests, and a health fair. Suggested activities are provided for each area of the school's curriculum, and a variety of lessons have been written for curriculum area including: English; history; mathematics; reading; science; art; band, choir, and music; computer technology; drama, speech, theater arts; foreign language; health; home-making, life management skills; industrial technology; physical education; resource areas and special education; English as a Second Language (ESL); advisory; and clubs, groups, and sports teams. An outline for contests and for special programs in AIDS (Acquired Immune Deficiency Syndrome) awareness is also included. (ND)

Descriptors—Business Administration Education, *College Faculty, *Discussion (Teaching Technique), *Educational Methods, Educational Philosophy, Faculty Development, Higher Education, Models, Teacher Role, Teacher Workshops, Teaching Skills

Identifiers—*Case Method (Teaching Technique), Harvard University MA

This volume includes text, cases, and readings for a college faculty seminar to develop the knowledge, skills, and attitudes necessary for utilization of the case method approach to instruction. It builds on a long-term clinical research effort on the dynamics of the case method of teaching and application at Harvard Business School. In addition it incorporates suggestions gleaned from experimentation with course concepts and materials which cover the size and composition of participant groups, multiple seminar time lengths (varying from intensive 2- or 3-day models to semester-long versions), the impact of the architectural design of the seminar room, and

the administrative protocols employed on patterns of student contribution. Part 1 contains five essays arranged to flow from the philosophic underpinnings of a discussion pedagogy to pragmatic modes. Part 2 presents materials for a case-discussion teaching seminar that covers the roles, responsibilities and skills of the discussion leader, teaching and learning contracts, key skill requirements (questioning, listening, and responding), guidance versus control, operational challenges and opportunities, and ethical dilemmas. Part 3 offers graduates of that seminar a number of next-step suggestions for their consideration that include how to write cases for teaching seminars, using videotape replays, managing discussion in a lecture course, and two reflective readings. Descriptors—Cooperative Learning, Elementary Secondary Education, Higher Education, Integrated Activities, Interviews, Learning Activities, Oral History, Preservice Teacher Education, Teacher Educators, Teachers, Undergraduate Study

Identifiers—Preservice Teachers, Retired Persons
This paper contains materials and describes a project that allowed teacher educators to model collaborative, integrated curriculum for preservice teachers by holding a retired teachers' tea. The preservice teachers were from a secondary English methods course and an elementary Social Studies methods class. While honoring retired teachers, preservice teachers would interview the guests and seek first-hand knowledge of these teachers' contributions to education through data gathered during the interviews. As a result, the language arts and social studies methods classes were united in creating oral history. Examples of related materials to assist in organizing the activity are attached, including invitation form letter, forms for students, interview checklists, thank-you form letter, guidelines for oral history interviewing, interview guide, and oral history data sheet. Descriptors—College Freshmen, Cultural Awareness, Education Majors, Elementary Secondary Education, Higher Education, High Schools, Knowledge Level, Multicultural Education, Preservice Teacher Education, Required Courses, Secondary School Curriculum, State Legislation, Student Attitudes, Student Surveys

Identifiers—Eastern Kentucky University, Kentucky, Kentucky Education Reform Act 1990, Preservice Teachers

One hundred forty-three Eastern Kentucky University college students majoring in education and enrolled in an introductory education course were surveyed to determine their understanding of and knowledge about multicultural education and to discern the extent to which these students appreciated and valued multicultural education. The study also intended to use this group as a control and compare it with a similar group in 1996, 5 years after the implementation of the Kentucky Education Reform Act (KERA), which was passed in 1990, and to use the group in a pre- and post-study in 1996. KERA recognizes the significance of diversity and includes diversity in the state's learner expectations. At the first class the subjects were asked to give a comprehensive definition of multicultural education by responding to a prompt "Multicultural education is..." These were then scored against the Kentucky State Board of Education's definition. Results suggested that multicultural education was addressed in the subjects' high school curriculum, though perhaps only to a limited degree. Compared to 11 percent of the subjects who did not know anything about multicultural education, 55 percent were aware of cultural differences. Another 4.2 percent had some understanding of multicultural education. Six subjects had benefited from their multicultural education to a degree where they accepted, respected, and valued it. (JB)

Identifiers—Moral Education, Political Education
Philosophy of education has had difficulty finding its proper role in recent years. It has been seen as too removed from educational matters, irrelevant to teacher and administrator training, and fostering skepticism and radical ideas. However, philosophy is a way to make educational leaders and teachers more rational and critical in their thinking and act-

ing about education. Philosophy's emphasis on clarity, purpose, criticism, and justification are tools with which educators can accomplish their work effectively by presenting visions of what educators and schools should be and detailing criticisms of current efforts to realize these visions. This publication begins with a brief history of the philosophy of education and a discussion of the teaching of philosophy of education. The following eight chapters address content areas of education. Each chapter is divided into two large sections, first covering the philosophy of education in a specific content area from a historical or classical perspective, and then from a contemporary perspective. The eight content areas included are: (1) intellectual education; (2) moral education; (3) aesthetic education; (4) religious education; (5) political education; (6) vocational education; (7) physical education; and (8) special education. (Contains 244 references.) (ND)

Wojtowicz, G. Greg, DesLauriers, Karen
Teaching about Hazard Identification and Injury Control: A Student-Based Project Focusing on Pedestrian Safety.

Pub Date—[Aug 95]
Note—42p.

Pub Type—Reports—Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Accident Prevention, Data Collection, Higher Education, Pedestrian Traffic, Safety Education, School Safety, Secondary Education, Student Motivation, Traffic Safety, Urban Universities, Vehicular Traffic

Identifiers—Hazards

Students learn to practice safe behavior most effectively when they are actively involved in the process of identifying and controlling hazards. This article focuses on a problem faced by many urban-based schools—pedestrian safety. Hazard identification projects can be used to train students to develop practical, effective hazard controls. The purpose of this hazard surveillance study was twofold: (1) to identify hazards to pedestrian safety and (2) to involve students in a class project that would result in the development of hazard control measures. The project was implemented on a university campus and attempted to determine pedestrian crosswalk utilization rates at 15 campus-based sites. A geodemographic data collection protocol was designed to allow student observers to record vehicular and pedestrian traffic at the varied sites. Results indicated that a number of specific unidentified pedestrian hazards existed on the campus. Students used these data to develop varied approaches to hazard control including documentation, presentations to campus-based groups, and methods designed to support the development of a computer-based accident/injury data base. Graphs presenting data are included. (Author/ND)

The Preparation of Teachers for Ethnocultural Diversity.

Pub Date—95

Note—17p.; Paper presented at the Annual Meeting of the Canadian Association for Teacher Education (23rd, Montreal, Quebec, Canada, June 2, 1995).

Pub Type—Reports—Research (143)—Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Canada Natives, Elementary Secondary Education, Ethnic Groups, Faculty Development, Foreign Countries, Higher Education, Inservice Teacher Education, Multicultural Education, Preservice Teacher Education, Surveys, Teacher Student Relationship

Identifiers—Canada (West), Diversity (Student)

This paper presents preliminary findings from a doctoral research project investigating the preparation of teachers to teach ethnoculturally diverse student populations. Census data suggest that some 70 percent of North American teachers are white, female, middle class, and from suburban or small rural communities, while the majority of students are not. A two stage design was used for the study. Data were collected from 450 teachers working in three distinct sociogeographic environments in western Canada, including urban, rural, and isolated settings. A combination of quantitative and qualitative methodologies were used in the study. During the first stage, a survey questionnaire was distributed to 150 teachers in each of the three settings. The second stage involved semi-structured interviews with

a number of the respondents. Preliminary findings suggest that few of the recommendations in the literature concerning the preparation of effective teachers for ethnically diverse student populations are being implemented. This is the case for both preservice and inservice programs. It is recommended that schools do not rely on preservice teacher education programs to prepare teachers for student diversity. Rather, schools must play a proactive role in developing and implementing orientation, induction, and other inservice practices which will facilitate teacher growth in this area. Program for the Preparation of Preservice Agricultural Education Teachers for the Twenty-First Century.

Pub Date—[1995]

Note—117p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC05 Plus Postage.

Descriptors: *Agricultural Education, *Agriculture, Educational Equipment, Educational Facilities, Higher Education, Knowledge Base for Teaching, Off Campus Facilities, *Preservice Teacher Education, Program Evaluation, Secondary Education, *Teacher Education Programs, *Teacher Role, Teaching Skills, *Vocational Education

This report describes a proposal for a preservice teacher education program to prepare agricultural education teachers for the 21st century. The paper identifies and defines the critical roles agricultural education teachers must perform in the 21st century and recommends specific preservice teacher education practices. After an introduction, the first section describes six specific teacher roles and the skills and knowledge needed for each: (1) facilitator of learning; (2) understander of the learner; (3) program developer; (4) administrator; (5) professional educator; and (6) role model and mentor. The second section explores the development of a preservice curriculum and describes specific courses based on guidelines suggested by the National Council for Accreditation of Teacher Education, State Teacher Education and Certification Standards, and the Standards for Quality Vocational Programs in Agriculture/Agricultural Education. Section 3 examines teaching methods for effective presentation of the preservice agricultural teacher curriculum. Section 4 covers resources and facilities needed for effective preparation of preservice agricultural education teachers, including instructional and support facilities, instructional equipment, off-campus facilities, and funding sources. Section 5 discusses recruitment, selection, and retention of students. Section 6 covers faculty selection. Section 7 examines program evaluation. Section 8 outlines the elements that distinguish the proposed preservice program from other preservice teacher education programs in agriculture. Section 9 looks at issues and problems associated with developing a preservice teacher education program in agriculture in each of the areas described. (Contains 68 references.) (ND)

Identifiers:—Suchman Inquiry Method, Synectics, Thelen Group Investigation

Teaching is a complex act requiring expertise rela-

tive to content, students, and the myriad of alternatives available to bring the two together in meaningful ways. This monograph is designed to assist teachers in examining and altering their own teaching practices and in transforming the classroom from a place of "dull sameness" to an environment where excitement reigns and student growth is at the forefront. The teaching strategies outlined all emphasize active student involvement, a focus on student collaboration, and development of thinking skills. Discussion of each strategy includes an overview describing the approach, providing a rationale for its use and resources for further information about the strategy, followed by a specific lesson plan, usually focusing on some aspect of home economics or family life which uses the strategy. The teaching strategies discussed are: (1) concept attainment; (2) inductive thinking; (3) cooperative learning; (4) Jigsaw, a specific cooperative learning strategy; (5) Thelen's Group Investigation, a group approach to problems of social significance; (6) Social Science Inquiry; (7) Suchman Inquiry which emphasizes independent and disciplined inquiry; (8) games and simulations; (9) synectics, a creative group problem solving process; and (10) moral development. This volume contains 36 articles on education taken from a wide array of magazines, newspapers, and journals in the public press appearing between 1992 and 1994. Unit 1 contains six articles that discuss the importance of a multi-cultural curriculum in sensitizing students to an integrated world society. Unit 2 contains four selections that examine some of the major issues being debated on how to effectively integrate the multi-cultural dynamic into teacher education programs. Unit 3 contains five selections that examine the dynamics of integrating multi-cultural education into the discipline of education. Unit 4 contains four articles that consider the interconnections between gender, social class, racial or ethnic heritage, and primary cultural values. Unit 5 contains seven articles that review how curriculum and instruction must be formulated to sensitize young people to the multi-cultural reality of a national civilization. Unit 6 contains seven articles on exploring some of the ways students succeed or fail in culturally pluralistic school settings. Unit 7 contains three selections that address the concerns that must be kept in mind for future improvement of the educational system. Includes an index and forms for reviewing and rating articles. (Many articles contain references.) (JB)

*School Restructuring, Standards, Teaching Methods

Identifiers:—*Authentic Assessment

In order to address concerns about the intellectual quality of students' work under various "active learning" formats appearing in education reform efforts, this study developed a model of authentic pedagogy and assessed its presence in 23 restructured schools. The proposed authentic pedagogy is consistent with an active learning perspective and posits standards of intellectual quality, rather than teaching techniques or processes, as the central target of innovation. The study defined authentic academic achievement with three criteria: construction of knowledge, disciplined inquiry, and value beyond school. The school study examined instruction for one year at 23 schools (equally divided among elementary, middle, and high schools) with emphasis on six valued outcomes: (1) authentic pedagogy and authentic academic performance; (2) equity for students; (3) empowerment of teachers, parents, and principals; (4) sense of community among staff and students; (5) reflective professional dialogue; and (6) accountability. The study found that schools varied substantially in their success on standards for authentic pedagogy. Overall, pedagogy was rarely rated at the higher levels of the study's standard indicating that the promotion of authentic teaching is enormously difficult. Authentic pedagogy did appear to improve authentic academic performance for all students in mathematics and social studies. Finally, student achievement was reasonably equitable across gender, race, ethnicity, and socioeconomic status. (Contains 44 references.) (JB)

Identifiers:—*American Federation of Teachers, Reform Efforts

This publication presents the American Federation of Teachers' 10 criteria for high-quality public school academic standards and seeks to contribute to the national debate about school reform, academic achievement, and world-class educational standards. The criteria are: (1) standards must focus on academics because the purpose of setting standards is to improve students' academic performances, which should be the central mission of all educational arrangements; (2) standards must be grounded in the core disciplines to ensure that interdisciplinary approaches reflect the depth and integrity of the disciplines involved and that standards can be clearly designed and communicated; (3) standards must be specific enough to assure the development of a common core curriculum guaranteeing that all students are exposed to a common core of learning; (4) standards must be manageable given the constraints of time; (5) standards must be rigorous and world class; (6) standards must include "performance standards" that indicate how competent a student demonstration must be to indicate attainment of the content standard; (7) standards must include multiple performance levels allowing multiple standards that set expectations to match different aspirations and achievements; (8) standards must combine knowledge and skills, not pursue one at the expense of the other; (9) standards must not dictate how the material should be taught; and (10) standards must be written clearly enough for all stakeholders to understand. Identifiers—*American Federation of Teachers, Reform Efforts

This study sought the opinions of teachers, all members of the American Federation of Teachers, on issues such as student discipline, common academic standards, inclusion, professional development, and school reform. The telephone survey of a sample of 800 teachers from kindergarten through Grade 12 was conducted in Spring, 1995. Findings include the following: (1) 98 percent of respondents were aware of their union membership; (2) 55 percent of the teachers in urban districts gave a negative evaluation of their systems' ability to meet students' educational needs while only 21 percent of those in suburban and small town areas did so; (3) teachers most wanted to see educational reform address parental involvement and classroom discipline; (4) 50 percent of all teachers said they could still improve their teaching a great deal with training and support; (5) more than 6 in 10 teachers had had some kind of experience with inclusion and 75 percent said inclusion was not a good idea including 64 percent who reported strong feelings about this issue; (6) 49 percent of teachers said that they currently had a student who "should really not be there because of the disciplinary problems he or she poses," and two in every three teachers said they had been verbally abused by a student; and (7) teachers registered strong support for national educational standards. A copy of the questionnaire is attached. (JB)

Identifiers—American Federation of Teachers

Professional development for teachers is a continuous process of individual and collective examination of practice. This publication first identifies reasons why traditional staff development often fails and several prerequisites for effective professional development. These include establishing real stakes for students; providing incentives for teachers to take the risks inherent in changing practices; convincing educators that proposed changes are substantial and not merely fads; and implementing policies that create a foundation for a safe and orderly learning environment. Nine principles of effective professional development are then presented: (1) professional development should ensure depth of content knowledge; (2) it should provide a strong foundation in the pedagogy of particular disciplines; (3) it should provide more general knowledge about teaching and learning processes and about schools as institutions; (4) it should be rooted in and reflect the best available research; (5) it should contribute to measurable improvement in student achievement; (6) it expects teachers to be intellectually engaged with ideas and resources; (7) it provides sufficient time, support, and resources to enable teachers to master new content and pedagogy and to integrate these into their practice; (8) it should be designed by representatives of those who participate in it, in cooperation with experts in the field; and (9) it should take a variety of forms, in-

cluding some not typically considered. (ND)

Identifiers—*Mississippi, *National Teacher Examinations

The purpose of this study was to compare the influence of selected student characteristics on composite National Teacher Examination (NTE) scores for students taught in a traditional or modified undergraduate teacher education program. The modified professional sequence resulted from a Mississippi statewide educational reform act which requires graduates to pass the NTE in addition to other mandates and represents a continued effort to seek better ways to train teachers. The subjects for this study were 862 undergraduate students for whom complete and usable data were available. Of this group, 227 students completed the traditional program and 635 completed the modified program. Data were collected through the use of American College Testing Program scores, NTE scores and personal data. When the composite NTE scores of the group were compared, no significant difference at the .05 level was observed between students taught in the traditional or modified programs. However scores for the group in the modified program were slightly higher. (Author)

This paper discusses ways that teachers have found to integrate curriculum and make it more meaningful to students. A review of the literature reveals that teachers are exploring ways to provide developmentally appropriate curriculum and opportunities for children to learn in a more natural setting. Three approaches are examined: whole language, literature-based curriculum, and the project approach. The whole language approach draws on scientific theory based on research in linguistics, education, and psycholinguistics as curriculum is planned and implemented. This approach emphasizes that literacy develops in response to personal and social needs and that children learn language skills in a social context rather than in isolation. Literature-based curriculum is a thematic approach using materials that are meaningful and relevant to the student. The advantages of using literature as the basis of an integrated curriculum are explored, along with methods of student evaluation. Finally, project approach, a method of integrating subjects and involving students in doing in-depth investigation of topics that interest them, is described in detail. Several specific examples are used to illustrate the project approach. allows The three approaches all are seen as enabling teachers to look at how children learn and illustrate that an integrated approach can be an effective and efficient way to teach that is meaningful, relevant, and interesting for teachers and students. Identifiers—Bangladesh, India, Maldives, Pakistan, Sri Lanka

This publication reports on the Commonwealth Secretariat UNESCO Regional Roundtable, which was held in Penang, Malaysia as a follow-up to the 1992 Colloquium on Alternatives in Initial Teacher Training, held in Colombo, Sri Lanka. There were 28 participants from Bangladesh, India, Maldives, Pakistan, Sri Lanka, Indonesia, Malaysia, Philippines, and Thailand. This report includes an interim statement identifying critical issues related to the quality of teacher training in these countries including the process of change, improving teacher performance, and the quality of teacher educators. Action plans of the five nations participating in the previous colloquium were presented and are described in this report. These projects addressed: (1) strengthening the organizational framework of teacher institutions and related activities; (2) alternative strategies for initial teacher training; (3) development of resource centers; (4) professional development of teacher educators and managers; and (5) social mobilization and awareness as a means of improving teacher training. Appendices include a list of participants and details of the country action plans, including rationale and objectives, activities, and expected outcomes for each project. (ND)

Identifiers—Commonwealth of Nations, United Kingdom

This monograph reports on the Planning Meeting of the Commonwealth Project on Improving the Quality of Science and Mathematics Education at the Basic Level which focused on the role of higher education. The purpose of the meeting was to make recommendations for improving the preparation and training of science and mathematics teachers for the first 9 years of education and of trainers of science and mathematics teachers. The report summarizes the meeting discussions on the following topics: curriculum and curriculum change; the education of teachers; inservice education of teachers (INSET); problems in teaching and teacher education; improving the education of teachers and

teacher educators; proposals for gathering and disseminating information about INSET programs; and a strategy and action plan for developing INSET guidelines. Brief descriptions of several INSET programs are included. Four recommendations resulted from the meeting: (1) policies on education and professional development of teacher educators should be reviewed; (2) the proposed programs of overlapping and sustained INSET for teachers and teacher educators should be implemented; (3) steps should be taken to identify key personnel to take part in such INSET programs at all levels; and (4) national committees on basic science and mathematics teaching should be established to collect and review existing INSET materials and to prepare for regional and local workshops and INSET programs. Appendices include a list of consultants at the meeting, a list of documents prepared for the meeting, and draft suggestions for content guidelines. (Contains 11 references.) (ND)

Identifiers—Asia, Bangladesh, India, Pakistan, World Bank

This publication is one of two prepared for a South Asian colloquium on issues related to teacher training in Bangladesh, India, Pakistan, and Sri Lanka. This volume includes four papers presented at the conference. The papers present an analytical view of both policy and practical measures on teacher education. The first paper, "The Professional Development and Training of Teacher Educators" (Elwyn Thomas) examines recruitment, training, and career development in teacher education. The second paper, "Teacher Education: The Quest for Quality" (Motilal Sharma), looks at issues in teacher education in Asia, including World Bank involvement and regional cooperation. The third paper, "A Critique of Policy and Practice in India and Bangladesh" (Adarsh Khanna), analyzes preservice and inservice teacher education in India and Bangladesh, the chief strengths of the Indian and Bangladesh systems, and the importance of aid agency projects. The fourth paper, "Initial Teacher Training in Pakistan" (Haroon Jatoi), explores preservice and inservice teacher training in Pakistan. (Individual papers contain references.) (ND)

Programs, Teacher Effectiveness, Teacher Improvement, *Teacher Shortage, Teacher Workshops

Identifiers—*Nigeria

This report is a case study of the shortage of science and mathematics teachers in Nigeria. The paper begins with a discussion of the Nigerian educational system, including the place of science and mathematics in the school system, and the shortage of science and mathematics teachers. Programs undertaken to increase the number of science and mathematics teachers and the program outcomes are described. These include: a regional crash program for training Junior Science Masters; establishment of a national Emergency Science School to prepare sixth form students for university education; the Universal Primary Education (UPE) program, UPE teaching training institutions; Sandwich Associateship Programmes in University Institutes of Education; creation of special science schools in the states; introduction of remedial science programs at some universities; the "Winning More Students for Science" Program at Lagos State University; and several inservice training programs throughout the country. Also described are activities and products of a May, 1992, Regional Workshop in Science, Technology and Mathematics Education in Nigeria organized by the Commonwealth Secretariat. Statistical graphs are included in appendices. (Contains 10 references.) (ND)

Identifiers—Asia, Bangladesh, India, Pakistan, Sri Lanka

This publication is one of two prepared for a South Asian Colloquium on issues related to teacher training in Bangladesh, India, Pakistan, and Sri Lanka. The papers in this volume focus on innovations and alternative strategies designed to improve quality in teacher education at preservice phase. The publication is in five sections. The first four sections were prepared by the respective national Ministries of Education. Section 1 is on Bangladesh and includes an overview of literacy and primary education and a discussion of provisions for initial training of teachers, the funding of education, and problems and remedies. Section 2, on India, includes a brief history of India's educational system, a review of key issues in the National Policy of Education, a discussion of issues facing Indian educators in the nineties, and several data tables. Pakistan is the focus of section 3 which looks at historical perspectives on teacher training, training of elementary and secondary teachers, qualifications for teacher educators, innovations in teacher training, analysis of teacher training programs, financing of teacher education, and recommendations for future development. The fourth section is on Sri Lanka and covers inservice and preservice teacher education, successful innovations in teacher training, problems and issues, and statistical information. The final section is an overview by Beatrice Avalos which summarizes the educational context and the characteristics, issues, and alternatives of teacher education in general and in each of the four countries. Radical Pedagogical Structures: Infusing a Multicultural Perspective through Environmental Proverbs.

Pub Date—95

Note—17p.

Pub Type—Reports—Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Cultural Differences, *Educational Change, Elementary Secondary Education, *Environmental Education, Instruction, Integrated Curriculum, Interdisciplinary Approach, *Language Arts, Lesson Plans, *Multicultural Education, Proverbs, *Science Education, Teaching Models

Identifiers—Multidisciplinary Education

While researchers have long advocated integrating disciplines, practitioners have sometimes viewed the combination of language arts and science for a particular purpose as unnatural and difficult to accomplish. An introductory section of this paper examines the underlying concepts for the integrated approach, that students learn based on what they know, and that genuine learning results from students interacting with and internalizing information into their cognitive structures. The paper describes a lesson plan that provides opportunities for students to use their cultural capital (i.e., their language, history, experiences) as they develop and expand their skills. The particular focus of the lesson is environmental issues, combining language and science. The lesson is designed to demonstrate a multicultural focus through an examination of environmental proverbs from diverse groups. A model lesson plan is provided which outlines the lesson goals and objectives, lists materials required, and offers suggestions for introducing the lesson content, fostering discussion during the lesson, and pro-

posing student activities and projects as well as follow-up activities. (Contains 14 references.) (ND)

Handle with CARE: A Site-Based Character Development Project.

Pub Date—[26 Oct 95]

Note—12p.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Conflict Resolution, Discipline Problems, Elementary Education, Elementary Schools, Inservice Teacher Education, *Participative Decision Making, Program Development, Program Effectiveness, *Program Implementation, School Based Management, Student Behavior

Identifiers—*Character Development, Mediation, Syracuse City Schools NY

Van Dusen Elementary School (Syracuse, New York) implemented a site-based project to develop student character. The neighborhood is a racially mixed, stable, private home community with 58 percent of students eligible for free or reduced price lunches. The school's objectives as part of a shared decision making, pilot school process were to have staff, students, and parents trained in mediation through the "New Justice Conflict Resolution Program" and to review, develop, and implement "Discipline with Dignity" and "CARE" to improve students' respect for themselves and others. "CARE" stands for courtesy for all people; achievement in the learning environment; respect for property and self; and environment: keep it safe for everyone. The "New Justice" component included training in conflict prevention and intervention for teachers and students through inservice programs and workshops, respectively. "Discipline with Dignity" is a program specifically designed for school settings and is based on the basic tenet that discipline can be a win-win proposition for students. Program results were difficult to assess but suspensions in 1993 were 270, 277 in 1994, and 253 in 1995. However, when student discipline referral data was disaggregated according to type of offense, the declining trend became inconsistent. In addition, significant leadership instability (two new principals and three new assistant principals in 3 years) may have had an impact of the program's effectiveness. (JB)

Descriptors—Academic Achievement, Black Students, *Black Teachers, Data Analysis, Elementary School Students, *Elementary School Teachers, *Equal Education, High Schools, High School Students, *Race, Racial Differences, Research Methodology, *Secondary School Teachers, Teacher Characteristics, *Verbal Ability, Whites, White Students

Identifiers—*Coleman Report

This paper reanalyzed data from the classic 1966 study "Equality of Educational Opportunity," or "Coleman Report." It addressed the issue of whether teacher characteristics, including verbal ability and race, influenced "synthetic gain scores" of students (mean test scores of upper grade students in a school minus mean test scores of lower grade students in the school), in the context of an econometric model that allow for the possibility that teacher characteristics in a school are endogenously determined. The study found that verbal aptitude scores of teachers influenced synthetic gain scores for both black and white students. Verbal aptitude mattered as much for black teachers as it did for white teachers. Finally, holding teacher characteristics other than race constant, in some specifications black teachers were associated with higher gain scores for black high school students, but lower gain scores for white elementary and secondary students.

The study noted that because these findings were for American schools in the mid-1960s they could not be directly applied to contemporary experience. However, the results do raise issues that should be addressed in hiring policies in American education. (Contains 83 references.) (JB)

Revolving Classroom Door: Management Strategies To Eliminate the Quick Spin.

Pub Date—Nov 95

Note—16p.; Paper presented at the Annual Meeting of the Southern Regional Association of Teacher Educators (Lake Charles, LA, November 2-4, 1995).

Pub Type—Guides - General (050) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Classroom Techniques, *Discipline, Educational Environment, Educational Planning, Elementary Secondary Education, Instructional Development, Prevention, Punishment, Student Behavior

This paper presents classroom management practices that can be used to avoid the "revolving classroom door." In the revolving classroom door, misbehaving students are sent to the principal, and eventually returned to the classroom with no gains in student behavior or opportunity for learning. The paper begins by discussing the meaning of classroom management which is defined as how teachers maintain order in the classroom. There follow sections on features and teaching behaviors that must be in place for good classroom management. These include ways to create a positive classroom climate (for example, being friendly and warm, helping students to learn); planning for teaching before school begins, the first day of school, and throughout the year (for example, reviewing and outlining textbooks for each course, posting classroom rules, and reviewing the entire course plan with students the first day); prevention strategies (for example, acting and dressing professionally, teaching standing up and moving around), and consequences and punishments (for example, not ignoring misbehavior problems). The paper concludes with a summary listing of teaching strategies. (Contains 11 references.) (JB)

Educational Law: A Relevant Course for All Teacher Education Programs.

Pub Date—Mar 95

Note—25p.; Paper presented at the Annual Spring Conference of the Louisiana Council of Professors of Educational Administration (Natchitoches, LA, March 29-30, 1995).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143) — Tests/Questionnaires (160)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Educational Legislation, Elementary Secondary Education, Higher Education, Legal Problems, Legal Responsibility, *Preservice Teacher Education, Program Design, *School Law, *Teacher Attitudes, Undergraduate Study

Identifiers—*Louisiana

With professional educators becoming the target of litigation in increasing proportions and most state legislatures preparing 15-20 new laws per year dealing with educational issues, it is essential that teachers become advised of the impact of law on their classrooms and their activities. This study surveyed a sample of 480 Louisiana teachers on their undergraduate education in school law. Teachers were surveyed at 12 locations. Of the sample, 30 percent reported advanced study towards a Master's degree. Ninety-five percent of the sample reported taking no course in school law as a proportion of their undergraduate preparation. The teachers were concerned with the following legal issues: privacy factors related to student records and general students conversations, child welfare, evaluation and tenure issues, and attendance regulations. Many respondents expressed a beginning interest in all legal areas of education. Members of the sample who were working on graduate degrees reported apprehensions about legal issues regarding privacy of student records, all areas of student discipline, tort, performance indicators, discipline issues, special education issues, false accusations, federal funds distribution, liability insurance, student/teacher rights, and accountability. The paper recommends that a specific course in educational law be added to the preparation curriculum for undergraduate and

graduate educators. The survey instrument is appended. (Contains 11 references.) (JB)

Belcher, Christopher D. Williams, Wayne
Middle School Science Teachers' Perception of Textbook Congruency with Classroom Needs.

Pub Date—Oct 95

Note—26p.; Paper presented at the Annual Meeting of the Missouri Unit of the Association of Teacher Educators (Osage Beach, MO, October 1995).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150) — Tests/Questionnaires (160)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Active Learning, Elementary School Science, *Elementary School Teachers, Intermediate Grades, Junior High Schools, *Middle Schools, Professional Development, Science Education, *Science Teachers, *Secondary School Teachers, Sex Differences, State Standards, Teacher Attitudes, *Textbooks, Textbook Selection

Identifiers—Middle School Students, Missouri

This study examined how middle science teachers perceive the textbooks they use and how their perceptions varied with their personal attributes and professional backgrounds. A questionnaire was sent to 79 middle school science teachers in Missouri, and 66 responded. The questionnaire was designed to determine the teachers' perceptions about the quality, usability, and congruency of their respective textbooks. The data indicated a general positive acceptance by the teachers towards their textbooks. However, 30 percent did not feel that their current textbook was congruent with the state-mandated objectives. About 25 percent of respondents thought their text book did not provide activities that encouraged the student-as-the-worker or provided for active learning. It also appeared that teachers who had attended a national science conference within the previous 3 years approached their curriculum more critically. Teachers who were involved in a team plan tended to have a more positive outlook on their textbook's ability to provide a proper mix of lower and higher order questions. Also, female teachers appeared to be less critical of their textbook and less confrontational about district policy issues. Overall, the research indicated that teachers who participated in professional conferences were more critical and more aware of the needs of the learner. The appendix contains the survey instrument and data tables. (Contains 16 references.) (JB)

Identifiers—*Colorado

This document presents recommendations for Colorado state teacher education policy additions and changes based on a review of existing policies and in light of current changes in the professional education field. The recommendations are: (1) do not reinstate undergraduate degrees in education; (2) accept interdisciplinary majors for teacher education when they meet certain criteria; (3) allow undergraduate students intending to become teachers to complete all requirements for a degree and for teacher licensure in a planned eight-semester program; (4) the teacher licensure component of post-baccalaureate programs should be the same undergraduate courses required of students completing an eight-semester Bachelor's degree with licensure requirements; (5) continue programs combining licensure requirements with Master's degree requirements, with stipulations; (6) continue limiting teacher education licensure programs to 20-42 semester hours with a Bachelor's degree program; (7) 4-year institutions should deliver licensure/pedagogy components and only at the upper level; (8) accept the University of Northern Colorado's (UNC) definition of its designation as the state's primary teacher education institution; (9) do not encourage development of new programs; (10) K-12/higher education partnerships are strongly endorsed; (11) retain the current configuration for access to programs in teacher education; (12) encourage appropriate technology; (13) hold programs accountable for students' knowledge and performance in teacher education; (14) do not establish a Bachelor's in early childhood education; (15) establish a permanent education advisory committee to review programs; (16) codify certain policies stemming from past reports. An appendix lists members of the panel making the recommendations, the UNC role definition, a statement on elimination of undergraduate education degrees from deans of education; and responses from deans of education to questions on licensure and standards-based education, and a draft codification of teacher education policy. Identifiers—ERIC Digests

This digest examines the relationship between elementary and secondary teachers' use of computer-based technologies to deliver and support classroom instruction and the training provided to

prospective teachers by teacher education institutions. It offers an overview of obstacles faced by teacher educators in providing appropriate technology instruction and outlines approaches to addressing these obstacles. Teachers are under pressure to acquire skills in instructional technology, particularly computer-based technologies. Although the number of computers in K-12 classrooms has increased dramatically over the last decade, certain barriers prevent the majority of teachers from fully exploiting computer capabilities in the classroom. Among these barriers is lack of training. Improving preservice preparation will require changing current practices and programs to provide: (1) teacher educators who model appropriate instructional use of computers; (2) integration of technology across the preservice curriculum; and (3) exposure to and practice with newer, more sophisticated computer-based tools. Within the teacher education community, efforts to overcome obstacles found in schools, colleges, and departments of education appear to fall into two major categories: (1) capacity building; and (2) developing models and materials. Brief descriptions of examples from each category are given. (Contains 17 references.) (IAH)

Identifiers—*Cholesterol

This guide presents an overall direction for mass media messages and materials developed for public audiences under the National Cholesterol Education Program (NCEP), with particular emphasis on overall consistency and coherence in broadcast and print materials. Section 1 introduces the program and presents overall objectives, purpose, and scope of the communications strategy; recent NCEP developments influencing the strategy; scientific basis for the strategy; public knowledge basis for the strategy; and role of the mass media campaign. Section 2 states the problem in detail using data from the third National Health and Nutrition Examination Survey (1988-91). This section presents a two-pronged strategy, with one prong aimed at the total population and the other at the high risk groups. Section 3 reviews important considerations for public education efforts, especially the general population's knowledge level regarding nutrition. Section 4, which deals with target audiences, specifies that the high risk treatment population is defined on the basis of LDL-cholesterol levels. Section 5 lists communications objectives and strategies for both the general population and high-risk groups. Section 6 lays out the desired resulting actions for both groups. Section 7 presents conclusions and notes anticipated future changes in public knowledge, health behavior, and education. (JB)

A Step towards Enhancing the Field of Instructional Supervision: A Modest Proposal for a New Journal.

Pub Date—5 Nov 95

Note—17p.; Paper presented at the Fall Meeting of the Council of Professors of Instructional Supervision (University Park, PA, November 5, 1995).

Pub Type—Speeches/Meeting Papers (150) — Opinion Papers (120) — Historical Materials (060)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Educational History, Elementary Secondary Education, Higher Education, Intellectual Disciplines, Professional Associations, *Scholarly Journals, Teacher Education, *Teacher Supervision

Identifiers—Council of Professors of Instruction Supervision

This paper proposes that the Council of Professors of Instructional Supervision (COPIS) start a journal

devoted to the study and practice of instructional supervision and examines the history of "The Journal of Educational Method" to support the contention that the proposed new journal could thrive. An opening section argues that the proposed journal would help to enhance the field's reputation, would enliven supervision as a field of study, and would provide an outlet for scholarship. There is a lack of journals in the field, and other related fields in education may not be able to support many more journals than they currently support. However, if supervision is broadly conceived as related to many contexts, with varied approaches, and if inclusivity is valued and encouraged, then varied outlets for dissemination and scholarship would be welcome and necessary. The section devoted to "The Journal of Educational Method" reviews the journal's history as well as the history of the organization that published it, the professional orientation of the journal, how scholars came together to start and run the journal, and organizational difficulties. This section also outlines the characteristics of this journal and presents a detailed outline for the proposed new journal and related organizational considerations. The conclusion expresses the hope that continued dialogue will eventuate in the debut and publication of a new journal devoted to instructional supervision. (Contains 26 references.) (JB)

An Innovative Teaching Strategy: Using Critical Thinking To Give Students a Guide to the Future.

Pub Date—[95]

Note—12p.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Black Colleges, *Career Planning, College Students, *Critical Thinking, Education Courses, Elementary Secondary Education, Foundations of Education, Higher Education, Preservice Teacher Education, Program Descriptions, Program Effectiveness, *Strategic Planning, *Teaching Methods, Thinking Skills

Identifiers—*Rust College MS

College students in a Foundations of Education class at Rust College (Mississippi), a small historically black liberal arts college, were required in 1993 and again in 1994 to develop a modified personal strategic plan using critical thinking skills. The plan had four components: a family history; a present situation; a strengths, weaknesses, opportunities, and threats (SWOTs) list; and a "scenario" for a planned future. In addition, some students added a mission statement. The components were developed over a 6-week period. Each week, the class members prepared initial drafts of a particular component of the plan for which they were allowed 2 weeks and which were not graded. Each was read and returned to the student with comments. The polished final draft was due early in the final week of the module (an 8-week session with daily classes of 90 minutes). The most committed students prepared the best papers with background material woven into the scenario; they named a future for themselves that was realistic and achievable. The results indicated that the program was a useful device for prompting the use of higher level thought processes among graduate students but possibly beyond the experiential reach of some undergraduates. Finished products were better in 1994 than in 1993, due probably to the 1994 requirement that the plan's components be created one at a time on a weekly basis. (JB)

Identifiers—North Carolina, North Carolina State Department Public Instruction

Today's social and demographic changes demand that elementary and secondary education incorporate social skills and affective education in the curriculum. One way for this to be accomplished is through an interdisciplinary approach. Numerous curriculum resources which use an interdisciplinary approach and address affective skills are available for the classroom teacher. Spencer Kagan's "Cooperative Learning" provides a variety of activities that can be integrated into the curriculum to develop social skills. The North Carolina Department of Public Instruction has developed an interdisciplinary Alcohol and Drug Prevention curriculum for elementary and secondary level education. Michelle Borba's "Esteem Builders" was developed for the purpose of improving achievement, behavior, and school climate, or overall self-esteem. Designed for K-8, it provides activities that can be used in conjunction with various subject areas. The program has over 250 theory-based and field-tested esteem building activities cross-correlated to all subject areas and grade levels. S. V. Andrews' book, "Teaching Kids to Care: Exploring Values through Literature and Inquiry," discusses how values were taught in education in the past, how they are currently being taught, and how teachers can use children's literature to teach values. Appendixes contain sample pages from "Alcohol and Other Drugs: Interdisciplinary Curriculum, Grades K-5, 6-8, 9-12" (North Carolina Department of Public Instruction: Alcohol and Drug Defense Program, 1991), and from Borba's "Esteem Builders" (B. L. Winch & Associates/Jalmar Press, 1989). (JB)

Descriptors—Educational Objectives, Elementary Secondary Education, Integrated Curriculum, *Interdisciplinary Approach, Literature Reviews, Models, *Multicultural Education, Teaching Methods

Identifiers—Banks (James A)

Effective ways to implement the multicultural education demanded by contemporary social issues and demographic changes may be through interdisciplinary approaches or curriculum integration such as those proposed by James Banks and other authors. Banks defines multicultural education as "an education reform movement designed to restructure schools...so that students from all social class, racial, cultural, and gender groups will have an equal opportunity to learn." Banks' curriculum reform includes: the "Contributions Approach," typically found in elementary schools; the "Additive Approach," which adds a book or course to an established curriculum; the "Transformation Approach," which changes the structure of the curriculum; and the "Decision-making and Social Action Approach," which explores social issues and provides opportunities for social action. Hilda Taba, cited by Banks, has developed a key concept curriculum in which a multicultural theme is incorporated across disciplines. Geneva Gay posits that multicultural education content can be incorporated in a curriculum in at least six ways. Leonard and Patricia Davidman in a 1994 book, "Teaching with a Multicultural Perspective: A Practical Guide," provide sample units from integrated subject areas. A nationally validated approach to multicultural curriculum is Project REACH. Donna Norton has described an approach for the language arts curriculum. A brief description of Norton's approach is attached. (JB)

seware, Higher Education, Integrated Curriculum, *Interdisciplinary Approach, Models, Program Design, Seminars, Teaching Methods, *Urban Studies

Identifiers—Urban Centers, Urban Development, *Webbing (Thematic)

In an effort to put into action an increased interest in interdisciplinary teaching at the higher education level, a model for interdisciplinary instruction was designed and used for a seminar on ancient urbanization and city development. The model for the seminar used what Robin Fogarty has termed "webbed" likening this perspective to that of a telescope, with "a broad view of a constellation as one theme, webbed to the various elements." The format was a seminar with about 12 students and 2 primary objectives: to provide a historical survey of the origins and early development of urban centers and to introduce students to the problems commonly facing urban societies. Student study focused on city planning, politics, the economy, sociology, and leisure. Four texts provided background material. Introductory presentations illustrated the origins of the city in various areas. Then students researched specific cities in a case study format. The webbed approach was particularly helpful in the case study work. After students observed presentations on several cities, they presented their own case studies of the cities they had chosen to research. The seminar also used CD-ROM programs that have been developed to study cities of Ancient Greece. These programs, one of which is interactive, contain a data base of reference materials, libraries of major authors, and various types of graphics. (JB)

Identifiers—Shenandoah Valley, Virginia

Increased interest in interdisciplinary instruction in secondary schools has led to the development of different models. At one school in the Shenandoah Valley (Virginia) three designs evolved when teams of teachers took on nontraditional, integrated instruction as a goal. In general, integrated curriculum designs in secondary schools match one of six models: discipline-based (traditional), parallel disciplines, multidisciplinary, transdisciplinary, interdisciplinary, and integrated-day. At this high school, grade-9 teachers of English, science, and social studies were teamed in three groups of three. Each team was responsible for 60 to 75 students and had a 150-minute class period for team teaching. Team members had common planning time and eventually a large office space for planning work. The teams' approaches evolved over time, and eventually one team used a parallel style of integration, another used an interdisciplinary design, and a third used a transdisciplinary design. All three teams collected data and information on effectiveness. At the end of the year, teachers reported that they had learned about their colleagues' subjects, appreciated the long class time and its opportunities, and saw value in the holistic approach. Some had reservations about how much actual knowledge of the subjects or disciplines students had gained, even though they believed the students had gained leadership skills and developed socially. Identifiers—Childrens Hospital of Los Angeles CA, Colorado (Denver), Huckleberry House OH, Minnesota (Minneapolis), Streetwork

This volume is a guide to providing effective Human Immunodeficiency Virus (HIV) and substance abuse prevention services to runaway and homeless youth. The guide is based on current research and the best programs in this field. Chapters 1 and 2 summarize what is known about runaway and homeless youth, the services these youth require if they are to reduce their risk behaviors, and the challenges of integrating HIV prevention activities into existing programs. Chapter 3 on program planning covers: developing goals and policies for programs, assessing needs, designing prevention activities, distributing condoms, educating staff and volunteers, evaluating prevention activities, and implementing HIV antibody testing. Chapters 4 through 6 use a case study approach to describe three types of programs: (1) those that serve the "street youth" of larger cities (Los Angeles Youth Network, Urban Peak in Denver, Colorado, and Streetwork Project in New York, New York); (2) short-term crisis intervention services (The Bridge for Runaway Youth in Minneapolis, Minnesota, and Huckleberry House in Columbus, Ohio); and (3) a system of comprehensive care for runaway and homeless youth coordinated by the Division of Adolescent Medicine of the Childrens Hospital of Los Angeles. The guide includes a bibliography and list of resources. (Contains 214 references.) (JB)

Identifiers—*Reform Efforts, University of Arizona, University of East Anglia (England), University of Missouri Kansas City

This monograph contains reflections by current and former deans of schools of education on their experiences in providing leadership for change, their attempts at reform, their perceived successes and failures, and the lessons they learned. It opens with a preface by Larry S. Bowen describing the conference that led to the monograph, the challenges of reform in the 1980s and 1990s, and the nature of leadership. "From Camelot to Chechnya: The Journey of an Education Dean" (Gary D. Fenstermacher) describes a dean's difficult tenure at the University of Arizona's College of Education from 1985 to 1991. "We're Not in Kansas Anymore: Transforming Conditions & Relationships in an Urban School of Education" (Eugene E. Eubanks) describes Eubanks' work at the University of Missouri-Kansas City during the 1980s. "Storming the Tower of Babel: A British Experience in Ed School Reform" (Hugh Sockett) describes Sockett's experience at the University of East Anglia in Norwich, England, while he was trying to establish a new school of education from the merger of several smaller institutions. "What Deans Do: A Reflection on Reflections" (Nancy L. Zimpher) analyzes the three previous pieces. In "The Dean, or the Tiger? An Epilogue" Richard Wisniewski looks toward the future in teacher education. (JB)

Identifiers—*National Education Longitudinal Study 1988, *Transition Time.

This study is based on the National Education Longitudinal Survey of 1988 (NELS:88) sponsored by the National Center for Education Statistics. NELS:88 is a nationally representative sample of approximately 25,000 eighth graders who were enrolled in public or private school in 1988. About 21,000 students were resurveyed in 1990, a second follow-up was completed in 1992, a third follow-up was completed in 1994, and one more additional follow-up interview is planned for 1998. NELS:88 provides a wealth of information on students as they progress through the school system, including information collected from their parents, teachers, and school principals. This study examined the characteristics of students who switched between school sectors (public to private, or private to public) as they moved from 8th to 10th grade. Variables were examined in the following categories: (1) student and family background; (2) parent involvement; (3) academic achievement and educational expectations; (4) characteristics of the student's school; and (5) parental satisfaction with the school. Families of high socioeconomic status were more likely to shift to private schools, as were Catholic students. Females were more likely to shift to public school than were males, but there was no significant association between student race and ethnic background and the likelihood of shifting between school sectors. Appendixes describe the data and methodology and give sample size tables. Eight text tables and 9 appendix tables present study information. (Author/SLD)

Descriptors—*Adaptive Testing, *Computer Assisted Testing, Item Banks, *Item Response Theory, *Online Systems, Psychometrics, Simulation, *Test Items.

Identifiers—Armed Services Vocational Aptitude Battery, *Calibration, LOGIST Computer Program, *Scale Drift.

Recent advances in psychometrics and computer technology encourage the development of model-based methods of individualized testing on a microcomputer, where each examinee receives short tests and where the number of pretest items that can be administered is severely restricted. On-line (i.e., data is collected on operational equipment) methods for calibrating pretest items in this setting face new challenges. In the context of adaptive testing (CAT), two LOGIST-based methods of on-line calibration that were developed are described. These two methods were applied and compared in a simulation study using data from the CAT Armed Services Vocational Aptitude Battery. One of the methods was superior to the other in terms of statistical properties, but the superior method was more expensive to implement in terms of the numbers of

items required and either the numbers of examinees or numbers of items per examinee required. Both methods showed scale drift, although the drift was in opposite directions for the two methods. Ways to reduce scale drift are explored. An appendix contains 4 tables and 22 figures, and 17 references are attached. (Author/SLD)

Descriptors—Adults, College Students, Comparative Analysis, *English (Second Language), Health Personnel, Higher Education, *Interrater Reliability, *Language Proficiency, Language Tests, Patients, Psychometrics, *Scoring, *Teaching Assistants, Test Construction, Test Validity. Identifiers—*Nonnative Speakers, Test of English as a Foreign Language, *Test of Spoken English. A prototype revised form of the Test of Spoken English (TSE) was compared with the current version of the same test, comparing interrater reliability, frequency of rater discrepancy at all score levels, component task adequacy, scoring efficacy, and other concurrent and construct validity evidence, including the oral proficiency interview correlations for a subsample of the examinees. The study employed a representative sample of 342 nonnative speakers of English, purposely sampled from two professional domains of prospective university teaching assistants (N=184) and prospective licensed medical professionals (N=158). In an attempt to involve the persons most at risk in the judgment process, 16 naive adult raters (8 first-year university students and 8 nondegree medical outpatients) were used in addition to the usual group of trained raters. The naive raters provided concurrent judgments of the comprehensibility and communicative effectiveness of a subset of 40 examinations. In general, the evidence appeared to underscore the psychometric quality of the prototype revised TSE and to support conclusions of its adequacy as an instrument to make judgments of oral English language proficiency of nonnative speakers. Some suggestions on scoring are provided. Six appendixes give additional scoring information and include sample tests. (Contains 10 tables and 10 references.) (SLD)

Descriptors—Arabic, Chinese, College Entrance Examinations, *College Students, Ethnic Groups, Graduate Study, Higher Education, *Scoring, Spanish, Test Items, *Thinking Skills, *Verbal Ability, Verbal Tests, *Writing Skills. Identifiers—*Analytical Tests, *Graduate Record Examinations, Language Minorities.

The reasoning skills tapped by the analytical measure of the Graduate Record Examinations were studied by examining how performance on its constituent type items relate to alternative criteria. Another objective was to ascertain the extent to which additional information on examinees' analytical skills might be obtained from further analyses of their writing performance. The data base consisted of 406 writing samples prepared by 203 examinees (89 native speakers of English and 6 native speakers of Arabic, 73 of Chinese, and 35 of Spanish). Scoring methods were developed that focused on the reasoning skills reflected in the papers. Three scoring methods did not appear to add information beyond that obtained from the analytical reasoning and verbal sections of the GRE General Test, but the scheme developed by P. Moss yielded scores that were relatively independent of these sections of the GRE, possibly tapping verbal reasoning skills

not assessed by the GRE General Test. Writer's Workbench computerized text analysis suggested that the different writing tasks elicited different kinds of performance, and that the performance of students of different native language groups may vary in complex ways. Four appendixes provide topic and scoring information. (Contains 13 tables and 35 references.) (SLD)

Wightman, Linda F. Wightman, Lawrence E.

An Empirical Investigation of One Variable Section Pre-Equating.

Educational Testing Service, Princeton, N.J.

Report No.—ETS-RR-88-37

Pub Date—Jun 88

Note—44p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Comparative Analysis, Correlation, *Equated Scores, Estimation (Mathematics), Models, *Statistical Analysis, *Test Format. Identifiers—Graduate Management Admission Test, *Missing Data, *Parallel Test Forms.

Section Pre-Equating (SPE) is a method used to equate test forms that consist of multiple separately timed sections. SPE does not require examinees to take two complete forms of the test. Instead, all of the old form and one or two sections of the new form are administered to each examinee, and missing data techniques are employed to estimate the necessary equating parameters. When a test includes only one variable section, there is no simple way to obtain an estimate of the correction between pairs of sections from the new test because no group takes a pair of sections. This study evaluated several methods for obtaining reasonable values for these correlations. Methods evaluated included borrowing correlations from another population that took the test at a different administration, borrowing correlation from another parallel test, and imputing the unknown partial correlations. Samples were drawn from existing data for the Graduate Management Admission Test. Comparison of the converted scores obtained using the three different methods showed them to be consistent with one another. Results also demonstrated that equating results from the one-variable section test model were very consistent with those obtained from a two-variable section test model. An appendix presents section correlations. (Contains 8 references, 10 tables, and 12 figures.) (Author/SLD)

Descriptors—*Definitions, *Identification, *Item Bias, Item Response Theory, Scores, *Sex Differences, Statistical Analysis, Test Construction, Test Items, *Test Reliability. Identifiers—*Likelihood Ratio Criterion, Scholastic Aptitude Test, *Testlets.

It is sometimes sensible to think of the fundamental unit of test construction as being larger than an individual item. This unit, dubbed the testlet, must pass muster in the same way that items do. One criterion of a good item is the absence of differential item functioning (DIF). The item must function in the same way as all important subpopulations of examinees. In this paper, "testlet DIF" is defined, and a statistical methodology is provided to detect it. This methodology parallels the item response theory-based likelihood ratio procedures explored previously by D. Thissen, L. Steinberg, and H. Wainer (1988). The methodology is illustrated with analyses of data from a testlet-based experimental version of the Scholastic Aptitude Test. The illustration demonstrated that, in this instance, not modeling the testlet structure overestimated the reliability of the test by an amount equivalent to a test of doubled length. In addition, testlets made up of what appeared to be exemplar items exhibited significant sex DIF when testlets were considered "in toto." It was also found that testlets with modest DIF in both directions can still be fair at score and proficiency levels. (Contains 4 tables, 10 figures, a technical appendix, and 27 references.) Identifiers—*Analogy Test Items, Antonyms, *Graduate Record Examinations, Scholastic Aptitude Test, Sentence Completion Method

The first of two studies reported examined the factors that predict differences in item responses for black and white matched examinees to analogies on the Graduate Record Examinations (GRE). Data were taken from 13 forms of the GRE Verbal Test, with a median sample size of 21,000 whites and a median sample size of 1,400 blacks for the purpose of computing Differential Item Functioning (DIF) values for each test form. Three factors were found independently to predict differential item responses to 234 GRE analogies: (1) item difficulty; (2) analogy stems with a part/whole relationship; and (3) analogy stems with an "attribute" relationship. A study of 220 Scholastic Aptitude Test (SAT) analogy items found very similar results. For both GRE and SAT analogies, black examinees performed differentially better than matched white examinees on the hard analogy items. Study II used the same forms to explore the importance of item difficulty as a predictor of differential item responses of blacks and whites for other verbal item types (antonyms, sentence completions, and reading comprehension). Item difficulty was found to be an important predictor of the observed differences. Several hypotheses were advanced to account for some of the observed ethnic differences. Appendix A gives sample means and standard deviations. Appendix B lists variable labels and intercorrelations. (Contains 11 tables and 36 references.) (SLD)

Descriptors—Asian Americans, Black Students, *College Entrance Examinations, *Difficulty Level, Ethnic Groups, Females, High Schools, *High School Students, Hispanic Americans, *Item Bias, Males, Mathematics Tests, *Racial Differences, Responses, Scores, Verbal Tests
Identifiers—*Omitted Responses, Scholastic Aptitude Test, *Speededness (Tests)

Two editions of the Verbal and Mathematical portions of the Scholastic Aptitude Test (SAT) were used to study differential speededness and differential omission and the relationships among differential item functioning (DIF), differential omission, and item difficulty for Asian Americans, Blacks, Hispanics, and females in a total sample exceeding 300,000 SAT examinees in 1984 and 1985. Consistent and replicable evidence of differential speededness was found for Blacks and Hispanics. Use of an unspeeded criterion for matching in place of the traditional total score, which contains speeded items, did not affect the DIF analyses of speeded items. A strong artifactual negative relationship between DIF and differential omission was found. The relationship between differential omission and difficulty was consistently positive on the Verbal sections for all comparison groups except the Asian-American group, for whom it was consistently negative. On the mathematical sections, this relationship was consistently found for the female/male comparison, for whom it was negative. Finally, the relationship between difficulty and DIF was

negative but smaller than previously observed. (Contains 8 tables, 8 figures, and 31 references.) (Author/SLD)

Descriptors—*Achievement Tests, *Difficulty Level, Goodness of Fit, *Knowledge Level, Multiple Choice Tests, Prediction, *Prose, Psychology, Regression (Statistics), *Test Construction, Test Items, Verbal Tests

Identifiers—*Graduate Record Examinations, NTE Test of Professional Knowledge

To help increase the understanding of sources of difficulty in test items, a study was undertaken to evaluate the effects of various aspects of prose complexity on the difficulty of achievement test items. The items of interest were those that presented a verbal stimulus followed by a question about the stimulus and a standard set of multiple-choice options. Items were selected for study from two tests with differing demands on an examinee's knowledge base, the NTE Communications Skills test (sample size of about 850 examinees) and the Graduate Record Examinations (GRE) Subject Test in Psychology (sample of 1,000). Standard multiple regression analyses and S. E. Embretson's model fitting procedures were used to evaluate the contribution of various complexity factors to the prediction of difficulty. These factors, which included measures of item structure, readability, semantic content, cognitive demand, and knowledge demand, were found to be successful in predicting item difficulty for these items. The immediate usefulness of the results for test development practice, however, are limited by the fact that only a single item type was studied and by the time required to develop the complexity measures. (Contains 1 figure, 14 tables, and 25 references.) (Author/SLD)

Identifiers—*Chicanos, *General Cognitive Index, McCarthy Scales of Children's Abilities

Data reported in this paper were collected as part of a larger longitudinal study of the development of young Chicano or Mexican American children and their families. The measures completed by the children included the McCarthy Scales of Children's Abilities, a standardized instrument that measures general intellectual level. The first three scales are combined to make up the General Cognitive Index (GCI). This paper focuses on the psychometric properties of the GCI when administered to normal Chicano children. Analyses are based on a random sample of 75 subjects from the Early Environmental Experience Project database. Each child was initially tested in the child's own language at about 2.5 years of age and every 6 months thereafter for 4 longitudinal points. Results provided impressive evidence of the psychometric strengths of the GCI, indicating that the properties of GCI scores were as sound for Chicano children as they are for White English-speaking children. (Contains three tables and eight references.) (SLD)

A Comparison of the Structural Relationships

among Reading, Listening, Writing, and Speaking Components of the AP French Language Examination for AP Candidates and College Students.

Educational Testing Service, Princeton, N.J.

Report No.—ETS-RR-88-59

Pub Date—Oct 88

Note—56p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Advanced Placement Programs, *College Students, Comparative Analysis, Error of Measurement, Experience, Factor Structure, *French, Higher Education, High Schools, *High School Students, Language Proficiency, *Listening, Multiple Choice Tests, *Reading Comprehension, Second Language Learning, Speech, Test Items, Writing (Composition)

Identifiers—*Advanced Placement Examinations (CEEB), Confirmatory Factor Analysis, Exploratory Factor Analysis, Structural Constituents

The dimensional structure of the 1987 Advanced Placement (AP) French language examination was tested in four populations using a series of confirmatory linear factor analysis models. To mitigate problems with the linear factor analysis of multiple choice items, the linear factor analysis of item parcel scores, made of small mutually exclusive collections of items hypothesized to measure the same underlying dimension, was used. Six confirmatory factor analysis models were tested with each of five data samples. Two contained high school AP candidates with no out-of-school French language experience ($n=1,500$ each), and a third consisted of candidates who had spent a significant amount of time in a French-speaking country ($n=1,418$). A fourth sample contained 477 AP candidates who regularly spoke or heard French at home, and the final sample contained 302 students with no out-of-class experience enrolled in third year college French. In all samples the examination appeared to measure four major dimensions associated with listening, reading, writing, and speaking. For those without out-of-school experience, the examination displayed invariance of factor loadings and errors of measurement. Factor structures were similar for groups with similar out-of-school French language experience. (Contains 15 tables, 1 figure, 2 tabular appendixes, and 13 references.) (SLD)

Descriptors—Biological Sciences, *College Students, *English (Second Language), Graduate Study, Higher Education, Humanities, Interaction, *Majors (Students), *Performance, Physical Sciences, Reading Tests, Social Sciences, Statistical Significance, *Test Format

Identifiers—Nonnative Speakers, *Test of English as a Foreign Language

It was hypothesized that a student's major-field area interacts with the text content in determining performance on the Test of English as a Foreign Language (TOEFL) reading passages. Results with 32,467 graduate school applicants, all nonnative English speakers, supported the study's hypothesis, as students in two major-field groups, the humanities and social sciences and the biological and physical sciences, performed significantly better on passages related to their own groups than on other passages for three of the four test forms examined. Although the hypothesized interaction was statistically significant for most of the test forms, the effect was relatively small, as expressed in terms of points on the TOEFL scale. As a practical matter, the effect seems to be relatively small with typical TOEFL reading passages. Statistically, however, the results showed the effect to be a reliable phenomenon, even if relatively small in magnitude, supporting the theoretical view that a student's major-field interrelates with the text content in determining reading performance. Appendix A contains 7 supplemental tables, appendix B lists the major fields in the four categories; appendix C presents sample reading passages used in the study; and appendix D gives TOEFL subject matter classifications. (Contains 7 tables, 10 figures, and 13 references.) (SLD)

The Standardization Approach to Assessing Differential Speededness.

Educational Testing Service, Princeton, N.J.

Report No.—ETS-RR-88-31

Pub Date—May 88

Note—24p.

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Asian Americans, Black Students,

*Ethnic Groups, *Evaluation Methods, Hispanic

Americans, *Item Bias, Item Response Theory,

*Racial Differences, *Test Wiseness

Identifiers—Omitted Responses, Scholastic Aptitude Test, *Speededness (Tests), *Standardization

An adaptation of the standardization approach to assessing differential item functioning that applies to all item responses, including omits and not reached, is described. Applications of this method to evaluate differential speededness show that there is evidence of differential speededness for Blacks and Hispanics, but not for Asian Americans. Data from a study by A. P. Schmitt and C. A. Bleistein (1987) and from a recent form of the Scholastic Aptitude Test were used. There may be a dependency between differential speededness and test section location. Differential speededness may be more noticeable when the test section is located at the beginning of a test. Implications of these findings for evaluations of content-related differential item functioning and on differential test-taking strategies are described. (Contains five figures and eight references.) Tests, Listening Comprehension, *Multiple

Choice Tests, Reading Comprehension, Skills,

Test Items, Vocabulary

Identifiers—Language Minorities, Nonnative

Speakers, *Test of English as a Foreign Language

This study examined the relation of performance on the Test of English as a Foreign Language (TOEFL) to a widely used variant of the cloze procedure, the multiple choice (MC) cloze method. Examinees taking an operational TOEFL (n=11,290) were given three basic sections of the test along with a section containing prepared MC cloze items, and performance on each was examined for each of nine major language groups. Exploratory and confirmatory factor analyses suggested that, from a practical standpoint, TOEFL performance can be adequately described by two factors relating to listening comprehension and then to all other parts of the test. Examination of the MC cloze test showed that the total score was relatively reliable, and that it was possible to estimate item response theory parameters for the MC cloze items with reasonable accuracy. However, there was no strong empirical evidence that the items types within the MC cloze test reflected distinct skills. It appeared that skills associated with grammar, vocabulary, and reading comprehension are highly interrelated as assessed by the TOEFL and the MC cloze test. Five appendices provide supplemental information about the analyses performed. (Contains 13 tables, 8 figures, and 37 references.) (SLD)

Descriptors—Computer Uses in Education, Edu-

cational Philosophy, *Educational Technology, Elementary Secondary Education, Grants, Outcomes of Education, Program Evaluation, *Program Implementation, *Staff Development, State Programs, *Technological Advancement

Identifiers—*California, *Model Technology Schools

A study was undertaken to summarize the results of the first 2 years of the Model Technology Schools (MTS) program in California. Research and evaluation reported from the five MTS schools were analyzed to provide information about basic questions. MTS projects involved the use of technology in instruction, administration, and school-community involvement. Five sites were selected to receive MTS funding in 1987-88. These projects focused on their original goals despite delays in obtaining program materials, and they conducted staff development activities as expected. There was clear evidence that MTS projects had impacts on instruction and curriculum, and there were clear indications of positive student changes in each of the MTS projects. A number of factors were identified that affected the implementation of the MTS projects, and the key areas of central philosophy, staff development emphasis, and the role of technology were highlighted as essential to successful implementation. Activities related to the defined statewide goals were being carried out at all project sites, although it was too early to draw conclusions about project effectiveness. Some recommendations are made for program continuation and educational policy. Two appendices present a report on the MTS projects and a framework for reporting results. (Contains 13 references.) Likelihood Statistics, Models

Identifiers—Asymptotic Distributions, Four Parameter Model, *Three Parameter Model, Two

Parameter Model

Birnbaum's three-parameter logistic function has become a common basis for item response theory modeling, especially within situations where significant guessing behavior is evident. This model is formed through a linear transformation of the two-parameter logistic function in order to facilitate a lower asymptote. This paper discusses an alternative three-parameter logistic model in which the asymptote parameter is a linear component within the logit of the function. This alternative is derived from a more general four-parameter model based on a transformed hyperbola. (Contains 7 figures, 1 appendix of likelihood equations and information functions, and 13 references.) (Author)

Identifiers—Confirmatory Factor Analysis, *Scholastic

Aptitude Test, *Test of Standard Written

English

This study, one of several examining a decline in the predictive validity of the Scholastic Aptitude Test (SAT) and high school grades between 1975 and 1988, asks whether the criterion, freshman grade point average (FGPA), has changed. College Board tests usually thought of as predictors were used as proxies for the concurrent academic competencies that comprise FGPA. Academic compo-

nents, defined by combinations of SAT, Test of Standard Written English (TSWE), and Achievement Test scores and high school grade point average, included verbal and mathematical reasoning ability, mathematics, language, and writing skills, and knowledge of science and history. Confirmatory factor analysis was used to test the consistency between 1978 and 1985 of the relationship between academic factors and FGPA. Primary results indicate that FGPA has been stable from 1978 to 1985 in relation to the abilities, skills, and subject knowledge measured by the SAT, TSWE, Achievement Tests, and high school grade point average. No evidence was found that a change in meaning of the FGPA has contributed to a decline in predictive validity of the SAT and high school grades. (Contains 14 tables, 2 figures, and 13 references.) Descriptors—Educational Practices, Foreign

Countries, Moral Values, Narration, *Professional

Development, *Research Methodology,

Research Problems, *Self Evaluation (Individuals),

Teacher Education, *Validity

This consideration of validity issues in self-study research argues that issues of validity in such research are first and foremost moral arguments about educational practice. The arguments point to narrative study because versions of narrative work are considered a necessary component of self-study. Narrative research has been criticized on positivist, analytical, literary, and post-structuralist grounds, but the appropriateness of self-study as research is justified by the fact that professionals are always obligated to monitor their own performance. Teacher educators involved in self-study are submitting their understanding of morally principled professional action to the scrutiny of peers. If a self-study piece is to be valid, then the educational merit of the practice under study must be seen to be appropriate. All other debates about the validity of self-study research should be subservient to debates on the educational appropriateness of the professional practice that is the object of the self-study. Methodology, Simulation

Identifiers—*Missing Data, National Education

Longitudinal Study 1988, *Random Variables

Many missing data studies have simulated data,

randomly deleted values, and investigated the

method of handling the missing values that would

most closely approximate the original data. Regression

procedures have emerged as the most recommended

methods. If the values are missing randomly, the use

of regression procedures to impute values for missing

data is questionable. The purpose of this study

was to determine if values were missing randomly in

samples selected from the National Education Longitudinal

Study of 1988. Four samples were selected: 2 samples of 8

variables, average inter-correlation of 0.2 and 0.4 respectively;

and 2 samples of 4 variables, average inter-correlation of

0.2 and 0.4 respectively. All cases containing one or

more missing values were selected, and the pattern

of missing values for each was determined. Chi

square analysis indicated that the missing values are

not missing randomly (p.001). Implications of the

use of regression procedures to handle non-randomly

missing values are discussed. Appendix A

contains four tables of descriptive statistics. (Con-

tains 12 references and 2 tables.) (Author/SLD)

Identifiers—Performance Based Evaluation, Standardization, *Wechsler Intelligence Scale for Children III

The reliability and validity of three short forms of the Wechsler Intelligence Scale for Children III (WISC-III) were compared. Each of the short forms was a tetrad composed of two verbal and two performance subtests. The first tetrad was selected based primarily on practical considerations, particularly its brevity to administer and score. The second tetrad was selected on the basis of psychometric and clinical considerations, and the third reflected a blend of psychometric, clinical, and practical factors. WISC-III standardization data (100 males and 100 females at each year of age between 6 and 16) were used to select the short forms, to determine their psychometric properties, and to develop formulas for computing a child's estimated full-scale IQ. All three short forms had acceptable average reliability coefficients above 0.90, but the validity of the brief, practical form was too low to represent a good alternative to either of the other two tetrads. Overall, the short form that represented a compromise between psychometric, clinical, and practical variables seemed to be the best choice. (Contains 4 tables and 27 references.) (Author/SLD)

Descriptors—*Analysis of Covariance, *Analysis of Variance, *Educational Research, *Monte Carlo Methods, *Research Methodology, *Robustness (Statistics), *Simulation, *Statistical Significance
Identifiers—*Group Size, *Heterogeneity of Variance, *Kurtosis, *Skew Curves, *Type I Errors, *Violation of Assumptions

This research explored the degree to which group sizes can differ before the robustness of analysis of variance (ANOVA) and analysis of covariance (ANCOVA) are jeopardized. Monte Carlo methodology was used, allowing for the experimental investigation of potential threats to robustness under conditions common to researchers in education. The effects of unequal group sizes were explored under the following data set conditions: (1) heterogeneity of group variances; (2) skew; (3) kurtosis; and (4) in ANCOVA, heterogeneity of regression slopes. Two independent sets of simulations were conducted, one using a total group of 90 and the other a total of 60. Experimentation was limited to simulations using three groups, with the total number divided in a systematic fashion. Results of these studies produced results consistent with previous research. In the analyses having homogeneity of group variances, the only simulations that emerged as statistically significant from the theoretical F test were those that had a large degree of difference in group numbers and unequal regression slopes. No significant differences emerged in simulations with near equal numbers. Tables in this paper document the simulation results, but also offer the research practitioner some idea of the true risk of Type I error in such situations. (Contains 7 tables and 24 references.) Identifiers—*Broward County Public Schools FL, *Middle School Students

The Alpha Program for the 1994-95 school year was operated for at-risk students by the School Board of Broward County (Florida) at two middle schools and one elementary school under the provisions of a grant from the Florida Department of Health and Rehabilitative Services. Services included academic instruction, parent involvement, group counseling, and individual counseling intended to prevent future dysfunctions such as alcohol and drug abuse, school dropout, and delinquency. A total of 103 fifth- and sixth-grade students identified as "at-risk" academically or behaviorally were served by a full-time family counselor, teacher, and teacher aide at each school. Evaluation found that the program was being operated at each of the sites in a way consistent with the 12 performance objectives and the program's stated purposes. Recommendations for program continuation and improvement are offered. Appendix 1 describes program components, list student risk factors, list the program performance objectives, and contains 10 graphic data exhibits. (Contains seven tables and six exhibits.) Identifiers—*Alternative Assessment, *Performance Based Evaluation

This study describes an innovative alternative assessment program used in an undergraduate educational psychology course. Subjects were 60 undergraduate students enrolled in a teacher preparation program at a midwestern liberal arts college. Each student was required to demonstrate mastery of course objectives through a course portfolio. The study also investigated the program's effectiveness in terms of students' attitudes and beliefs using both quantitative and qualitative data. The results indicated that many of the outcomes sought by educational psychology teachers (e.g., higher-order thinking, more quality time spent on assignments, and intrinsic motivation) were achieved with the use of alternative forms of assessment. Ancillary benefits in terms of perceived writing and technological skills were identified as well. Positive and negative dimensions of the program were examined. Appendixes present a modified course syllabus and contain the assessment program questionnaire frequencies. (Contains 6 references.) (SLD)

Scoring and Clerical Errors on the Stanford-Binet

Intelligence Scale: Fourth Edition.

Pub Date—[91]

Note—18p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Error Patterns, *Graduate Students, *Higher Education, *Intelligence Tests, *Scores, *Scoring, *Test Results

Identifiers—*Accuracy, *Clerical Skills, *Stanford Binet Intelligence Scale Fourth Edition

Twenty-eight protocols of the Stanford-Binet Fourth Edition (SB:IV) obtained from graduate stu-

dents were examined for scoring and clerical errors that contributed to the inaccuracy of test scores. Scoring of individual items was identified as the most error prone process, as evidenced by the fact that 96% of the protocols contained scoring errors. The most frequent scoring errors by subtest occurred on Comprehension, Vocabulary, Copying, Absurdities, and Verbal Relations. A relatively high occurrence of basal or ceiling errors (61%) was also found, with the Copying subtest being the most problematic for the establishment of both basal and ceiling levels. Clerical errors involving computation and coding were found in 32% of the protocols. Although the overall impact of examiner errors was fairly small in magnitude on the composite scores, 7% of the protocols produced a discrepancy of 6 points or more, sufficient to affect classification and placement decisions. (Contains 4 tables and 16 references.) (Author/SLD)

Identifiers—*Performance Based Evaluation, *Vermont Portfolio Assessment Program

This study explored fourth-grade teachers' understanding of mathematical problem solving, an aspect of the Vermont portfolio assessment program that has been largely ignored. Teachers' conceptions of problem solving, their knowledge of problem-solving strategies, their selection and evaluation of problem-solving tasks, and their instructional practices related to problem solving were examined in a representative sample of 20 fourth-grade teachers. Data were collected through a written survey and a structured telephone interview. Results indicated that Vermont teachers believe that the program has taught them much about problem solving and the everyday applications of mathematics. They have learned much of what has been communicated through the state training materials and network meetings. However, they do not share a common understanding of problem solving and do not agree about which skills are most essential. Teachers tend to rely on the state scoring rubrics for practical guidance. Differences in understanding lead to differences in practice, which should be addressed through continued professional development. Three appendixes present the scoring rubric, the survey and interview protocol, and a description of characteristics of good problems. (Contains 3 tables, 8 figures, and 21 references.) (SLD)

Descriptors—*Beliefs, *Educational Assessment, *Elementary Secondary Education, *Parent Atti-

tudes, *Parents, Parent Teacher Conferences, Parent Teacher Cooperation, Questionnaires, Report Cards, *Standardized Tests, *Test Use Identifiers—*Alternative Assessment, Performance Based Evaluation

Parent opinions about standardized tests and performance assessments were examined systematically. Mutually exclusive but randomly equivalent stratified samples from schools participating in a study of performance assessment and control schools were used to measure change in parent opinion over time. Approximately one-third of parents ($n=105$) completed questionnaires at the beginning of the school year, one-third completed them at the end of the year (similar sample), and the remaining third supplied interview samples ($n=33$ and $n=27$, respectively). Results demonstrated that parents' favorable ratings of standardized national tests did not imply a preference for this type of educational assessment over other types of assessment for measuring student or school progress. Parents considered report cards, hearing from the teacher, and seeing graded samples of student work as more informative than standardized tests, and they wanted comparative information to measure their own child's progress. When parents had a chance to look at performance assessments through the year, they endorsed their use for district purposes and preferred them for classroom use. Survey data like the Gallup Poll showing widespread approval of standardized tests should not be taken to mean that parents are opposed to other forms of assessment. Appendices contain the parent questionnaire and the interview protocol. (Contains 3 figures, 17 tables, and 9 references.) (SLD)

Identifiers—NCTM Curriculum and Evaluation Standards, *Performance Based Evaluation

This paper reviews a year's work with third-grade teachers who introduced performance assessments in the hope of improving both instruction and assessment in mathematics. The 14 participating teachers in 3 schools tried many changes in their educational and assessment practices. Patterns of stability and change that resulted from their efforts were examined, focusing in-depth on six teachers. The main finding was that the teachers indeed adopted many changes with respect to course content and pedagogy and assessment. Changes in assessment and instruction were mutually reinforcing for most of the teachers. By the end of the year, many were using more hands-on and problem-based activities that were closely aligned with the "Standards" of the National Council of Teachers of Mathematics. The introduction of performance assessment raised teachers' expectations of what their students could accomplish. Change resulted, not from what teachers were told to do, but from what they experienced as they attempted to change. An appendix provides examples of math tasks provided by the project. (Contains 2 figures, 1 table, and 21 references.) (SLD)

Identifiers—Dichotomous Scoring, *National Assessment of Educational Progress, *Performance Based Evaluation, Polytomous Variables, Standard Setting

The research reported in this paper was conducted to gain information to guide the selection of standard setting procedures for use with polytomous items to set achievement levels on the National Assessment of Educational Progress (NAEP) assessments in U.S. History and geography. Standard-setting procedures were evaluated to determine the relative level of the standards, the relationships of the level of the standard set by each method to the standard set using dichotomously scored items, and the practicality of the procedure for operational standard setting. The methods explored were: (1) estimated score point percentage (P method); (2) modified percentage estimate (PGE2); (3) estimated mean score method (M method); and (4) the hybrid method (H method), a combination of the previously used paper-selection method and the M method. Data were from the full NAEP pool for each content area with 20 panelists at each level for grades 4, 8, and 12. The P method tended to set the highest standard overall, and the PGE2 method, the lowest overall. The M method, which set standards between P and PGE2, but above the H method when they could be compared directly, was selected as the operational method for achievement level setting, with raters trained in paper-selection as a first step. Identifiers—Blocks, *National Assessment of Educational Progress

At grades 8 and 12, the 1992 National Assessment of Educational Progress (NAEP) reading assessment contained a small number of 50-minute blocks in addition to the usual 25-minute blocks. To determine whether to incorporate the 50-minute blocks into the operational scaling, this study sought to determine whether the longer blocks measured a different construct from that assessed by the 25-minute blocks. Structural equation modeling tested the hypothesis that the structural parameters relating reading ability to demographic variables do not differ across block type. A multiple group analysis, where type of block (25-minute or 50-minute) defined the two groups, was used. The null hypothesis was that the two types of blocks measure the same trait but could differ in observed mean and variance. Results of the main analysis did not reject the hypothesis of invariant structural parameters, and so the 50-minute blocks were not incorporated into the 1992 NAEP scales. Sensitivity analyses indicated that this conclusion was moderately robust to assumptions made about missing data for items that were not reached. Analyses using other measures of fit yielded similar results, although the magnitude of chi-square statistics was affected by the fit measure chosen. (Contains 6 tables and 13 references.) Descriptors—*Computer Assisted Testing, *Cutting Scores, *Difficulty Level, Evaluators, *Pass Fail Grading, Standards, Test Format, *Test Items

Identifiers—Paper and Pencil Tests, *Standard Setting

The objective of this study was to determine the degree to which recommendations for passing scores, calculated on the basis of a traditional standard-setting methodology, might be affected by the mode (paper versus computer-screen prints) in which test items were presented to standard setting panelists. Results were based on the judgments of 31 panelists for items in each of 3 parts of a computer-based academic skills assessment designed for use as part of the teacher licensing process. None of the evidence collected—either the analysis of panelists' estimates of item difficulty or their perceptions of effects—revealed any differences in recommended passing standards resulting from the mode of item presentation. Identifiers—*Item Exposure (Tests), Paper and Pencil Tests, *Parallel Test Forms, Test Security
In the periodic testing environment associated with conventional paper-and-pencil tests, the frequency with which items are seen by test-takers is tightly controlled in advance of testing by policies that regulate both the reuse of test forms and the frequency with which candidates may take the test.

In the continuous testing environment associated with more novel testing paradigms such as computerized adaptive testing (CAT), the computer itself can be used to control the frequency with which items are administered. This paper discusses previous methods of controlling item security in the continuous adaptive testing environment and presents a new method that overcomes some (but not all) of the disadvantages of previous attempts. The new method rethinks the use of the exposure control parameters in selecting each item to be administered. An extensive sample with this new method and a particular adaptive testing algorithm illustrates how concerns about test efficiency, parallelism, and security can be balanced. The target population was estimated using the method of R. J. Mislevy (1984) and a sample of over 5,000 real test-takers who took a linear 50-item paper-and-pencil analytical reasoning test to which the adaptive tests were designed to be parallel. (Contains 2 figures and 19 references.) (Author/SLD)

Descriptors—*Ability, *Adaptive Testing, Algorithms, *Computer Assisted Testing, Simulation, *Test Items

Identifiers—*Item Exposure (Tests), Large Scale Assessment, Paper and Pencil Tests, Randomization, Test Security

The interest in the application of large-scale adaptive testing for secure tests has served to focus attention on issues that arise when theoretical advances are made operational. Many such issues in the application of large-scale adaptive testing for secure tests have more to do with changes in testing conditions than with testing paradigms. One such

issue is that of insuring item and pool security in the continuous testing environment made possible by the computerized administration of a test, as opposed to the more periodic testing environment typically used for linear paper-and-pencil tests. In the continuous testing environment of adaptive testing, methods have been developed in the past to use the computer to control the rate at which particular items are exposed to test-takers. These methods have typically employed randomization schemes, sometimes in reference to a particular target distribution of test-taker ability. This paper presents a new multinomial method of controlling the exposure rate of items conditional on the ability level of an individual test-taker. The properties of such conditional control on the exposure rates of items, when used in conjunction with a particular adaptive testing algorithm, are explored through five studies with simulated data. Identifiers—*High Stakes Tests, Item Exposure (Tests), *Large Scale Assessment, Test Security Computerized adaptive testing (CAT), while well-grounded in psychometric theory, has had few large-scale applications for high-stakes, secure tests in the past. This is now changing as the cost of computing has declined rapidly. As is always true where theory is translated into practice, many practical issues arise. This paper discusses a number of such issues and outlines potential problems and potential solutions. The purpose is to encourage further development of solutions to these and other practical issues facing measurement professionals involved in CAT implementation. Practical issues explored include: (1) establishing test designs through simulation studies; (2) selecting the first item; (3) choosing the stopping rule; (4) scoring adaptive tests; (5) incorporating the test plan; (6) administering items belonging to sets; (7) facilitating item ordering; (8) controlling item exposure; (9) controlling item overlap; (10) providing item review; (11) dealing with item omissions; (12) allowing for incomplete tests; (13) establishing comparability; (14) developing CAT pools; (15) maintaining CAT pools; (16) developing and prototyping new item types; (17) complying with disclosure requirements; and (18) accommodating low-volume tests. Descriptors—Black Students, Comparative Analysis, *Item Bias, *Mathematics Tests, Multiple Choice Tests, Pretests Posttests, *Racial Differences, *Sex Differences, Test Format, *Test Items, White Students
Identifiers—*Free Response Test Items, *Scholastic Aptitude Test

This research summarizes differential item functioning (DIF) results for student produced response (SPR) items, a nonmultiple-choice mathematical item type in the Scholastic Aptitude Test I (SAT I). DIF data from 4 field trial pretest administrations (620 SPR items) and 10 final forms (100 SPR items with samples ranging from about \$8,000 to over 250,000) were examined. For the male/female comparison, the SPR item type exhibited negligible DIF. The male/female DIF results for the SPR items resembled DIF results for the multiple-choice items in the SAT. For the African American/White comparison, SPR items exhibited more DIF than multi-

ple-choice items. (Moderate or sizable DIF on multiple choice items in the old and new SAT-M is rare.) In particular, when African American test-takers were compared to matched groups of White test-takers, they performed less well than White test-takers on the SPR items. Although the level of African American/White DIF on SPR items was elevated, relative to the multiple-choice items, none of the SPR items in any of the final forms were flagged for exhibiting extreme DIF. The relationship between DIF and discrimination is discussed as a possible explanation for the elevated level of DIF on the SPR items. An appendix contains eight scatter plots. (Contains 6 tables, 14 figures, and 18 references.) (Author/SLD)

The design, administration, scoring, and results of the 1993 New York State Correctional Captain Examination are described. The examination was administered to 405 candidates. As in previous Sergeant and Lieutenant examinations, candidates also completed latent image written simulation problems and open/closed book multiple choice test components. New approaches to constructing the examination permitted the inclusion of in-baskets and orals. The in-basket items required candidates to handle relatively complex situations. Candidates were then asked specific questions about their decisions. Scoring was by rater pairs formed of a civil service examiner and a corrections subject matter expert. Each rater pair scored a small subset of items for each candidate, becoming item experts who could evaluate a small set of responses rapidly and consistently. The inclusion of oral interviews provided other challenges. The interviews were conducted by a trained civil service examiner who asked standardized questions. Assessors, Department of Corrections personnel above the rank of captain, evaluated responses on a 9-point scale. Both in-basket and oral processes proved to be efficient and economical. Two appendixes contain an examination type synopsis and the history of litigation about corrections department examinations. (Contains 10 tables.) (SLD)

Identifiers—Goals 2000, Reform Efforts

The Board on Testing and Assessment of the National Research Council convened a workshop in 1994 to help policymakers and others better understand the complex issues emerging from the standards-based educational reform movement. This bulletin synthesizes the workshop discussions. It is organized around four major themes that emerged

from the presentations: (1) the implications of using standards as accountability tools; (2) the challenges of designing assessments related to standards; (3) the implications of building the new form of education federalism implied by standards-based reform; and (4) the challenges of strengthening the state and local capacities to implement standards and linked assessments. Each section contains a brief review of the main issue, a synthesis of the views raised during the workshop discussion, and a list of questions for further analysis. Steps that will have to be taken to make the vision of standards-based reform a reality are outlined. An appendix describes the workshop agenda and lists participants. (SLD)

A method is proposed for optimizing cutting scores for a selection-placement-mastery problem simultaneously. A simultaneous approach has two advantages over separate optimization. First, test scores used in previous decisions can be used as "prior data" in later decisions, increasing the efficiency of the decisions. Then, more realistic utility structures can be defined using final success criteria in utility functions for earlier decisions. An important distinction is made between weak and strong decision rules. Weak rules are allowed to be a function of prior test scores. Conditions for optimal rules to be monotone are presented, and it is shown that optimal weak monotone rules are compensatory by nature. Results from an empirical example of instructional decision making illustrate the differences between simultaneous and separate approaches. Subjects were 71 medical students receiving interactive video or computer-aided instruction. (Contains 2 tables, 2 figures, and 17 references.) (SLD)

Identifiers—*Decision Theory, *Minnesota Adaptive Instructional System

Some applications of Bayesian decision theory to intelligent tutoring systems are considered. How the problem of adapting the appropriate amount of instruction to the changing nature of a student's capabilities during the learning process can be situated in the general framework of Bayesian decision theory is discussed in the context of the Minnesota Adaptive Instructional System (MAIS). Two basic elements of this approach are used to improve instructional decision making in intelligent tutoring systems. First, it is argued that in many decision-making situations the linear loss model is a realistic representation of the losses actually incurred. Second, it is shown that the psychometric model relating observed test scores to the true level of functioning can be represented by Kelley's re-

gression line from classical test theory. Optimal decision rules for the MAIS are derived using these two features. (Contains 3 tables, 1 figure, and 42 references.) (SLD)

Identifiers—*Decision Theory
As part of a project formulating optimal rules for decision making in computer assisted instructional systems in which the computer is used as a decision support tool, an approach that simultaneously optimizes classification of students into two treatments, each followed by a mastery decision, is presented using the framework of Bayesian decision theory. The main advantages of handling the three decision points simultaneously compared with separate optimization of such decisions are more efficient use of data and the use of more realistic utility structures. Both optimal weak monotone and strong monotone rules are considered. The results are empirically illustrated using data for 17,259 students for the problem, well-known in The Netherlands, of selecting optimum continuation schools at the end of elementary school on the basis of achievement test scores. (Contains 2 tables, 1 figure, and 6 references.) (SLD)

Identifiers—Aberrance, *Person Fit Measures, *Power (Statistics)

In person-fit analysis, the object is to investigate whether an item score pattern is improbable given the item score patterns of the other persons in the group or given what is expected on the basis of a test model. In this study, several existing group-based statistics to detect such improbable score patterns were investigated, along with the cut scores that have been proposed in the literature to classify an item score pattern as aberrant. Through a simulation study and an empirical study, the power of three person-fit statistics was compared, and the practical use of various cut scores was investigated. The empirical study involved 437 Dutch sophomores studying psychology and pedagogics taking an examination on test theory. It was also demonstrated that person-fit statistics can be used to detect persons with a deficiency of knowledge on an achievement test. While one of the statistics was less appropriate in the simulation, the power of the three approaches was approximately the same in the empirical example. (Contains 9 tables and 31 references.) Identifiers—*Missing Data, Netherlands
It is argued that judgments in evaluative research are ultimately subjective, but that good criteria are available to assess their quality. One of these criteria is the robustness of the judgments against incompleteness or uncertainty in the data used to describe the educational system. The use of the robustness criterion is demonstrated through the case of a recent evaluation project in which the state of elementary education in The Netherlands was evaluated. To test robustness, four different procedures were simulated for item removal: (1) scaling; (2) removal of easy items; (3) removal of difficult items; and (4) removal of extreme items. The robustness study demonstrated that the qualifications used in the evaluation project were quite stable under the removal of items from the pool by these four methods. Nearly all the qualifications met the rigorous criterion of robustness. An appendix discusses the independence of the mean observed score of covariation between abilities. (Contains 3 tables, 8 figures, and 17 references.) (Author/SLD)

Identifiers—*Conditionals, Item Parameters, Person Parameters, *Rasch Model

In order to obtain conditional maximum likelihood estimates, the so-called conditioning estimates have to be calculated. In this paper a method is examined that does not calculate these constants exactly, but approximates them using Monte Carlo Markov Chains. As an example, the method is applied to the conditional estimation of both item and person parameters in the Rasch model. The key idea for this approach was developed by C. J. Geyer and E. A. Thompson (1992), who showed that, in the exponential family, a quantity that is proportional to the conditioning constant can be expressed as an expectation with respect to a certain distribution. Simulating from this distribution, an estimate of the proportional quantity can be obtained as the observed sample mean. Inserting this estimate into the conditional likelihood then allows one to maximize the approximate likelihood, as the proportionality constant does not depend on the parameters to be estimated. (Contains 5 tables, 1 figure, and 11 references.) (Author/SLD)

Descriptors—Foreign Countries, *Identification, *Item Response Theory, *Nonparametric Statistics, Norms, *Scores, *Test Items

Identifiers—*Aberrance, Item Score Patterns, *Person Fit Measures

Methods for detecting item score patterns that are unlikely (aberrant) given that a parametric item response theory (IRT) model gives an adequate description of the data or given the responses of the other persons in the group are discussed. The emphasis here is on the latter group of statistics. These statistics can be applied when a nonparametric model is used to fit the data or when the data are described in the absence of an IRT model. After discussion of the literature on person-fit methods, the use of person-fit statistics in empirical data analysis is briefly discussed. In some situations, the analysis of item score patterns might reveal more information about examinees than the analysis of test scores. Finding an aberrant pattern does not explain the reason for the aberrance. A full person-fit analysis requires additional research into the motives, strategies, and backgrounds of the examinees who deviate from the statistical norm set by the model or group. (Contains 47 references.) (Author/SLD)

Identifiers—ACT Assessment, *Optimization
An optimization model is presented that allows test assemblers to control the shape of the observed-score distribution on a test for a population with a known ability distribution. An obvious application is for item response theory-based test assembly in programs where observed scores are reported and operational test forms are required to produce the same observed-score distributions as long as the population of examinees remains stable. The model belongs to the class of 0-1 linear programming models and constrains the characteristic function of the test. The model can be solved using the heuristic presented in Lucht and T. M. Hirsch (1992). An empirical example with item parameters from the ACT Assessment Program Mathematics Test illustrates the use of the model. (Contains 6 figures and 23 references.) (Author)

Descriptors—Ability, *Adaptive Testing, *Bayesian Statistics, Computer Assisted Testing, *Criteria, *Estimation (Mathematics), Foreign Countries, Item Response Theory, Maximum Likelihood Statistics, *Selection, Simulation, *Test Items

Identifiers—Weighting (Statistical)

In this study some alternative item selection criteria

ria for adaptive testing are proposed. These criteria take into account the uncertainty of the ability estimates. A general weighted information criterion is suggested of which the usual maximum information criterion and the suggested alternative criteria are special cases. A simulation study was conducted to compare the different criteria. The results showed that the likelihood weighted mean information criterion was a good alternative to the maximum information criterion. Another good alternative was a maximum information criterion with the maximum likelihood estimate of ability replaced by the Bayesian EAP estimate. An appendix discusses the interval information criterion for the two- and three-parameter logistic item response theory model. (Contains 5 figures and 15 references.) (Author)

Identifiers—*Conceptual Analysis, Decision Theoretic Testing, *Large Scale Assessment, *Standard Setting

Elements of arbitrariness in the standard setting process are explored, and an alternative to the use of cut scores is presented. The first part of the paper analyzes the use of cut scores in large-scale assessments, discussing three different functions: (1) cut scores define the qualifications used in assessments; (2) they simplify the reporting of achievement distributions; and (3) they allow for the setting of targets for such distributions. The second part of the paper gives a decision-theoretic alternative to the use of cut scores and shows how each of the three functions identified in the first part can be approached in a way that may reduce some of the arbitrary nature of standard setting processes. The third part of the paper formulates criteria for standard setting methods that can be used to evaluate their results. (Contains six figures and eight references.) (Author/SLD)

Identifiers—*Test Items

The designing of tests has been a source of concern for test developers over the past decade. Various kinds of test forms have been applied. Among these are the fixed-form test, the adaptive test, and the testlet. Each of these forms has its own design. In this paper, the construction of test forms is placed within the general framework of optimal design theory. A review of various objective functions and methods for the designing of different test forms is given. The advantages of using these methods are discussed, and an illustration of an optimal test design is provided. (Contains 3 figures, 1 table, and 36 references.) (Author/SLD)

Descriptors—*Academic Achievement, *Criteria, *Cutting Scores, Educational Assessment, *Evaluation Methods, Foreign Countries, *Scoring, Standards, *Test Construction
Identifiers—*Conceptual Analysis, Decision Theoretic Testing, *Large Scale Assessment, *Standard Setting

Elements of arbitrariness in the standard setting process are explored, and an alternative to the use of cut scores is presented. The first part of the paper analyzes the use of cut scores in large-scale assessments, discussing three different functions: (1) cut scores define the qualifications used in assessments; (2) they simplify the reporting of achievement distributions; and (3) they allow for the setting of targets for such distributions. The second part of the paper gives a decision-theoretic alternative to the use of cut scores and shows how each of the three functions identified in the first part can be approached in a way that may reduce some of the arbitrary nature of standard setting processes. The third part of the paper formulates criteria for standard setting methods that can be used to evaluate their results. (Contains six figures and eight references.) (Author/SLD)

Identifiers—*Compensatory Models, Decision Rules, *Mastery Model, Simultaneous Processing, Utility Functions

This paper presents some Bayesian theories of simultaneous optimization of decision rules for test-based decisions. Simultaneous decision making arises when an institution has to make a series of selection, placement, or mastery decisions with respect to subjects from a population. An obvious example is the use of individualized instruction in education. Compared with separate optimization, a simultaneous approach has two advantages. First, test scores used in previous decisions can be used as "prior" data in later decisions, and the efficiency of the decisions can be increased. Second, more realistic utility structures can be obtained defining utility functions for earlier decisions on later criteria. An important distinction is made between weak and strong decision rules. As opposed to strong rules, weak rules are allowed to be a function of prior test scores. Conditions for monotonicity of optimal weak and strong rules are presented. Also, it is shown that under mild conditions on the test score distributions and utility functions, weak rules are always compensatory by nature. To illustrate this approach, a common decision problem in education and psychology, consisting of a selection decision for treatment followed by a mastery decision, is analyzed. Identifiers—*Aberrance, Calibration, Item Parameters, *Item Score Patterns, *Person Fit Measures, Power (Statistics)

In studies investigating the power of person-fit statistics it is often assumed that the item parameters that are used to calculate the statistics can be estimated in a sample without aberrant persons. However, in practical test applications calibration samples most likely will contain aberrant persons. In the present study, the influence of the type and the number of aberrant persons in the calibration sample on the detection rate of the ZU3 statistic was investigated by means of simulated data. The ZU3 is a standardized version of the person-fit U3 statistic developed by H. Van der Flier (1980). An increase in the number of aberrant simulees resulted in a decrease in the power of ZU3. Furthermore, the type of aberrant behavior influenced the power of ZU3. The use of an iterative procedure to remove the aberrant persons from the dataset was investigated. Results suggested that this method can be used to improve the power of ZU3. (Contains 4 tables, 6 figures, and 17 references.) (Author/SLD)

Descriptors—*Curriculum, Educational Administration, *Educational Assessment, Educational Technology, *Evaluation Methods, Instructional Effectiveness, *Portfolios (Background Materials), Professional Development, Summative Evaluation, *Teacher Evaluation, Teaching Methods, Test Use

Identifiers—*Authentic Assessment, *Performance Based Evaluation, Process Measures

This guidebook explains the purpose and rationale for initiating a portfolio process in the schools. A fundamental authentic assessment principle holds that students should demonstrate, rather than be required to tell or be questioned about, what they know and can do. The use of portfolios has gained significant attention as an alternative to traditional student assessment. The portfolio is defined as a systematic and organized collection of evidence used by the teacher and student to monitor growth of the student's knowledge, skills, and attitudes. Curriculum, instruction, and assessment intersect via portfolios, tying the three together effectively for students. Both process and product portfolios have roles to play in authentic assessment. Strategies for implementing portfolios, using them in the classroom, and using them for teacher and administrator growth and evaluation are discussed. Chapter 5, "Technology and Portfolios in the Future," by Bonnie K. Mathies, considers the potential of this avenue of assessment. Four resources are presented, including a discussion of portfolio issues, a conference report and summary about portfolios, and a list of 21 computer software resources. A 14-item annotated bibliography is also included. (Contains 37 references.) (SLD)

Descriptors—*Academic Achievement, *Achievement Tests, *Black Students, Educational Environment, Elementary Education, Minority Groups, Preschool Education, *Racial Differences, School Districts, *School Readiness, Scores, Statistical Analysis, *Test Results, White Students

Identifiers—National Education Goals 1990, *Pennsylvania

The large difference in average achievement test scores between white students and black students is exacerbated in Pennsylvania by the fact that 90% of the black students are enrolled in only 9% of the state's 500 school districts. The nature of this achievement gap was examined, focusing on the variation of the gap's size as measured within a school. In 154 elementary schools that served both black and white students, the achievement gap varied from very large to no gap at all. Using statistical procedures for studying many factors simultaneously, it was found that of the 88 school and home factors studied, providing more opportunities for preschool and kindergarten experiences for black students seems to have the best chance of reducing this achievement gap. Research also indicated that home stimulation had a positive effect on student performance. These results reinforce the need for Pennsylvania to address the first of the National Education Goals, starting school ready to learn, seriously. (Contains 3 figures, 1 table, and 12 references.) Identifiers—*Dominant Culture

Recent instances of cultural conflict represent a single, broad, novel cultural tendency with real capacities to effect change. This tendency is labeled "black cultural projection." By altering American culture, black cultural projection questions entrenched patterns of political and economic domination in the United States, even though politics in America generally protects these same entrenched patterns of domination. It is argued that Americans can, should, and must overcome the gap between a changing American culture and a long entrenched pattern of economic and political domination in the United States. Analyzing films, literature, popular music, education, television, and governmental cultural policy demonstrates how black cultural projection occurs. The first section of the book, "Skirmishes along the Cultural Front," which contains six chapters examines several cases of black cultural projection. The second section, "A Major Battle," which contains four chapters, analyzes the same cases in the context of a three-part combat between black cultural projection and white response. The final chapter, "For a New American Culture," summarizes the studies and offers a proposal for creating a new American identity with the help of syncretic black projection. Racial and ethnic identity must be understood as an important determinant of the creative process and social dynamics, as well as understood as individual psychology. This collection of papers examines identity issues in the following chapters: (1) "Roots and Routes: Black Identity as an International Project" (Paul Gilroy); (2) "Identity as Coping: Adolescent African-American Males' Adaptive Responses to High-Risk Environments" (Margaret Beale Spencer, Michael Cunningham, and Dena Phillips Swanson); (3) "In Search of Blackness and Afrocentricity: The Psychology of Black Identity Change" (William E. Cross, Jr.); (4) "Biracial Identity—Asset or Handicap?" (Elaine Pinderhughes); (5) "Transracial Adoptions and the Continuing Debate on the Racial Identity of Families" (Ezra E. H. Griffith and Ina L. Silverman); (6) "Coping with Stress through Art: A Program for Urban Minority Children" (Ian A. Canino); (7) "Images Used by African-Americans to Combat Negative Stereotypes" (Barbara A. Hudson); (8) "National Nightmares: The Liberal Bourgeoisie and Racial Anxiety" (Hazel V. Carby); (9) "Puerto Ricans and the Politics of Racial Identity" (Angelo Falcon); (10) "Black Religion and Racial Identity" (C. Eric Lincoln); and (11) "Conclusion: The Pageantry of Difference: The Psychological Development and Creative Expression of Racial and Ethnic Identity" (Howard C. Blue). Descriptors—*Adolescents, Elementary Secondary Education, Family Relationship, *Females, Feminism, *Home Schooling, Interviews, Nontraditional Education, *Personality Traits, *Self Esteem, Sex Differences, *Student Attitudes

Research has documented that the self-esteem of girls plunges at adolescence. Whether this is true for girls educated outside the school system was studied through interviews with 20 homeschooled girls, a questionnaire completed by 20 more, and tape-recorded responses of 5 others. Subjects were asked to describe themselves and their interests, family relationships, friendships, and educations. Many of these girls chose to act in ways that resisted society's expectations, and many were very self-reflective about the paths their families had chosen for them, or the paths they were working out for themselves. Most of the girls talked about trusting themselves, pursuing their own goals, and maintaining friendships even when they and their friends were not in agreement. Looking at the attitudes and successes of homeschooled girls provides an oblique look at schools and their effects on girls and young women. The eight chapters in the book are entitled: (1) "They cannot understand the freedom"; (2) "Family Context"; (3) "We don't have to agree"; (4) "I like who I am"; (5) "Acts of Resistance"; (6) "A whole different person"; (7) "More aware of my femaleness"; and "Bringing Resistance into School." (Contains 37 references.) (SLD)

litical Influences, *Public Policy, Social Action, *Social Change, Social Problems, Sociocultural Patterns, Urban Areas

Identifiers—Discourse, *Elite Values, *Self Righteousness

Most contemporary social and political discourse in the United States takes place within a particular framework of assumptions. The rise of mass media, mass politics, and massive government means that an elite group of articulate people have great leverage in determining the course of the whole society. This book examines the vision of the country's elite intelligentsia, the anointed, and explores how their vision consists of a set of self-congratulatory assumptions that are rhetorical assertions rather than critical thinking. The prevailing vision of our time holds that those who are not in agreement are on a lower plane morally, inferior to the benighted who hold other views. When social policies favored by the anointed fail, a pattern of crisis, proposed solution, results, and response that does not acknowledge failure ensues. The contemporary vision of the anointed treats reality as highly malleable and handles unpleasant experiences as readily preventable. The self-flattering and self-centered vision of the anointed makes assumptions that empirical evidence cannot confirm. The nine chapters in this book are entitled: (1) "Flattering Unction"; (2) "The Pattern"; (3) "By the Numbers"; (4) "The Irrelevance of Evidence"; (5) "The Anointed versus the Benighted"; (6) "Crusades of the Anointed"; (7) "The Vocabulary of the Anointed"; (8) "Courting Disaster"; and (9) "Optional Reality." This collection examines and explains racial and ethnic family patterns in the United States. Identities, including racial and ethnic ones, are formed and harbored in the family. One's identity influences one's interaction with members of other groups and individuals' behaviors in a number of ways that reflect group membership. The 22 papers in this collection explore racial and ethnic identities, beginning with discussions of the current status of Black, Asian American, American Indian, Hispanic, and Jewish families in a section entitled "The Current States of Racial and Ethnic Families." A section on "Parenting and Socialization in Ethnic Families" considers the roles of family members in the family and society and parenting practices. "Interracial Dating, Mate Selection, and Marriage" contains four chapters on racial attitudes. A final section, "Education and Family Structure Issues," presents four chapters on marriage and the family among ethnic groups. References follow each chapter. (Contains 7 figures and 68 tables.) This anthology contains 48 selections about being

a woman of color in the United States. The first section, "The Paradox of Color: Living in an 'Un-sane' World," considers the emotional amputations as well as the spiritual powers that are derived from the woman's struggle to "be" in her skin. The second section, "On Becoming 'AdNormal': Finding, Creating, and Accepting Wellness," suggests ways of unlearning destructive behaviors and attitudes that affect people of color, and moving toward self-defined emotional, mental, physical, and spiritual health. There is no homogeneity among women of color in the United States. The women represented in this collection are African, Asian, Sephardic Jew, Latina, Middle Eastern, Native Hawaiian, First Nation, and various mixtures. Some have never before been published; others are well-known to many. Their perceptions are presented to encourage women to be more accessible to each other. A 52-item reading list and a 51-item resource list are included. (SLD)

Identifiers—*African Americans

In this anthology, which ranges from essays through poetry, young African Americans express their understandings of their generation's shared experiences with racism, the educational system, and society as a whole, while affirming what it is to be Black in America. Many of the 37 selections are grounded in a moment of self-recognition, as the writer resynthesizes what has been learned in the past. Common to most is an awareness of acknowledging and accepting one's own beauty and self-worth as an African American. Many of the contributors recognize the need to forge links with the past, and most acknowledge the role of education in designing structures for the future as well. These writings reflect an urgent need for change in a society that, while more integrated than that of past generations, falls far short of being free of racism. (SLD)

Resilience and Vulnerability in Low Cognitive Functioning African American Adolescents Exposed to Multiple Risks.

Spons Agency—National Inst. of Child Health and Human Development (NIH), Bethesda, Md.

Pub Date—Mar 95

Note—19p; Paper presented at the Biennial Meeting of the Society for Research in Child Development (Indianapolis, IN, March 1995).

Pub Type—Reports—Research (143)—Speeches/Meeting Papers (150)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—*Adjustment (to Environment), Adolescents, *Black Students, Cognitive Processes, *High Risk Students, *Intelligence, *Mental Health, Parents, Personality Traits, Self Concept, Special Education, Student Attitudes
Identifiers—African Americans, *Resilience (Personality), *Vulnerability

The mental health status of African American adolescents who have been diagnosed with mild cognitive limitations was studied, and the variables that differentiated those who were well adjusted (resilient) from those who were poorly adjusted (vulnerable) are detailed in this presentation. Participating were 205 African American families, each with a child aged 13 to 16 years enrolled in a special education program. Individual interviews with the adolescent and the parents explored environmental stress, parental and child dysfunction, and family interaction. Resilient and vulnerable adolescents were identified, and 23 resilient and 25 vulnerable students in a subsample of 74 families were studied. Few differences were found in overall health status, but resilient students were happy and displayed better developmental adjustment. Vulnerable adolescents were more likely to be withdrawn or to have tried to kill themselves. Eight information sheets, suitable for handouts, and three figures supplement two pages of text containing an abstract of the study reported on at the presentation. (SLD)

Descriptors—*Children, Child Welfare, Day Care, Early Childhood Education, Economic Factors, *Low Income Groups, *Parent Child Relationship, Policy Formation, *Poverty, *Public Policy, Public Television, *Social Problems, Tax Allocation, Urban Problems

Almost one quarter of American children live in poverty, and the effects of poverty on these children are mediated by many family and social conditions. Poverty affects parenting practices and the home environment, with consequential effects on child adjustment and functioning. Changes in income cause changes in parenting and the quality of the home environment, suggesting that these qualities are affected by income rather than being fixed characteristics of people living in poverty. Public policies can affect the resources available to families,

affecting the quality of the environments of young children. Income supports to help assure basic needs are important. Universal subsidies for all children should replace the current system of tax advantages, and subsidies that provide access to safe and high quality child care are especially important. Funding for public broadcasting could help make television a source of education and quality entertainment for children. (Contains 4 figures and 49 references.) (SLD)

What Every Middle School Parent Should Know.

An Overview of Middle Schools in the Long Beach Unified School District.

Children Now, Oakland, CA.; Long Beach Unified School District, Calif.

Spons Agency—Edna McConnell Clark Foundation, New York, N.Y.

Pub Date—95

Note—32p.

Pub Type—Guides—Non-Classroom (055)

EDRS Price—MF01/PC02 Plus Postage.

Descriptors—*Academic Achievement, Adolescents, Cooperative Education, *Educational Change, Educational Environment, Educational Policy, Educational Practices, Intermediate Grades, Junior High Schools, *Middle Schools, Parent Child Relationship, *Parent Participation, Parent School Relationship, School Districts, School Safety, *Teaching Methods
Identifiers—*Long Beach Unified School District CA, Middle School Students, *Reform Efforts

This parent guide addresses common parent concerns about middle schools, focusing on the Long Beach (California) Unified School District. It provides a quick reference to different aspects of the child's middle school education and encourages parent involvement. Sections describe how parents can make a difference for the child in the home and in the school and how middle schools in the district are changing to help students achieve. The guide presents answers to commonly asked questions about school environments, achievement, and school safety and gives facts about Long Beach middle schools. Each of the 21 middle schools in the district, which accommodates 17,600 students, is different, but all are united in their commitment to the developmental needs of young adolescents. Some schools have added new courses and others have shifted to innovative teaching methods, including emphasis on cooperative education. The school district will continue to work until achievement scores and skill levels are much higher. (Contains 5 figures.) (SLD)

Standards-Based Reform: What Does It Mean for the Middle Grades?

Spons Agency—Edna McConnell Clark Foundation, New York, N.Y.

Pub Date—Sep 95

Note—48p.

Pub Type—Reports—Evaluative (142)

EDRS Price—MF01/PC02 Plus Postage.

Descriptors—*Academic Achievement, Course Content, Curriculum Development, Educational Assessment, *Educational Change, *Expectation, Intermediate Grades, Junior High Schools, *Middle Schools, Performance, *Standards, Urban Schools

Identifiers—Goals 2000, Middle School Students, *Opportunity to Learn, Reform Efforts

This paper describes the status of the standards movement in relation to the middle grades and in terms of the policy context of the 1990s. It also outlines the potential of standards-guided reform at the middle level. By the early years of the 1990s, two key assumptions characterized the new wave of proposed reforms: that schools needed to reinforce their academic purposes through standards for curriculum and that these standards needed to apply to the learning of all students. The Goals 2000 Act provided a national context for reform and the application of educational standards. The standards movement today rests on content, performance, and opportunity-to-learn standards. In the middle grades these standards must be brought to bear in the various subject areas of mathematics, literacy, science, and social studies. The common thread that links emerging standards for the middle grades is the thread of learning and teaching for understanding. The status of national achievement and the academic experiences of middle school students make a clear starting point for thinking about the potential

of standards for the middle grades. Standards-based reform can formalize high academic expectations for all students and set criteria for more challenging classrooms, more challenging learning, and more authentic assessment. (Contains 47 references.) (SLD)

Collins, Bill

Staff Development for Multicultural Education in Mathematics.

Pub Date—19 Aug 92

Note—7p.; Paper presented at the International Congress on Mathematics Education (7th, Quebec, Quebec, Canada, August 1992).

Pub Type—Reports - Evaluative (142) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—*Cultural Awareness, Elementary Secondary Education, Ethnic Groups, *Inservice Teacher Education, Mathematics Achievement, *Mathematics Education, *Minority Groups, *Multicultural Education, Preservice Teacher Education, Problem Solving, Professional Development, *Staff Development

A fertile area for the improvement of mathematics achievement in the United States is in staff development for multicultural education. Multicultural mathematics is best defined by what it is not; it is not ethnomathematics, nor simply Afrocentricism or Eurocentricism. Multicultural mathematics furthers the multicultural goals of the school system because it shows minority students that all social groups have contributed to the body of knowledge they learn in mathematics class. Preservice education for teachers is the best opportunity to introduce a multicultural perspective on mathematics. Multicultural mathematics education should be taught in inservice programs as well. Regardless of the depth of instruction necessary to acquaint teachers with multicultural mathematics, the important ingredient is a commitment to inclusion. Problem solving in mathematics provides an opportunity to pose problems from many cultures that highlight many social groups. National standards efforts do not always address multicultural approaches directly, but they do encourage the inclusion of all cultures. Inservice education offerings must also be locally relevant, with emphasis on the cultural groups served. (SLD)

Cauley, Kathleen M. And Others

The NCTM "Standards": Implementation.

Metropolitan Educational Research Consortium, Richmond, VA.

Pub Date—Nov 93

Note—41p.

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Educational Assessment, Elementary Secondary Education, *Evaluation Methods, Mathematics, *Mathematics Curriculum, Principals, Problem Solving, *Program Implementation, Rural Schools, *Standards, Suburban Schools, Surveys, *Teachers, Test Construction, Urban Schools

Identifiers—Benchmarking, Focus Groups Approach, National Council of Teachers of Mathematics, *NCTM Curriculum and Evaluation Standards, *Virginia (Richmond)

In 1989 the National Council of Teachers of Mathematics published the "Curriculum and Evaluation Standards for School Mathematics" (Standards). This document provides benchmark statements about specific aspects of the curriculum and about evaluation against which school divisions can judge their own specific curricula. In the fall of 1992 the Metropolitan Educational Research Consortium of the Richmond (Virginia) area undertook a study to determine the extent to which local schools were implementing the Standards. This report summarizes findings from a survey of 1,892 teachers, a survey of 108 principals, and focus group interviews with 24 selected teachers. Overall, data suggest that there is uneven implementation of the Standards and that the changes made by some teachers are by no means universal. The driving force in the classroom remains the textbook, and problem solving has not become a central focus. The area of assessment is perhaps least reflective of the Standards. It is recommended that considerable work needs to be done to implement the Standards. Meeting them requires the development of policies that clearly delineate the curriculum to be offered and provide resources to support teacher training and technology. (SLD)

Performance-Based Assessment: Lessons Learned from Leading School Districts.

Metropolitan Educational Research Consortium, Richmond, VA.

Pub Date—May 94

Note—64p.

Pub Type—Reports - Research (143) — Tests/Questionnaires (160)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—*Accountability, *Educational Assessment, Educational Change, Educational Policy, Educational Practices, Elementary Secondary Education, *School Districts, Student Evaluation, Student Motivation, Suburban Schools, *Test Use

Identifiers—Colorado, Illinois, New York, *Performance Based Evaluation

The use of performance assessment for instruction and accountability and the support for its use provided by the school district were studied in three suburban school districts in Colorado, New York, and Illinois. Two were elementary and secondary districts, but the Illinois district was a high school district. All three districts have employed performance assessment for several years. In instruction, the districts found that performance assessment helped student understanding, clarified evaluation, helped engage student attention, and increased motivation. Accountability was emphasized in the application of performance assessment in two districts, both of which had adopted policies that clarified the use of performance assessment in overall accountability. One district developed plans for performance assessment requirements for high school graduation. District offices in all three districts supported the implementation of performance assessment through staff development activities, policy statements, public information sharing sessions, and changes in district testing policies. Both advantages and disadvantages to performance assessment in these districts are outlined. An appendix contains interview questions used in the study. (Contains eight tables.) (SLD)

Work Force Preparation: A Review of Literature.

Metropolitan Educational Research Consortium, Richmond, VA.

Pub Date—Dec 93

Note—43p.

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Career Education, College Preparation, *Economic Factors, Educational Change, *Education Work Relationship, Elementary Secondary Education, Integrated Activities, *Labor Market, Prevocational Education, *Program Effectiveness, Program Evaluation, Skill Development, *Vocational Education

There is a clear national consensus that for the United States to remain economically competitive, schools will have to change to emphasize higher levels of performance and skills. Students need to be independent, directed, and effective learners to be able to adapt to changing work environments by acquiring and using new information. However, there is little consensus about how to operationalize these skills and assess them at different levels. Needed skills and competencies are grouped into four major categories: (1) basic skills; (2) higher-order thinking skills; (3) interpersonal and teamwork skills; and (4) personal characteristics and attitudes. A review of the literature suggests that schools have used a variety of strategies to improve these skills and competencies and that there is an increasing emphasis on integrating academic and vocational education. In practice, this has usually meant reforming vocational education, with little attention to college preparatory tracks. The meager research on these integration efforts suggests that success is site-specific, with identifiable features that center on providing time and resources. An appendix contains eight information sheets that summarize points from the review. (Contains 1 table and 34 references.) (SLD)

Technology Case Studies.

Metropolitan Educational Research Consortium, Richmond, VA.

Spons Agency—Virginia State Dept. of Education,

Richmond.

Pub Date—1 Apr 93

Note—68p.; In the Consortium's technology brochure, this document has the alternate title, "Learning Technologies in the Classroom: Lessons Learned from Technology Intensive Schools."

Pub Type—Reports - Research (143) — Tests/Questionnaires (160)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Beliefs, Case Studies, Computer Assisted Instruction, Computer Managed Instruction, Educational Change, Educational Innovation, *Educational Technology, Elementary Secondary Education, *Instructional Leadership, Program Evaluation, Rural Schools, Suburban Schools, *Teaching Methods, *Technological Advancement, Urban Schools

Identifiers—*Virginia (Richmond)

Case studies were conducted to gain a better understanding of the impact of technology in schools, focusing on schools that have had a technology-rich environment for at least 2 years. The four sites selected included a rural high school, a suburban middle school, an urban elementary school, and an urban high school. The case studies collected information under three broad categories: an organizational profile, a technology profile, and a resource profile. Observations of the four-member study teams and their inferences are reported through a cross-case analysis. In each of the four schools, adaptability was a characteristic, and this adaptability was complemented by beliefs and visions of educational technology. Technology was seen as an integral part of the educational process, rather than as a supplement, in all four schools. Each school also had a "visionary-type" leader or team of leaders who sparked the innovations. In all the schools, implementation was regarded as a journey rather than an event. All four sites experienced difficulties, but all persevered with the integration of technology and instruction. An appendix contains an interview protocol and data collection forms used in the studies. (SLD)

Performance-Based Assessment: Questions and Answers.

Metropolitan Educational Research Consortium, Richmond, VA.

Pub Date—Mar 93

Note—72p.

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—*Accountability, Comparative Analysis, *Educational Assessment, Educational Change, Educational Practices, Scores, State Programs, *Teacher Education, Test Construction, *Testing Programs, Test Reliability, *Test Use, Thinking Skills

Identifiers—*Performance Based Evaluation

Performance based assessment refers to tasks that require students to construct responses or take actions to demonstrate specific knowledge or skills. Performance assessment tasks appear in a variety of formats, but they focus on higher order skills and are nonroutine, and sometimes loosely structured, in nature. A number of concerns have been expressed about performance assessment, usually noting the difficulties of producing such assessments and implementing them on a large scale. Kentucky and California are among the states taking an early lead in using performance based evaluation. Advocates believe that performance assessment has the potential to change instructional practices in schools, and that as tests change, teacher practices will change. However, changes in teacher education will be necessary in order to adopt the successful use of performance assessments. Standardization will be necessary if the tests are to be used for accountability and comparisons. Special attention must be paid to the reliability of aggregated scores when such scores are used to represent the performance of classrooms, schools, and districts, as well as subgroups of students classified by race, ability, or sex. A four-item annotated bibliography contains some interesting resources for further reading. (Contains 74 references.) (SLD)

A Qualitative Study of Resilient At-Risk Students.

Review of Literature.

Metropolitan Educational Research Consortium, Richmond, VA.

Pub Date—Jun 92

Note—74p.

Pub Type—Information Analyses (070)

EDRS Price—MF01/PC03 Plus Postage.

Descriptors—Academic Achievement, Class Size, Counseling, Educational Environment, Elementary Secondary Education, *High Risk Students, Intervention, Parent Participation, *Program Effectiveness, Program Evaluation, *Qualitative Research, Self Esteem, *Student Characteristics, *Teacher Role, Urban Schools, *Youth Programs

Identifiers—*Resilience (Personality)

This review of literature organizes and categorizes recent research on at-risk students, concentrating on resilient at-risk students. Programs that have been effective in promoting the success of at-risk students are reviewed, and a file of resources on at-risk students has been compiled. The 61 resources located in this study are organized in the following ways: (1) summary of the literature; (2) summary of characteristics of at-risk students; (3) summary and analysis of effective programs; (4) summary and analysis of research on resilient students; (5) index of literature by grade level and resource type; (6) an annotated bibliography of 61 resources; and (7) a file of resources that contains copies of manuscripts local school divisions can use. Research shows that effective programs that help at-risk students are characterized by early intervention, a positive school climate, a central role for the teacher, small class size, and parent involvement. Other important components are self-esteem and support building, guidance and mental health counseling, social and life skills education, perhaps coupled with vocational education, and peer involvement. (SLD)

Identifiers—*Resilience (Personality), Richmond

Public Schools VA

Qualitative, in-depth interviews of resilient at-risk students were used to identify factors that these students believe contributed to their success in school. Resilient students in six urban, suburban, and rural school divisions in the Richmond (Virginia) area were nominated by principals and guidance counselors. Of the 115 identified, 62 were interviewed in individual sessions by 8 interviewers using a standard interview protocol. Findings from these interviews indicate that these students were busy with activities and other positive uses of time. They tended to have clear and specific long-term goals that they were confident of achieving, and they were optimistic about their futures. Many of the older students had experienced severe "reality checks" that turned them around. These resilient students had an internal sense of control about their lives and took personal responsibility for their actions. Most were from dysfunctional home environments, but did not find this a hindrance to school success. Most admired some adults they knew, and these relationships helped them believe in themselves. Implications for teaching and for the educational environment are discussed. Appendixes contain the interview protocol and a coded interview transcription. (Contains 40 references.) (SLD)

Inclusion: Why Mathematics Education Will

Never Be the Same Again.

Pub Date—94

Note—7p. "Prepared for the NYSCEA 1994 monograph on Inclusion, on behalf of the New York State Association of Mathematics Supervisors."

Pub Type—Reports—Evaluative (142)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—Ability Grouping, *Cultural Aware-

ness, Disabilities, Elementary Secondary Education, *Mathematics Education, Mathematics Instruction, *Multicultural Education, *Sex Fairness, *Track System (Education)

Mathematics programs and mathematics teaching will change forever once a program of inclusion, that refers to more than the inclusion of handicapped students, is defined and implemented. It is apparent that mathematics has served as a filter for career and financial success. Ability grouped classes featuring pull-out programs almost universally led to tracking. A classroom in which inclusion is the rule is one in which activities are designed to challenge all learners. In New York, the State Education Department is developing its "Framework for Mathematics, Science and Technology" for elementary and secondary school mathematics. This framework and the "Addenda" series from the National Council of Teachers of Mathematics will help teachers find ways to make the curriculum and their instruction truly inclusive in terms of gender and ethnic identity. Identifiers—England, *Logical Necessity, Russia

Exploring whether deductive reasoning can develop adequately without special instruction, this paper presents two studies that examine the development of meta-components of deductive reasoning, first in algebra, and second in verbal reasoning. The first study examined students' understanding of logical necessity in algebraic tasks in different curricular settings, where one curriculum provided instruction with an emphasis on the meta-components of algebraic reasoning and the other did not. The study involved 120 Russian and 120 English students participated in an experimental mathematics curriculum group, and 89 Russian and 120 English students participated in the nonexperimental curriculum. Each group included younger and older adolescents. Students in the experimental curriculum had a better understanding of logical necessity and this ability tended to increase with age. Students in the nonexperimental curriculum had not developed an understanding of logical necessity. In the second study, the same subjects participated in a study of the transfer of the understanding of logical necessity to verbal reasoning. The advantage noted for those in the experimental curriculum continued into the verbal reasoning tasks. (Contains 5 figures, 5 tables, and 45 references.) (SLD)

Pub Type—Reports—Research (143)—Speeches/

Meeting Papers (150)

EDRS Price—MF01/PC02 Plus Postage.

Descriptors—*Adjustment (to Environment), *College Students, Cultural Differences, *Ethnicity, Higher Education, *Hispanic Americans, Parent Child Relationship, Predictor Variables, *Racial Identification, Sex Differences, Sex Role

Identifiers—Chicanos, *Latinos, *Psychological

Separation

This study examined the relationship between psychological separation and college adjustment in a Chicano/Latino sample, a group which has traditionally not valued psychological separation (N=137). Ethnic identity as a moderator variable was also explored. The Psychological Separation Inventory, Student Adjustment to College Questionnaire, and the Multigroup Ethnic Identity Measure were used as indicators of psychological separation, college adjustment, and ethnic identity, respec-

tively. Hierarchical multiple regression analyses supported two separation variables, freedom from negative emotions with father and involvement of father in everyday practical and personal affairs, as significant predictors of the relationship. Ethnic identity was established as a significant moderator of the psychological separation/college adjustment relationship. Multiple analysis of variance revealed that more paternal than maternal separation was evident and that males were more separated than females in this Chicano/Latino sample. Discussion is focused on within-group issues, including shifting gender roles and cultural norms. (Contains 3 figures, 10 tables, and 25 references.) (Author)

Youth Programs

Identifiers—Congress 103rd, *Maine

Evidence was gathered from those involved with at-risk children and juvenile offenders in Maine on how the Federal Government can best help states and communities battle juvenile crime. The kinds of prevention and intervention programs that work were considered, with the allocation of public resources an underlying concern. Panels of educators, social service providers, youth workers, community representatives, and young people in the process of turning their lives around made it clear that simply holding youthful offenders accountable for crimes is not enough. Governments need to work to eliminate domestic violence, child abuse and neglect, and drug abuse. Programs must improve the self-esteem of young participants. Mothers and fathers must be held accountable for their children's well-being, and when they ask for help, they should receive it. Although the overall incidence of youth crime in Maine has remained relatively stable when compared to other parts of the country, there is widespread agreement that there has been a proliferation of juvenile crime. Lessons taught by the citizens of Maine have national implications. (SLD)

Identifiers—Benchmarking, *Vermont

Unless communities create equitable learning environments, many students will be excluded from learning and will not be fully prepared for the workforce of the future. The Vermont Institute for Science, Math and Technology has developed benchmarks to assure educational equity. Benchmarks are listed for the following areas: (1) school and classroom climate; (2) curriculum; (3) assessment; (4) professional development; (5) management and governance; (6) community outreach; and (7) access to technology. Following the benchmarks listed for each area, a checklist is presented to help

educators assess existing educational equity in their own communities. The "Equity Reality Check" asks questions about the same areas. A list of equity resources organizations in Vermont is included. (SLD)

Identifiers—Preservice Teachers

The goal of this text is to help educators recognize and reduce ethnic, socioeconomic, gender, contextual, and communicative disparities and inequalities in school. It is designed for preservice educators and attempts to help them understand the influence of diversity factors on the educational careers of their students. Chapter 1 describes the problems that need to be addressed. Chapters 2 through 4 examine the causes and solutions of ethnic and socioeconomic disparities. Chapter 5 deals with contextually appropriate education, focusing on immigrant and refugee students, migrants, rural youth, middle-class, affluent, suburban students, and victims of child neglect and abuse. Chapter 6 explores communicatively appropriate education, emphasizing the problems of limited English proficiency and ethnic or minority differences in communication style or dialect. Chapters 7 and 8 help educators deal with the impact of students' gender and sexual orientation. Chapters 9 through 11 help educators select nonbiased and nonsexist assessment and instruction approaches and classroom management techniques. Each chapter contains references. (SLD)

Descriptors—Academic Achievement, *Asian Americans, Biculturalism, Counseling, *Cultural Differences, Educational Environment, Elementary Secondary Education, Ethnic Groups, *Family Programs, *Hmong People, Immigrants, Minority Groups, *Multicultural Education, *Racial Discrimination

Identifiers—*Model Minority Groups

A primary purpose of this book is to show the danger of racism and inaccuracy in the often-told Asian American success story by telling about the other side of Asian American academic success. Outlining an approach to family-based multicultural education, the book provides a model for paraprofessional, bicultural counselors to meet the needs of students, their parents, and school administrators. The book opens with the story of a Hmong girl that illustrates the difficulties often encountered by Hmong and other Southeast Asian children in their efforts to pursue an American education. Chapters 1 and 2 provide background information about the Hmong and other Asian Americans. Chapter 3 describes the experiences of Hmong children in two school districts in California and on the east coast. Chapters 4 and 5 focus on cultural influences and the challenges that exist in the present school system. Chapter 6 offers a theory of family-based multicultural education to counter the deficit theories that have been at the root of schools' inadequate responses to the needs of immigrants. Teaching methods are not as important as teacher attitudes, which should reflect a belief in cultural difference as strength. (Contains 1 table and 130 references.) (SLD)

Descriptors—*Economic Factors, Equal Opportunities (Jobs), Financial Support, Government Role, Labor Economics, *Labor Market, Low Income Groups, *Policy Formation, *Poverty, *Public Policy, Resource Allocation, Social Class, Social Problems, Structural Unemployment, *Welfare Services

Identifiers—*Reform Efforts

This analysis of economic conditions in the United States challenges the view, emphasized during the 1994 Congressional elections, that restraining government social spending and reforming welfare should be the country's top domestic policy priority. It is argued instead that the major domestic priority should be to address an economic environment that has been hostile toward less-skilled workers since the early 1970s. Americans tend to cite the behavior of the disadvantaged as the primary cause of poverty, rather than the economic changes that have made it so hard for millions to make ends meet. The poor and the middle class have fared so badly because of the erosion of labor market opportunities, not because of the erosion of the work ethic. Policies are proposed that would reduce poverty by supplementing the earnings of low-wage workers and increasing the employment prospects of the jobless. Demand-side policies of this sort are essential for correcting a labor market that cannot absorb less-skilled and less-experienced workers. (Contains 16 tables, 24 figures, and 207 references.) Descriptors—*Adolescents, *Cultural Awareness, Cultural Background, Dropouts, *Employment, Hispanic Americans, *Identification (Psychology), Models, Profiles, Psychological Needs, *Puerto Ricans, *Racial Identification, Student Attitudes, Youth Programs

Identifiers—*Identity Formation, Task Engagement

Using an innovative framework, a psychology of identity is explored by incorporating an analysis of the cultural, historical, and political context of youths from different regions of Puerto Rico. Interviews with 56 Puerto Rican youths who were either studying to work at something they felt strongly about, working at something they loved, or trying to find work after dropping out of school provide portraits of young people in personal transition. The book is conceptualized as a triptych, with the first "panel" being a description of the author's background and its relationship to the narratives of the youths interviewed. The second panel, the center piece, reviews Erik Erikson's ideas on identity, work, and love during youth. Martin Luther King's concept of "opera manum dei," the hands that do the work of God, is amplified in the discussion of work and love. The interviews presented in the second panel are further explored in the third panel's discussions of work, love, and identity. (Contains 1 table, 8 figures, and 86 references.) (SLD)

Descriptors—*Employment Patterns, Futures (of Society), Ideology, Low Income Groups, Moral Issues, *Poverty, *Public Policy, Social Change, Social Class, *Social Problems, Socioeconomic Status, Stereotypes, *Welfare Recipients

Identifiers—*Underclass

For much of its history, America has been waging war against many of its poor people. Chapters 1 through 4 of this book discuss the labeling of the poor as morally inferior, which has increased in the last 15 years, blames them falsely for the ills of the American society and economy, reinforces their mistreatment, increases their misery, and further discourages their moving out of poverty. The underclass is discussed, not as an economic term, but as a behavioral term to describe the people who are accused of failing to behave in mainstream ways. It is argued that the phrase is merely a popular label to stereotype poor people. The ideological notion that the undeserving nature of the poor justifies the campaign against them allows the poor to be the scapegoats for modern social problems and supports the idea that benefits for the poor contribute to the shortcomings of the economy. Chapter 5 reviews the political strategy of antipoverty policy and discusses needed antipoverty programs, especially job-centered ones. Some programs are also proposed to fight the labeling of the poor. The final chapter considers a future in which full-time jobs could become increasingly scarce and suggests programs to maintain a viable standard of living in a part-time job economy. (Contains five tables.) (SLD)

As part of a five-volume series this volume presents biographical sketches of persons of Asian American heritage who have made contributions to American life. Asian Americans have often been subjected to racial and ethnic prejudice, as have other easily identifiable groups of Americans. The series, written at a reading level of grades 5 to 6, but with an interest level for older students as well, profiles several Asian Americans and demonstrates their valuable places in American life. Volume I includes biographies of: (1) Pat Suzuki, Japanese American singer and actress; (2) Minoru Yamasaki, Japanese American architect; (3) Kristi Yamaguchi, Japanese American figure skater; (4) An Wang, Chinese American founder of Wang Laboratories; (5) Connie Chung, Chinese American broadcast journalist; and (6) Carlos Bulosan, Filipino American author. A glossary supplements the biographies. (SLD)

Identifiers—Gonzalez (Melissa), Language Minorities, *Latinos, Ochoa (Ellen), Pena (Federico), Rivera (Gerald)

This series presents biographical sketches of famous Americans of Hispanic descent. The biographies in the projected eight volume series for elementary school children represent the diversity of Hispanic heritage in the United States. Those featured are contemporary figures with national origins in the United States or Latin America, with careers that cover many aspects of contemporary life. Every person profiled in the series is a positive role model, not only for Hispanic youth but for all youth. Collectively these biographies demonstrate the value of cultural pluralism and a view that the future strength of the United States lies in nurturing diversity, not in creating national uniformity. This volume includes biographies of: (1) Gerald Rivera, television journalist; (2) Melissa Gonzalez, adolescent actress; (3) Federico Pena, lawyer, mayor, and Secretary of Transportation; and (4) Ellen Ochoa, astronaut. Descriptors—Access to Education, *Ancillary School Services, Curriculum Development, Educational Policy, *Educational Trends, Elementary Secondary Education, *High Risk Students, Integrated Activities, Nontraditional Education, *Teacher Expectations of Students, Teaching Methods, Time Factors (Learning), Trend Analysis, *Urban Schools

As the negative effects of traditional approaches to the problems of at-risk students have become known, several promising new trends have been recognized. First among these is the belief that all students benefit from raised expectations. A curriculum that builds on the knowledge and strengths students bring to school can capitalize on the ability of all students to learn. A schoolwide approach is generally replacing piecemeal efforts that separate disadvantaged children. Access to improved curriculum and instruction is recognized as a necessity. To cut down on fragmentation, schools are devising better ways to coordinate supplemental and regular instruction. Increasing instructional time is recognized as a need, and new ways are being found to extend teaching time. Parent involvement is another aspect that is receiving increased attention, as the vital role of parents is recognized. Yet another trend is toward the integration of services for children so that social services and school services can be linked. Ensuring that these trends continue will not be easy, but the progress to date gives cause for optimism. (Contains 6 resources.) (SLD)

A hearing was held on H.R. 4086, the Youth Development Block Grant of 1993, a bipartisan bill introduced by Representatives Constance A. Morella (Maryland) and Donald M. Payne (New Jersey). The purpose of the initiative was to expand community-based youth development programs for youth aged 6 to 19 years. The bill was supported by the National Collaboration of Youth, a coalition of 15 major youth serving organizations, collectively serving over 25 million young people. The bill would fund programs that help youth reach their fullest potential through youth clubs, sports and recreation, mentoring programs, leadership development, substance abuse and delinquency prevention, and community service programs. Fund allocation would be based on a state's total school-age population, the percentage of that population living in poverty, and the increase of juvenile crime in the state. Although the opening statement by Representative Cass Ballenger (North Carolina) expressed doubts that the bill was necessary, statements by the bill's sponsors advocated its passage. A number of representatives of youth programs spoke about the necessity for such programs and the need for further funding. Their remarks are followed by their prepared statements and supporting documentation, including some descriptions of successful programs. (SLD)

Descriptors—Age Differences, Cultural Differences, Decision Making, Elementary Education, *Elementary School Students, *Hispanic Americans, Leisure Time, Life Events, Planning, *Recreational Activities, *Skill Development, *Time Management

Identifiers—*European Americans, *Latinos

This study examined the opportunities children have to plan their everyday activities outside of school, with particular attention to the role of age and cultural factors in these experiences. Parents of 127 children between the ages of 5 and 12 years participated, with 69 of the families Euro American and 58 Hispanic. The parents completed a 10-page survey that tapped the nature and extent of their children's non-school activities, including organized lessons, types of play inside and outside the home, chores, and self care. Parents were also asked about their children's involvement in the decision to participate in these activities. Patterns indicate that children do have some opportunity outside of school to plan their time, and that these opportunities are, in some instances, related to the children's age and the cultural values of the community in which the child is a member. Identifiers—Houston Independent School District TX, Philadelphia School District PA

This paper describes the results of research examining the racial and socioeconomic segregation of public schools in two very different cities, Philadelphia (Pennsylvania) and Houston (Texas). Factors that explain the degree of racial and economic segregation and the consequences of this segregation for student academic achievement were examined. Data for the analyses were derived from census figures, the annual reports of the city school districts, and achievement test scores for the cities. In spite of the many differences between the two cities, there were striking similarities in the composition and character of their school districts. Both provide educational services to higher proportions of minorities and the poor than are observed in their respective metropolitan area populations. Results observed for the impact of neighborhood segregation, parental-student choice, and the development of magnet school programs were very similar. Analysis indicated that overall the most important determinant of academic success for city schools was the proportion of students from low income families. The failure of such schools is the result of a series of characteristics such as withdrawal of resources, diminished teacher commitment, and disinterested families and communities. (Contains 9 tables and 17 references.) (SLD)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Administrators, Educational Assessment, Educational Planning, Educational Policy, Educational Practices, Educational Research, Educational Researchers, Evaluation Methods, Outcomes of Education, Program Development, Program Implementation, Research Utilization, School Effectiveness

In a survey of educational researchers, school and district administrators, and policymakers, 1,818 respondents rated educational practices and policies according to their influence on learning and assessability. Classroom practices, design and delivery of curriculum, and schoolwide practices were rated as more influential than federal, state, and district policies; however, the latter were rated as more assessable. In general, researchers and practitioners agreed about which practices and policies are influential but not about their assessability. Practices and policies rated both influential and assessable are the most feasible for use in educational planning and evaluation; those rated influential but less assessable call for development of new observational measures. This survey data can be used to guide local program development, assessment development, and the monitoring of program implementation and evaluation of outcomes. (Contains 8 tables, 2 figures, and 47 references.) (Author)

Descriptors—Academic Achievement, At Risk Persons, Decentralization, Economic Factors, Elementary Secondary Education, Ethnic Groups, Family School Relationship, School Community Relationship, School Segregation, Teacher Expectations of Students, Teaching Methods, Urban Areas, Urban Problems, Urban Schools, Urban Youth

Identifiers—Language Minorities, Resilience (Personality)

The impact of the changing macroecological characteristics of cities on school performance is explored, and what can be done to reduce the achievement shortcomings among urban students from ethnic and language minority backgrounds is considered. The increase in residential segregation and thereby educational segregation in urban schools is as much an economic as a social response to the decentralization of cities and the changing urban economic order. These changes, taken together, translate into a marked achievement gap between urban schools and the national norms. School success can be promoted by fostering resilience among urban youth. Two major guidelines derived from research and experience have received increasing attention for potentially reducing the risk factors associated with urban life. One is forging greater school connections with families and the community to support resilience development and student learning. The other is reducing educational segregation within the schools and implementing responsive and powerful instructional practices to ensure the learning success of every student. Specific strategies are presented to make the public schools inclusive and integrated. (Contains 48 references.) (SLD)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Child Development, Disadvantaged Youth, Educational Policy, Educational Practices, Educational Research, Elementary Secondary Education, Models, Parent Participation, Parent Role, School Effectiveness, Teacher Role, Urban Schools, Urban Youth

Identifiers—Resilience (Personality)

Psychological theory holds that resilient infants, children, and youth can do well even in adverse circumstances. Corroborative research in preventive psychopathology, longitudinal cases of resilient development, and effective education suggests an ecological framework that organizes findings and can help guide research on educational resilience within the contexts of the home, school, and community. Protective and adverse factors and indicators of each can be identified for each context. The framework integrates literature on educational and psychological conditions and programs that may be altered for increased learning and constructive development. It suggests improved practices and collaborative roles for educators, parents, and psychologists that seem likely to promote educational resilience. (Contains 1 table and 116 references.) (Author)

Descriptors—Black Students, Disadvantaged Youth, Dropouts, Educational Environment, Elementary Secondary Education, Foreign Countries, Minority Groups, Nontraditional Education, Parent Attitudes, Power Structure, School Effectiveness, Student Attitudes, Student Motivation, Urban Schools, Urban Youth

Identifiers—Afrocentricism, Ontario, Student Disengagement, Student Engagement

Findings of a 3-year study of the experiences of Black and African-Canadian students in the Ontario public school system are presented. The paper focuses on urban students in four schools and on their parents' perceptions of public schooling. Interviews were held with nearly 150 African Canadian students, including 22 dropouts, some of whom returned to school. Surveys were completed by 145 of these students. It is argued that a critical interrogation of individual narratives provides alternative and disturbing insights into how schooling and education in Euro-Canadian and American contexts function to engage some students, while disengaging others. African-centered schools are also discussed as an alternative educational strategy to address the fundamental concerns of student disengagement and underachievement in mainstream schools. Canadian schools need to be more inclusive and to be governed by principles that stress power sharing with all stakeholders in the educational system. (Contains 47 references.) (SLD)

Descriptors—Academic Failure, Causal Models, Economic Factors, Elementary Secondary Edu-

cation, Family Characteristics, Inner City, Juvenile Gangs, Poverty, Social Change, Stress Variables, Substance Abuse, Urban Problems, Urban Schools, Violence

Identifiers—California (Watts)

This analysis of causes of poverty in the Watts section of Los Angeles (California) and other inner-city communities and of the effects of poverty on children considers exogenous factors that affect lives and behaviors, focusing on the situations of high school students. The first five chapters are arranged around issues cited by those who blame the poor for their own plight: (1) academic failure; (2) dysfunctional families (by dominant culture standards); (3) gangs; (4) substance abuse; and (5) stress, education, and the inner city. Causal factors for these problems are examined. Chapter 6 examines the 1992 upheaval in South-Central Los Angeles, the factors that led to the violence, and what society can do. Chapter 7, the final chapter, offers suggestions for change that pertain to each of the areas previously discussed. The hopelessness in inner cities in the United States can only be combated by an infusion of real hope manifested in a societal commitment to social change. (Contains 93 references.) (SLD)

Miller, Lynda And Others

Cultural Cobblestones: Teaching Cultural Diversity. School Library Media Series, No. 4.

Report No.—ISBN-0-8108-2966-5

Pub Date—94

Note—216p.

Available from—Scarecrow Press, Inc., P.O. Box 4167, Metuchen, NJ 08840.

Pub Type—Books (010)—Guides - Non-Classroom (055)

Document Not Available from EDRS.

Descriptors—American Indians, Apartheid, Cultural Awareness, Cultural Differences, Cultural Pluralism, Ethnicity, High Schools, High School Students, Hmong People, Immigrants, Language Arts, Multicultural Education, School Libraries, Student Projects, Urban Education

Identifiers—Holocaust, Topeka Public Schools KS

The purpose of this book is to provide pathways to cultural enlightenment that can be used in any classroom. Activities are presented to enhance student involvement and promote individual learning. With each of the detailed units of study presented, varied levels of learning activities are offered. The odd-numbered chapters, beginning with Chapter 3, present language arts and art activities as they have been taught in the study of various cultures during Ethnic Week library forums in a high school in Topeka (Kansas) over a 4-year period. Ethnic Week is the starting point for a multicultural awareness program centered around a single theme that reaches across the curriculum. Beginning with Chapter 4, the even-numbered chapters present student work that is the culmination of the learning resulting from those activities. The presentations and student work for these first 4 years of the Ethnic Week program focus on: (1) Apartheid; (2) the Holocaust; (3) the Native American experience; and (4) the experiences of Hmong immigrants. An appendix contains the handouts used in the school. (Contains 35 references.) (SLD)

Descriptors—Culture, Dropout Research, Dropouts, Foreign Countries, Identification (Psychology), Life Events, Models, Politics, Secondary Education, Student Attitudes, Theories, Urban Problems, Urban Schools, Urban Youth

Identifiers—Identity Formation, Ireland, Post-structuralism

The everyday lives and the cultural identities of early school-leavers in the Republic of Ireland are explored, drawing up a political practice, a cultural politics, that relates to the position of early

school-leavers. This practice is theorized within a poststructuralist and post-Marxist framework. Part 1 presents conversations with urban early school-leavers, organized around how they represent their experience of schooling, how they view leaving school in retrospect, and their current material and social situations. Part 2 argues that early school-leavers occupy a subordinate position in terms of material well-being. Sociological theories of reproduction and resistance are explored and applied to the experiences in Part 1. Part 3 constructs a discourse of social change without transcending the realities early school-leavers experience. A cultural, political, and educational strategy is presented for work with, by, and for early school-leavers. Theories of radical social democracy and theories of cultural production provide a transformative theoretical framework from which the issue of early school-leaving can be moved beyond the current crisis of political space. Descriptors—*American Indians, *Asian Americans, Authors, *Blacks, Educational History, Ethnicity, Folk Culture, *Hispanic Americans, *Literary Criticism, Literary History, *Literature, United States History

Identifiers—African Americans, Chicanos, Latinos, Native Americans

This volume is a serious effort to provide a guide to the range of creative and scholarly work in the four major American ethnic literatures. The burst in creative energy among Native Americans, African Americans, Hispanic Americans, and Asian Americans has made it difficult for teachers to keep up with the primary literature, let alone the growing body of criticism. The book gives brief narrative histories of the ethnic literatures, provides annotations to the best works of history, presents annotated bibliographies of the best books of criticism, and lists the major works of the primary literature. The first four-chapter unit gives teachers a background for teaching American ethnic literature and lists bibliographies on ethnic history and immigration in general, as well as by ethnic group. The second, and longer, unit describes the literatures, giving a brief narrative history of the literature, a selected reading list of primary works, and an annotated bibliography of the best criticism, grouped by genre. Descriptors—Citizenship Education, *Cultural Awareness, Cultural Differences, *Educational Change, Educational Theories, Elementary Secondary Education, *Ethnic Groups, Higher Education, Minority Groups, *Multicultural Education, Politics, Racial Identification, *Self Determination

Demystifying some of the implications of multiculturalism might allow the opportunity to ground the field in the basic exercise of cultural affirmation, self-determination. Contributors to this book affirm that self-determination and moving beyond the comfort zones to which multiculturalism has advanced are essential to seeing multiculturalism as an aspect of educating people to develop independence in thought and action. Contributions include: (1)

"Introduction: Resisting Zones of Comfort in Multiculturalism" (Sandra Jackson and Jose Solis); (2) "White Studies: The Intellectual Imperialism of U.S. Higher Education" (Ward Churchill); (3) "Multiculturalism: War in America Continues" (Imari Abubakari Obadele); (4) "Nuestra Realidad: Historical Roots of Our Latino Identity" (Felix Masud-Piloto); (5) "The Politics of Culture: Multicultural Education after the Content Debate" (Cameron McCarthy and Arlette Ingram Willis); (6) "Academic Apartheid: American Indian Studies and 'Multiculturalism'" (Marie Annette Jaimes * Guerrero); (7) "The Doorkeepers: Education and Internal Settler Colonialism, the Mexican Experience" (Priscilla Lujan Falcon); (8) "Negotiating Self-Defined Standpoints in Teaching and Learning" (Sandra Jackson); (9) "Entre la Marquesina y la Cocina" (Jose Solis); (10) "Deconstructing Mainstream Discourse through Puerto Rican Women's Oral Narratives" (Lourdes Torres); (11) "Education in Community: The Role of Multicultural Education" (Terence O'Connor); (12) "Core Culture and Core Curriculum in South Africa" (Neville Alexander); (13) "The Peer Review Group: Writing, Negotiation, and Metadiscourse in the English Classroom" (Linda Williamson Nelson); and (14) "The Cultural Ethos of the Academy: Potentials and Perils for Multicultural Education Reform" (Geneva Gay and Wanda Fox). Each chapter contains references. (SLD)

Descriptors—Black Students, Case Studies, Community Involvement, Court Litigation, Elementary Secondary Education, *Government School Relationship, Leadership, *Migration, Minority Groups, Poverty, Program Implementation, *Racial Balance, Racial Segregation, *School Desegregation, School Districts, Suburbs, Urban Areas, *Urban Schools, *White Students

This study describes and analyzes how five communities in the northeastern United States have addressed the subject of school desegregation. Dayton (Ohio), Hartford (Connecticut), Rochester (New York), Trenton (New Jersey), and Wilmington (Delaware) share the experience of having increasingly large, poor, minority populations surrounded by mostly white, generally affluent suburbs. Since the 1960s, each of these mid-sized urban communities has been engaged in school desegregation. Chapters 2, 3, 4, 5, and 6 contain case studies for each of the communities. For each city, the investigation of legal issues related to segregation includes a review of court cases and decisions. Chapter 7 discusses the most important factors in the desegregation efforts of these cities, with a lesson drawn from each. The importance of leadership, civic pride, community involvement, educational components that encourage involvement, a close working relationship between the city and the schools, and the creation of districts too large to allow easy "white flight" are demonstrated. Three appendixes present interview questions and a list of those interviewed. A bibliographic essay discusses sources. (Contains 6 maps, 6 tables, and 179 references.) (SLD)

Descriptors—Definitions, *Delinquency, Illegal Drug Use, *Juvenile Gangs, *Peer Groups, *Pre-

vention, Social Change, Social Problems, Urban Problems, *Urban Youth, *Violence, Youth Clubs

What is known about gangs is reviewed and the information is brought up to date. The book covers reported changes in the structure and crime patterns of gangs, their age, ethnic, and gender characteristics, and their spread into almost all corners of the United States. The early chapters consider four issues that are major concerns in understanding the gang problem. The first is the issue of defining the gang. Street gangs are considered as qualitatively different from other forms of gangs. The second issue involves recent changes in gangs, presenting new data on violence and the spread of gangs. The third issue is the involvement of street gangs in drug distribution, and the fourth issue is ways of handling the gang problem. It is argued that most gang prevention and suppression programs have been either ineffectual or actually have made matters worse. Social conditions mean that gangs are here to stay for the immediate future at least, and that the problem is growing internationally. Only long-term solutions to social problems will reduce gang formation. (Contains 5 tables and 16 figures.) (SLD)

Identifiers—ERIC Digests, Hawkins Stafford Act 1988, *Opportunity to Learn

The concept of "opportunity to learn" (OTL) strategies was first introduced several decades ago and was defined by a narrow set of instructional components. Since then, many additional criteria have been incorporated into the OTL concept, some specifically to ensure an equal education for disadvantaged and minority students. The original purpose of OTL measures was simply to describe aspects of the education process. Since then, they have been used to indicate overall educational quality and the availability and use of educational resources. The Hawkins-Stafford Education Amendments of 1988 mandated the development of OTL indicators to measure the effectiveness of federally-funded educational programs. Evaluating a school's OTL can provide information about whether the school has adequate resources, uses them effectively, and provides equal educational access. Although school reform programs vary in their commitment to OTL standards, OTL strategies can be implemented fairly easily in the following areas: (1) access to courses; (2) curriculum; (3) time factors; (4) teacher competence; (5) school resources; (6) school environment and culture; and (7) ancillary services. Descriptors—Academic Achievement, *Adolescents, *Attention Deficit Disorders, Behavior Problems, Clinical Diagnosis, *High Risk Students, *Hyperactivity, *Identification, Intelligence Quotient, Intelligence Tests, Learning Disabilities, *Mental Health, Secondary Education

Identifiers—Minnesota Multiphasic Personality Inventory, Wechsler Intelligence Scale for Children III

A multidimensional clinical assessment project was conducted on an at-risk adolescent population ($n=78$) in a public school setting. The focus of the project was on the identification of specific learning disabilities (LD) and attention deficit hyperactivity disorder (ADHD) as they relate to mental health problems and scholastic difficulties. Results indicated that 11.5% of these at-risk students had a Wechsler Intelligence Scale for Children-III full scale IQ less than 70, indicative of a developmental handicap. Of the remaining students, 39% met criteria for one or more specific LD, 30% met criteria for ADHD, and 13% of these at-risk students met criteria for comorbid ADHD and LD. Those classified as ADHD also exhibited significantly greater levels of psychological distress, evidenced by Minnesota Multiphasic Personality Inventory-A scale elevations, compared to the non-ADHD students, suggesting that even among their at-risk peers, ADHD students warrant greater attention with regard to psychological problems. (Contains 4 figures and 12 references.) (Author/SLD)

Identifiers—*Case Management, *Client Relations

The National Center for Children in Poverty has recently conducted research on case management in service integration projects, with the core information coming from 16 projects around the country from many service domains. Six programs specifically target very young children living in poverty, and six provide services to very young children regardless of their family income. Aspects of the case management process were studied, from finding the clients through implementing developed service plans to eventual disengagement. While the core functions of case management were routine, the types and needs of clients were extremely varied. Most clients came to these projects through referrals from other human service agencies. Rather than the linear notion of case management promoted in research and the academic literature, most projects followed a rather circular path, suggesting the need for flexibility by case managers. Projects intended to serve the whole family frequently focused on one member. Findings also showed that case managers do more than provide access to and navigation around the human service system in that they provide ongoing support. A final conclusion is that the mutual dependence of some case managers and clients could become counterproductive if taken too far. (Contains one table and three figures.) (SLD)

Identifiers—*Case Management, *Client Relations

As the case management approach has become increasingly popular, a new phenomenon has emerged. A client may have several case managers, each employed by a different project, and these managers may not be aware of each other. The National Center for Children in Poverty has recently conducted research on case management in service integration projects. The core of the information comes from 16 projects from many service domains serving children and their families. Reviewing the work of these projects has made it apparent that the problem of multiple case managers exists everywhere, in cities and rural areas, and that the cost of unnecessary duplication is excessive, not only in terms of dollars, but in terms of wasted human capital. The reality of categorical programs, single-focus interventions, and other features of the human service delivery system virtually ensure the continuation of the trend. Consolidating categorical programs into block grants, as is being debated in some public policy arenas, may remove some system factors that lead to multiple case managers, but it is evident that real solutions call for the application of professional standards and common sense. (SLD)

Identifiers—*Case Management, *Client Relations

The National Center for Children in Poverty recently conducted research on case management in service integration projects. The core of the study's information comes from 16 projects around the country, all serving children living in poverty. This brief discusses the characteristics of case managers, including their demographic attributes, tenure, work environment, caseload size, time allocations among tasks, and salaries. Case managers from these projects were a diverse group, from varied ethnic and racial backgrounds, with varied education and work experiences. The resources to support their work are often limited, and their salaries are only moderate, but many have been with their projects for extended periods. Most of these projects had relatively small caseloads, but there was considerable variance. Overall, case managers spent rather comparable amounts of time on the activities they performed. The characteristics of case managers identified may contribute to the development of a typology that would help in further explorations of case management methods and project and client outcomes. (Contains two tables and two figures.) (SLD)

Stutzner, Elsa L.

A Teacher's Construction of Success among Non-Elite Children in an Heterogeneous Urban Setting.

Pub Date—Apr 95

Note—12p.; Paper presented at the Annual Meeting of the American Educational Research Association (San Francisco, CA, April 18-22, 1995). Pub Type—Reports - Research (143)—Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Academic Achievement, Constructivism (Learning), Cultural Awareness, Educational Practices, Elementary School Students, Elementary School Teachers, Grade 3, Heterogeneous Grouping, *Minority Groups, Primary Education, Second Language Instruction, Spanish, *Student Motivation, *Teacher Effectiveness, *Urban Schools

Identifiers—*Elites, *Freire (Paulo), Minnesota

A study was conducted in a middle to upper class neighborhood in a Minnesota city to determine the practices that the Spanish teacher used to encourage full student participation and to consider whether the Freirian view of education can furnish an adequate framework for understanding this teacher's practices. Of the school's more than 500 students, about 56% were minority, and many were of lower socioeconomic status. All materials used in the Spanish classes, which were attended by all children for 1 hour each week, were prepared by the teacher herself. During the 1990-91 school year, all six second-third grade Spanish classes (176 children) had been observed. The ideas of P. Freire provided a framework and methodology that did not bias the data through preconceptions. The teacher's teaching practices created interdependence, cooperation, and a new classroom culture. Games were the medium she used to socialize the children out of endemic school failure and to make learning dynamic. A generative theme was used as a springboard to social awareness and as a tool to lead students toward mutual respect and tolerance. Participation by elite and non-elite students required tailoring learning opportunities to the students' individual needs. (Contains 22 references.) (SLD)

Making Children, Families, and Communities

Safer from Violence.

National Crime Prevention Council, Washington, DC.

Spons Agency—Department of Justice, Washington, DC. Bureau of Justice Assistance.

Pub Date—Sep 95

Note—31p.

Pub Type—Guides - Non-Classroom (055)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Child Welfare, Community Involvement, *Crime, Parent Child Relationship, Parent Participation, *Prevention, *Safety, Urban Areas, *Urban Problems, *Violence

There is something everyone can do to combat violence. The highest priority is making oneself and one's family safer from violence. Parents should consider carefully about having weapons, especially firearms, in the home, since statistics show that a firearm in the home is more than forty times as likely to injure or kill a family member as to stop a crime. Parents should also talk with children about violence and reinforce nonviolent behaviors. Community involvement is critical to building a safer neighborhood. Acting in concert with public agencies, parents and community members can combat violence and encourage positive thoughts and actions among the young. By working on community anti-violence activities, people can emphasize prevention and plan for adequate services. Community partnerships reduce violence risks. A checklist for violence prevention and a sheet to create a list of link-ups and referrals are included. A list of 60 resource organizations is also provided. (SLD)

Identifiers—*United Kingdom

School Development Plans (SDPs) were pioneered by individual schools and local education authorities (LEAs) in England as a grassroots approach to school management that was eventually adopted by national education authorities. An empirical investigation of the implementation and impact of SDPs was carried out in primary schools through a combination of qualitative and quantitative data collection. With the cooperation of administrators of urban and rural schools, a questionnaire was prepared on attitudes and support for school development planning. This questionnaire, sent to 110 LEAs in England, 12 in Scotland, 8 in Wales, and 5 in Northern Ireland, obtained a 100% response rate. Data were also collected in the schools through interviews and observation in nine case study schools. Results supported a typology that described SDPs as rhetorical, singular, cooperative, or corporate in nature. Only corporate plans, characterized by a united effort to improve and a sense of shared ownership, resulted in real educational change. The more effective the plan was, the more complex its characteristics. The aspect of SDPs that was found to be the weakest was that of formative evaluation, but schools engaged in the corporate type of planning were most likely to use formative evaluation to support the development process. Identifiers—*Case Management

The National Center for Children in Poverty has recently conducted research on case management in service integration projects, with the core information coming from 18 projects for children around the country. This brief describes the training and experience that case managers bring to their jobs and receive on the job, how prepared they feel to perform their jobs, and how case managers are supervised. Results indicated that case managers rely on prior experience and on-the-job training to strengthen their competence and confidence in working with clients and that formal education and orientation are less useful to case managers in preparing them for work. Projects hire staff members whose general qualifications meet the basic requirements for the job, but the fit between the backgrounds of new employees and necessary job skills is rarely sufficient to eliminate the need for orientation and staff development. Unfortunately, staff development is frequently an ad hoc and informal process. Supervision also tends to be informal, at least in terms of clinical content. The environments in which most case managers work call for wide-ranging skills and knowledge, but most training and degree programs emphasize specialization. (Contains two figures and three tables.) Descriptors—*Academic Achievement, Cognitive Processes, *Educational Environment, Effective Schools Research, Elementary Secondary Education, Foreign Countries, *Institutional Characteristics, Instructional Leadership, Outcomes of Education, *Partnerships in Education, *School Effectiveness, Teaching Methods

This review provides an analysis of the key determinants of school effectiveness in elementary and secondary schools. A literature review identified the following key correlates of effectiveness: (1) professional leadership; (2) shared vision and goals; (3) a learning environment; (4) concentration on teaching and learning; (5) purposeful teaching; (6) high expectations; (7) positive reinforcement; (8) monitoring progress; (9) pupil rights and responsibilities; (10) home-school partnership; and (11) a learning organization. The majority of effectiveness studies have focused exclusively on students' cognitive outcomes, but there is less evidence about school and classroom processes that are important in determining schools' success in promoting social or affective outcomes. Because of this focus, the review tells more about the correlates of academic effectiveness. Results of the review did not support the view that any one particular teaching style is more effective than others, but did indicate that flexibility and the ability to adapt teaching approaches are more important than notions of any single style. Issues Related to Student Part-Time Work: What Did Research Find in the Toronto Situation and Other Context? No. 215.

Toronto Board of Education (Ontario). Research Dept.

Report No.—ISBN-0-88881-239-6; ISSN-0316-8786

Pub Date—Oct 95

Note—40p.

Pub Type—Information Analyses (070)—Reports—Research (143)

EDRS Price—MF01/PC02 Plus Postage.

Descriptors—*Academic Achievement, *Extracurricular Activities, Foreign Countries, High Schools, *High School Students, Homework, *Part Time Employment, Student Attitudes, *Student Employment, Time Management, *Working Hours, Youth Employment

Identifiers—*Ontario (Toronto)

Research done during the last 10 years on part-time employment of secondary students was compared with results of a study of part-time employment in Toronto (Ontario, Canada). The literature has indicated that whether part-time work is beneficial or harmful depends on the amount of time students spend at work. In comparison with students with no jobs and students who work long hours, students who work limited hours (up to 15 per week) tended to demonstrate superior academic performance. They tended to spend more time on homework and extracurricular activities and to have lower dropout rates. More than 15 to 20 hours a week was associated with negative academic results. Part-time employment among Toronto students was explored through the 1991 Every Secondary Student Survey, the Ontario Provincial assessment of student writing, and a local school survey on the after-school activities of 71 students. Data on Toronto students support the findings of other research. Working was more advantageous to students than not working, provided the hours were moderate (up to 15 hours a week). Four appendixes present tables that summarize the impact of part-time work on students. (Contains 4 figures and 1 table in the text and 32 references.) (SLD)

How Communities Can Bring Up Youth Free from Fear and Violence.

National Crime Prevention Council, Washington, DC.

Spons Agency—American Legion Child Welfare Foundation, Inc., Indianapolis, Ind.; Department of Justice, Washington, DC. Bureau of Justice Assistance.

Pub Date—Jul 95

Note—75p.

Pub Type—Guides—Non-Classroom (055)

EDRS Price—MF01/PC03 Plus Postage.

Descriptors—*Child Rearing, Child Welfare, *Community Involvement, Participation, *Prevention, Program Descriptions, Safety, *Urban Areas, *Violence, *Youth Programs

This document describes the extent of the violence problem, names some key causes, presents some successful strategies, and outlines how a number of communities have developed and carried out thoughtful, coordinated game plans. Part 1 frames the problem, presenting facts, causes, and costs, and explaining the value of prevention. Part 2 illustrates concrete strategies that can reduce youth violence by: (1) developing ways to support families; (2) ensuring safe childhoods; (3) involving young people in education, social, recreational, and employment activities; and (4) encouraging youth to participate in healthy and supportive communities as leaders and citizens. Part 3 describes five cities that have developed comprehensive approaches to implementing these strategies. San Antonio (Texas), Minneapolis (Minnesota), Boston (Massachusetts), Savannah (Georgia), and Little Rock (Arkansas) are taking a coordinated approach to violence reduction. Part 4 presents 27 organizations and 24 publications as resources that can provide more detailed information for violence reduction programs. (SLD)

Descriptors—Ancillary School Services, Community Involvement, *Community Services, Elementary Secondary Education, *Family Programs, Health Programs, *Integrated Activities, Partnerships in Education, Profiles, Program Descriptions, Program Development, *Social Services, *Urban Schools

Nine schools report in this document on the challenges, successes, and lessons they have experienced while setting up Family Centers and bringing health and social services into their schools. These

schools are part of a professional network of urban schools begun and facilitated by the Regional Laboratory for Educational Improvement of the Northeast and Islands through its Designing Schools for Enhanced Learning Initiative. Called the Urban Working Party, this network consists of school teams that include teachers, administrators, other school professionals, parents, and social workers. A profile of each school describes the systems of integrated social services that they are developing. Schools are located in Puerto Rico, Connecticut, Massachusetts, New York, and Rhode Island. Appendix A lists 13 sources for further reading. Appendix B presents an activity to develop critical inquiry skills. Appendix C lists Urban Working Party participants. (SLD)

Descriptors—Academic Achievement, Community Involvement, *Educational Environment, Elementary Secondary Education, *Prevention, *Professional Development, Psychological Services, School Community Relationship, School Safety, *Stress Variables, Teacher Education, Urban Problems, *Urban Schools, *Violence

Identifiers—*Traumas, Victimization

The magnitude of crime, violence, victimization, and associated disruption in the urban schools of the United States severely impairs the educational process and the normal psychological development of many students. The problems of urban schools result from the problems of the larger community, but the community also holds the solutions to violence and traumatic stress. Increased cooperation between the school and the community can be implemented through a variety of channels. Community and parent involvement in various forms is critical to violence prevention. Professional development for teachers can prepare them to address violence and the consequences of urban stress with their students while creating an educational environment that fosters conflict resolution. Any approach to the complex phenomenon of urban violence, victimization, and traumatic stress must be systemic. Enhancing psychological services, ensuring adequate nutrition, and providing a safe and caring environment will contribute to closing the achievement gap and relieving the effects of urban problems. (Contains 42 references.) (SLD)

Subject Index

This index lists titles of documents under the major subject terms that have been assigned to characterize their contents. The subjects, which conform to those presented in the *Thesaurus of ERIC Descriptors* and the *Identifier Authority List*, are in word-by-word alphabetical order.

As shown in the examples below, the accession number is displayed below and to the right of the document title. Additional information about the document can be found under that number in the resume section.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

Increasing the Efficacy of Informal Video through Rapid Prototyping.
ED 389 263
- Foster Care**
Child Welfare: Complex Needs Strain Capacity To Provide Services. United States General Accounting Office Report to Congressional Committees.
ED 389 440
- Foundations of Education**
Philosophy of Education: Classical and Contemporary.
ED 389 673//
- Fractions**
Facilitating Children's Development of Rational Number Knowledge.
ED 389 576
Gobble Up Math: Fun Activities To Complete and Eat for Kids in Grades K-3.
ED 389 531//
Incongruity and Complexity of Young Children's Understanding of Simple Fractions.
ED 389 578
Preservation of the Common Referent in the Addition of Fractions: A Case Study.
ED 389 581
Preservice Elementary Teachers' Understanding of Multiplication Involving Fractions.
ED 389 612
Tools for Interactive Mathematical Activity. TIMA: BARS-A Tool Designed To Help Teachers Help Children Construct Their Own Knowledge of Whole Numbers and Fractions. [Diskette.]
ED 389 510//
- France (Caen)**
The Caen Primary School Foreign Language Project. Occasional Papers, 16.
ED 389 187
- Free Response Test Items**
DIF Data on Free-Response SAT I Mathematical Items.
ED 389 742
- Freedom of Speech**
The High School Ethics Challenge: Using Standards of Professional Journalism without the Freedoms of the Professional Press.
ED 388 981
Knight's Paradigm and Scholastic Press Freedom.
ED 388 983
Statute Midwifery: Nurturing Passage of a State Student Publications Act.
ED 388 986
Student Freedom of Expression and High School Journalism Advisers: A Legal and Educational Dilemma.
ED 389 001
- Freire (Paulo)**
A Teacher's Construction of Success among Non-Elite Children in a Heterogeneous Urban Setting.
ED 389 821
- French**
A Comparison of the Structural Relationships among Reading, Listening, Writing, and Speaking Components of the AP French Language Examination for AP Candidates and College Students.
ED 389 719
- Freshman Composition**
An Analysis of Lexical Frequency and Discourse Need for Instructive Purposes. Technical Report
RIE APR 1996

- 95-5-002.
ED 389 229
Information Literacy: Real Writers, Real Research.
ED 388 996
The Variable-Credit College Writing Course.
ED 388 971
- Fringe Benefits**
Federal Tax Rules Relating to Benefit Plans for Public Education Employees. A Resource Guide.
ED 389 071
- Functional Linguistics**
A Developmental-Functionalist Approach to Child Language.
ED 389 217//
- Functional Literacy**
Lifelong Learning. IDRA Focus.
ED 389 496
- Functions (Mathematics)**
The Effect of the Use of Number Lines Representations on Student Understanding of Basic Function Concepts.
ED 389 621
Graph, Equation and Unique Correspondence: Three Models of Students' Thinking about Functions in a Technology-Enhanced Precalculus Class.
ED 389 565
A Growth-Oriented Route to the Reification of Function.
ED 389 566
The Interplay of Mathematical Understandings, Facility with a Computer Algebra Program, and the Learning of Mathematics in a Technologically Rich Mathematics Classroom.
ED 389 611
The Role of One Teacher's Mathematical Conceptions in His Implementation of a Reform-Oriented Functions Unit.
ED 389 613
- Fund Raising**
Library Fundraising: Models for Success.
ED 389 328//
- Funding Formulas**
AEL Study of KERA Implementation in Four Rural Kentucky School Districts. 1993-94 Annual Report.
ED 389 489
- Futures (of Society)**
Facing the Future: Attitudes of Journalism Educators and Students about New Media Technology.
ED 389 000
Increasing Student Awareness of Global and Future Issues through a Secondary Level Mini-Course.
ED 389 634
Integrating Multicultural/International Experiences into the Public Relations Curriculum.
ED 389 025
Understanding the Impact of New Technology on Life and Work. Secondary Learning Guide 12. Project Connect. Linking Self-Family-Work.
ED 388 837
- Games**
What the Heck is a MOO? And What's the Story with All Those Cows?
ED 389 222
- Gatekeeper Role**
The Future of Agenda Setting Research: New Audiences and New Gatekeepers.
ED 389 009
- Gender Issues**
Popular Culture Images of Gender as Reflected through Young Children's Story.

Author Index

This index lists documents under the name(s) of their author(s). The index is arranged in alphabetical order by the person's last name.

As shown in the example below, the accession number is displayed below and to the right of the title. Additional information about the document can be found under that number in the resume section.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

Author———McKeachie, Wilbert J.
 Title———Teaching Tips: A Guidebook for the Beginning College
 Teacher, Eighth Edition. ED 298 813———Accession Number

Institution Index

This index lists the titles of documents under the institution responsible for them and/or the agency sponsoring them. The index is arranged in alphabetical sequence by the name of the university, agency, association, etc. Names beginning with the word "University" have generally been inverted in order to provide a more distinctive entry, e.g. Wisconsin University (for the University of Wisconsin).

As shown in the example below, the accession number is displayed below and to the right of the title. Additional information about the document can be found under that number in the resume section.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

Institution	American Association of State Colleges and Universities, Washington, DC. Planning Now for College Costs: A Guide for Families.	ED 298 804 — Accession Number
Title

Publication Type Index

This index lists documents under the Publication Type that has been assigned to them to characterize their form or organization, as contrasted to their subject matter.

As shown in the example below, the accession number is displayed below and to the right of the document title. Additional information about the document can be found under that number in the resume section. The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

The Publication Types are displayed in a classified index arrangement, according to the outline below.

Code	(052) Guides - Classroom - Teacher	Publication Type
Title	The First Amendment: Free Speech & a Free Press. A Curriculum Guide for High School Teachers.	Accession Number

Publication Type Index

Opening the Doors to Lifelong Learning: Empowering Undereducated Adults. Report of the Provincial Literacy Advisory Committee.

ED 388 853

Operational Sense in First Grade Addition.

ED 389 623

Organization of Educational Services in Sparsely Populated Regions of Canada.

ED 389 482

The Other Side of School Reform: Integrating Professional Technical Education.

ED 388 805

Outcomes and Pathways in Adult and Community Education.

ED 388 807

Outcomes of Recent Changes in Federal Student Financial Aid. Statistics in Brief.

ED 389 236

Parents, Professionals and Assessment: Attitudes and Roles in Assessment in Nursery Education.

ED 389 431

Parents' Views of Their Involvement at Home, in ESEA Chapter 1 Programs, and at School: Impact on Parents and Their Children.

ED 389 083

Participation of VICA Members in Personal Development Activities.

ED 388 775

Paths to Performance: A Seven State Focus. State Challenge Grant Conferences on Strategies for Change.

ED 388 764

Pennsylvania Library Association, Membership Survey, 1994.

ED 389 339

Perceptions and Attitudes of Business and Marketing Education Teachers in the United States: Schools and Staffing Survey Results.

ED 388 850

Performance-Based Assessment: Lessons Learned from Leading School Districts.

ED 389 775

Personality Traits of Mathematically Advanced College Students.

ED 388 927

Personnel Preparation: Relationship to Job Satisfaction. Draft Report. Working Paper #7.

ED 389 152

Place-Value: Problem-Solving and Written Assessment Using Digit-Correspondence Tasks.

ED 389 624

Policy and Practice in Initial Teacher Training. Quality in Basic Education: Professional Development of Teachers. Papers Presented at a South Asian Colloquium on Teacher Training (Colombo, Sri Lanka, April 1992).

ED 389 687

Popular Culture Images of Gender as Reflected through Young Children's Story.

ED 388 966

Positive Outcomes of Group Learning in the ABLE Classroom. Research to Practice.

ED 388 862

Post-16 Participation: The Success Story. Mendip Papers MP 043.

ED 388 844

Practice in School Public Relations: A Study of Superintendents in Four Midwestern States.

ED 389 086

Pragmatic Language in Early Childhood Education: Behavior and Thought in Teaching.

ED 389 437

The Preparation of Teachers for Ethnocultural Diversity.

ED 389 675

Preservation of the Common Referent in the Addition of Fractions: A Case Study.

ED 389 581

Preservice Elementary Teachers' Understanding of Multiplication Involving Fractions.

ED 389 612

Procedural and Conceptual Understandings of the Arithmetic Mean: A Comparison of Visual and Numerical Approaches.

ED 389 555

Proceedings of the Annual Meeting of the North American Chapter of the International Group for the Psychology of Mathematics Education (17th, Columbus, Ohio, October 21-24, 1995). Volumes 1 and 2: Plenary Lectures, Discussion Groups, Research Papers, Oral Reports, and Poster Presentations.

ED 389 534

Program for the Preparation of Preservice Agricultural Education Teachers for the Twenty-First Century.

ED 389 676

Promoting Cooperative and Helping Behaviours in Student Work Groups through Training in Small Group Processes.

ED 388 923

A Proposed Constructive Itinerary from Iterating Composite Units to Ratio and Proportion Concepts.

ED 389 582

Psychological Separation, Ethnic Identity and Adjustment in Chicano/Latinos.

Clearinghouse Number/ED Number Cross-Reference Index

This index cross-references the temporary ERIC Clearinghouse accession number to the permanent ERIC Document (ED) accession numbers by which resumes are arranged in *Resources in Education (RIE)*. Readers who have only Clearinghouse numbers for a given document may use this index to trace the item to this ED number and hence to its location in *RIE*.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

The following Clearinghouse prefixes are used in this index.

AA — ERIC Processing and Reference Facility	JC — Community Colleges
CE — Adult, Career, and Vocational Education	PS — Elementary and Early Childhood Education
CG — Counseling and Student Services	RC — Rural Education and Small Schools
CS — Reading, English, and Communication	SE — Science, Mathematics, and Environmental Education
EA — Educational Management	SO — Social Studies/Social Science Education
EC — Disabilities and Gifted Education	SP — Teaching and Teacher Education
FL — Languages and Linguistics	TM — Assessment and Evaluation
HE — Higher Education	UD — Urban Education
IR — Information and Technology

THESAURUS ADDITIONS AND CHANGES

The following additions and modifications have been made to the ERIC controlled vocabulary since December 1994. They are, therefore, not included in the main body of the 13th (1995) edition of the *Thesaurus of ERIC Descriptors*.

Academic Senates (Colleges)

USE COLLEGE GOVERNING COUNCILS (unqualified use reference "Academic Senates" was deleted)

AMERICAN DREAM

SN The ideals of freedom, equality, and opportunity traditionally held to be available to everyone in the U.S.—also, the popular belief that perseverance and hard work in the U.S. will bring forth happiness, success, and material well-being

BIRTHS TO SINGLE WOMEN

UF Illegitimacy
Illegitimate Births (1967 1995)
Nonmarital Childbirth
Out of Wedlock Births
Single Mother Births
Unmarried Mother Births

CAREER ACADEMIES

SN Schools-within-schools (usually high-school level) focusing on broadly defined career themes (health careers, electronics, etc.), with highly integrated academic and vocational curricula and active involvement of local employers
UF High School Academies (Career Development)
Job Training Academies
Partnership Academies (School and Business)
Vocational Academies

CHARTER SCHOOLS

SN Public schools run by groups of parents, teachers, and administrators under contract with local or state school boards, and given broad freedom from regulations in exchange for the promise of such favorable outcomes as improved test scores, attendance rates, and dropout rates

CHILDREN'S WRITING

SN Writing by, not for, children (note: see also the Identifiers "Beginning Writing" and "Early Writing")

COMPREHENSIVE SCHOOL HEALTH EDUCATION

SN Sequential programs of health instruction, health services, and healthful school environments that enable students in kindergarten through grade 12 to develop the awareness, knowledge, and skills needed for healthy behaviors—health areas covered include mental and emotional health, community and environmental health, consumer health, family life, growth and development, nutrition, personal health and fitness, safety and accident prevention, disease prevention and control, and substance use and abuse
UF Comprehensive School Health Programs

CULTURAL RELEVANCE

SN Applicability of materials, methods, or programs to one's own ethnicity, social status, gender, religion, home and community environment, and/or personal experiences (note: if possible, use the more specific term "Culturally Relevant Education")
UF Relevance (Cultural)

CULTURALLY RELEVANT EDUCATION

SN Educational practices and resources that reflect the culture, values, customs, and beliefs of students (i.e., help to connect what is to be learned with the students' own lives)
UF Culturally Appropriate Education
Culturally Responsive Education
Culture Based Curriculum

DOCUMENT DELIVERY

SN Transmission of a print or electronic document, such as a journal article, from a vendor or a library to the requestor—may be fee-based or free

DROUGHT

SN Climatic period(s) of extreme dryness, in which natural water supplies are insufficient for plant life and other needs (note: see also the Identifier "Desertification")

ENGLISH ONLY MOVEMENT

SN Efforts to make English the single official language of a government or other group (commonly, of the nation and states of the U.S.A.)

ENGLISH TEACHERS

SN Teachers of English-language arts and letters (note: may be coordinated with "English (Second Language)" for teachers of English as a second language)

Faculty Senates (Colleges)

USE COLLEGE GOVERNING COUNCILS (unqualified use reference "Faculty Senates" was deleted)

FLOODS

SN Bodies of water that overtop their natural or artificial confines and that cover areas not normally underwater

Government Policy

USE PUBLIC POLICY

Hands on Learning

USE EXPERIENTIAL LEARNING

HANDS ON SCIENCE

SN Science activities and programs that require active personal participation

HEALTH MAINTENANCE ORGANIZATIONS

SN Prepaid comprehensive medical service systems (note: see also the Identifier "Social Health Maintenance Organizations")
UF HMOs
Managed Care (HMOs)

HURRICANES

SN Tropical cyclones with high-speed winds equaling or exceeding 64 knots (73 mph)
UF Tropical Cyclones
Typhoons

Illegitimate Births (Del Dec 95)

USE BIRTHS TO SINGLE WOMEN

INTERNET

SN The international network of computer networks interconnected by routers or gateways and using the standard TCP/IP telecommunications protocol to transfer data such as electronic mail—the Internet connects millions of users among industry, education, government, research, commerce, and private households (note: see also the Identifier "National Information Infrastructure" for documents related to the U.S. Government's Federal NII/Internet policy initiative)
UF Electronic Superhighway
Information Superhighway

JOURNALISM RESEARCH

SN Basic, applied, and developmental research conducted to advance knowledge about journalism (note: use as a minor Descriptor for examples of this kind of research—use as a major Descriptor only as the subject of a document)

NATIONAL TEACHER CERTIFICATION

SN Use of nationwide competency assessment and testing to certify teachers (Note: Do not confuse with the Identifier "National Teacher Examinations," which is a specific test series published by the Educational Testing Service)
UF National Certification (Teaching)

NURSERY RHYMES

SN Short rhymed poems or songs for children that often tell a story
UF Mother Goose Rhymes

OUTCOME BASED EDUCATION

SN The effort, often by a state or local education agency, to organize all the features of schooling (including aims, curriculum, instruction, and assessment) so as to produce specifically delineated results (often including noncognitive as well as cognitive results) and generally with the expectation that all students will demonstrate such results

UF OBE
Outcomes Based Education
Results Based Education

PACIFIC ISLANDERS

SN Indigenous peoples of Micronesia, Polynesia, and Melanesia, and their descendants (note: use the more specific term "Pacific Americans," if appropriate—see also the geographic Identifiers "Pacific Islands" and "Oceania")

PAPAGO

SN (Scope Note Added) The Uto-Aztecan language of the Tohono O'odham nation of American Indians—related to Pima, the two languages are sometimes referred to collectively as O'odham, the Papago and Pima word for "people"

POPULAR MUSIC

SN Music enjoyed by the general public and commonly disseminated via the mass media (note: prior to Jan96, this concept was frequently indexed by "Popular Culture" coordinated with "Music" terms)
UF Pop Music

POSTTRAUMATIC STRESS DISORDER Oct. 95

SN Acute or chronic delayed reaction to highly stressing events such as military combat, sexual assault, childhood abuse, natural disasters, unexpected deaths, and life-threatening accidents—symptoms include anxiety, depression, intrusive recollections, and emotional detachment

UF Post Traumatic Stress Syndrome
Posttraumatic Neurosis
PTSD

PUBERTY

Dec. 95

SN Period of life at which the individual reaches sexual maturity and is capable of reproduction (note: see also the Identifier "Puberty Rites")

RAINFORESTS

Apr. 95

SN Woodlands of dense, mainly broad-leaved evergreen trees in areas of high annual rainfall (note: coordinate with Identifiers "Deforestation," "Tropics," etc., as appropriate)

UF Rain Forest Preserves
Temperate Rainforests
Tropical Rainforests

READING MOTIVATION

Nov. 95

SN The arousal, direction, and sustaining of reading interest and activity for work, school, pleasure, or other purpose

SCHOOL CULTURE

Feb. 96

SN Patterns of meaning or activity (norms, values, beliefs, relationships, rituals, traditions, myths, etc.) shared in varying degrees by members of a school community

Self Centeredness

USE EGOCENTRISM

Semiology

USE SEMIOTICS

SOCIOLOGISTS

Feb. 96

SN Scholars who systematically study and critique the development, structure, functioning, and dilemmas of human society

TECH PREP

Mar. 95

SN Sequential programs of study that integrate preparation for technical careers with academic education in a highly structured and closely articulated secondary and postsecondary curriculum, leading to a minimum of an associate degree or 2-year certificate in a specific career field

UF Two Plus Two Tech Prep

TOHONO O ODHAM PEOPLE

Dec. 95

SN A desert-dwelling American Indian people of southern Arizona and the province of Sonora in northwest Mexico (also, dispersed kin)

UF Papago (Tribe)

TORNADOES

Nov. 95

SN Violently rotating storms, usually visible as funnel clouds, with wind speeds of 100-200 mph and causing considerable destruction when touching ground—most common in the U.S. and Australia

Two Plus Two Tech Prep Associate Degrees

USE ASSOCIATE DEGREES

and TECH PREP

WORKPLACE LITERACY

Feb. 96

SN Reading, writing, computation, and communication skills performed in the context of job tasks

UF Job Literacy
Job Related Literacy
Occupational Literacy

Submitting Documents to ERIC

What Kinds of Documents to Send ERIC

ERIC would like to be given the opportunity to examine virtually any document dealing with education or its aspects. The ERIC audience is so broad (encompassing teachers, administrators, supervisors, librarians, researchers, media specialists, counselors, and every other type of educator, as well as students and parents) that it must collect a wide variety of documentation in order to satisfy its users. Examples of the kinds of education-related materials collected are the following:

- Research/Technical Reports
- Program/Project Descriptions
- Opinion Papers, Essays, Position Papers
- Monographs, Treatises
- Speeches and Presentations
- Evaluation Studies
- Feasibility Studies
- State of the Art Studies
- Instructional Materials
- Syllabi
- Teaching Guides
- Resource Guides
- Manuals
- Handbooks
- Curriculum Materials
- Conference Papers
- Bibliographies
- Legislation and Regulations
- Texts, Questionnaires, Measurement Devices
- Vocabularies, Dictionaries, Glossaries, Thesauri
- Statistical Compilations
- Taxonomies and Classifications
- Dissertations

ERIC does not accept non-print materials (such as films, filmstrips, videotapes, tapes, records, cassettes, etc.). However, if such material accompanies a printed text, ERIC may process the printed text and refer the user to the accompanying non-print components, as long as a source of availability for them can be cited.

A document does not have to be formally published to be entered into the ERIC database. In fact, ERIC seeks out the unpublished or "fugitive" material not usually available through conventional library channels.

Selection Criteria Employed by ERIC

• QUALITY OF CONTENT

All documents received are evaluated by subject experts against the following kinds of quality criteria: contribution to knowledge, significance, relevance, newness, innovativeness, effectiveness of presentation, thoroughness of reporting, relation to current priorities, timeliness, authority of source, intended audience, and comprehensiveness.

• LEGIBILITY AND REPRODUCIBILITY

Documents may be type-set, typewritten, xeroxed, or otherwise duplicated. They must be legible and easily readable. Letters should be clearly formed and with sufficient contrast to the paper background to permit filming. Colored inks and colored papers can create serious reproduction problems. Standard 8 1/2" x 11" size pages are preferred.

Two copies are desired, if possible: one for processing into the system and eventual filming, the other for retention and possible use by the appropriate Clearinghouse while processing is going on. However, single copies are acceptable.

• REPRODUCTION RELEASE

For each document submitted, ERIC requires a formal signed Reproduction Release form indicating whether or not ERIC may reproduce the document. A copy of the Release Form appears as a separate page in each issue of this journal. Additional Release Forms may be copied as needed or obtained from the ERIC Facility or any ERIC Clearinghouse. Items for which releases are not granted, or other non-reproducible items, will be considered for announcement only if they are noteworthy education documents available from a clearly identified source, and only if this information accompanies the document in some form.

Items that are accepted, and for which permission to reproduce has been granted, will be made available by the ERIC Document Reproduction Service (EDRS).

Advantages of Having a Document in ERIC

Contributors of documents to ERIC can benefit in the following ways:

- **Announcement**—Documents accepted by ERIC are announced to some 2,000 organizations receiving the abstract journal *Resources in Education (RIE)*.
- **Publicity**—Organizations that wish to sell their own documents in original copies can have this availability (together with address and price information) announced to users in *RIE*, thus serving to publicize their product. After the document is sold out at the original source, it is then still available through EDRS, if permission to reproduce has been granted to ERIC. (Original copy prices, while the supply lasts, are generally less, and are therefore more attractive to users, than EDRS on-demand duplication prices).
- **Dissemination**—Documents accepted by ERIC are reproduced on microfiche and distributed (at no cost to the contributor) to the more than 800 current subscribers to the ERIC microfiche collection.
- **Retrievability**—The bibliographic descriptions developed by ERIC are retrievable by the thousands of subscribers to the online database retrieval services (offered by commercial vendors such as BRS and DIALOG). In addition there are thousands of locations offering computer searches of ERIC based on either compact disk (CD-ROM) systems (offered by DIALOG, and SilverPlatter) or other local computer-based systems.
- **Always "In Print"**—The presence of a master microfiche at EDRS, from which copies can be made on an on-demand basis, means that ERIC documents are constantly available and never go "out of print." Persons requesting copies from an original source can always be referred to ERIC. This archival function relieves the source of a distribution burden and solves the availability problem when the source's supply has been exhausted.

In addition, submission of a document to ERIC reduces the overall likelihood of overlap, redundancy, and duplication of effort among users. It increases the probability that the results reported in the document will be available indefinitely and used in subsequent efforts.

To encourage submission of documents to the system, ERIC offers to send contributors notice of document disposition, giving the ED identification number (for ordering purposes) of those documents selected for *RIE*. Additionally, ERIC will send a complimentary microfiche to each contributor when the document is announced in *RIE*.

There are no fees to pay in submitting documents to ERIC, nor does ERIC pay any royalties for material it accepts. Other than a statement concerning permission to reproduce, there are no forms to complete.

(OVER)

Where to Send Documents

Documents usually enter the ERIC system through one of two ways:

They may be sent to the Clearinghouse most closely related to their subject matter. A list of the Clearinghouses and their addresses appears on the inside back cover of this issue. Material is expedited if it is directed to the attention of "Acquisitions."

If it is uncertain which Clearinghouse is appropriate, materials may be sent to the following address:

ERIC Processing and Reference Facility
Acquisitions Department
1301 Piccard Drive, Suite 300
Rockville, Maryland 20850-4305

The ERIC Facility will forward all submissions to the appropriate ERIC Clearinghouse for consideration and, if selected, processing.

U.S. Department of Education
Office of Educational Research and Improvement (OERI)
Educational Resources Information Center (ERIC)

REPRODUCTION RELEASE

(Specific Document)

I. DOCUMENT IDENTIFICATION:

Title:	
Author(s):	
Corporate Source:	Publication Date:

II. REPRODUCTION RELEASE:

In order to disseminate as widely as possible timely and significant materials of interest to the educational community, documents announced in the monthly abstract journal of the ERIC system, *Resources in Education* (RIE), are usually made available to users in microfiche, reproduced paper copy, and electronic/optical media, and sold through the ERIC Document Reproduction Service (EDRS) or other ERIC vendors. Credit is given to the source of each document, and, if reproduction release is granted, one of the following notices is affixed to the document.

If permission is granted to reproduce and disseminate the identified document, please CHECK ONE of the following two options and sign at the bottom of the page.

<input type="checkbox"/> ↑	The sample sticker shown below will be affixed to all Level 1 documents	The sample sticker shown below will be affixed to all Level 2 documents	<input type="checkbox"/> ↑
Check here For Level 1 Release: Permitting reproduction in microfiche (4" x 6" film) or other ERIC archival media (e.g., electronic or optical) and paper copy.	PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL HAS BEEN GRANTED BY _____ _____ TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)	PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL IN OTHER THAN PAPER COPY HAS BEEN GRANTED BY _____ _____ TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)	Check here For Level 2 Release: Permitting reproduction in microfiche (4" x 6" film) or other ERIC archival media (e.g., electronic or optical), but <i>not</i> in paper copy.
	Level 1	Level 2	

Documents will be processed as indicated provided reproduction quality permits. If permission to reproduce is granted, but neither box is checked, documents will be processed at Level 1.

please

<i>"I hereby grant to the Educational Resources Information Center (ERIC) nonexclusive permission to reproduce and disseminate this document as indicated above. Reproduction from the ERIC microfiche or electronic/optical media by persons other than ERIC employees and its system contractors requires permission from the copyright holder. Exception is made for non-profit reproduction by libraries and other service agencies to satisfy information needs of educators in response to discrete inquiries."</i>			
Signature:		Printed Name/Position/Title:	
Organization/Address:		Telephone:	FAX:
		E-Mail Address:	Date:

III. DOCUMENT AVAILABILITY INFORMATION (FROM NON-ERIC SOURCE):

If permission to reproduce is not granted to ERIC, or, if you wish ERIC to cite the availability of the document from another source, please provide the following information regarding the availability of the document. (ERIC will not announce a document unless it is publicly available, and a dependable source can be specified. Contributors should also be aware that ERIC selection criteria are significantly more stringent for documents that cannot be made available through EDRS.)

Publisher/Distributor:
Address:
Price:

IV. REFERRAL OF ERIC TO COPYRIGHT/REPRODUCTION RIGHTS HOLDER:

If the right to grant reproduction release is held by someone other than the addressee, please provide the appropriate name and address:

Name:
Address:

V. WHERE TO SEND THIS FORM:

Send this form to the following ERIC Clearinghouse:

However, if solicited by the ERIC Facility, or if making an unsolicited contribution to ERIC, return this form (and the document being contributed) to:

ERIC Processing and Reference Facility
1301 Piccard Drive, Suite 100
Rockville, Maryland 20850-4305

- Please contact EDRS for shipping estimate

GENERAL INFORMATION

- **DOCUMENT AVAILABILITY** — ERIC uses 3 codes to indicate the format in which a document is available
 - **Level 1** — available in both paper and microfiche
 - **Level 2** — available in microfiche only
 - **Level 3** — not available through EDRS; see "Available From" in the abstract for source information

- **EJ ARTICLES** — EJ articles are **NOT** available through EDRS. For copies contact:

- ISI (Institute for Scientific Information): 800-523-1850 or 215-386-0100
- UMI: 800-248-0360 or 415-433-5500

- **PAPER COPY (PC)** — A Paper Copy is a xerographic reproduction on paper from microfiche of the original document. Each paper copy has a Vellum Bristol cover to identify and protect the document.

PAYMENT

- Prices set forth herein do not include any sales, use, excise, or similar taxes that may apply to the sale of microfiche or paper copy to the customer. The cost of such taxes, if any, shall be borne by the customer.
- Payment terms are **NET THIRTY (30) DAYS** by check or money order payable to EDRS in U.S. DOLLARS drawn on a U.S.BANK.

- **REPRODUCTION** — Permission to further reproduce a copyrighted document provided hereunder must be obtained from the copyright holder, usually noted on the front or back of the title page of the copyrighted document.

- **CLAIMS POLICY** — **ALL SALES ARE FINAL.** EDRS will replace products returned within 30 days of delivery due solely to reproduction defects or incompleteness caused by EDRS.

DEPOSIT ACCOUNTS

Customers who have a continuing need for ERIC Documents may wish to open a **Deposit Account** as follows:

- **DOMESTIC CUSTOMERS:** By depositing a suggested minimum of \$200.00 or submitting an executed purchase order. If tax exempt, include a copy of the tax exempt certificate.
- **INTERNATIONAL CUSTOMERS:** By depositing a recommended minimum of \$300.00 in U.S. dollars drawn on a U.S. bank.

OTHER EDRS PRODUCTS

- Standing Orders and Backfiles for either the **FULL ERIC COLLECTION** or individual **CLEARINGHOUSE COLLECTIONS** are available.
- EDRS also offers **TOPICAL COLLECTIONS** in several subject areas.

For more information, please contact a Customer Service Representative.

HOW TO ORDER

Resources in Education (RIE)

Resources in Education (RIE) is a monthly abstract journal covering the document literature of education. It is published for the U.S. Department of Education by the U.S. Government Printing Office (GPO). RIE consists of twelve (12) monthly issues (each announcing over 1000 documents and indexing them by Subject, Institution, Personal Author, and Publication Type) and two (2) cumulative semiannual indexes (January-June, July-December). RIE is sold by GPO on subscription or as individual issues on-demand. Stock is retained for only approximately six months; issues older than that are generally not available from GPO. Orders from foreign sources cost 25% additional, as shown in the table below.

NOTE: The Semiannual Index to RIE has been discontinued; the last issue was the volume for July-December 1994.

RIE Product (Master Stock No. 756-003-00000-8)		Domestic	Foreign
Subscription to Monthly Issues	(12 issues)	\$77.00	\$96.25
— Single Copy On-Demand	(1 issue)	\$21.00	\$26.25

Mail Orders: Check or money order (full remittance required) made payable to "Superintendent of Documents":

Mail to: Superintendent of Documents
U.S. Government Printing Office
Washington, DC 20402-9371

Telephone Orders: Acceptable credit cards are: Choice, Mastercard, or VISA. You may also charge against your pre-paid GPO deposit account, if available.

Call: 202-783-3238 (Note: This is not an FTS or AUTOVON line.)

Customer Service: Publication service section (*Inquiries about a publication order.*)
202-275-3050

Subscription research section (*Inquiries about a subscription order.*)
202-275-3054

Deposit account section (*Inquiries about deposit accounts.*)

ERICTAPES ERICTOOLS

HAVE A COMPUTER?

LOOK AT ERICTAPES!

The Educational Resources Information Center (ERIC) database is available on magnetic tape in a variety of options. Under special authorization from the U.S. Department of Education, these tapes are offered at unusually low cost to encourage the widest possible dissemination.

The ERIC database provides coverage of the significant literature in the field of educational resources. Report literature (announced in *Resources in Education (RIE)*) is covered from 1966 to date; journal article literature (announced in *Current Index to Journals in Education (CIJE)*) is covered from 1969. Monthly, quarterly, and annual updates are available for both *RIE* and *CIJE*, so that the files may be kept current.

The basic files are available in the ERIC Format (IBM/OS variable length records). These files include the complete resume (document description, indexing, and abstract or annotation) of each document or journal article announced, in accession number order. A variety of peripheral files,

including Postings Files (inverted subject and source indexes) and the Thesaurus (controlled indexing vocabulary) are also available on magnetic tape, and virtually any segment of the master files is obtainable on Special Order.

The files may be purchased individually or on annual subscription. The files are written on new, high quality, 9-track tapes (600, 1200, or 2400-ft., as appropriate) at either 1600 or 6250 BPI and are guaranteed. Prices per tape reel start as low as \$75.

NO COMPUTER?

LOOK AT ERICTOOLS!

For organizations without access to a computer,* ERICTOOLS provide manual access to the ERIC document collection. ERICTOOLS are a series of printed indexes, directories, and cross-reference lists, distributed internally to components of the ERIC network. The *Title Index* provides access by document title. The *Source Directory* provides access to all organizational names used in the system, i.e., corporate authors and sponsoring agencies. Cross-reference lists lead the inquirer to the accession number (ED number) from: Report Number; Contract Number; and Clearinghouse Accession Number.

ERICTOOLS are available individually and on annual subscription. Prices start from as low as \$20 for some individual documents.

* Many of these documents are also valuable tools for computer searchers.

For additional information, complete and mail the reply form or call: **ERICTAPES/ERICTOOLS, 1301 Piccard Drive, Suite 300, Rockville, Maryland 20850-4305, (301) 258-5500**

Toll-Free 800 Number Makes Education Information Accessible

ACCESS ERIC is your gateway to the Educational Resources Information Center (ERIC), a nationwide information service designed to make education literature readily accessible.

With its toll-free number, **1-800-LET-ERIC**, ACCESS ERIC makes it easy for you to locate and obtain education information. One call puts you in touch with information specialists who can answer questions about ERIC, refer you to subject-specific information sources, and provide education-related publications produced by ERIC.

Sponsored by the U.S. Department of Education, Office of Educational Research and Improvement, ERIC helps teachers, librarians, students, parents, researchers, and policymakers stay abreast of the most important developments in the education field. Through ERIC, you can access information on a wide range of subjects.

In addition, ACCESS ERIC recently introduced four reference and referral databases to guide you through the vast world of education information. These databases are also available as print directories.

- **ERIC Digests Online**--Synthesizes information for you and includes more than 470 full-text ERIC Digests (two-page summaries) on current topics in education.

- **ERIC Information Service Providers**--Lists nearly 1,000 agencies, such as libraries and information centers, that provide computerized searches of the ERIC database, have a sizable collection of ERIC microfiche, or subscribe to and collect ERIC hard-copy reference tools.

- **Education-Related Information Centers**--Helps you quickly locate agencies knowledgeable about your subject needs. Describes more than 200 resource centers that cover a broad range of education-related topics and provide user services, technical assistance, and information dissemination.

- **Education-Related Conferences**--Presents nearly 500 international, national, State, regional, and local education-related conferences covering the entire calendar year.

And, to help you stay up to date on a broad range of education-related issues, ACCESS ERIC offers free subscriptions to *The ERIC Review*. You can also order copies of *A Pocket Guide to ERIC* and other resources to help you access and use ERIC.

Gain entry to a world of education literature. For more information, call 1-800-LET-ERIC, Monday to Friday, 8:30 a.m.-5:30 p.m. (eastern time), or write:

**ACCESS ERIC
1600 Research Boulevard
Rockville, MD 20850**

MAJOR VENDORS OF ERIC ONLINE SERVICES AND CD-ROM PRODUCTS

The ERIC database is one of the most widely used bibliographic databases in the world. Users from approximately 100 countries perform an estimated half million online or CD-ROM searches a year using a variety of available commercial systems (listed below).

Users wishing to search ERIC online need a computer terminal equipped with a modem that can link by telephone with the vendor's system. Those preferring stand-alone CD-ROM systems must have a computer equipped with a CD-ROM drive.

As an alternative to acquiring your own ERIC search capability, the *Directory of ERIC Information Service Providers* (available from any ERIC component) lists approximately 1000 organizations that perform ERIC searches on demand for users.

ERIC Network Components

There are currently sixteen (16) ERIC Clearinghouses, each responsible for a major area of the field of education. Clearinghouses acquire, select, catalog, abstract, and index the documents announced in *Resources in Education* (RIE). They also prepare interpretive summaries and annotated bibliographies dealing with high interest topics and based on the documents analyzed for RIE; these information analysis products are also announced in *Resources in Education*.
